Thirst knows no season. For Soft Drinks. Coca-Cola Company. 7,490; July 22.
Williams Aqua Velva (cutout). For Face Lotion. J. B. Williams Company. 7,504; July 22.
You Men Are Alike. For Palmolive Shaving Cream. Palmolive Company. 7,501; July 22.
You wouldn't acknowledge Wedding Gifts by telephone. For Eaton's Highland Linen and Crane's Writing Papers. Eaton, Crane & Pike Company. 7,495; July 22.
You wouldn't discuss your personal affairs before servants. For Eaton's Highland Linen and Crane's Writing Papers. Eaton, Crane & Pike Company. 7,494; July 22.

CLASSIFIED LIST OF TRADE-MARK TITLES.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

CLASS 1.

Leather. C. Trautman & Company. 186,301; July 22.
Seed. W. G. Scarlett. 181,498; July 22.
Tires, etc., Asphaltic compound for. Standard Oil Company. 196,629; July 22.

CLASS 2.

Bags, Mothproof. Abraham & Straus, Inc. 197,325; July 22.
Bottles, Vacuum. George Borgfeldt & Co. 198,053; July 22.
Cosmetic containers. Elgin American Manufacturing Co. 196,010–1; July 22.
Paper cans. Union Paper Company. 197,568; July 22.
Sacks, Cotton picker. Crawford-Austin Manufacturing Co., 198,123; July 22.
Tanks, Storage. Chicago Bridge & Iron Works. 198,114; July 22.

CLASS 3.

Belt fasteners. Flexible Steel Lacing Company. 197,734–S; July 22.
Trunks and bags. R. H. Macy & Co. 197,545; July 22.

CLASS 4.

Cleaner and spot remover. R. H. McElroy, jr. 195,065; July 22.
Cleansing and washing compounds. Solvay Process Company. 194,823; July 22.
Metal polishing rouge. Zucker Sons Co. 196,844; July 22.
Soap. I. J. Anderson. 196,045; July 22.
Soap. Remmers Soap Company. 171,590; July 22.
Soap. Rome Soap Mfg. Co. 184,103; July 22.
Soaps, Toilet. Societe Commandite Chome & Cie. 196,482; July 22.

CLASS 5.

Waterproofing and seal-forming materials. Cello Products Incorporated. 182,133; July 22.

CLASS 6.

Ammonia. Old Witch Company. 197,339; July 22.
Antiseptic healing cream. Atlanta Barbers Supply Co. 196,638; July 22.
Baking powder. W. F. MacGlashan. 197,206; July 22.
Balsam, Lung. J. P. Ardelean. 197,857; July 22.
Bath preparation, Weight-reducing. San-I-Sal Laboratories Inc. 196,932; July 22.
Bedbug exterminator, etc. T. Shapiro. 179,684; July 22.
Boilers, Compound for preventing and removing scale from. E. R. Williams. 197,347; July 22.
Chemical preparation. Stevens Laboratories. 197,628; July 22.
Chemical preparation for the skin. Comfort Mfg. Co. 197,533; July 22.
Chemicals. New Brunswick Chemical Company. 195,480; July 22.
Cream, facial steams, and shampoo, etc., Face and massage. J. M. Heacock. 197,077; July 22.
Creams, Cold. Kala Company. 195,644; July 22.
Creams, scents, toilet waters, etc. Myrurgia S. A. 184,225; July 22.
Dandruff remedy. R. L. Schrader. 190,412; July 22.
Depilatory, Cream. E. I. Mitchell. 197,949; July 22.
Disinfectants. C. M. Renkert. 175,679; July 22.
Disinfectants, insecticides, etc. Vestal Chemical Company. 197,307; July 22.
Finger-nail polish, Liquid. W. E. Gordon. 178,177; July 22.
Flux for metallurgical treatment, Purifying. Superior Foundry Supply Company. 195,201; July 22.
Foot cream. F. A. Koch. 197,437; July 22.
Foot toilet waters. H. C. Stein. 182,776; July 22.
Glandular extracts for liver disease. Dr. L. Plantier. 193,726; July 22.
Hairdressing compound. Big E Laboratories. 197,797; July 22.
Hair grower, shampoo cream, and hair pressing oil. A. B. Kinkade. 197,944; July 22.
Hair tonic. Atlanta Barbers Supply Co. 196,639–41; July 22.
Hair tonic. Gilman-Bruette Co. 192,532; July 22.
Hair tonic. J. Muscolino. 197,893; July 22.
Hair tonics and face lotions. Atlanta Barber Supply Co. 196,636; July 22.
Insecticides and fungicides. Earp-Thomas Cultures Corporation. 181,063; July 22.
Laxative and bowel regulator. Graham Sanitarium, Inc. 197,481; July 22.
Laxatives. H. C. Yockey. 197,348; July 22.
Licorice paste. MacAndrews & Forbes Company. 196,919; July 22.
Liniment for horse ailments. Dr. Reed Liniment Company. 197,047; July 22.
Liquid motor fuel, Antiknock compound for. Benzo-Gas Motor Fuel Company. 196,850; July 22.
Lotion, Cleansing skin. Orchidew Corporation. 197,953; July 22.
Lyes and dram solvents. Lightnin Lye Co. 196,345; July 22.
Massage cream. Atlanta Barbers Supply Co. 196,637; July 22.
Medical preparation for impotency. Ecko Products Company. 194,265; July 22.
Medicinal compound for pyorrhea. Gold + Plus Corp. 197,536; July 22.
Medicinal preparation. J. G. Gatlin. 197,271; July 22.
Medicinal preparation for rheumatism, gout, etc. E. C. De Witt & Co. 197,421; July 22.
Medicine for itching scalp, dandruff, etc. G. S. Smyth. 197,911; July 22.
Medicine for rheumatism, etc. Saenger Drug Company. 196,351; July 22.
Mouth wash. Myrrh-Lyptol Co. 193,611; July 22.
Oil, Mineral. Standard Oil Company (New Jersey). 197,502; July 22.
Oil, Rubbing-in. P. W. Moomaw. 196,252; July 22.
Ointments, Base for. P. Beiersdorf & Co. 197,409; July 22.
Olive shampoo, witch-hazel, styptic pencils, etc. Daniel R. Makrauer Barber Supply Co. 196,667; July 22.
Perfumes. J. Lanvin. 197,604; July 22.
Perfumes, toilet waters, etc. Societe Commandite Chome & Cie. 196,483; July 22.
Pharmaceutical preparations. Coast Chemical Company. 197,362; July 22.
Powder, Complexion. F. H. Smith. 197,174; July 22.
Powder, Face. Lady Esther Co. 179,538; July 22.
Powder, liver pills, etc., Headache. Sords Pharmacy Co. 197,965; July 22.
Powder, perfumes, etc., Face. Gimbel Brothers, New York. 177,842; July 22.
Powder, Toilet. Silica Gel Products Corporation. 197,785; July 22.
Powders and toilet water, Face and talcum. Marinello Company. 186,324; July 22.
Powders, Deodorant body. Hilda Lee, Inc. 195,750; July 22.
Powders, Face. Kala Company. 195,645; July 22.
Powders, Toilet. French Cosmetic Mfg. Co. 197,269; July 22.
Preparation for driving away rats and other rodents. G. W. Hauser. 197,813; July 22.
Preparation for eczema, itch, etc. A. W. Fife. 197,592; July 22.
Preparation for hay fever and catarrh. Pom-Phona Remedy Co. 194,660; July 22.
Preparation for indigestion. S. Simon. 197,562; July 22.
Preparation for the hair and scalp. M. C. King. 168,040; July 22.
Preparation for the skin. John T. Milliken & Company. 176,562; July 22.
Preparation for the treatment of pyorrhea, etc. J. Weisberger. 197,346; July 22.
Preparation for treatment of catarrhal affections. Veritas Remedy Co. 197,972; July 22.
Radio compound or cement. Government Square Garage Company. 190,541; July 22.
Remedy for affections or disorders of the kidneys, etc., and a laxative pill. A. M. Maloney. 180,612; July 22.
Remedy for ivy poisoning. W. Ude. 196,943; July 22.
Salve. R. T. Yates. 197,057; July 22.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Salve and antipain balm, Healing. Stevens Laboratories. 197,629; July 22.
Shampoos. Beauti-Craft Co. 195,628; July 22.
Shampoos and rubbing alcohol. B. Jacobson. 196,460; July 22.
Soda ash. Solvay Process Company. 197,840; July 22.
Soldering composition. J. Laewen. 180,609; July 22.
Solvents. Carbide & Carbon Chemicals Corporation. 197,656; July 22.
Sulphur liquid compound. Pep Chemical Co. 191,280; July 22.
Tablets and a preparation for use as an antiseptic, etc., Throat. Middle West Laboratories. 195,756; July 22.
Tablets, Cold. Ukemco Corporation. 196,993; July 22.
Tablets, Headache. Ukemco Corporation. 196,994; July 22.
Toilet preparations. Plough Chemical Company. 197,291; July 22.
Toilet waters. H. C. Stein. 181,787; July 22.
Tonic for stomach disorders. William Vassel Co. 195,469; July 22.
Tonic, Stomach. E. R. Lamparter. 197,946; July 22.
Wax and washing tablets, Ironing. W. R. Hollingshead Inc. 181,689; July 22.
Welding flux preparation. E. E. Shafer. 196,767; July 22.

CLASS 9.

Matches. Diamond Match Company. 196,583; July 22.

CLASS 11.

Carbon paper. Champion Conserver Company. 189,239; July 22.
Inks, Thinning compound for printing. Senelith Ink Company. 194,880; July 22.
Typewriter ribbons. Impression Products Company. 193,924; July 22.

CLASS 12.

Asphalt. Gardiner and Lewis, Inc. 194,267; July 22.
Doors, Garage. Rowe & Giles Lumber Co. 196,973; July 22.
Floor coating, etc. A. I. Rankin. 170,448; July 22.
Lumber, Artificial. Upson Company. 141,439; July 22.
Netting. G. F. Wright Steel & Wire Company. 182,951; July 22.
Stone, Artificial. Arnold Stone, Brick & Tile Co. 195,998; July 22.
Wall board. Plastergon Wall Board Co. 195,711–3; July 22.

CLASS 13.

Broilers, Meat. Deep Drawn Metal Corporation. 197,138; July 22.
Cement wash trays, tubs, conduits, etc. Star Cement Tray Co. 192,587; July 22.
Culverts, irrigation pipe and gates, air pipe, well casings, and flumes. R. Hardesty Manufacturing Co. 197,371; July 22.
Melting pots, hand ladles, and monids, Lead. Turner & Seymour Manufacturing Co. 193,142; July 22.
Nuts, Shackle bolt. Ferry Cap & Set Screw Co. 196,799; July 22.
Sheet iron and sheet iron products. R. Hardesty Manufacturing Co. 197,372; July 22.
Tire-chain adjusters. Washburn Company. 197,636; July 22.
Tire-chain adjusters. Washburn Company. 197,641; July 22.
Washers, Lock. Washburn Company. 197,637–S; July 22.

CLASS 14.

Alloy, Metal. W. E. Atz. 195,042; July 22.
Alloy, Metallic. Standard Platinum Company. 197,690; July 22.
Cars, Carrier irons, etc., used in connection with draft mechanism for railway. American Steel Foundries. 185,777; July 22.
Castings, Metals for gold metal. Vincent J. Luongo & Company. 196,601; July 22.
Steel, Tool. Columbia Tool Steel Company 196,235; July 22.

CLASS 15.

Candles. Standard Oil Company. 197,400; July 22.
Fuel, Motor. W. J. Keenan. 196,872; July 22.
Gasoline. Federal Oil Company. 195,271; July 22.
Gasoline and blended motor fuels. General Oil Corporation. 196,913; July 22.
Gasoline and motor oils. G. W. Quinn. 186,926; July 22.
Gasoline and oils. H. C. Bellows. 194,687; July 22.
Gasoline, kerosene, etc. Factory Oil Company. 196,446; July 22.
Gasoline, kerosene, etc. Factory Oil Company. 196,450; July 22.
Gasoline, lubricating oil, cup greases. Oriental Oil Company. 195,902; July 22.
Lubricants. Pennzoil Co. 196,135; July 22.
Oil, Lubricating. Federal Oil Company. 195,270; July 22.
Oil, Lubricating. J. L. Kemp Company. 190,791; July 22.
Oils and greases, Lubricating. Fred G. Clark Company. 198,289; July 22.
Oils, greases, etc., and compounds, Lubricating. Ryt-Oyl Lubricants Company. 184,765; July 22.
Oils, Lubricating. J. Woodrow. 196,563; July 22.
Oils, Motor and lubricating. Rusk Oil Co. 196,032; July 22.
Petroleum and products of petroleum. Standard Oil Company of New York. 175,967; July 22.

CLASS 16.

Chemical, Protective liquid. Kepec Company. 181,690; July 22.
Lacquers. Standard Varnish Works. 198,092; July 22.
Oil, Linseed. William O. Goodrich Company. 195,818; July 22.
Paint and enamel remover. Aloka Chemical Corporation. 195,853; July 22.
Paint solvents, paint enamels, and varnishes. Dehco Enameling Company. 196,867; July 22.
Paints and paste paints. James B. Sipe & Company. 179,329; July 22.
Paints and varnishes. B. Buchbinder. 196,290; July 22.
Paints, paint enamels, varnish, and lacquers. Republic Varnish Company. 196,713; July 22.
Paints, Paste. James B. Sipe & Company. 179,324; July 22.
Paints, stains, varnish, etc. Gateways, Inc. 194,704; July 22.
Paints, varnishes, stains, etc. Glidden Company. 195,513; July 22.
Polish and oil, Liquid. P. C. Holt. 191,487; July 22.
Turpentine, Synthetic. James B. Sipe & Company. 179,330; July 22.
Varnish. Red Hand Compositions Company. 197,498; July 22.
Varnish. Sheratone Products Corporation. 193,545–6; July 22.
Varnish, paints, finishes. Marshall-Wells Company. 195,527; July 22.
Varnishes and paints. W. P. Fuller & Co. 190,289–90; July 22.

CLASS 17.

Cigars and cigarettes. J. E. A. Reyes. 194,947; July 22.
Tobacco, cigars, and cigarettes. Carreras Limited. 194,049; July 22.

CLASS 19.

Automobile motor vehicle and parts thereof. General Motors Corporation. 195,057; July 22.
Bicycles. Al. Ray Co. 197,293–4; July 22.
Shock absorbers. Aerobelle Company. 196,686; July 22.
Truck bodies. Heil Company. 176,472; July 22.

CLASS 21.

Amplifiers, sockets, rheostats, switches, etc. General Radio Company. 194,794; July 22.
Automobile generator. Automotive Manufacturers Outlet, Inc. 171,748; July 22.
Commutator segments, etc., Finished. Anaconda Copper Mining Company. 180,682; July 22.
Condensers, Neutralizing capacity. Chelten Electric Company. 194,785; July 22.
Condensers, Variable. T. W. Binder. 195,331; July 22.
Condensers, Variable. Chelten Electric Company. 194,786; July 22.
Dishwashing machines, Electrical. Wonder Portable Dishwasher Company. 194,832; July 22.
Electric-lighting appliances, fixtures, lamps, and parts. Ferro-Art Lighting Fixture Co. 192,249; July 22.
Electric-lighting fixtures, etc. Beverly Lights Corporation. 165,179; July 22.
Electron tubes. F. S. McCullough. 196,466; July 22.
Engines, Ignition timers for internal combustion. Blublaze Motor Specialties Corp. 195,630; July 22.
Inductance coils, Connecticut Telephone & Electric Company. 191,224; July 22.
Inductance coils, Variable. T. W. Binder. 195,330; July 22.
Lamp sockets, Incandescent-electric. Weber Electric Company. 162,224; July 22.
Lamps, Electric-arc. American Kreuger & Toll Corporation. 184,432; July 22.
Ohmer resistances. Scholes Radio and Manufacturing Corporation. 170,673; July 22.
Radiocircuits, Tuning inductances for. P. J. Kelly. 193,837; July 22.
Radio equipment. Carter Radio Company. 192,557; July 22.
Radio loud speakers. R. B. Wheelan. 194,830; July 22.
Radio outfits, devices, and accessories. Polydyne Corporation. 194,211; July 22.
Radio outfits, devices, and accessories. Polydyne Corporation. 194,213; July 22.
Radio outfits, devices, and accessories. Service Radio Corporation. 195,718; July 22.
Radio receiving sets and parts thereof. Melodyne Company. 195,755; July 22.
Radio sets. Aeolian Company. 166,123; July 22.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Radio transmitting and receiving appliances. General Radio Winding Company. 189,714; July 22.
Radio transmitting and receiving sets, coils, etc. Wave Radio Corporation. 193,741; July 22.
Telephone loud speakers. Manhattan Electrical Supply Company. 190,890; July 22.
Telephone receivers and loud talkers. Radio Industries Corporation. 196,258; July 22.
Trolley wires, cables, etc., Ears, clamps, and hangers for suspending and supporting. Ohio Brass Company. 191,565; July 22.
Vacuum cleaners and attachments. Robertson-Cataract Electric Company. 177,695; July 22.

CLASS 22.

Fishing line leaders. W. P. MacMasters. 196,962; July 22.
Game. Mah-Jongg Sales Company of America. 176,488; July 22.
Game. Simplex Metal Products Corporation. 197,342; July 22.
Game. J. M. Tees. 195,724; July 22.
Games, Educational. Selchow & Richter Company. 180,343; July 22.
Golf balls and clubs, tennis rackets and balls. B. Altman & Co. 196,044; July 22.
Skates, Ice. Nestor Johnson Mfg. Co. 197,767; July 22.
Toy. L. Neumann. 197,443–4; July 22.

CLASS 23.

Automobile engines, Gasoline-saving devices for. H. G. Schlecht. 196,678; July 22.
Can machinery. Angelus Sanitary Can Machine Company. 196,846; July 22.
Clamps. H. V. Holman. 174,448; July 22.
Crank-case drain-plug adapter. Standard Oil Company. 195,720–2; July 22.
Cream depositors, Machines for making. Rex Products Co. 197,049; July 22.
Engines, Accelerators for combustion. W. S. Schuyler. 180,502; July 22.
Grinding machines and attachments thereto. Norton Company. 190,514; July 22.
Hoists. Wright Manufacturing Company. 197,235; July 22.
Knives and forks, Kitchen and table. J. C. Raisley. 197,559; July 22.
Machines, devices, etc., for making concrete and similar material. Equipment Corporation of America. 163,386; July 22.
Mills and wood saws, Corn. New Williams Mill Company. 189,911; July 22.
Mowers, Lawn. Shapleigh Hardware Company. 185,620; July 22.
Painting and industrial surface finishing equipment, Pneumatic. Spray Engineering Company. 189,822; July 22.
Pet-cock-operating tool. W. Borth. 180,466; July 22.
Pistons. Taylor Manufacturing Company. 196,836; July 22.
Rakes, Lawn. Lindsay Chaplet & Manufacturing Company. 197,440; July 22.
Tool handles. Hartwell Brothers. 182,914; July 22.
Tractors, Hoisting attachments for. Bear Cat Hoist Company. 197,244; July 22.
Vacuum cleaners and parts thereof. G. Drescher. 198,291; July 22.
Valve tappets. John C. Hoof & Company. 186,906; July 22.
Vending machines, Coin-operated. Norris Manufacturing Co. 197,616; July 22.
Wire-blades, Pile-. Lox Seal Corporation. 197,100; July 22.

CLASS 24.

Ironing board. E. V. Sanders. 188,775; July 22.
Washboards. Columbus Washboard Company. 195,496; July 22.

CLASS 26.

Crucibles. Vesuvius Crucible Company. 180,992; July 22.
Hydrometers. Francis L. Freas Glass Works. 193,227; July 22.
Photographic films. Kosmos Photographics, Limited. 196,063; July 22.
Picture films, Motion-. Warner Brothers Pictures, Inc. 195,927; July 22.
Pictures, Motion. Fun Shop, Inc. 195,880; July 22.
Surveying instruments. New York Blue Print Paper Co. 193,115; July 22.

CLASS 27.

Clocks and parts thereof. Hamburg-Amerikanische Uhrenfabrik. 197,073; July 22.
Watchcases. A. Kamion. 197,435; July 22.
Watches, clocks, etc. Hoffman Bros., Inc. 194,921; July 22.
Watches, watchcases, watch movements and parts of same. "Liga" Watch Manufactory, Limited. 195,647; July 22.
Watches, watch movements, etc. Elder Company. 196,517; July 22.

CLASS 28.

Diamonds, Imitation. Garfield Importing Co. 193,164; July 22.
Gold and silver plated and metal-plated ware. Weidlich Bros. Mfg. Co. 187,785; July 22.
Rings, bracelets, etc., Finger. Katz & Ogush, Inc. 195,693; July 22.

CLASS 29.

Brooms. South Side Broom Co. 196,831; July 22.
Brushes. Gebroeders Jonker. 194,858–9; July 22.

CLASS 32.

Racks for holding books, newspapers, etc., Adjustable. Adjustable Rack Company. 193,748; July 22.

CLASS 34.

Boilers, Automatic gas-fired. Gas Utilities Corporation. 189,972; July 22.
Burners, Pilot-light controls and igniting devices for. Time-O-Stat Corporation. 195,924; July 22.
Heaters, Combination gas and water. Davis Engineering Corporation. 196,794; July 22.
Heaters, Gas. Ohio State Stove & Mfg. Co. 192,467; July 22.
Ovens, Bakers'. Williams Oven Mfg. Co. 174,872; July 22.

CLASS 35.

Tires and rubber tubes therefor, Vehicle. Fisk Rubber Company. 196,656; July 22.
Tires, tubes, casings, etc., Automobile. New York Auto and Radio Supply Co. 196,185; July 22.
Tires, Vehicle. Fisk Rubber Company. 196,657; July 22.

CLASS 36.

Harmonicas, Mouth. M. Hohner, Inc. 197,202–3; July 22.
Music rolls, Perforated. Har-Mel Music Publishing Company. 193,460; July 22.

CLASS 37.

Card-index system. Roneo Limited. 180,389; July 22.
Envelopes and slips of paper, Apertured. H. C. Spencer. 191,042; July 22.
Index and filing devices, Portable. D. W. Low. 196,600; July 22.
Paper. C. H. Dexter & Sons, Inc. 197,366–7; July 22.
Paper and paper napkins, Crêpe. Tissue Company. 197,692; July 22.
Paper crêpe napkins, wrapping papers, and wrapping tissue papers. Stone and Forsyth Company. 196,989; July 22.
Paper, envelopes, paper napkins, etc. Blake, Moffitt & Towne. 187,287; July 22.
Paper for skin cleaning purposes, Tissue. Continental Paper & Bag Mills Corporation. 197,416; July 22.
Paper, parchment, paper excelsior and napkins, Tissue and wax. Brooks Paper Company. 195,485; July 22.
Paper, Toilet. Austin, Nichols & Co. 180,824; July 22.
Paper, Writing. Combe Printing Co. 197,135; July 22.
Paper, Writing. Empire Paper Company. 197,139; July 22.
Papers, Wrapping and transparent. Westfield River Paper Company. 196,325; July 22.
Pens, Fountain. S. A. Harris. 195,169; July 22.
Pens, Stylographer. J. D. Snow. 197,223; July 22.

Armington, Arthur A., et al, executors. (See Wardwell, Simon W.)
Armstrong, Edward P., Portland, Oreg. Saw-sharpening machine. 1,502,085; July 22.
Arndt, Franklin E., assignor to The Gallon Iron Works & Mfg. Co., Gallon, Ohio. Stone distributor and leveler. 1,502,007; July 22.
Arnstein, Karl, assignor to the Firm: Luftschiffbau Zeppelin, Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Panel work for light structures. 1,502,227; July 22.
Arnstein, Karl, assignor to the Firm: Luftschiffbau Zeppelin, Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Wire and rope clamp. 1,502,417; July 22.
Arnstein, Karl, assignor to the Firm: Luftschiffbau Zeppelin, Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Wire and rope clamping device. 1,502,418; July 22.
Asbill, Fletcher G., Ridge Springs, S. C. Poison applier. 1,502,539; July 22.
Ascherin, Hugo J., and R. W. Loomis, East Troy, Wis. Internal-combustion engine. 1,502,609; July 22.
Attallah, Michael A., Toronto, Ontario, Canada. Oil burner. 1,502,228; July 22.
Auld, D. L., Company, The. (See Auld, Frederick H., assignor.)
Auld, D. L., Company, The. (See Brooks, Stanley G., assignor.)
Auld, Frederick H., assignor to The D. L. Auld Company, Columbus, Ohio. Automobile door handle. Des. 65,214; July 22.
Austin Manufacturing Co. (See Bentty, W. T., Davis, and Wilson, assignors.)
Austin Manufacturing Company. (See Wilson, F. D., and Burns, assignors.)
Automatic Electric Company. (See Wicks, John, assignor.)
Automatic Straight Air Brake Company. (See Neal, Spencer G., assignor.)
Autoyre Company, The. (See Mosgrove, Charles A., assignor.)
Babcock & Wilcox Company, The. (See Irish, David J., assignor.)
Bagley, Fred A., Cedar Rapids, Iowa. Tank heater. 1,502,008; July 22.
Bailey, Cameron V., New York, N. Y. Apparatus for use in sampling gas for analysis. 1,502,324; July 22.
Bailey, Frederick W. (See De Forcest, E. J. W., and Bailey.)
Baker, Phillip, Malden, Mass. Mattress-filling machine with double rotary beater. 1,502,367; July 22.
Bakke, Laurits K. O., Emmetsburg, Iowa. Carrier-operating mechanism for binders. 1,502,102; July 22.
Bal, William, Newark, N. J. Folding box. 1,501,896; July 22.
Ball, Charles F., Peoria, Ill., assignor to Research Corporation, New York, N. Y. Nonskid chain attachment for motor vehicles. 1,502,009; July 22.
Ball, Edwin, Birmingham, and C. E. Abbott, Bessemer, Ala. Mining. 1,501,936; July 22.
Bamberger Reinthal Company, The. (See Reinthal, Sol, assignor.)
Banks, Alfonso A., New York, N. Y. Toy. 1,502,010; July 22.
Bannister, Grant A., assignor of one-half to M. E. Dentler, Bridgeport, Conn. Sandwich dispenser. 1,502,325; July 22.
Bardsley, Willard W., et al., executors. (See Wardwell, Simon W.)
Baron, Charles S., Tiffin, Ohio. Jar for sugar and the like. 1,501,981; July 22.
Barr, James M. M., London, England. Calculating machine. 1,502,610; July 22.
Bart, Eugene. (See Shearer, George T., assignor.)
Bauer, John A., assignor to The Lamson Company, Boston, Mass. Carrier dispatch system. 1,502,326; July 22.
Bauer, John A., Boston, Mass., assignor to The Lamson Company, Syracuse, N. Y. Signal-actuating device for dispatch systems. 1,502,327; July 22.

Baumgartner, Joseph P., Philadelphia, Pa. Garter clasp. 1,502,011; July 22.

Beard, William M., et al., executors. (See Sayre, William H.)

Beat, William N., Cicero, Ill. Golf club. 1,502,328; July 22.

Beatty, William T., Flossmoor, F. S. Davis, Homewood, and F. D. Wilson, Harvey; said Davis and said Wilson assignors to Austin Manufacturing Co., Chicago, Ill. Double control for road-roller scraper attachments. 1,502,086; July 22.

Bebry, Percival P., assignor to The Englander Spring Bed Company, Brooklyn, N. Y. Bedivan. 1,502,329; July 22.

Bechtold, William S., Newark, N. J. Jewelry cabinet. Des. 65,215; July 22.

Beck, Charles W., assignor to Beck-Frost Corporation, Detroit, Mich. Steering wheel. 1,502,540; July 22.

Beck-Frost Corporation. (See Beck, Charles W., assignor.)

Bee, William E., assignor to Palmer-Bee Company, Detroit, Mich. Reduction gearing. 1,502,456; July 22.

Beetz, Hans B., San Francisco, Calif. Tack puller. 1,502,229; July 22.

Beggs, Thomas R., Hartford, Conn. Flushometer. 1,502,541; July 22.

Belais, David, New York, N. Y. Finger ring. Des. 65,216; July 22.

Belais, David, New York, N. Y. Finger ring. Des. 65,217; July 22.

Bell, H. G. (See Kennedy, James B., assignor.)

Bell, Joseph B. (See McCoy, Robert H., assignor.)

Benedict, Edward L., Sewickley, assignor to Pittsburgh Steel Company, Pittsburgh, Pa. Wire fabric. 1,502,012; July 22.

Benjamin, Bert R., Oak Park, assignor to International Harvester Company, Chicago, Ill. Traction wheel. 1,501,937; July 22.

Bennett, Charles B., assignor to James Clark, jr., Electric Company, Louisville, Ky. Electric tool. 1,502,169; July 22.

Bennett, John O. (See O'Connell, James R., assignor.)

Benois, Edouard P., Paris, France, assignor to Coty, Inc., New York, N. Y. Ornamental box. 1,502,013; July 22.

Bergquist, John A., Duluth, Minn. Water-heating gas plate. 1,502,170; July 22.

Bermes, John W. (See Patrick, H. E., Peterson, and Bermes.)

Bernini, Arciero, Genoa, Italy. Electroscopic apparatus for testing the genuineness of woolen and silk materials. 1,502,330; July 22.

Bertrand, Frederic E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-clamping machine. 1,502,014; July 22.

Best, Norman A., Midland, Mich. Aligning jig. 1,502,542; July 22.

Biggs, Arthur D., South Bend, Ind. Basket-cover fastener. 1,502,368; July 22.

Bishir, Marion S., Canyon, Tex. Valve-grinding device. 1,502,015; July 22.

Bishop, Alfred F., Audubon, N. J. Shrubbery clipper. 1,502,331; July 22.

Blaylock, Avery E., Little Rock, Ark. Signal system for railway cars. 1,502,419; July 22.

Bliss, E. W., Company. (See Thoma, Walter, assignor.)

Blum, Ulrich, Kiel, Germany. Periscope. 1,502,230; July 22.

Blumenthal, Sidney, & Co. (See Kozlay, Clarence V., assignor.)

Bockwitz, Andrew J., Twin Falls, Idaho. Shock absorber. 1,502,231; July 22.

Boddy, Marlett D., London, England. Marine life-saving appliance. 1,502,543; July 22.

Boedecker, Harry E., Benham, Ky. Wheeled sounding toy. 1,502,611; July 22.

Boettcher, Gallus E. (See Holl, J., and Boettcher.)

Bolling Manufacturing Company. (See Anderson, Carl E., assignor.)

Booth, Jesse, Blythedale, Mo. Poultry feeder. 1,502,171; July 22.

Booty, Stuart B., Dulwich Hill, near Sydney, New South Wales, Australia. Reproducer for talking machines. 1,502,332; July 22.

Bory, Georges H. L. G. (See Galliot, Norbert J. A., assignor.)

Boston, John, Newark, N. J., assignor, by mesne assignments, to T. H. Carter. Strip-feeding mechanism for sewing machines. 1,502,544; July 22.

Bourque, David, assignor to G. W. J. Murphy Company, Amesbury, Mass. Turnbutton fastener. 1,501,982; July 22.

Bowden, Junius A., Los Angeles, Calif., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Spring holder for attaching dust caps. 1,502,232; July 22.

Bowes, Nelson M., Saybrook, Conn. Strainer for gasoline tanks. 1,502,545; July 22.

Boye, James H., Chicago, Ill. Shelf support. 1,502,288; July 22.

Boyer, Oram A., Chester, Pa. Fluid-jet motor. 1,502,289; July 22.

Boynton, Vern K., New York, and P. W. Webster, Pelham Manor, N. Y., assignors to Perry & Webster Incorporated, Elizabeth, N. J. Masonry construction for chemical apparatus. 1,501,938; July 22.

Bradshaw, George L. (See Swindler, R. M., and Bradshaw.)

Braender, Walter P., Montclair, N. J. Automobile tire. Des. 65,218; July 22.

Braley, Charles L., assignor of one-half to C. F. Noftzger, Chicago, Ill. Marking-pin holder. 1,501,897; July 22.

Braunstein, Roger, Paris, France. Device for interfolding sheets of paper. 1,502,333; July 22.

Brecker, Max, Brooklyn, N. Y. Combined bust and skirt form. 1,502,457; July 22.

Brennan, James M., Los Angeles, Calif. Motor meter. 1,501,898; July 22.

Brindley, Charles F., Sheffield, England. Wind musical instrument. 1,502,369; July 22.

Brintzenhofe, Walter, Bluffton, Ind. Fishing-reel attachment. 1,501,939; July 22.

Brooks, Arthur H., administrator. (See Willson, Robert W.)

Brooks, Edward J., East Orange, N. J. Open-face sleeve seal. 1,502,458; July 22.

Brooks, Stanley G., assignor to The D. L. Auld Company, Columbus, Ohio. Automobile radiator cap. Des. 65,219; July 22.

Brown & Bigelow. (See Welcker, Paul H., assignor.)

Brown, Charles A. (See Colby, Vincent V., assignor.)

Brown, Edward A., Fort Worth, Tex. Ventilator. 1,501,940; July 22.

Brown, George H., Market Harborough, England. Change-speed belt gearing. 1,502,420; July 22.

Brown, Irving L., assignor to American Homes Bureau, Chicago, Ill. Badge. Des. 65,220; July 22.

Brown, Lz Adam, Alto, Mich. Pneumatic rubber tire. Des. 65,221; July 22.

Brunhoff, Edward, Cincinnati, Ohio. Display and vending apparatus. 1,501,983; July 22.

Bucher, John W. (See Akins, R. P., Bucher, and Gross.)

Buchli, Jacob, Baden, Switzerland. Combined steam and internal-combustion locomotive. 1,502,546; July 22.

Buckeye Iron & Brass Works. (See Sheppard, O., jr., and Trace, assignors.)

Buckner, Frank. (See Wells, R. L., and Buckner.)

Budd, Edward G., Manufacturing Company. (See Ledwinka, Joseph, assignor.)

Buerkle, Lewis J. (See Elliott, R. W., Johnston, and Buerkle.)

Bullard, Edwin E., Fresno, Calif. Traffic-movement indicator for vehicles. 1,502,370; July 22.

Bunns, Julius, Malden, Mass. Boot or shoe. 1,502,087; July 22.

Bunting, Norman E., Chicago, Ill., assignor to International Harvester Company. Feeding mechanism for potato planters. 1,501,941; July 22.

Burd High Compression Ring Company. (See Higgins, George H., assignor.)

Burnham, George A., Saugus, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Company. Electric switch. 1,502,640; July 22.

Burns, Leonard S. (See Wilson, F. D., and Burns.)

Buss Metal Window Company. (See Buss, Otto W. L., assignor.)

Buss, Otto W. L., assignor to Buss Metal Window Company, Minneapolis, Minn. Mason's tool. 1,502,371; July 22.

Butler Bros. (See Guenthermann, Hans, assignor.)

Byrne, John E., Plattville, Wis. Tapping machine. 1,502,016; July 22.

C. G. Spring & Bumper Company, The. (See Girl, C. and Utz, assignors.)

Capstan Glass Company. (See Kucera, Peter, assignor.)

Cady, Harrison, Brooklyn, N. Y., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box or similar article of manufacture. Des. 65,222; July 22.

Cain, John J., Bayonne, N. J. Knockdown shipping container. 1,502,334; July 22.

Callanan, James T., jr., assignor to Parkersburg Machine Company, Parkersburg, W. Va. Packer. 1,502,372; July 22.

Calvert, Robert, K. L. Dern, and G. A. Alles, Lompoc, Calif. Diatomaceous-earth product and making the same. 1,502,547; July 22.

Campbell, Harry E., New York, N. Y., assignor to Campbell Metal Window Corporation, Baltimore, Md. Slidable window sash. 1,502,644; July 22.

Campbell Metal Window Corporation. (See Campbell, Harry E., assignor.)

Campbell, Sterling H., St. Louis, Mo. Brake-shoe key. 1,502,459; July 22.

Carbery, James L., Rock Hill, S. C. Steam cooking apparatus. 1,502,172; July 22.

Carborundum Company, The. (See Tone, Frank J., assignor.)

Carlson, Robert C., Chicago, Ill. Reenforcing corner for boxes. 1,502,017; July 22.

Carman, Denslay L., Selby, S. Dak. Game. 1,501,942; July 22.

Caron Corporation. (See Daltroff, Ernest, assignor.)

Carr & Company. (See Greenwood, Rowland, assignor.)

Carrick, Gerald S., Chicago, Ill. Automatic control device. 1,502,548; July 22.

Carter, Thomas H. (See Boston, John, assignor.)

Carty, Maurice W., Boston, Mass. Apparatus for separating solid particles from a gas stream containing them. 1,502,135; July 22.

Carver, Fred S., East Orange, N. J. Filling apparatus for presses. 1,502,335; July 22.

Casale Ammonia Company. (See Casale, Luigi, assignor.)

Casale, Luigi, Rome, Italy, assignor to Casale Ammonia Company, Lugano, Switzerland. Making catalyst. 1,502,336; July 22.

Casazza, Valentino, Vineland, N. J. Brooder. 1,502,549; July 22.

Casey, Charles C., Detroit, Mich. Workholder. 1,502,613; July 22.

Cellars, Robert W., Delaware, Ohio. Garment. 1,502,614; July 22.

Central Radiator Company. (See Weiss, Charles, assignor.)

Chamberlin, Benjamin D., assignor to Eastman Kodak Company, Rochester, N. Y. Aerial camera. 1,502,173; July 22.

Chamberlain, George L., Chicago, Ill. Electrical connection. 1,502,550; July 22.

Chapman, Royal N., St. Paul, Minn. Fumigant. 1,502,174; July 22.

Chicago Pneumatic Tool Company. (See Smith, William A., assignor.)

Chilton, Roland, Keyport, N. J., assignor to Aeromarine Plane and Motor Company. Internal-combustion-engine starter. 1,502,018; July 22.

Christensen, Carl V. J., et al., executors. (See Wardwell, Simon W.)

Christy, Russ J., Fremont, Ohio. Skin smoothing and stretching device for safety razors. 1,502,615; July 22.

Church, Harold D., Fairfield, Conn., assignor, by mesne assignments, to Locomobile Company of America, Incorporated, New York, N. Y. Vehicle spring suspension. 1,502,616; July 22.

Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)

Cincinnati Planer Company, The. (See Glosh, Frederick P., assignor.)

Citizens of the United States of America. (See Paine, H. S., and Hamilton, assignors.)

Clapham, Charles F., Newport News, Va. High-speed reduction gearing. 1,502,175; July 22.

Clark, A. C., & Company. (See Crane, Robert G., assignor.)

Clark, A. C., & Company. (See Hanberg, John V., assignor.)

Clark, George H., Brooklyn, N. Y., assignor to Radio Corporation of America. Radio signaling apparatus. 1,502,460; July 22.

Clark, James, jr., Electric Company. (See Bennett, Charles B., assignor.)

Clauss, Max O., New York, N. Y. Tubular-band-making machine. 1,502,134; July 22.

Clayton & Lambert Manufacturing Company. (See Groehn, Otto J., assignor.)

Clear, Charles J., and G. M. Webber, Portland, Oreg. Exhaust box. 1,502,019; July 22.

Cleveland Rock Drill Company, The. (See Nell, Gustave M., assignor.)

Cline, William, Lancaster, Pa. Reflector. 1,502,617; July 22.

Coffee Products Corporation. (See Wimmer, Karl H., assignor.)

Colby, Vincent V., Chicago, assignor to C. A. Brown, Hinsdale, Ill. Cutting and sawing device. 1,502,088; July 22.

Coleman, Clyde W., Lincoln, Nebr. Oil-strainer heater. 1,502,290; July 22.

Compagnie des Forges & Acieres de la Marine & d'Homecourt. (See Rimailho, Emile, assignor.)

Condit Electrical Manufacturing Company. (See Burnham, George A., assignor.)

Conger, Samuel, Indianapolis, Ind. Musical instrument. Des. 65,223; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,224; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,225; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,226; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,227; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,228; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,229; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,230; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,231; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,232; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,233; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,234; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,235; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,236; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,237; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,238; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,239; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,240; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,241; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,242; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,243; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,244; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,245; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box cover or similar article of manufacture. Des. 65,246; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Tray or similar article of manufacture. Des. 65,247; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box or similar article of manufacture. Des. 65,248; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box or similar article of manufacture. Des. 65,249; July 22.

Connor, Martha H., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Box or similar article of manufacture. Des. 65,250; July 22.

Conrad, Henry S., trustee. (See Lundquist, Frank A., assignor.)

Conti, John D., Philadelphia, Pa. Sheet-turning device. 1,502,176; July 22.

Conway, George F., Tenafly, N. J. Valve for motors. 1,502,291; July 22.

Cook, Willard C., Clovis, Calif. Fruit basket. Des. 65,251; July 22.

Cooper, Abraham, Brooklyn, N. Y. Lighting-fixture ring. 1,502,461; July 22.

Cooper, Hugh S., Cleveland, Ohio, assignor to Kemet Laboratories Company, Inc. Enamel opacifying composition and making the same. 1,502,421; July 22.

Cooper, Hugh S., Cleveland, Ohio, assignor to Kemet Laboratories Company, Inc. Zirconium-containing composition and making the same. 1,502,422; July 22.

Corbett, Matt Q., W. E. Huffman, and C. F. Adams, Dayton, Ohio. Captive balloon. 1,502,551; July 22.

Cossitt, Malcolm L., Oakland, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding attachment for typewriters. 1,502,177; July 22.

Cossitt, Malcolm L., Oakland, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev. Manifolding platen for typewriters. 1,502,178; July 22.

Coty, Inc. (See Benois, Edouard P., assignor.)

Cox, Charles P., Toledo, Ohio. Kitchen implement. 1,502,497; July 22.

Cozine, Benjamin H., Louisville, Ky. Automobile curtain and top. 1,502,423; July 22.

Crane, Robert G., assignor to A. C. Clark & Company, Chicago, Ill. Dental appliance. 1,502,292; July 22.

Creveling, John L., White Plains, N. Y., assignor to Gould Coupler Company. Electric regulation. 1,502,373; July 22.

Creveling, John L., Tucson, Ariz., assignor to Gould Coupler Company. Electric regulation. 1,502,374; July 22.

Crofut & Knapp Company, The. (See Josephs, Abraham, assignor.)

Crompton & Knowles Loom Works. (See Turner, Richard G., assignor.)

Crompton, Randolph. (See Rankin, W. H., and Marsh, assignors.)

Crone, Seth A., East Orange, N. J. Strut for railway brake beams. 1,501,899; July 22.

Crowell, Erd V., Tulsa, Okla. Apparatus for and method of cementing oil-well casings. 1,502,179; July 22.

Crum, Roland R., Whittier, Calif. Casing perforator. 1,502,375; July 22.

Curti, Ernesto, Milan, Italy. Pneumatic hammer. 1,502,233; July 22.

Curtis, Harry F., Philadelphia, Pa. Apparatus for cleaning gravel and the like. 1,502,462; July 22.

Dahl, John L., Teaneck, and R. H. Frech, Bogota, N. J., assignors to The Electrisan Corporation, Philadelphia, Pa. Cleaner for tumblers or the like. 1,502,441; July 22.

Dahlberg, C. F. (See Munroe, Treadway B., assignor.)

Dahlberg, C. F. (See Shaw, John K., assignor.)

Daimler, Paul, Cannstatt, assignor to the Firm Daimler-Motoren-Gesellschaft, Unterturkheim, Germany. Toothed wheel-driving mechanism for motor vehicles. 1,502,089; July 22.

Daimler, Paul, Cannstatt, assignor to the Firm Daimler-Motoren-Gesellschaft, Unterturkheim, Germany. Running gear for motor cars. 1,502,090; July 22.

Daimler-Motoren-Gesellschaft. (See Daimler, Paul, assignor.)

Dake, Charles W., assignor to The Pyle-National Company, Chicago, Ill. Glass-polishing machine. 1,502,136; July 22.

Daltroff, Ernest, Paris, France, assignor to Caron Corporation, New York, N. Y. Bot. Des. 65,252; July 22.

Damm, Arvid G., Ronninge, Sweden. Production of ciphers. 1,502,376; July 22.

Danielson, Frank, Chicago, Ill. Motor stand. 1,502,293; July 22.

Danziger, Jacob C., assignor to Detroit Motor Castings Company, Detroit, Mich. Steering wheel. 1,502,020; July 22.

Davies, Frank P., Rock Island, Ill. Dental flask press. 1,502,377; July 22.

Davis, Charles E., assignor to Handy Auto Bed Company, Inc., Bend, Oreg. Folding bed for automobiles. 1,502,498; July 22.

Davis, Frank S. (See Beatty, W. T., Davis, and Wilson.)

Davis, Glen L., San Francisco, Calif. Oil and water circulating system for explosive engines. 1,502,234; July 22.

Dayton Engineering Laboratories Company, The. (See Elliott, R. W., Johnston, and Buerkle, assignors.)

Dearborn Equipment Company. (See Patrick, H. E., Peterson, and Bermes, assignors.)

Deck, Theodore J., Baltimore, Md. Toy arrow. 1,502,499; July 22.

Dedi, Arthur L., Oak Park, Ill. Arm for lighting fixtures. Des. 65,253; July 22.

Dedi, Arthur L., Oak Park, Ill. Arm for lighting fixtures. Des. 65,254; July 22.

De Foreest, Earl J. W., and F. W. Bailey, Tulsa, Okla. Identification tag. 1,502,137; July 22.

De Francisci, Joseph, Brooklyn, N. Y. Macaroni press. 1,502,021; July 22.

De Kermor Electric Heating Company Limited. (See De Kermor, Louis G., assignor.)

De Kermor, Louis G., assignor to De Kermor Electric Heating Company Limited, Edmonton, Alberta, Canada. Regulation of heat generated by electricity. 1,502,294; July 22.

De Kermor, Louis G., assignor to De Kermor Electric Heating Company Limited, Edmonton, Alberta, Canada. Self-regulating water heater. 1,502,295; July 22.

Denison, Frederick S., assignor to Minneapolis Heat Regulator Co., Minneapolis, Minn. Switch mechanism. 1,501,943; July 22.

Dentler, Mary E. (See Bannister, Grant A., assignor.)

Dern, Karl L. (See Calvert, R., Dern, and Alles.)

Detroit Motor Castings Company. (See Danzinger, Jacob C., assignor.)

Deutsche Hollerith Maschinen Gesellschaft m. b. H. (See Tolle, Heinrich, assignor.)

Dever, Walter H., jr., Houston, Tex. Tool holder for automobiles. 1,502,180; July 22.

De Vries, Siebren G., Grand Rapids, Mich. Watch and clock. 1,502,235; July 22.

Dexter, Lucien A., Grand Rapids, Mich. Latch construction. 1,502,022; July 22.

Dickinson, Joseph H., Larchmont, N. Y., assignor to The Aeolian Company. Player piano and the like. 1,502,618; July 22.

Dinhofer, Harry, New York, N. Y. Finger ring. Des. 65,255; July 22.

Disbro, Roger W., Cleveland Heights, assignor to The W. S. Tyler Co., Cleveland, Ohio. Metallic door. 1,502,091; July 22.

Djörup, Frants, Chicago, Ill. Composition floors. 1,502,645; July 22.

Doak, James S., Glenn, Calif. Fluid-current motor. 1,502,296; July 22.

Dodge, Edward W., Portland, Me. Statuette. Des. 65,256; July 22.

Dodge, Raymond E. (See Newman, S. J., and Dodge.)

Dondo, Mathurin M., New York, N. Y. Marionette. 1,502,236; July 22.

Donnallan, Martin R., Long Beach, Calif. Pump screen. 1,502,552; July 22.

Doob, Mork M., New York, N. Y. Baseball game board. 1,502,619; July 22.

Doody, John E., Toronto, Ontario, Canada, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,501,900; July 22.

Doughty, George E., New York, N. Y. Hat-tree. 1,502,297; July 22.

Dowd-Rodgers Company. (See Schemker, Francis, assignor.)

Dozier, Joe F., assignor of one-half to J. T. Jolley, Nashville, Tenn. Apparatus for testing and repairing radiators. 1,502,553; July 22.

Dreis, Herman C., near San Jose, Calif. Carburetor. 1,502,378; July 22.

Drescher, Max G., San Francisco, Calif. Truck. 1,502,237; July 22.

Dreyer, Friedrich. (See Oertel, R., and Dreyer.)

Dreyfus, Henry, London, England. Manufacture of cellulose derivatives. 1,502,379; July 22.

Duckworth, Charles W., Jacksonville, Fla. Vaporizer. 1,502,554; July 22.

Dufresne, Joseph A., Montreal, Quebec, Canada. Lock. 1,502,238; July 22.

Duncan, James H., and S. Rogow, New York, N. Y. Concrete form. 1,502,092; July 22.

Dunn, Felix E., and J. E. Patterson, Klamath Falls, Oreg. Land leveler and grader. 1,502,138; July 22.

Dunston, Wayne E. (See Girl, C., and Dunston.)

Dunsworth, George W., Houston, Tex. Drill bit. 1,502,463; July 22.

Du Pont, E. I., de Nemours & Company. (See Hedin, Erling A., assignor.)

Dyer, Frank L., Montclair, N. J. Measuring device for collapsible tubes. 1,502,298; July 22.

Earnshaw, Henry P. J., Berlin, Mass. Automobile lighting system. 1,502,424; July 22.

Eastman Kodak Company. (See Chamberlin, Benjamin D., assignor.)

Eastwood Wire Manufacturing Company. (See Joule, Joseph, assignor.)

Edgar, Frank M., assignor to Ternstedt Manufacturing Company, Detroit, Mich. Punch-press guard. 1,502,023; July 22.

Edwards, Alonzo L., assignor to Wheeling Stamping Company, Wheeling, W. Va. Device for removing deformities in collapsible metal tubes. 1,502,299; July 22.

Ehrhart, Raymond N., Jeannette, Pa., assignor, by mesne assignments, to Westinghouse Gear and Dynamometer Company. Reduction gearing. 1,502,239; July 22.

Eklund, Oskar A., Stockholm, Sweden. Locking device. 1,502,555; July 22.

Eiben, Michael A., Cleveland, Ohio. Screen for dust collectors. 1,501,984; July 22.

Eiseman, Kaye Company. (See Eiseman, Nathan, assignor.)

Eiseman, Nathan, assignor to Eiseman, Kaye Company, Chicago, Ill. Key case. 1,502,380; July 22.

Electric Machinery Manufacturing Company. (See Hibbard, Charles T., assignor.)

Electric Water Sterilizer & Ozone Company. (See Hartman, Frank E., and H. B., assignors.)

Electrisan Corporation, The. (See Dahl, J. L., and Frech, assignors.)

Elliott, Robert W., W. A. Johnston, and L. J. Buerkle, assignors to The Dayton Engineering Laboratories Company, Dayton, Ohio. Brush holder. 1,502,139; July 22.

Ely, Bernard M., Troy, Ohio. Grinding apparatus. 1,502,024; July 22.

Embury Manufacturing Company. (See Embury, William C., assignor.)

Embury, William C., assignor to Embury Manufacturing Company, Warsaw, N. Y. Lantern. Des. 65,257; July 22.

Englander Spring Bed Company, The. (See Bebry, Percival P., assignor.)

Equipment Specialties Company, The. (See Gillies, William R., assignor.)

Ermey, Thomas R., et al. (See Hanna, Frank L., assignor.)

Evans, Evan, Los Angeles, Calif. Metal building corner. 1,501,985; July 22.

Evans, Robert H., Detroit, Mich. Hardening alloy for bearing metals and using same. 1,502,425; July 22.

Evans, William L., jr., Washington, Ind. Building construction. 1,501,986; July 22.

Evinrude Motor Company. (See Meyer, Christopher J., assignor.)

Evinrude Motor Company. (See Mould, James A., assignor.)

Fairchild, Walter H., Chicago, Ill. Golf bag. 1,502,300; July 22.

Faircloth, Grady E., and W. M. Moseley, Port Arthur, Tex., assignors to The Texas Company, New York, N. Y. Portable attachment for conveyers. 1,502,093; July 22.

Fedders, John M., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Radiator. 1,502,301; July 22.

Fedders Manufacturing Company. (See Fedders, John M., assignor.)

Ferguson, Angus, et al. (See Graham, David M., assignor.)

Ferris, Walter. (See Magie, W. E., and Ferris.)

Fiber Specialty Company. (See Morris, Edward K., assignor.)

Fickes, Isaac N., York, Pa. Corn harvester. 1,502,025; July 22.

Field, Charles H., Providence, R. I. Engraving machine. 1,502,381; July 22.

Fielder, Reuben E., New York, N. Y. Motor vehicle. 1,502,026; July 22.

Fine, Harry, Hartford, Conn. Self-weighing scoop. 1,502,181; July 22.

Fishback, F. M. (See Loy, James W., assignor.)

Fisher, David, Paden City, W. Va. Combination match and ash tray. Des. 65,259; July 22.

Fisk Rubber Company, The. (See Pratt, Benjamin H., assignor.)

Fleisher, Henry, Gambrills, Md. Poison indicator. 1,502,620; July 22.

Flostik Company. (See MacDonald, Frederick L., assignor.)

Flowers, Henry F., Findlay, Ohio. Dump car. 1,502,302; July 22.

Floyd, George G., Riverside, Ill. Fountain lather brush. 1,502,464; July 22.

Folkerts, Hayo, Aachen, Germany. Converter. 1,502,621; July 22.

Ford, Albert C., Chicago, Ill. Advertising sign. Des. 65,258; July 22.

Ford, Henry, Dearborn, Mich. Locomotive power plant. 1,502,240; July 22.

Ford, Henry, Dearborn, Mich. Railway-car truck. 1,502,241; July 22.

Ford, Ralph L., Chicago, Ill., assignor to International Harvester Company. Fertilizer attachment for planters. 1,501,944; July 22.

Forrest, Rolland, Philadelphia, Pa. Awning. 1,502,182; July 22.

Forsyth, William H., Philadelphia, Pa. Prospecting or well-drilling device. 1,502,622; July 22.

Fowler, Fred D., assignor to Hood Rubber Company, Watertown, Mass. Manufacturing cushion tires. 1,502,027; July 22.

Fox, Charles H., Bakersfield, Calif. Pump. 1,501,987; July 22.

France, Edward E., Racine, Wis. Game. 1,502,183; July 22.

Franklin, George A., Augusta, Ga. Cloth-feed interrupter for automatic looms. 1,502,556; July 22.

Frech, Robert H. (See Dahl, J. L., and Frech.)

Fredrickson, Ernest W., Kinbrae, Minn. Attachment for door-lock escutcheons. 1,501,988; July 22.

Freeble, Benjamin F., Jamaica, N. Y., assignor to Sewickley Electric Manufacturing Company, Sewickley, Pa. Ash tray or similar article. Des. 65,261; July 22.

French, Earl, Vancouver, British Columbia, Canada. Holder for milk bottles and the like and making same. 1,502,242; July 22.

Fridrichsen, Peter C. C., Independence, Mo. Mounting-board shaking box and bearing therefor. 1,502,557; July 22.

Frismuth, Harriet W., New York, N. Y. Statuette. Des. 65,260; July 22.

Fritz, John, New Bedford, Mass. Paper clip. 1,502,623; July 22.

Fry, Thornton C., Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. System for determining the direction of propagation of wave energy. 1,502,243; July 22.

Fuquay, Felix R., Durham, N. C. Dispensing apparatus. 1,502,028; July 22.

Gabke, John S., Wilmington, Del. Steering device for pedacycles. 1,502,303; July 22.

Gabrielson, Carl, assignor, by mesne assignments, to Meldrum-Gabrielson Corporation, Syracuse, N. Y. Adjustable arbor support for milling machines. 1,502,624; July 22.

Gaines, John T., Indianapolis, Ind. Art stand lamp. 1,502,304; July 22.

Galion Iron Works & Mfg. Co., The. (See Arndt, Franklin E., assignor.)

Gallagher, Daniel A., Cleveland Heights, Ohio. Cigar-display device and clamp for assembling the same. 1,502,094; July 22.

Galliot, Norbert J. A., Vaucresson, assignor of one-half to G. H. L. G. Bory, Paris, France. Recoil-absorbing means for firearms. 1,502,558; July 22.

Garden, Alexander T., Augusta, Kans. Steam-diaphragm regulator. 1,502,426; July 22.

Garrett, Samuel H., Philadelphia, Pa. Can opener. 1,502,465; July 22.

Gartside, John E., York, Pa. Machine for trimming sheet material. 1,502,095; July 22.

Gatchell, George S., Roselle Park, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Presser foot for sewing machine. 1,501,901; July 22.

Gates, Leroy G. (See Scharpenberg, C. C., and Gates.)

Gaunt, Charles F., Birmingham, England. Ash tray. Des. 65,262; July 22.

General Automatic Scale Company, The. (See Schaper, Henry C., assignor.)

General Electric Company. (See Steenstrup, Christian, assignor.)

General Fire Extinguisher Company. (See Loepsinger, Albert J., assignor.)

General Railway Signal Company. (See Leake, Richard C., assignor.)

Gerrard, Alec J., and P. Wright, Chicago, Ill. Wire bale tie. 1,502,625; July 22.

Gerrard, Alec J., and P. Wright, Chicago, Ill. Twisted knot for securing shipping packages. 1,502,029; July 22.

Getty, Fred I., Jennings, La. Well tool. 1,502,427; July 22.

Getty, Fred I., Jennings, La. Whipstock for wells. 1,502,428; July 22.

Giblin, Patrick J., La Crosse, Wis. Footwear 1,502,559; July 22.

Giese, Henry, Ames, Iowa. Ironing board. 1,501,989; July 22.

Gillen, Joseph, Flushing, N. Y. Combined curb box and automatic gas cut-off. 1,502,466; July 22.

Gillet, Alexis F., assignor to Jubilee Manufacturing Company, Omaha, Nebr. Oil-level-indicating attachment for crank cases. 1,501,990; July 22.

Gillies, William R., assignor to The Equipment Specialties Company, Chicago, Ill. Drain trap. 1,502,184; July 22.

Gillinder Brothers. (See Gillinder, Edwin B., assignor.)

Gillinder, Edwin B., assignor to Gillinder Brothers, Port Jervis, N. Y. Lighting globe. Des. 65,263; July 22.

Gilmore, Lou S., El Reno, Okla. Tourist's kitchenette or cabinet. 1,502,096; July 22.

Girl, Christian, Detroit, Mich. Automobile bumper. Des. 65,266; July 22.

Girl, Christian, Detroit, Mich. Automobile bumper. Des. 65,267; July 22.

Girl, Christian, Detroit, Mich. Automobile bumper. Des. 65,268; July 22.

Girl, Christian, Detroit, Mich. Automobile bumper. Des. 65,269; July 22.

Girl, Christian, and W. E. Dunston, assignors to The C. G. Spring Company, Detroit, Mich. Automobile bumper. Des. 65,264; July 22.

Girl, Christian, and W. E. Dunston, assignors to The C. G. Spring Company, Detroit, Mich. Automobile bumper. Des. 65,265; July 22.

Girl, Christian, Kalamazoo, and J. G. Utz, Detroit, Mich., assignors to The C. G. Spring & Bumper Company, Detroit, Mich. Bumper. 1,502,305; July 22.

Giudice, Frank, New York, N. Y. Fire escape. 1,501,991; July 22.

Glaskey, Warren E., Bridgeton, N. J., assignor to Spring Stopper Company, New York, N. Y. Machine for making bottles, etc. 1,502,560; July 22.

Glaskey, Warren E., Bridgeton, N. J., assignor to Spring Stopper Company, New York, N. Y. Machine for making bottles, etc. 1,502,561; July 22.

Glosh, Frederick P., Cincinnati, assignor to The Cincinnati Planer Company, Oakley, Cincinnati, Ohio. Automatic screw machine. 1,502,467; July 22.

Godfrey, Alfred, Wood Green, London, England. Jet-cutting machine. 1,501,902; July 22.

Goering, Ernest H., Duluth, Minn. Dental bridge. 1,501,992; July 22.

Goerz Photochemische Werke G. m. b. H. (See Oertel, R., and Dreyer, assignors.)

Goodbody, Edmund M., assignor to Intertype Corporation, Brooklyn, N. Y. Typographical machine. 1,502,626; July 22.

Goodney, Samuel J., Crystal Falls, Mich. Mining soft ore. 1,502,030; July 22.

Goodnow, Theodore H., Oak Park, and W. S. Schroeder, Chicago, Ill. Release rigging. 1,502,306; July 22.

Gordon, William, Union, N. J. Wrench. 1,501,903; July 22.

Gore, Robert J. K., assignor of one-half to W. J. Grandchamp, Detroit, Mich. Engine. 1,502,244; July 22.

Goshen Manufacturing Company, The. (See Weaver, Earl L., assignor.)

Gould Coupler Company. (See Creveling, John L., assignor.)

Grace, Emanuel J., Erie, Pa. Rim-punching machine. 1,502,097; July 22.

Graham, David M., Juanita, assignor of one-half to A. Ferguson and A. H. Wentland, Bordulac, N. Dak. Feeder for thrashing machines and the like. 1,501,993; July 22.

Grandchamp, William J. (See Gore, Robert J. K., assignor.)

Gray, Harold, Newark, N. J. Visitor's information bureau. 1,502,185; July 22.

Gray, Robert E., Snoqualmie Falls, Wash. Cross arm. 1,502,031; July 22.

Grayson, J. H., Manufacturing Company, The. (See Grayson, John H., assignor.)

Grayson, John H., assignor to The J. H. Grayson Manufacturing Company, Athens, Ohio. Gas heater. Des. 65,270; July 22.

Greenpoint Metallic Bed Company. (See Lies, William, assignor.)

Greenwood, Rowland, assignor of one-half to Carr & Company Limited, Carlisle, England. Apparatus for baking or drying substances at high temperatures and for subsequently cooling same. 1,502,186; July 22.

Green, William A., Toronto, Ontario, Canada. Holder. 1,502,245; July 22.

Greif, L., & Bro. Incorporated. (See Waxman, Samuel B., assignor.)

Greist Manufacturing Company, The. (See Lent, W. F., and Hinman, assignors.)

Greve, Edgar E., Bellevue, Pa. Drill or grief stem for rotary drilling machines. 1,501,994; July 22.

Greve, Edgar E., Bellevue, Pa. Lubricating device for reversing clutch mechanism. 1,501,995; July 22.

Grieves, Albert, Springfield, Ohio, assignor to International Harvester Company. Block-setting mechanism for baling presses. 1,501,945; July 22.

Grigsby-Grunow-Hinds Co. (See Grigsby, Owen E., assignor.)

Grigsby, Owen E., Park Ridge, assignor to Grigsby-Grunow-Hinds Co., Chicago, Ill. Weather shield and glare visor. 1,502,382; July 22.
Grimes, Charles P., Syracuse, N. Y. Primer construction. 1,502,098; July 22.
Grob, William C., assignor of one-half to G. B. Storer, jr., Toledo, Ohio. Window-control means. 1,502,468; July 22.
Groehn, Otto J., assignor to Clayton & Lambert Manufacturing Company, Detroit, Mich. Oil burner. 1,502,469; July 22.
Grooms, George F., Sabinal, Tex. Vehicle for transporting poles. 1,501,996; July 22.
Grouros, John W., Bronx, N. Y. Sprinkler head. 1,502,187; July 22.
Gross, Frederick D. (See Akins, R. P., Bucher, and Gross.)
Grueneich, Nathaniel, Long Lake, S. Dak. Dirigible headlight construction for motor vehicles. 1,502,500; July 22.
Gscheidlen, Wilhelm. (See Reichel, W., and Gscheidlen.)
Guenthermann, Hans, Mount Vernon, assignor to Butler Bros., New York, N. Y. Plate or similar article. Des. 65,271; July 22.
Guerrini, Pietro, and L. Zaccaria, Nokomis, Ill. Support for drills. 1,502,383; July 22.
Gumowski, Antoni, Camden, N. J. Waterproof brick. 1,502,501; July 22.
Haddox, Clifford M., Charleston, W. Va. Shoe tongue. 1,502,429; July 22.
Hagopian, Simon, Petaluma, Calif. Plant puller. 1,502,246; July 22.
Hall, Claude H., and G. Knudsen, Baltimore, Md. Process and machine for creasing. 1,502,032; July 22.
Hall, John H. (See Jordan, R. D., and Hall.)
Hall, Wesley F., Matawan, N. J., assignor to A. P. Munning & Co., New York, N. Y. Electroplating apparatus. 1,501,946; July 22.
Hamilton, John. (See Paine, H. S., and Hamilton.)
Hammond, Edward W., New York, N. Y. Blade holder. 1,502,627; July 22.
Hampton, James G., Lafontaine, Kans. Water-supply system. 1,501,997; July 22.
Hanberg, John V., Chicago, Ill., assignor to A. C. Clark & Company, Chicago, Ill. Dental appliance. 1,502,247; July 22.
Hanchette, Rex J. (See Hershey, W. C., and Hanchette.)
Handy Auto Bed Company. (See Davis, Charles E., assignor.)
Hanford, Harry C., and M. H. Lang, Minneapolis, Minn. Radio mast seat. 1,501,998; July 22.
Hanna, Frank L., assignor of forty-five one-hundredths to F. L. Hanna, forty one-hundredths to F. E. Mallonee, and fifteen one-hundredths to T. R. Ermey, Wichita, Kans. Hinged spider. 1,502,628; July 22.
Hanna, Frank L., et al. (See Hanna, Frank L., assignor.)
Hanson, Ole C., Hopkins, Minn. Beet-topping machine. 1,502,384; July 22.
Hanson, Ole E., Poulsbo, Wash. Drawbar attachment for Fordson tractors. 1,502,033; July 22.
Hardy Brothers (Alnwick) Limited. (See Hardy, Laurence R., assignor.)
Hardy, Laurence R., assignor to Hardy Brothers (Alnwick) Limited, Alnwick, England. Portable stool. 1,502,629; July 22.
Hargrave, Allen C., assignor of one-tenth to E. Samson, Anna, Ill. Demountable rim. 1,502,630; July 22.
Harrington, Norman T., Cleveland, Ohio. Loading and unloading apparatus. 1,501,999; July 22.
Harris, Barnett W., assignor to Utilities Development Corporation, Chicago, Ill. Apparatus for developing photographs. 1,501,904; July 22.
Hart, Ira B., assignor, by mesne assignments, to St. Louis Pump and Equipment Company, St. Louis, Mo. Pump. 1,502,470; July 22.
Hart, Milo O., Euclid, assignor to The Pompeian Company, Cleveland, Ohio. Vanity case. 1,502,034; July 22.
Hart, William E., near San Jose, Calif. Vacuum fuel-feed tank. 1,502,631; July 22.
Harter, Charles, St. Louis, Mo. Door stop for end-door automobile freight cars. 1,502,307; July 22.
Hartford, Edward V., Inc. (See Waterman, Arthur, assignor.)
Hartman, Frank E., and H. B. Hartman, assignors to Electric Water Sterilizer & Ozone Company, Scottdale, Pa. Softening water. 1,502,188; July 22.
Hartman, Harry B. (See Hartman, Frank E. and H. B.)
Hasenclever, Peter, Hamburg-Billwarder, Germany. Preparing crystals of chrome alum. 1,502,035; July 22.
Hasley, Thomas R., Menominee, Mich. Wheel. 1,502,632; July 22.
Hass, Clarence E., and W. R. James, Chicago, Ill. Coaster wagon. 1,502,337; July 22.
Hassler, Robert H. (See Meggenhofen, Charles W., assignor.)
Hatch, Albert E., Wakonda, S. Dak. Game apparatus. 1,502,189; July 22.
Hauenstein, John, Kansas City, Mo. Flash-light support. 1,502,385; July 22.
Haupenthal, John R. (See Wilson, Bertram E., assignor.)
Hausrath, Herbert, Durlach, near Karlsruhe, assignor to the Firm of Schott & Gen., Jena, Germany. Thermopile and its manufacture. 1,502,562; July 22.
Hawes, Austin W., Greenfield, assignor to John Russell Cutlery Company, Turners Falls, Mass. Making table cutlery. 1,502,502; July 22.
Hawley, Ernest P., Nashville, Tenn. Card-display stand. 1,502,248; July 22.
Hayes, Fay C., Altamont, N. Y. Snowplow. 1,502,430; July 22.
Hazelton, Carl J., assignor to American Narrow Fabric Company, Worcester, Mass. Hose-supporter button. Re15,877; July 22.
Heath, Frederick, Bellingham, Wash. Steam-boiler plant. 1,502,564; July 22.
Heath, Wilfred P., Chicago, Ill. Bread making. 1,502,563; July 22.
Hedin, Erling A., Upper Darby, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Dynamite cartridge. 1,502,646; July 22.
Heerdt, Walter, Frankfort-on-the-Main, Germany. Insecticide. 1,502,190; July 22.
Heidbrink, Jay A., Minneapolis, Minn. Anæsthetic apparatus. Re15,873; July 22.
Heidbrink, Jay A., Minneapolis, Minn. Apparatus for delivering a mixture of gases. Re15,874; July 22.
Heilhecker, Eugene C., Bristol, R. I., assignor to National India Rubber Company. Heel construction for footwear. 1,502,036; July 22.
Heimann, Albert, New York, N. Y. Casing for a combined weighing and advertising machine. Des. 65,272; July 22.
Helwig, John, St. Paul, Minn. Metal-pressing tool. 1,502,191; July 22.
Helwig, John, St. Paul, Minn. Wrench and manufacturing the same. 1,502,192; July 22.
Hemphill Company. (See Jones, Frank E., assignor.)
Heppe, Florence J., Philadelphia, Pa. Musical instrument. 1,502,565; July 22.
Herrick, Una B., Bozeman, Mont. Brassière. 1,502,000; July 22.
Hershey, William C., and R. J. Hanchette, McAllester, Okla. Headlight-switch-operating device for motor vehicles. 1,502,193; July 22.
Hewitt, Edward R., Midvale, N. J., and A. H. Leipert, College Point, assignors to International Motor Company, New York, N. Y. Steel wheel. 1,502,308; July 22.
Hibbard, Charles T., assignor to Electric Machinery Manufacturing Company, Minneapolis, Minn. Coil support. 1,502,194; July 22.
Hicks, George C., jr., St. Louis, Mo., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Pump. 1,502,195; July 22.
Hicks, George C., jr., St. Louis, Mo., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Pump. 1,502,196; July 22.
Higgins, George H., assignor to Burd High Compression Ring Company, Rockford, Ill. Ring-grinding machine. 1,502,099; July 22.
Hill, David, Leicester, England. Heel for boots and shoes. Des. 65,273; July 22.
Hill, Edgar R., Oak Park, Ill. Ironing machine. 1,502,566; July 22.
Hill, Elmer L., Rapelje, Mont. Chain fastener. 1,502,386; July 22.
Hill, George D., Norfolk, Va. Shade, curtain, or awning roller stop. 1,502,197; July 22.
Hill, George E., Pittsburgh, and R. R. Williams, Glenshaw, Pa. Cutting tool. 1,501,948; July 22.
Hill, Harry W., West Hanover, Mass. Detonating toy. 1,502,198; July 22.
Hillman, Frederick M., Indianapolis, Ind. Printer's gauge. 1,501,947; July 22.
Hinman, George L. (See Lent, W. F., and Hinman.)
Hlavacek, Emil, Two Rivers, Wis. Disappearing dimmer. 1,502,471; July 22.
Hobart, Frank, Marseilles, Ill. Fencepost base. 1,501,949; July 22.
Hodgkinkinson, Francis, Edgewood, Pa., assignor to Westinghouse Gear & Dynamometer Company. Floating frame. 1,502,199; July 22.
Hoerr, Louis A., assignor to Railway Devices Company, St. Louis, Mo. Angle-cock holder. 1,502,472; July 22.
Holl, John, and G. E. Boettcher, Richardson, N. Dak. Portable electric lamp. 1,502,338; July 22.
Hollrigl, Joseph, Manchester, N. H. Catamenial appliance. 1,502,503; July 22.
Holmgreen, Julius H., San Antonio, Tex. Stop mechanism for bending machines. 1,502,633; July 22.
Hood, Cyrus S., Corning, N. Y. Hot-air damper. 1,502,100; July 22.
Hood Rubber Company. (See Fowler, Fred D., assignor.)
Hopedale Manufacturing Company. (See Northrop, Jonas, assignor.)
Hopkins, O. G. (See Raconovich, George, assignor.)
Horovitz, Max, Woodridge, N. Y. Account book and the like. 1,501,905; July 22.
Horrocks Desk Company. (See Simmons, George P., assignor.)
Hotchkiss, E. H., Company, The. (See Muth, John, assignor.)
Howard, Alden L., Ann Arbor, Mich. Phonograph. Re15,875; July 22.

Howard, Almeda B. (See Howard, Frank A. and A. B.)
Howard, Frank A. and A. B., Elizabeth, N. J., assignors to Standard Development Company. Oil-can. Des. 65,274; July 22.
Howell, Hamilton T., New York, N. Y., assignor to Alfred Vester Sons, Inc., Providence, R. I. Ceiling fixture for lighting fixtures. Des. 65,275; July 22.
Howell, Hamilton T., New York, N. Y., assignor to Alfred Vester Sons, Inc., Providence, R. I. Collar-ring husk. Des. 65,276; July 22.
Howlett, William T., and H. O. Smith, New York, N. Y. Gas stove. 1,502,200; July 22.
Hubbard, Richard W., Ashtabula, Ohio. Hinge. 1,502,431; July 22.
Huffman, William E. (See Corbett, M. Q., Huffman, and Adams.)
Hulbert, Ansel C., San Carlos, Calif. Electric steam radiator. 1,502,249; July 22.
Humeston, Frederick L., assignor to Winchester Repeating Arms Company, New Haven, Conn. Handlamp switch. 1,502,567; July 22.
Humphrey, Walter S., Kansas City, Mo. Oil burner. 1,501,950; July 22.
Hunt, Seth B., trustee. (See Mann, Matthew D., jr., assignor.)
Hunter, Thomas M., assignor, by mesne assignments, to Newark Tube Company, Newark, N. J. Welding apparatus. 1,502,140; July 22.
Hurley, Robert S., Toledo, Ohio. Apparatus for handling railway ties. 1,502,568; July 22.
Hurst, Carl, Glenwood, Iowa. Automobile seating arrangement. 1,502,250; July 22.
Hussey, Charley F., assignor to Precision Machine Company, Milwaukee, Wis. Measuring apparatus. 1,502,569; July 22.
Huttinger, Charles A., Lakewood, assignor to The Acme Artificial Silk Company, Cleveland, Ohio. Manufacturing viscose. 1,502,101; July 22.
Hybinette, Noak V., New York, N. Y., assignor to National Trust Company Limited, Toronto, Canada. Nickel alloy. 1,501,906; July 22.
Ideal Speed Control, Inc. (See Spiva, Giles F., assignor.)
Ike, Carl J. (See Millett, John I., assignor.)
Industrial Controller Company. (See Van Valkenburg, H. L., and Magin, assignors.)
Ingalls, Ralph T. (See Rasmussen, Charles, assignor.)
Ingebritson, Marie, widow. (See Ingebritson, Reuben C., assignor.)
Ingebritson, Reuben C., Camp Kearny, Calif., assignor, by court decree, to M. Ingebritson, widow. Gliding torpedo. 1,502,634; July 22.
Ingersoll-Rand Company. (See Jimerson, Francis A., assignor.)
Ingersoll-Rand Company. (See Peters, A. E., and Parkhill, assignors.)
Ingersoll-Rand Company. (See Peters, Arthur E., assignor.)
Ingersoll-Rand Company. (See Smith, William A., assignor.)
Inland Steel Company. (See Stefan, Jacob, jr., assignor.)
International Harvester Company. (See Benjamin, Bert R., assignor.)
International Harvester Company. (See Bunting, Norman E., assignor.)
International Harvester Company. (See Ford, Ralph L., assignor.)
International Harvester Company. (See Grieves, Albert, assignor.)
International Harvester Company. (See Lindgren, Alexus C., assignor.)
International Motor Company. (See Hewitt, E. R., and Leipert, assignor.)
Intertype Corporation. (See Goodbody, Edmund M., assignor.)
Irish, David J., Barberton, Ohio, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Fuel-combustion apparatus. 1,502,141; July 22.
Ivaldi, Giuseppe, Paterson, N. J. Tool holder. 1,502,037; July 22.
Jackson, Carl J., Superior, Wis. Window. 1,502,142; July 22.
Jaeger, Max, Long Island City, assignor to Anchor Cap & Closure Corporation, New York, N. Y. Package-transferring machine. 1,502,201; July 22.
Jaeger, Max, assignor to Anchor Cap & Closure Corporation, Brooklyn, N. Y. Package-handling machine. 1,502,635; July 22.
James, William R. (See Hass, C. E., and James.)
Jaroski and Klocko. (See Jaroski, Stanley A., assignor.)
Jaroski, Stanley A., Holyoke, assignor to Jaroski and Klocko, Hatfield, Mass. Folding brush. 1,502,432; July 22.
Jimerson, Francis A., Athens, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Bonding drill. 1,502,339; July 22.
Johanson, Johan A., Stockholm, Sweden. Windmill. 1,502,433; July 22.
Johnson, Alfred J., Fairfield, and C. Sliwonik, Bridgeport, Conn. Adjustable chuck. 1,502,636; July 22.
Johnson, Emil, et al. (See Petersen, W., and Miller, assignors.)
Johnson, John R. (See Adams, R., and Johnson.)
Johnston, Warren A. (See Elliott, R. W., Johnston, and Buerkle.)
Johnston, William, Ballykilberg, Ireland. Potato digger. 1,502,570; July 22.
Jointless Fire Brick Company. (See Schaefer, William A. L., assignor.)
Jolley, J. T. (See Dozier, Joe F., assignor.)
Jones, Frank E., Pawtucket, assignor to Hemphill Company, Central Falls, R. I. Picker mounting for circular-knitting machines. 1,502,309; July 22.
Jones, William M., jr., Rochester, N. Y. Automobile steering knuckle and axle. 1,502,504; July 22.
Jordan, Richard D., and J. H. Hall, assignors to Taylor-Wharton Iron and Steel Company, High Bridge, N. J. Making manganese steel. 1,502,642; July 22.
Josephs, Abraham, assignor to The Crofut & Knapp Company, New York, N. Y. Cap. 1,502,202; July 22.
Joule, Joseph, assignor to Eastwood Wire Manufacturing Company, Belleville, N. J. Valve. 1,502,473; July 22.
Jubilee Manufacturing Company. (See Gillet, Alexis F., assignor.)
Kanazawa, Sadanosuke, Tokyo, Japan. Pocket stove. 1,502,251; July 22.
Karsky, Joseph, and H. Meyer, Eau Claire, Wis. Cut-off or nail-checking attachment for nailing machines. 1,502,505; July 22.
Katrina, Anton, Yukon, Pa. Stovepipe mounting. 1,502,571; July 22.
Kehoe, William E., San Francisco, Calif. Display fixture. Des. 65,277; July 22.
Kell, Ernest T., Benton, Ill. Combined shoveling and loading device. 1,502,143; July 22.
Kelly, William W., Cleveland, Ohio. Sales rack. Des. 65,278; July 22.
Kelman, John H. (See Kelman, Joseph N. and J. H.)
Kelman, Joseph N. and J. H., Los Angeles, Calif. Cushion. 1,502,387; July 22.
Kemet Laboratories Company. (See Cooper, Hugh S., assignor.)
Kennedy, James B., assignor of one-half to H. G. Bell, Bainbridge, Ga. Air pump for wells. 1,501,951; July 22.
Kerngood, Allen H., assignor to Alma Manufacturing Company of Baltimore City, Baltimore, Md. Buckle for straps and belts. 1,502,572; July 22.
Keuffel and Esser Company. (See Keuffel, Willie L. E., assignor.)
Keuffel, Willie L. E., Weehawken Township, Hudson County, assignor to Keuffel and Esser Company, Hoboken, N. J. Tape reel. 1,502,340; July 22.
Key Boiler Equipment Company. (See Key, Frederick E., assignor.)
Key, Frederick E., assignor to Key Boiler Equipment Company, St. Louis, Mo. Boiler plug. 1,502,038; July 22.
Keyes-Davis Company, The. (See Leggott, David, assignor.)
Kirk, Walter I., Chicago, Ill. Harp. 1,501,907; July 22.
Kirkpatrick, James N. (See O'Brien, Joseph A., assignor.)
Kirkpatrick, William L. (See O'Flaherty, L. F., and Kirkpatrick.)
Klausmeyer, David C., Cincinnati, assignor to The Cincinnati Bickford Tool Company, Oakley, Cincinnati, Ohio. Change gear. 1,502,647; July 22.
Klean Rite Auto Laundry. (See Nicholson, Jacob P., assignor.)
Klein, Max, New York, N. Y., assignor to Shapiro & Aronson, Inc. Ceiling lighting fixture. Des. 65,279; July 22.
Klemm, Emil R. (See McCanna, B. T., and Klemm.)
Klug, John R., Munday, Tex. Folding crate. 1,502,252; July 22.
Knickerbocker Silver Company. (See Smith, Winfield D., assignor.)
Knowles, Arthur J., Wilmington, Del. Compound for brazing and welding. 1,502,144; July 22.
Knudsen, George. (See Hall, C. H., and Knudsen.)
Knutson, William, Fort Shaw, Mont. Tire alarm. 1,502,039; July 22.
Kochring Company. (See Lichtenberg, Erich H., assignor.)
Koenigkramer, Frederick, Cincinnati, Ohio. Adjusting and locking apparatus. 1,502,001; July 22.
Konieczki, Steve S., Stevens Point, Wis. Protector for pneumatic tires. 1,502,637; July 22.
Kotter, Theodore F., Hollis, N. Y. Toy bear. Des. 65,280; July 22.
Kozlay, Clarence V., assignor to Sidney Blumenthal & Co. Inc., New York, N. Y. Pile fabric. Des. 65,281; July 22.
Krakauer, Samuel. (See Marcus, S. S., and Krakauer.)
Kramer, Abraham. (See Kramer, Samuel and A.)
Kramer, Samuel and A., Brooklyn, N. Y. Wall bracket. Des. 65,282; July 22.
Kraus, Morris. (See Segedy, John, assignor.)
Krause, Georg A., Munich, Germany, assignor, by mesne assignments, to American Lurgi Corporation, New York, N. Y. Process of and apparatus for evaporating liquids. 1,501,952; July 22.
Kucera, Peter, assignor to Capstan Glass Company, Connellsville, Pa. Device for making fluted glass molds or the like. 1,502,474; July 22.
Kuehn, William. (See Pilny, J., and Kuehn.)

Kuhn, Arthur, assignor to Firm: Carl Still, Recklinghausen, Germany. Sprinkling device for gas scrubbers, cooling towers, and the like. 1,502,573; July 22.
Kurtis, Angelos, Jacksonville, Fla. Bumper-operated brake and clutch mechanism. 1,502,145; July 22.
Kylin, Oskar, Elkhart, Ind. Adjustable reamer. 1,502,374; July 22.
Lambert, Daniel S., and C. B. Rader, Denver, Colo. Wheel puller. 1,502,103; July 22.
Lamson Company, The. (See Bauer, John A., assignor.)
Lang, Martin H. (See Hanford, H. C., and Lang.)
Lange, Henry, Quincy, Ill. Combination coal and gas heater. 1,502,575; July 22.
Lange, Henry, Quincy, Ill. Stove hinge. 1,502,376; July 22.
Latham, Albert, Beverly, Mass., assignor to American Button & Fastener Co., Augusta, Me. Forming ma- 1,502,040; July 22.
Latta, John L., Hickory, N. C. Pneumatic pump. 1,502,253; July 22.
Leake, Richard C., Rochester, assignor to General Railway Signal Company, Gates, N. Y. Adjustable rotary circuit controller. 1,502,643; July 22.
Lebeis, Martin, Berlin-Friedenau, Germany, assignor, by mesne assignments, to Naamlooze Vennootschap Machina Maatschappij voor Handel en Industrie, Amsterdam, Netherlands. Adding machine. 1,502,388; July 22.
Le Compte, Onesime H., St. Louis, Mo., assignor to Le Compte Standard Automatic Drawbar and Connector Company, Denver, Colo. Car coupler. 1,502,146; July 22.
Le Compte Standard Automatic Drawbar and Connector Company. (See Le Compte, Onesime H., assignor.)
Le Cras, Thomas J., Toronto, Ontario, Canada. Truss. 1,502,577; July 22.
Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Latch mechanism. 1,502,475; July 22.
Lee, William A., Roselawn, Ind. Circuit-closing device. 1,502,638; July 22.
Leggott, David, assignor to The Keyes-Davis Company, Inc., Battle Creek, Mich. Pin carrier. 1,502,254; July 22.
Leipert, August H. (See Hewitt, E. R., and Leipert.)
Leisenring, Harry T., Denver, Colo. Attachment for molasses gates. 1,502,578; July 22.
Lemieux, Darie, Leeds, N. Dak. Level attachment. 1,502,255; July 22.
Lent, Wilmar F., and G. L. Hinman, assignors to The Greist Manufacturing Company, New Haven, Conn. Lamp-shade support. 1,502,506; July 22.
Lepperhoff, Hans, Reading, assignor to The Narrow Fabric Co., West Reading, Pa. Lace. Des. 65,283; July 22.
Lepperhoff, Hans, Reading, assignor to The Narrow Fabric Co., West Reading, Pa. Lace. Des. 65,284; July 22.
Lepperhoff, Hans, Reading, assignor to The Narrow Fabric Co., West Reading, Pa. Lace. Des. 65,285; July 22.
Leppert, Henry E., New Britain, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Panel-board switch. 1,502,579; July 22.
Leslie, Elmer, Medford, Oreg. Fishing leader. 1,501,953; July 22.
Levy Shulman & Company. (See Shulman, Harry L., assignor.)
Library Bureau. (See Ohnstrand, Enoch, assignor.)
Lichtenberg, Erich H., assignor to Koehring Company, Milwaukee, Wis. Batch-box apparatus. 1,501,954; July 22.
Lick, Carl F., St. Paul, Minn. Automatic signal and safety device for motion-picture machines. 1,502,434; July 22.
Lieber, Jean, Lausanne, Switzerland. Liquid-fuel burner. 1,502,104; July 22.
Lies, William, assignor to Greenpoint Metallic Bed Company, Brooklyn, N. Y. End frame for a bedstead. Des. 65,286; July 22.
Lies, William, assignor to Greenpoint Metallic Bed Company, Brooklyn, N. Y. End frame for a bedstead. Des. 65,287; July 22.
Lilly, Eli, & Company. (See Shonle, H. A., and Moment, assignors.)
Lindenberger, Henry. (See Starmann, G. H., and Lindenberger.)
Lindgren, Alexus C., Evanston, Ill., assignor to International Harvester Company. Lister plow. 1,501,955; July 22.
Link, Lewis, Cottonwood Falls, Kans. Field implement. 1,502,507; July 22.
Lipsky, Norman, New York, N. Y., assignor to Sun Rise Lamp Mfg. Co., Inc. Lamp stand or similar article. Des. 65,288; July 22.
Locomobile Company of America. (See Church, Harold D., assignor.)
Loepsinger, Albert J., assignor to General Fire Extinguisher Company, Providence, R. I. Dry-pipe system. 1,501,955; July 22.
Loepsinger, Albert J., Edgwood, assignor to General Fire Extinguisher Company, Providence, R. I. Automatic sprinkler system. 1,502,041; July 22.
Loepsinger, Albert J., assignor to General Fire Extinguisher Company, Providence, R. I. Automatic sprinkler system. 1,502,042; July 22.
Longley, Lester A., Oconto Falls, Wis. Sectional steel form for concrete constructions. 1,502,508; July 22.
Lonsdale, William, Roselle Park, assignor to Wheeler Condenser & Engineering Company, Carteret, N. J. Condenser. 1,502,256; July 22.
Lonsdale, William, Roselle Park, assignor to Wheeler Condenser & Engineering Company, Carteret, N. J Condenser. 1,502,257; July 22.
Lonsdale, William, Roselle Park, assignor to Wheeler Condenser & Engineering Company, Carteret, N. J. Condenser. 1,502,258; July 22.
Loomis, Evarts G., Newark, N. J. Heating system. 1,502,341; July 22.
Loomis, Raymond W. (See Ascherin, H. J., and Loomis.)
Lovatt, George A., Boulder, Wyo. Wire stretcher. 1,502,389; July 22.
Loy, James W., Burnett, assignor of one-half to F. M. Fishback, Long Beach, Calif. Tool for removing casing from wells. 1,502,105; July 22.
Lucas, Owen D., Bayswater, London, assignor to Vickers Limited, Westminster, England. Percussive firing mechanism for breech-loading guns. 1,502,259; July 22.
Lucas, Owen D., assignor to Y. L. Oil Processes, Limited, Westminster, London, England. Preparation of catalytic bodies. 1,502,260; July 22.
Lucas, William C., Meriden, Conn. Pedestal for fire-alarm boxes. 1,502,342; July 22.
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Arnstein, Karl, assignor.)
Lucke, Charles E., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Ejector and nozzle therefor. 1,502,203; July 22.
Lundquist, Arthur R., Chicago, Ill. Advertising sign. Des. 65,289; July 22.
Lundquist, Frank A., Chicago, Ill., assignor, by mesne assignments, to H. S. Conrad, trustee. Motor control for switching mechanisms. 1,501,908; July 22.
Lundquist, Frank A., Chicago, Ill., assignor, by mesne assignments, to H. S. Conrad, trustee. Automatic telephone exchange. 1,501,909; July 22.
Lyne, William H., Houston, Tex. Device for oil and gas wells. 1,502,106; July 22.
Lyons, Benjamin F. (See Robinson, Walter W., assignor.)
MacDonald, Frederick L., assignor to Flostik Company, Waltham, Mass. Casing for a dental floss holder. Des. 65,290; July 22.
MacInnes, Robert H., assignor to D. Moore Company, Limited, Hamilton, Ontario, Canada. Oven for electric ranges. 1,502,392; July 22.
Mack, Patrick H., Bradford, assignor to Oil Well Supply Company, Pittsburgh, Pa. Disk or retaining means for well packers. 1,501,957; July 22.
Mackie, David B., Los Angeles, Calif. Apparatus for destroying animal life. 1,501,958; July 22.
Macpherson, Byron, Roxbury, assignor to Wireless Specialty Apparatus Company, Boston, Mass. Process and apparatus for making electrical condensers. 1,502,343; July 22.
MacTarnaghan, Samuel G., Nunda, N. Y. Concrete-pipe-forming machine. 1,502,509; July 22.
Magnton, Silvio, New York, N. Y. Floor-scrubbing machine. 1,502,148; July 22.
Magie, William E., Beloit, and W. Ferris, assignors to The Oilgear Company, Milwaukee, Wis. Pump or motor. 1,502,310; July 22.
Magin, Francis W. (See Van Valkenburg, H. L., and Magin.)
Mallonee, Frederick E., et al. (See Hanna, Frank L., assignor.)
Manifold Impressions Corporation. (See Cossitt, Malcolm L., assignor.)
Mann, Matthew D., jr., Roselle, N. J., assignor to S. B. Hunt, trustee, Mount Kisco, N. Y. Purifying and deodorizing isopropyl alcohol. 1,502,149; July 22.
Mann, Oscar F., Indianapolis, Ind. Bricklaying device. 1,502,046; July 22.
Mansfield Tire and Rubber Company. (See Ober, Philip H., assignor.)
Marcus, Samuel S., and S. Krakauer, New York, N. Y. Covered spring structure. 1,502,510; July 22.
Marsh, Henry R. (See Rankin, W. H., and Marsh.)
Martel, Edgar J., Laconia, N. H. Automobile switch lock. 1,502,047; July 22.
Martin, George C., Los Angeles, Calif. Reversing mechanism. 1,502,150; July 22.
Martin, William H., New York, N. Y., and T. Shaw, Hackensack, N. J., assignors to American Telephone and Telegraph Company. Loaded transmission circuits. 1,501,959; July 22.
Marvin, Frederick B., Port Jervis, N. Y. Wave motor. 1,502,511; July 22.
Mason, William H., Laurel, Miss. Treating lumber. 1,502,311; July 22.
Mathias, Lewis D. (See Andrews, L. W., and Mathias.)
Mathias, Lewis D., Chicago Heights, assignor to Victor Chemical Works, Chicago, Ill. Fire-resisting or flame-proof starching composition. 1,501,911; July 22.
Matthews, Charlton S., Little Mountain, S. C. Plow-operating apparatus. 1,501,960; July 22.

Mattson, John P., Minneapolis, Minn. Snap hook. 1,501,961; July 22.
May, Frank J., assignor of one-fourth to E. W. Olson, St. Paul, Minn. Automobile signal. 1,502,639; July 22.
Mayhew, Ralph, New York, N. Y. Mounting means for phonograph records. 1,502,312; July 22.
McArthur, William, Seattle, Wash. Method of and apparatus for treating oil sand. 1,502,261; July 22.
McBride, Charles L., jr., assignor to The C. L. McBride Manufacturing Company, Toledo, Ohio. Electric heating-cord machine. 1,502,043; July 22.
McBride, C. L., Manufacturing Company, The. (See McBride, Charles L., assignor, jr.)
McBrien, Harry T., Cleveland, Ohio, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,501,910; July 22.
McCann, James T., Glen Ellen, Calif. Wrench. 1,502,044; July 22.
McCanna, Benjamin T., and E. R. Klemm, Chicago, Ill. Gas-engine governor. 1,502,476; July 22.
McCarry, William H., Pittsfield, Mass. Oil burner. 1,502,045; July 22.
McClintock, Lewis G., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Tank for transformers and the like. 1,502,204; July 22.
McCollum, Earl E., Downers Grove, Ill. Speed-reducing device. 1,502,107; July 22.
McCoy, Robert H., Conda, Idaho, assignor of one-third to J. B. Bell, Evanston, Wyo. Oil cup. 1,502,262; July 22.
McCracken, George E., San Jose, Calif. Pump. 1,502,390; July 22.
McDuffie, Benjamin H., Brooklyn, N. Y. Faucet. 1,502,147; July 22.
McGuire, Lee R., Chicago, Ill., assignor to Morgan & Wright. Vulcanizing process and apparatus. 1,502,205; July 22.
McKinley, Benjamin P., Brooklyn, N. Y. Combined lamp-socket cluster and connection plug. Des. 65,291; July 22.
McNerny, Clyde J., San Francisco, Calif. Pressure brake for autos. 1,502,580; July 22.
McPherson, John O., Renton, Wash. Spike puller. 1,502,391; July 22.
McQueen, James B., Preston, Idaho. Hoist. 1,501,963; July 22.
McQueen, John N., Preston, Idaho. Demountable rim. 1,501,964; July 22.
McWilliam, James E., North Oxford, Mass. Marine hat. 1,502,108; July 22.
Meehan, Florence B., Highland Park, Ill. Dancing doll. 1,501,912; July 22.
Maggenhofen, Charles W., assignor to R. H. Hassler, Indianapolis, Ind. Shock-absorber axle bracket. 1,502,313; July 22.
Meisner, George A., Oak Park, Ill. Fountain brush. 1,502,263; July 22.
Meldrum-Gabrielson Corporation. (See Gabrielson, Carl, assignor.)
Meredith, Frederick W., South Farnborough, England. Motor-cycle spring fork. 1,502,151; July 22.
Merritt, Arthur A., Providence, R. I., assignor to Willcox & Gibbs Sewing Machine Co., New York, N. Y. Thread-tensioning means for sewing machines. 1,502,048; July 22.
Mervin, John, Johnstown, Pa. Check hanger for mine cars. 1,502,049; July 22.
Metzger, Myer, Chicago, Ill. Food-display cover. 1,502,109; July 22.
Meyer, Christopher J., assignor to Evinrude Motor Company, Milwaukee, Wis. Marine propulsion device. 1,502,477; July 22.
Meyer, Herman. (See Karsky, J., and Meyer.)
Meyer, Louis A., St. Louis, Mo. Vehicle signal-lamp casing. Des. 65,292; July 22.
Mezei, George, Clinchco, Va. Clasp. 1,502,512; July 22.
Miami Manufacturing Company. (See Worthington, Roland B., assignor.)
Michigan Chemical Company. (See Nikaido, Yasujuro, assignor.)
Miller, Charles D. (See Petersen, W., and Miller.)
Miller, Russell G., Pittsburgh, Pa. Reversing valve. 1,502,513; July 22.
Millett, John I., assignor of three-fourths to C. J. Ike, Los Angeles, Calif. Collapsible support. 1,502,152; July 22.
Mills, Frank W., Chicago, Ill. Remote control device. 1,502,153; July 22.
Mills Novelty Company. (See Sandell, Henry K., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Minneapolis Heat Regulator Co. (See Denison, Frederick S., assignor.)
Mitchell, David B., and G. J., Louisville, Ky. Manufacture of waterproof paint. 1,502,514; July 22.
Mitchell, George J. (See Mitchell, David B. and G. J.)
Mojonnier Bros. Co. (See Mojonnier, J. J., Phillips, and Warren, assignors.)
Mojonnier, Julius J., H. R. Phillips, and H. B. Warren, deceased, by L. W. Warren, administrator, Oak Park, assignors to Mojonnier Bros. Co., Chicago, Ill. Ice-cream-bricking machine. 1,502,110; July 22.
Mojonnier, Julius J., H. R. Phillips, and H. B. Warren, deceased, by L. W. Warren, administrator, Oak Park, assignors to Mojonnier Bros. Co., Chicago, Ill. Ice-cream-packaging machine. 1,502,314; July 22.
Möller, Frederik J., Copenhagen, Denmark. Electrical heating utensil. 1,502,315; July 22.
Molyneux, George E., Bayonne, N. J., assignor of one-half to J. F. Alvord, New York, N. Y. Brake mechanism for road vehicles. 1,502,111; July 22.
Moment, Asher. (See Shonle, H. A., and Moment.)
Montgomery, Gustavus A., assignor to Titusville Forge Co., Titusville, Pa. Casing slip for drilling apparatus. 1,501,962; July 22.
Moore, D., Company. (See Mac Innes, Robert H., assignor.)
Moore, Harry G., Philadelphia, Pa. Internal-combustion engine. 1,502,264; July 22.
Moore, Raymond H., Chicago, Ill. Ventilating means for the receivers of belt conveyers. 1,502,050; July 22.
Moorman, Charles L., Chicago, Ill. Metal receptacle. 1,502,112; July 22.
Moore, Walter C., Owensboro, Ky. Weed extractor. 1,501,965; July 22.
Morgan & Wright. (See McGuire, Lee R., assignor.)
Morgan, David W. R., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Air ejector. 1,502,478; July 22.
Morgan, Numa E., Atlanta, Ga. Electrical dental machine. 1,502,435; July 22.
Morita, Shigeo, San Francisco, Calif. Incense burner. Des. 65,293; July 22.
Morris, Edward K., Baltimore, Md. Collapsible box. 1,501,913; July 22.
Morris, Edward K., assignor to Fiber Specialty Company, Incorporated, Baltimore, Md. Collapsible folding box. 1,502,051; July 22.
Morris, Gideon, assignor of one-half to W. H. Roberson, Grand Saline, Tex. Dirigible headlight. 1,502,515; July 22.
Morris, John L., Los Angeles, Calif. Die for casting bearing liners. 1,502,393; July 22.
Moseley, William M. (See Faircloth, G. E., and Moseley.)
Moser, Morris B., Wells, Minn. Hydrocarbon burner. 1,502,394; July 22.
Mosgrove, Charles A., Watertown, Conn., assignor to The Autoyre Company, Inc. Garment fastener. 1,502,316; July 22.
Mould, James A., assignor to Evinrude Motor Company, Milwaukee, Wis. Water-supply connection. 1,502,479; July 22.
Mudd, William R., Evanston, Wyo. Vehicle signal. 1,502,113; July 22.
Mueller, Adolph, trustee. (See Mueller, P., and Schuermann, assignors.)
Mueller, John G., Dayton, Ohio. Rail brace. 1,502,581; July 22.
Mueller, Philip, and A. C. Schuermann, assignors to A. Mueller, trustee, Decatur, Ill. Noslip flange. 1,502,154; July 22.
Müller, Karl, and W. Sander, Essen, Germany. Bearing-metal alloy. 1,502,321; July 22.
Multer, John S., Portsmouth, Ohio. Demountable rim. 1,502,516; July 22.
Munning, A. P., & Co. (See Hall, Wesley F., assignor.)
Munroe, Treadway B., assignor to C. F. Dahlberg, New Orleans, La. Drying apparatus. 1,501,966; July 22.
Murphy, G. W. J., Company. (See Bourque, David, assignor.)
Murphy, Mary J., St. Paul, O. Sandbank and W. Sandbank, New York Mills, Minn. Soap holder for washboards. 1,502,395; July 22.
Murphy, Walter P. (See Sisson, Vinton E., assignor.)
Murray, Howard J., New York, N. Y. Instrument safe for automotive vehicles. 1,502,344; July 22.
Murray, Howard J., New York, N. Y. Gear synchronizer. 1,502,345; July 22.
Murray, John C., Lakewood, Ohio. Drawing pad. 1,502,517; July 22.
Muth, John, assignor to The E. H. Hotchkiss Company, Norwalk, Conn. Staple-driving machine. 1,502,346; July 22.
Naamlooze Vennootschap Machina Maatschappij voor Handel en Industrie. (See Lebeis, Martin, assignor.)
Nadeau, Robert, Fort Kent, Me. Dish and plate lifter. 1,501,967; July 22.
Narrow Fabric Co., The. (See Lepperhoff, Hans, assignor.)
Nasta, Dominick, Brooklyn, N. Y. Reel support. 1,502,518; July 22.
National India Rubber Company. (See Heilbecker, Eugene C., assignor.)
National Trust Company Limited. (See Hybinette, Noak V., assignor.)
Naylor, Carl G., Chicago, Ill., assignor to Naylor-Robertson Company. Spirally-wound pipe and making it. 1,502,052; July 22.
Naylor-Robertson Company. (See Naylor, Carl G., assignor.)
Neal, Spencer G., New York, N. Y., assignor to Automatic Straight Air Brake Company, Wilmington, Del. Air-brake apparatus. 1,502,519; July 22.
Neal, Spencer G., New York, N. Y., assignor to Automatic Straight Air Brake Company, Wilmington, Del. Air-brake apparatus. 1,502,520; July 22.

Neal, Spencer G., New York, N. Y., assignor to Automatic Straight Air Brake Company, Wilmington, Del. Air-brake apparatus. 1,502,521; July 22.
Negri, Teresina M., Paris, France. Bust support. 1,502,436; July 22.
Neidig, Claude E., Camp Hill, Pa. Cover for electric switch keys. 1,502,582; July 22.
Nell, Gustave M., assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Drill mounting. 1,502,317; July 22.
Nelson, Ivan J., Saginaw, Mich. Soap-dispensing machine. 1,502,347; July 22.
Nelson, Jos. E., & Sons. (See Tanner, Inos B., assignor.)
Nelson, Lewis D., Coldwater, Mich. Bag-tying machine. 1,502,114; July 22.
Neukom, Albert H., Toledo, Ohio. Automobile luggage rack. 1,502,480; July 22.
Neumann, Jan, Kromeriz, Czechoslovakia. T square. 1,502,396; July 22.
Newark Tube Company. (See Hunter, Thomas M., assignor.)
Newland, Barnet, New York, N. Y. Plate for lighting fixtures. Des. 65,294; July 22.
Newland, Barnet, New York, N. Y. Plate for lighting fixtures. Des. 65,295; July 22.
Newland, Barnet, New York, N. Y. Candle cup for lighting fixtures. Des. 65,296; July 22.
Newman, I., & Sons, Inc. (See Newman, S. J., and Dodge.)
Newman, Samuel J., and R. E. Dodge, assignors, by mesne assignments, to I. Newman & Sons, Inc., New Haven, Conn. Corset. 1,502,481; July 22.
Newton, Rolland H. (See Pearce, L. M., and Newton.)
Nicholson, Jacob P., assignor to Klean Rite Auto Laundry, Chicago, Ill. Apparatus for cleaning motor vehicles. 1,502,115; July 22.
Niemeyer, Henry C., Chicago, Ill. Vegetable harvester. 1,502,522; July 22.
Nikaido, Yasujuro, Bay City, Mich., assignor to Michigan Chemical Company. Fertilizer and making the same. 1,501,914; July 22.
Nikaido, Yasujuro, Bay City, Mich., assignor to Michigan Chemical Company. Making fertilizers. 1,501,915; July 22.
Nikaido, Yasujuro, Bay City, Mich., assignor to Michigan Chemical Company. Fertilizer and making the same. 1,501,916; July 22.
Noftzger, Charles F. (See Braley, Charles L., assignor.)
Nordstrom, Elof, East Orange, N. J., assignor to American Dan Bottle Seal Corporation, Dover, Del. Article-feeding hopper. 1,502,053; July 22.
Northern Trailer Company. (See Sargent, Don A., assignor.)
Northrop, Jonas, Hopedale, assignor to Hopedale Manufacturing Company, Milford, Mass. Self-threading shuttle. 1,502,397; July 22.
Norton, Downes E., Hampton Hill, London, England. Match holder and box. 1,502,206; July 22.
Ober, Philip H., assignor to Mansfield Tire and Rubber Company, Mansfield, Ohio. Tire. 65,297; July 22.
O'Brien, Joseph A., Brookston, assignor of one-half to J. N. Kirkpatrick, La Fayette, Ind. Hog trap. 1,502,155; July 22.
O'Connell, James R., assignor of one-half to J. O. Hennett, Rochester, N. Y. Feed chuck. 1,502,116; July 22.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Side bearing. 1,502,002; July 22.
O'Donoghue, Aloysius S. (See Wrenn, H. B. P., and O'Donoghue.)
Oertel, Rudolf, Lichterfelde, near Berlin, and F. Dreyer, assignors to the Firm Goerz Photochemische Werke G. m. b. H., Zehlendorf, near Berlin, Germany. Dull or roughened photographic film and making same. 1,502,482; July 22.
O'Flaherty, Leo F., and W. L. Kirkpatrick, Elgin, Ill. Mixing valve. 1,502,483; July 22.
Ohnstrand, Enoch, Mohawk, N. Y., assignor to Library Bureau. Cabinet such as used for visible index. 1,502,117; July 22.
Oilgear Company, The. (See Magie, W. E., and Ferris, assignors.)
Oilwell Supply Company. (See Mack, Patrick H., assignor.)
Olson, Ervie W. (See May, Frank J., assignor.)
Olson, Oscar, Brooklyn, N. Y. Shoe-tree-forming machine. 1,502,485; July 22.
Olson, Oscar F., Bethlehem, Pa. Roundabout. 1,502,484; July 22.
Onderdonk, Lansing, and A. J. Wohlpart, New York, N. Y., assignors to Union Special Machine Company, Chicago, Ill. Feeding mechanism for sewing machines. 1,501,968; July 22.
Ormsby, Elon A., Centerville, Calif. Can opener. 1,502,054; July 22.
Osborne, William F., Westwood, N. J. Viscosity-testing device. 1,502,118; July 22.
Osgood Bradley Car Company. (See Turner, Charles H., assignor.)
Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)
Paige, Arthur E., Philadelphia, Pa. Steering wheel. 1,502,348; July 22.
Paine, Howard S., Chevy Chase, Md., and J. Hamilton, Washington, D. C., dedicated, by mesne assignments, to the citizens of the United States of America. Preparing confections coated with fondant. 1,502,207; July 22.
Palmer-Bee Company. (See Bee, William E., assignor.)
Papanastasiou, Athanasios, East Pittsburgh, Pa. Marine disaster signal. 1,502,055; July 22.
Parkersburg Machine Company. (See Callanan, James T., jr., assignor.)
Parkhill, Mortimer S. (See Peters, A. E., and Parkhill.)
Pastore, Michael, Bridgeport, Conn. Cable guard for grooved pulleys. 1,502,208; July 22.
Paterson, David. (See Paterson, William, assignor.)
Paterson, William, Toronto, Ontario, Canada, assignor to D. Paterson, Lindsay, Ontario, Canada. Quick-release pitman. 1,502,265; July 22.
Patrick, Harry E., Evanston, and A. J. Peterson and J. W. Bermes, Chicago, Ill., assignors, by mesne assignments, to Dearborn Equipment Company, Kalamazoo, Mich. Apparatus for use in assembling, repairing, and limbering gas engines of various types. 1,502,349; July 22.
Patrick, Harry E., Evanston, and A. J. Peterson and J. W. Bermes, Chicago, Ill., assignors, by mesne assignments, to Dearborn Equipment Company, Kalamazoo, Mich. Truck jack. 1,502,350; July 22.
Patterson, Julius E. (See Dunn, F. E., and Patterson.)
Pauls, John W., Bundy, Mont. Corn tester. 1,501,969; July 22.
Pearce, Louis M., and R. H. Newton, Houston, Tex. Back-up post. 1,502,156; July 22.
Pearson, William H., Passaic, N. J. Machine for splicing cords. 1,502,056; July 22.
Peek, Norman W., Milwaukee, Wis. Foot accelerator. 1,502,523; July 22.
Pepin, Leonce G., Augusta, Me. Carrier. 1,502,583; July 22.
Perry & Webster Incorporated. (See Boynton, V. K., and Webster, assignors.)
Perry, Hannah O., Darien Center, N. Y. Attachment for knitting or crochet needles. 1,502,584; July 22.
Peters, Arthur E., Littleton, Colo., assignor to Ingersoll-Rand Company, Jersey City, N. J. Oiling device for drill sharpeners. 1,501,917; July 22.
Peters, Arthur E., and M. S. Parkhill, Littleton, Colo., assignors to Ingersoll-Rand Company, Jersey City, N. J. Sharpener for drill steels. 1,501,918; July 22.
Peters, John, Huntington, N. Y. Rubber holder for cylinders. 1,501,919; July 22.
Petersen, William, and C. D. Miller, assignors of one-fourth to E. Anderson and one-fourth to E. Johnson, Chicago, Ill. Smoke consumer. 1,502,585; July 22.
Peterson, Andrew J. (See Patrick, H. E., Peterson, and Bermes.)
Peterson, Walter S., Denver, Colo. Shock absorber. 1,502,209; July 22.
Phillips, Charles H., jr., Richmond Hill, N. Y., assignor to Seneca Glass Co., Morgantown, W. Va. Goblet or similar article. Des. 65,298; July 22.
Phillips, Harley R. (See Mojonnier, J. J., Phillips, and Warren.)
Pilny, John, New Brighton, and W. Kuehn, Elmhurst, N. Y. Operating means for curtains. 1,502,586; July 22.
Piper, Alonzo S., assignor to Stebler Parker Co., Riverside, Calif. Hand truck. 1,502,057; July 22.
Pittsburgh Steel Company. (See Benedict, Edward L., assignor.)
Pittsburgh Transformer Company. (See McClintock, Lewis G., assignor.)
Platt, Clarence D., Bridgeport, Conn. Inclosed electric switch. 1,502,210; July 22.
Poberejsky, Jacques, Paris, France. Means for protecting gasoline or other tanks. 1,502,437; July 22.
Pompeian Company, The. (See Hart, Milo C., assignor.)
Poultney, Edward C., Llandudno, Wales. Fluid-pressure braking apparatus. 1,502,211; July 22.
Pratt, Benjamin H., Milwaukee, Wis., assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Tire. Des. 65,299; July 22.
Precision Machine Company. (See Hussey, Charley F., assignor.)
Preuss, Emile V., Kelles, near Brussels, Belgium. Manufacture of molded articles. 1,502,157; July 22.
Price, Henry M., Washington, D. C. Building element. 1,502,438; July 22.
Price, Joseph W., jr., Philadelphia, Pa. Piston-rod packing. 1,502,524; July 22.
Priebatsch, Leon J., Brookhaven, Miss. Frame for beds. 1,502,587; July 22.
Probst, William G., Louisville, Ky. Electric enameling tool. 1,502,588; July 22.
Purdy, George A., Watertown, N. Y. Foot accelerator for automobiles. 1,502,119; July 22.
Purviance, Albert, Linden, Calif. Land leveler. 1,502,158; July 22.
Pyle-National Company, The. (See Dake, Charles W., assignor.)
Quin, Charles W., Centralia, Wash. Ball. 1,502,058; July 22.
Raconovich, George, assignor of fifteen per cent to O. G. Hopkins, Sacramento, Calif. Lock. 1,502,318; July 22.
Rader, Cranston B. (See Lambert, D. S., and Rader.)

Radimak, Steven, assignor of one-half to D. Schiffer, New York, N. Y. Traveling electric fan. 1,502,266; July 22.
Radio Corporation of America. (See Clark, George H., assignor.)
Rafferty, Martin J., Chicago, Ill. Windshield wiper. 1,502,589; July 22.
Railway Devices Company. (See Hoerr, Louis A., assignor.)
Ramsay, David M., Glasgow, Scotland. Steam condenser. 1,502,525; July 22.
Rankin, William H., Waltham, and H. R. Marsh, Canton, assignors to R. Crompton, Worcester, Mass. Weft-replenishing loom. 1,502,319; July 22.
Rascher, Frederick H., Arlington Heights, Ill. Bag tier. 1,502,267; July 22.
Rasmussen, Charles, assignor of one-half to R. T. Ingalls, Racine, Wis. Machine for cutting rubber and the like. 1,502,120; July 22.
Reck, Maurus C., assignor to Sill Stove Works, Rochester, N. Y. Stove. 1,502,159; July 22.
Rector, Lon B., Los Angeles, Calif. Picking device. 1,502,439; July 22.
Reel, Sam, Evansville, Ind., assignor of one-half to E. Rick, Marion, Ill. Window screen. 1,501,970; July 22.
Rehfuss, Martin O., Philadelphia, assignor to United States Chain and Forging Company, Pittsburgh, Pa. Chain link. 1,502,526; July 22.
Reichard, Harold D., Akron, Ohio. Resilient tire. Des. 65,300; July 22.
Reichel, Walter, Berlin-Lankwitz, and W. Gscheidlen, Berlin-Schmargendorf, assignors to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Rotary field magnet. 1,502,527; July 22.
Reichmann, Frank J., Chicago, Ill. Vehicle. 1,502,398; July 22.
Reilly, Edward, et al. (See Abbey, Samuel C., assignor.)
Reinthal, Sol, assignor to The Bamberger Reinthal Company, Cleveland, Ohio. Winter or storm cap. 1,502,160; July 22.
Renner, Harold G., Detroit, Mich. Rivetable nut. 1,502,399; July 22.
Research Corporation. (See Ball, Charles F., assignor.)
Reulbach, Louis, Cleveland, Ohio. Extensible tool holder. 1,502,528; July 22.
Reymond, Martin H., Binghamton, N. Y. Leather-estimating slide rule. 1,501,920; July 22.
Reynolds, William J., et al. (See Abbey, Samuel C., assignor.)
Riblett, Albert A., Burkburnett, Tex. Automobile fender brace. 1,502,268; July 22.
Rice, Charles D., West Hartford, Conn. Hydraulic hoist. 1,502,121; July 22.
Rick, Emma. (See Reel, Sam, assignor.)
Riedesel, Louis A., Wheatland, Iowa. Agricultural implement. 1,502,529; July 22.
Rimailho, Emile, assignor to Compagnie des Forges & Acieries de la Marine & d'Homecourt, Paris, France. Equilibrating device. 1,502,320; July 22.
Ringe, John C., Stratford, Conn., assignor to The Singer Manufacturing Company. Sewing machine. 1,501,971; July 22.
Roberson, Willis H. (See Morris, Gideon, assignor.)
Robert, Herbert F., Malden, Mass. Massaging implement. 1,502,440; July 22.
Roberts, Samuel H., Chicago, Ill. Hoof pad. 1,502,441; July 22.
Robinson, Frank W., assignor to Schuylkill Hosiery Mills, Inc., Reading, Pa. Yarn-change binder for circular-knitting machines. 1,502,486; July 22.
Robinson, Walter W., assignor of one-half to B. F. Lyons, Beloit, Wis. Pressure-reducing valve. 1,502,212; July 22.
Rodrian Electro-Metallurgical Co. (See Rodrian, Richard, assignor.)
Rodrian, Richard, assignor to Rodrian Electro-Metallurgical Co., Incorporated, New York, N. Y. Electrolytic process for the production of sulphides. 1,502,213; July 22.
Roffy, Joseph T., Pittsburgh, Pa., assignor to The Standard Corporation. Light projector. 1,502,530; July 22.
Rogow, Sydney. (See Duncan, J. H., and Rogow.)
Rooney, Elwin H., Providence, R. I. Traveler guide for spinning, twisting, etc. 1,502,269; July 22.
Rosenau, Frank L., San Francisco, Calif. Recovering laundry material. 1,502,270; July 22.
Rosenthal, Charles A., New Orleans, La. Game board. 1,502,531; July 22.
Ross, James C., Seattle, Wash. Faucet. Des. 65,301; July 22.
Rossman, Allen M., and J. C. Sanderson, assignors to Sargent & Lundy, Incorporated, Chicago, Ill. Bus structure. 1,502,442; July 22.
Rowland, Clifford B., Trenton, N. J. Agricultural assorting machine. 1,502,059; July 22.
Ruberoid Company, The. (See Abraham, Herbert, assignor.)
Rudginsky, Harry, Boston, Mass. Resilient tire. Des. 65,302; July 22.
Ruggles, Gilbert W., Youngstown, Ohio. Stoker ram. 1,502,122; July 22.
Russell, John, Cutlery Company. (See Hawes, Austin W., assignor.)
Sable, Paul M., Minneapolis, Minn. Belt buckle. 1,502,487; July 22.
Sachs, Solomon, New York, N. Y. Portable phonograph. 1,502,060; July 22.
Safford, Henry, Little Rock, Ark. Inflammable shell. 1,502,400; July 22.
Sager, George A., Albany, N. Y. Low-water safety telltale. 1,502,590; July 22.
St. Clair, John A., Indianapolis, Ind. Sanding machine. 1,502,130; July 22.
St. Louis Pump and Equipment Company. (See Hart, Ira B., assignor.)
Sall, Sam, Syracuse, N. Y. Traction mat. 1,502,123; July 22.
Sallenbach, Ernest J., Joliet, Ill. Protector for pipe connections. 1,502,271; July 22.
Sampson, Meyer, Chicago, Ill. Automatic water controller suitable for bathtubs and such like reservoirs. 1,502,061; July 22.
Samson, Ed. (See Hargrave, Allen C., assignor.)
Sandbank, Olive. (See Murphy, M. J., and Sandbank.)
Sandbank, William. (See Murphy, M. J., and Sandbank.)
Sandell, Henry K., assignor to Mills Novelty Company, Chicago, Ill. Motion-picture camera. 1,502,401; July 22.
Sandell, Henry K., assignor to Mills Novelty Company, Chicago, Ill. Self-playing musical instrument. 1,502,402; July 22.
Sander, Wilhelm. (See Müller, K., and Sander.)
Sanderson, John C. (See Rossman, A. M., and Sanderson.)
Sargent & Lundy, Incorporated. (See Rossman, A. M., and Sanderson, assignors.)
Sargent, Don A., assignor to Northern Trailer Company, Bangor, Me. Truck snowplow. 1,502,591; July 22.
Sauer, Johan N. A., Amsterdam, Netherlands. Preparing decolorizing carbon. 1,502,592; July 22.
Sayre, Elizabeth B., et al., executors. (See Sayre, William H.)
Sayre, William H., deceased, Glen Ridge, N. J.; W. H. Sayre, W. M. Beard, and E. B. Sayre, executors, assignors to American Abrasive Metals Company. Launder trough. 1,502,272; July 22.
Sayre, William H., et al., executors. (See Sayre, William H.)
Schaefer, William A. L., assignor to Jointless Fire Brick Company, Chicago, Ill. Making packages. 1,502,124; July 22.
Schaper, Henry C., assignor to The General Automatic Scale Company, St. Louis, Mo. Automatic scale. 1,502,443; July 22.
Scharpenberg, Charles C., Bakersfield, and L. G. Gates, Whittier, assignors to Standard Oil Company, San Francisco, Calif. Crown block for well-drilling apparatus. 1,502,161; July 22.
Schenker, Francis, assignor to Dowd-Rodgers Company, Wallingford, Conn. Unitary combination tray and condiment holder. Des. 65,304; July 22.
Schiffer, David. (See Radimak, Steven, assignor.)
Schmidt, Ferdinand, Des Moines, Iowa. Goblet or similar article. Des. 65,305; July 22.
Schmidt, Henry F., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Vertical destroyer type blower. 1,502,062; July 22.
Schofield, Henry N., Kansas City, Mo. Pump. 1,501,922; July 22.
Schott & Gen. (See Hausrath, Herbert, assignor.)
Schottky, Walter, Wurzburg, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Electric-wave receiver. 1,502,063; July 22.
Schrader's, A., Son, Inc. (See Bowden, Junius A., assignor.)
Schroeder, William S. (See Goodnow, T. H., and Schroeder.)
Schuermann, Anton C. (See Mueller, P., and Schuermann.)
Schulde, John, St. Louis, Mo. Refrigerator. 1,502,064; July 22.
Schultz, Fred, Decatur, Ill. Elevator. 1,502,273; July 22.
Schuylkill Hosiery Mills, Inc. (See Robinson, Frank W., assignor.)
Scott, Dudley H., Cleveland, Ohio. Liquid-level indicator. 1,502,125; July 22.
Scott, Robert D., Powell River, British Columbia, Canada. Clothespeg. 1,502,274; July 22.
Sousa, Lino, Phoenix, N. Y. Machine for winding cores. 1,501,921; July 22.
Segal Metal Products Company. (See Segal, Samuel, assignor.)
Segal, Samuel, assignor to Segal Metal Products Company, Inc., New York, N. Y. Sash fastener. 1,502,351; July 22.
Segedy, John, Brooklyn, assignor to M. Kraus, New York, N. Y. Cigar-bunch machine. 1,502,403; July 22.
Seipp, Henry C., Pittsburgh, Pa. Heater. 1,501,923; July 22.
Seitz, Gotthilf, Frankfort-on-the-Main, Germany. Arrangement for cleaning filters of fabric. 1,502,404; July 22.
Seneca Glass Co. (See Phillips, Charles H., jr., assignor.)
Serafini, Angelo, Erie, Pa. Antiskid device for vehicle wheels. 1,502,488; July 22.

Service Star Legion, Incorporated. (See Troupe, Hattie H., assignor.)
Settergren, Bernhard, Chicago, Ill. Differential clutch for power-driven vehicles, etc. 1,502,126; July 22.
Sewickley Electric Manufacturing Company. (See Freebie, Benjamin F., assignor.)
Shapiro & Aronson. (See Klein, Max, assignor.)
Shaw, John K., Minneapolis, Minn. Obtaining fibers from bagasse. 1,501,924; July 22.
Shaw, John K., Minneapolis, assignor to C. F. Dahlberg, St. Paul, Minn. Bagasse fiber and producing the same. 1,501,925; July 22.
Shaw, Thomas, Hackensack, N. J., assignor to American Telephone and Telegraph Company. Loaded transmission circuit. 1,501,926; July 22.
Shaw, Thomas. (See Martin, W. H., and Shaw.)
Shearer, George T., assignor of one-half to E. Bart, Atlanta, Ga. House-number box. Des. 65,303; July 22.
Shenhan, Aram, Providence, R. I. Finger guard for smoking pipes. 1,501,972; July 22.
Shepard, John W., Tucson, Ariz. Rod packing. 1,501,927; July 22.
Sheppard, Orlando, jr., Atlanta, Ga., and R. A. Trace, Dayton, Ohio, assignors to Buckeye Iron and Brass Works, Dayton, Ohio. Process and apparatus for charging cookers. 1,502,405; July 22.
Sherwin, Reidar T., New York, N. Y. Sand blower for automobiles. 1,502,214; July 22.
Shirk, David A. (See Wilson, Norman R., assignor.)
Shonle, Horace A., and A. Moment, assignors to The Eli Lilly & Company, Indianapolis, Ind. Hydriodide of the ester of 2-phenyl quinoline 4-carboxylic acid. 1,502,275; July 22.
Shrodes, George H., Porterville, Calif. Artificial limb. 1,502,593; July 22.
Shroyer, Jacob L., Oak Park, Ill. Grid for gas-burning broilers. 1,502,447; July 22.
Shulman, Harry L., assignor to Levy Shulman & Company, Inc., New York, N. Y. Shipping box. 1,502,162; July 22.
Siebert, Anna G., Reno, Nev. Baby harness. 1,502,276; July 22.
Siemens & Halske, Aktiengesellschaft. (See Schottky, Walter, assignor.)
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Reichel, W., and Gscheidlen, assignors.)
Silaj, Frank A., Chicago, Ill. Inkwell. Des. 65,306; July 22.
Sill Stove Works. (See Reck, Maurus C., assignor.)
Simmons, George P., assignor to Horrocks Desk Company, Herkimer, N. Y. Lubricator. 1,502,406; July 22.
Simonson, Leo B., New York, N. Y. Shampoo liquid fountain for hairdressing parlors. 1,502,352; July 22.
Simonson, Leo B., New York, N. Y. Means for illuminating booths. 1,502,353; July 22.
Singer Manufacturing Company, The. (See Gatchell, George S., assignor.)
Singer Manufacturing Company, The. (See Ringe, John C., assignor.)
Sisson, Vinton E., assignor to W. P. Murphy, Chicago, Ill. Corrugated-metal end structure for cars. 1,502,354; July 22.
Sisson, Vinton E., assignor to Union Metal Products Company, Chicago, Ill. Corrugated wall plate. 1,503,355; July 22.
Skidmore, Benjamin, jr., Chicago, Ill. Tank or liquid receiver. 1,502,127; July 22.
Sliwonik, Chester. (See Johnson, A. J., and Sliwonik.)
Smith, Albert W., Los Angeles, Calif. Turbogenerator. 1,502,065; July 22.
Smith, Amos H., Brooklyn, assignor to American Bank Note Company, New York, N. Y. Numbering machine. 1,502,128; July 22.
Smith, August J., Chicago, Ill. Tongs. 1,502,356; July 22.
Smith, Edward J., assignor to Mrs. M. E. Smith, Cleveland, Ohio. Music stand and light support. 1,502,357; July 22.
Smith, Edwin C., et al., executors. (See Wardwell, Simon W.)
Smith, Henry O. (See Howlett, W. T., and Smith.)
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,501,973; July 22.
Smith, Mrs. Mary E. (See Smith, Edward J., assignor.)
Smith, Wayne L., Columbus, Ohio, Traction device. 1,502,407; July 22.
Smith, William A., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Oiler for pneumatic tools. 1,502,066; July 22.
Smith, William A., Detroit, Mich., assignor to Ingersoll-Rand Company, Jersey City, N. J. Shank and bit punch. 1,502,648; July 22.
Smith, Winfield D., Deal, N. J., assignor to Knickerbocker Silver Company, Port Jervis, N. Y. Metal border strip for a dish or similar article. Des. 65,307; July 22.
Sohst, Martin A., San Francisco, Calif. Clamp. 1,502,215; July 22.
Sorensen, William E., New Orleans, La. Liquid-measurer and can filler. 1,502,408; July 22.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glass-circulating mechanism. 1,502,068; July 22.
Speidel, Robert, Calmbach, Wildbad, Germany. Device for neutralizing pickled nourishments and fodder. 1,502,409; July 22.
Speiden, Theodore, Chicago, Ill. Universal circular arc template. 1,502,277; July 22.
Spiva, Giles F., assignor to Ideal Speed Control, Inc., Spokane, Wash. Speed control. 1,502,594; July 22.
Sprague, Frank N., Holyoke, Colo. Combined stabilizer and shock absorber. 1,502,595; July 22.
Sprague, William P., San Anselmo, Calif. Nasal douche. 1,502,163; July 22.
Spring, C. G., Company, The. (See Girl, C., and Dunston, assignors.)
Spring Stopper Company. (See Glaspey, Warren, E., assignor.)
Stalder, Merle D., Lincoln, Nebr. Trolley. 1,502,596; July 22.
Standard Corporation, The. (See Roffy, Joseph T., assignor.)
Standard Development Company. (See Howard, Frank A. and A. B., assignors.)
Standard Oil Company. (See Scharpenberg, C. C., and Gates, assignors.)
Standard Plastering System. (See Walper, Curry O., assignor.)
Starmann, George H., and H. Lindenberger, Chicago, Ill., assignors to U. S. Reduction Co. Melting scrap metal and recovering by-products therefrom. 1,502,129; July 22.
Stebler, Fred, assignor to Stebler Parker Co., Riverside, Calif. Hand truck. 1,502,067; July 22.
Stebler Parker Co. (See Piper, Alonzo S., assignor.)
Stebler Parker Co. (See Stebler, Fred, assignor.)
Steenstrup, Christian, Schenectady, N. Y., assignor to General Electric Company. Apparatus for automatic arc welding. 1,502,489; July 22.
Stefan, Jacob, jr., Chicago Heights, assignor, by mesne assignments, to Inland Steel Company, Chicago, Ill. Fence. Re15,878; July 22.
Stevens, William L., Elgin, Nebr. Bee trap. 1,502,278; July 22.
Stewart, Alonzo L., Rushville, Ind. Corn-turner attachment for grain drills. 1,502,279; July 22.
Still, Firm of Carl. (See Kuhn, Arthur, assignor.)
Stillwaggon, John H., Richmond Hill, N. Y. Standpipe cap. 1,502,444; July 22.
Stocking, Milton D., Lindenwood, Ill. Hopper attachment for harvesters. 1,501,974; July 22.
Stokes, Oscar E., Streator, Ill. Automatic safety clutch. 1,502,358; July 22.
Storer, George B., jr. (See Grob, William C., assignor.)
Strasser, Leopold, New York, N. Y. Wrist-watch case. Des. 65,308; July 22.
Strasser, Leopold, New York, N. Y. Wrist-watch case. Des. 65,309; July 22.
Strasser, Leopold, New York, N. Y. Wrist-watch case. Des. 65,310; July 22.
Strasser, Leopold, New York, N. Y. Wrist-watch case. Des. 65,311; July 22.
Straub, Albert J., Fresno, Calif. Bag holder. 1,502,164; July 22.
Strehlenert, Robert W., Nol, Sweden. Building material and manufacturing the same. 1,501,975; July 22.
Stromgren, Charles D., Los Angeles, Calif. Piston ring. 1,502,445; July 22.
Sturges, Charles L., Claremont, Calif. Flushing apparatus. 1,502,165; July 22.
Sun Rise Lamp Mfg. Co. (See Lipsky, Norman, assignor.)
Svejkovsky, William, Oklahoma City, Okla. Corncutter. 1,502,069; July 22.
Swindler, Robert M., Ottawa, and G. L. Bradshaw, Topeka, Kans. Horse collar. 1,501,928; July 22.
Symmons, Samuel J., San Francisco, Calif. Dental swaging device. 1,502,446; July 22.
Tack, William G., Garrettsville, Ohio. Ladder attachment. 1,502,490; July 22.
Tanner, Inos B., assignor to Jos. E. Nelson & Sons, Chicago, Ill. Liquid-treating apparatus. 1,502,448; July 22.
Tasker, William A., Vindex, Md. Bracket. 1,502,280; July 22.
Taylor, Bayard E., Oak Park, Ill. Vehicle door lock. 1,502,359; July 22.
Taylor, Harry E., Holland, Pa. Bag holder. 1,502,597; July 22.
Taylor-Wharton Iron and Steel Company. (See Jordan, R. D., and Hall, assignors.)
Technicolor Motion Picture Corporation. (See Wescott, William B., assignor.)
Teegan, Harry, Des Moines, Iowa. Auxiliary air-intake mechanism. 1,502,410; July 22.
Ternstedt Manufacturing Company. (See Edgar, Frank M., assignor.)
Testa, John, St. Paul, Minn. Toy bank. Des. 65,312; July 22.
Texas Company, The. (See Faircloth, G. E., and Moseley, assignors.)
Thoma, Walter, assignor to E. W. Bliss Company, Brooklyn, N. Y. Clutch. 1,502,449; July 22.
Thompson, Nathaniel A., Kansas City, Kans. Waterproofing for cloth. 1,502,598; July 22.
Threadgill, Wilmer, Laredo, Tex. Machine for picking cotton. 1,502,216; July 22.

Timmons, Samuel E., Lawton, Okla. Knockdown toy. 1,502,599; July 22.
Tin Decorating Company of Baltimore, The. (See Cady, Harrison, assignor.)
Tin Decorating Company of Baltimore, The. (See Connor, Martha H., assignor.)
Titusville Forge Co. (See Montgomery, Gustavus A., assignor.)
Tobin, Charles S., Miami, Fla. Phonograph. 1,502,532; July 22.
Tobler, Ernest, Brunswick, Germany. Combination lock. 1,502,411; July 22.
Tolle, Heinrich, Villingen, Baden, assignor to Deutsche Hollerith Maschinen Gesellschaft m. b. H., Berlin, Germany. Printing tabulating machine. 1,502,360; July 22.
Tone, Frank J., assignor to The Carborundum Company, Niagara Falls, N. Y. Oven or furnace. 1,502,070; July 22.
Townsend, George H., Bronxville, N. Y. Temperature indicating and regulating means for engine-cooling systems. 1,502,071; July 22.
Trace, Russell A. (See Sheppard, O., jr., and Trace.)
Travis, Homer H., Columbus, Ohio. Headlight attachment. 1,502,072; July 22.
Treger, Aron S., Independence, Kans. Alarm-clock mechanism. 1,502,491; July 22.
Triplett, Armstead E., Dallas, Tex. Burial vault. 1,502,217; July 22.
Trippe, William, Holstein, Mo. Grain binder. 1,501,929; July 22.
Troupe, Calvin F., executor. (See Troupe, Hattie H.)
Troupe, Hattie H., deceased, Relay, by C. F. Troupe, executor, Relay, Md., assignor to Service Star Legion, Incorporated, Baltimore, Md. Badge or similar article. Des. 65,313; July 22.
Trumbull Electric Manufacturing Company, The. (See Leppert, Henry E., assignor.)
Turner, Charles H., assignor to Osgood Bradley Car Company, Worcester, Mass. Car ventilator. 1,502,412; July 22.
Turner, George, Union Township, Crawford County, Pa. Drawn vehicle. 1,502,281; July 22.
Turner, Richard G., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Weft-detecting mechanism. 1,502,413; July 22.
Tyler, W. S., Co., The. (See Disbro, Roger W., assignor.)
Umbenhower, Oras T., Garrett, Ind. Screen for automobile headlights. 1,502,282; July 22.
Underwood Typewriter Company. (See Doody, John E., assignor.)
Underwood Typewriter Company. (See McBrien, Harry T., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Union Metal Products Company. (See Sisson, Vinton E., assignor.)
Union Paper Company. (See Watrous, Isaac A., assignor.)
Union Special Machine Company. (See Onderdonk, L., and Wohlpart, assignors.)
Union Switch & Signal Company, The. (See Vanatta, Frank T., assignor.)
United Shoe Machinery Corporation. (See Bertrand, Frederic E., assignor.)
United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)
United States Chain and Forging Company. (See Rehfuss, Martin O., assignor.)
U. S. Reduction Co. (See Starmann, G. H., and Lindenberger, assignors.)
Utilities Development Corporation. (See Harris, Barnett W., assignor.)
Utz, John G. (See Girl, C., and Utz.)
V. L. Oil Processes, Limited. (See Lucas, Owen D., assignor.)
Vachier, Rafael, Baton Rouge, La. Carbonizing and revivifying retorts. 1,502,600; July 22.
Vanatta, Frank T., Mill Valley, Calif., assignor to The Union Switch & Signal Company, Swissvale, Pa. Signal. Re15,879; July 22.
Van Ballegooijen, George, Zion, Ill. Heater. 1,502,601; July 22.
Van Hook, Charles F., assignor to The Watson Machine Company, Paterson, N. J. Locking device for spools. 1,502,218; July 22.
Van Valkenburg, Hermon L., and F. W. Magin, assignors to Industrial Controller Company, Milwaukee, Wis. Motor starter. 1,502,361; July 22.
Vaudreuil, John, Milwaukee, Wis. Dishwasher. 1,502,131; July 22.
Vergés, Juan B., Buenos Aires, Argentina. Driving gear for tractors and the like. 1,501,930; July 22.
Vester, Alfred, Sons, Inc. (See Howell, Hamilton T., assignor.)
Vickers Limited. (See Lucas, Owen D., assignor.)
Victor Chemical Works. (See Mathias, Lewis D., assignor.)
Vidack, John B., Chicago, Ill. Vehicle spring. 1,502,602; July 22.
Vitek, Marie, Maywood, Ill. Clamp. 1,502,362; July 22.
Voss, Johann H. H., New York, N. Y. Valve spring. 1,502,363; July 22.
Wagner, Bernard P., assignor to The Wagner Manufacturing Company, Sidney, Ohio. Cooking utensil. 1,502,073; July 22.
Wagner Manufacturing Company, The. (See Wagner, Bernard P., assignor.)
Walden, Stanley F., West Newton, Mass. Tire carrier. 1,501,976; July 22.
Wallace, Charles F., Westfield, N. J. Carburetor. 1,502,219; July 22.
Walper, Curry O., assignor to Standard Plastering System, Detroit, Mich. Composition board. 1,502,603; July 22.
Wardwell, Simon W., deceased, Providence, R. I.; C. V. J. Christensen, E. C. Smith, A. A. Armington, and W. W. Bardsley, executors. Bobbin winder. 1,502,074; July 22.
Warne, Frederick C., Mansfield, Ohio. Lock nut. 1,502,492; July 22.
Warren Clock Company. (See Warren, Henry E., assignor.)
Warren, Henri B. (See Mojonnier, J. J., Phillips, and Warren.)
Warren, Henry E., assignor to Warren Clock Company, Ashland, Mass. Time-indicating apparatus. 1,502,493; July 22.
Warren, Henry E., Ashland, Mass., assignor to Warren Clock Company. Time-indicating apparatus. 1,502,494; July 22.
Warren, Lewis W., administrator. (See Mojonnier, J. J., Phillips, and Warren.)
Washuk, John, Detroit, Mich. Concealed trouser-supporting belt. 1,502,414; July 22.
Waterman, Arthur, East Orange, N. J., assignor to Edward V. Hartford, Inc., New York, N. Y. Shock absorber. 1,502,364; July 22.
Watrous, Isaac A., Bridgeport, Conn., assignor to Union Paper Company, New York, N. Y. Paper-box machinery. 1,502,220; July 22.
Watson Machine Company, The. (See Van Hook, Charles F., assignor.)
Waxman, Samuel B., assignor to L. Greif & Bro. Incorporated, Baltimore, Md. Trousers. 1,502,533; July 22.
Weaver, Earl L., assignor to The Goshen Manufacturing Company, Goshen, Ind. Ladder. 1,501,977; July 22.
Weaver, Floyd C., Washington, D. C. Gauge-block form. 1,502,075; July 22.
Webb, Ernest H., assignor to The Webb Wire Works, New Brunswick, N. J. Friction clutch. 1,501,978; July 22.
Webb Wire Works, The. (See Webb, Ernest H., assignor.)
Webber, George M. (See Clear, C. J., and Webber.)
Webster, Paul W. (See Boynton, V. K., and Webster.)
Weddle, Caleb S., Casper, Wyo. Adjustable brace. 1,501,931; July 22.
Weinberg, Charles, Brooklyn, N. Y. Automobile fender. 1,502,495; July 22.
Weinrich, Dorothea J. E., executrix. (See Weinrich, Moriz.)
Weinrich, Moriz, deceased, New York, N. Y.; D. J. E. Weinrich, executrix. Revivifying carbonaceous filtering mediums. 1,502,076; July 22.
Weiss, Charles, Lansdale, Pa., assignor to Central Radiator Company, New York, N. Y. Gas burner. 1,502,604; July 22.
Weitkamp, Aquasie E., New York, N. Y. Container. 1,502,166; July 22.
Welch Brothers Company. (See Welch, James G., assignor.)
Welch, James G., assignor to Welch Brothers Company, North Chicago, Ill. Milk-bottle holder. 1,502,322; July 22.
Welcker, Paul H., assignor to Brown & Bigelow, St Paul, Minn. Desk file and tray. 1,502,605; July 22.
Wells, Robert L., and F. Buckner, Chicago, Ill. Plant picker. 1,502,612; July 22.
Wentland, Andrew H., et al. (See Graham, David M., assignor.)
Wescott, William B., Wellesley, assignor, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Cinematographic machine. 1,502,077; July 22.
Wescott, William B., Wellesley, assignor, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Lens system. 1,502,078; July 22.
Western Electric Company. (See Fry, Thornton C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Allen, Robert C., assignor.)
Westinghouse Electric and Manufacturing Company. (See Morgan, David W. R., assignor.)
Westinghouse Electric and Manufacturing Company. (See Schmidt, Henry F., assignor.)
Westinghouse Gear and Dynamometer Company. (See Allen, Robert C., assignor.)
Westinghouse Gear and Dynamometer Company. (See Ehrhart, Raymond N., assignor.)
Westinghouse Gear & Dynamometer Company. (See Hodgkinson, Francis, assignor.)
Westling, Eric H., Redwood City, assignor to E. Winship, San Francisco, Calif. Making lead nitrate and hydrated manganese dioxide. 1,502,079; July 22.

Weston, Frederick T., London, England. Laminated spring. 1,502,167; July 22.
Wheeler Condenser & Engineering Company. (See Lonsdale, William, assignor.)
Wheeling Stamping Company. (See Edwards, Alonzo L., assignor.)
Whelan, Eugene B., Omaha, Nebr. Locomotive drifting valve. 1,502,283; July 22.
Whelan, Frank J., Brooklyn, N. Y. Carton. 1,502,606; July 22.
Whitman, Charles F., Detroit, Mich. Making bolt blanks. 1,502,221; July 22.
Wicks, John, assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,502,163; July 22.
Wilcox & Gibbs Sewing Machine Co. (See Merritt, Arthur A., assignor.)
Williams, David C., Medfield, Mass. Combined table and radiocabinet. Des. 63,514; July 22.
Williams, David C., Medfield, Mass. Radiotable. Des. 65,315; July 22.
Williams, David C., Medfield, Mass. Radiocabinet. Des. 65,316; July 22.
Williams, J. B., Company, The. (See Williams, Philip K., assignor.)
Williams, Philip K., assignor to The J. B. Williams Company, Glastonbury, Conn. Shaving-stick container. 1,502,496; July 22.
Williams, Raymond R. (See Hill, G. E., and Williams.)
Willson, Robert W., deceased, Cambridge, Mass.; A. H. Brooks, administrator. Optical instrument. 1,501,979; July 22.
Wilson, Albert A., Minneapolis, Minn. Device for automatically controlling the temperature of automobile radiators. 1,501,932; July 22.
Wilson, Albert A., Minneapolis, Minn. Device for automatically controlling the temperature of cooling systems of internal-combustion engines. 1,501,933; July 22.
Wilson, Bertram E., assignor of one-half to J. R. Haupenthal, Rochester, N. Y. Game of skill. 1,502,363; July 22.
Wilson, Don C., East Orange, N. J. Axle pulley for car lighting. 1,502,080; July 22.
Wilson, Fred D., and L. S. Burns, Harvey, Ill., assignors to Austin Manufacturing Co., Chicago, Ill. Highway-maintenance machine. 1,502,081; July 22.
Wilson, Fred D. (See Beatty, W. T., Davis, and Wilson.)
Wilson, James S., Scranton, Pa. Sectional grate bar. 1,502,284; July 22.
Wilson, Norman R., Belleville, assignor to D. A. Shirk, Glen Ridge, N. J. Precipitating an insoluble sulphide from a soluble sulphosalt. 1,502,285; July 22.
Wimmer, Karl H., Bremen, Germany, assignor to Coffee Products Corporation, New York, N. Y. Preparing caffeine-free coffee beans. 1,502,222; July 22.
Winchester Repeating Arms Company. (See Humeston, Frederick L., assignor.)
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-building machine. 1,502,082; July 22.
Winn, Chester B., Buffalo, N. Y. Artificial leg. 1,502,415; July 22.
Winship, Emory. (See Westling, Eric H., assignor.)
Wireless Specialty Apparatus Company. (See Macpherson, Byron, assignor.)
Wise, Solomon, Cincinnati, Ohio. Steering-wheel lock. 1,501,934; July 22.
Wohlpart, August J. (See Onderdonk, L., and Wohlpart.)
Wong, Harry, Duluth, Minn. Alarm clock. 1,501,935; July 22.
Wood, Logan T., Milwaukee, Wis. Vehicle body-dumping apparatus. 1,502,534; July 22.
Wood, William H., South Euclid, Ohio. Respirator. 1,502,450; July 22.
Wood, William H., South Euclid, Ohio. Respirator. 1,502,451; July 22.
Wood, William H., South Euclid, Ohio. Lamp. 1,502,452; July 22.
Wood, William H., South Euclid, Ohio. Headlight. 1,502,453; July 22.
Wood, William H., South Euclid, Ohio. Lamp. 1,502,454; July 22.
Wood, William H., South Euclid, Ohio. Storage battery. 1,502,455; July 22.
Worthington Pump and Machinery Corporation. (See Hicks, George C., jr., assignor.)
Worthington Pump and Machinery Corporation. (See Lucke, Charles E., assignor.)
Worthington, Roland B., assignor to Miami Manufacturing Company, Miami, Fla. Casement-window operator. 1,502,132; July 22.
Wreen, Henry B. P., and A. S. O'Donoghue, Cleveland, Ohio. Overhead electrical conductor system. Re15,976; July 22.
Wright, George, Aurora, Colo. Game. 1,502,607; July 22.
Wright, James A., Chicago, Ill. Die plate for dental bridgework. 1,502,366; July 22.
Wright, Parvin. (See Gerrard, A. J., and Wright.)
Young, Helen B., New York, N. Y. Baby-blanket harness. 1,502,608; July 22.
Young, Valedo M., Chicago, Ill. Method of and means for picking fowl and the like. 1,502,535; July 22.
Zaccaria, Luigi. (See Guerrini, P., and Zaccaria.)
Zoelly, Heinrich, Zurich, Switzerland. Lubricating device for toothed gearings. 1,502,083; July 22.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 22D DAY OF JULY, 1924.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accelerator, Foot. N. W. Peek. 1,502,523; July 22.
Adding machine. M. Lebeis. 1,502,388; July 22.
Adjustable brace. C. S. Weddle. 1,501,931; July 22.
Adjusting and locking apparatus. F. Koenigkramer. 1,502,001; July 22.
Agricultural implement. L. A. Riedesel. 1,502,529; July 22.
Air-brake apparatus. S. G. Neal. 1,502,519–21; July 22.
Air ejector. D. W. R. Morgan. 1,502,478; July 22.
Air-intake mechanism, Auxiliary. H. Teegan. 1,502,410; July 22.
Airship. M. W. Adkins. 1,502,084; July 22.
Alarm: *See*—
Fire alarm.
Alcohol, Purifying and deodorizing isopropyl. M. D Mann, jr. 1,502,149; July 22.
Alloy for bearing metals and using same, Hardening. R. H. Evans. 1,502,425; July 22.
Alloy, Nickel. N. V. Hybinette. 1,501,906; July 22.
Anæsthetic apparatus. J. A. Heidbrink. Re15,873; July 22.
Animal life, Apparatus for destroying. D. B. Mackie. 1,501,958; July 22.
Antiskid device for vehicle wheels. A. Serafini. 1,502,488; July 22.
Arc template, Universal circular. T. Speiden. 1,502,277; July 22.
Ash tray. C. F. Gaunt. Des. 65,262; July 22.
Ash tray or similar article. B. F. Freeble. Des. 65,261; July 22.
Assorting machine, Agricultural. C. B. Rowland. 1,502,059; July 22.
Auto pressure brake. C. J. McNerny. 1,502,580; July 22.
Automobile bumper. C. Girl. Des. 65,266–9; July 22.
Automobile bumper. C. Girl and W. E. Dunston. Des. 65,264–5; July 22.

Plant puller. S. Hagopian. 1,502,246; July 22.
Plate or similar article. H. Guenthermann. Des. 65,271; July 22.
Plow. Lister. A. C. Lindgren. 1,501,953; July 22.
Plow-operating apparatus. C. S. Matthews. 1,501,960; July 22.
Poison applier. F. G. Asbill. 1,502,539; July 22.
Poison indicator. H. Fleisher. 1,502,620; July 22.
Post: *See*—
Back-up post.
Potato digger. W. Johnston. 1,502,570; July 22.
Potato planters, Feeding mechanism for. N. E. Bunting. 1,501,941; July 22.
Poultry feeder. J. Booth. 1,502,171; July 22.
Press: *See*—
Dental flask press. Macaroni press.
Presses, Filling apparatus for. F. S. Carver. 1,502,335; July 22.
Primer construction. C. P. Grimes. 1,502,098; July 22.
Printer's gauge. F. M. Hillman. 1,501,947; July 22.
Prospecting or well-drilling device. W. H. Forsyth. 1,502,622; July 22.
Puller: *See*—
Plant puller. Tack puller.
Spike puller. Wheel puller.
Pulleys, Cable guard for grooved. M. Pastore. 1,502,208; July 22.
Pump. C. H. Fox. 1,501,987; July 22.
Pump. I. B. Hart. 1,502,470; July 22.
Pump. G. C. Hicks, jr. 1,502,195–6; July 22.
Pump. G. E. McCracken. 1,502,390; July 22.
Pump. H. N. Schofield. 1,501,922; July 22.
Pump for wells, Air. J. B. Kennedy. 1,501,951; July 22.
Pump or motor. W. E. Magie and W. Ferris. 1,502,310; July 22.
Pump, Pneumatic. J. L. Latta. 1,502,253; July 22.
Pump screen. M. R. Donnallan. 1,502,552; July 22.
Punch-press guard. F. M. Edgar. 1,502,023; July 22.
Punch, Shank and bit. W. A. Smith. 1,502,648; July 22.
Rack: *See*—
Automobile luggage rack.
Radiator. J. M. Fedders. 1,502,301; July 22.
Radiators, Apparatus for testing and repairing. J. F. Dozier. 1,502,553; July 22.
Radio cabinet. D. C. Williams. Des. 65,316; July 22.
Radio mast seat. H. C. Hanford and M. H. Lang. 1,501,998; July 22.
Radio signaling apparatus. G. H. Clark. 1,502,460; July 22.
Radiotable. D. C. Williams. Des. 65,315; July 22.
Rail brace. J. G. Mueller. 1,502,581; July 22.
Railway brake beams, Strut for. S. A. Crone. 1,501,899; July 22.
Railway ties, Apparatus for handling. R. S. Hurley. 1,502,568; July 22.
Range oven, Electric-. R. H. MacInnes. 1,502,392; July 22.
Razors, Skin smoothing and stretching device for safety. R. J. Christy. 1,502,615; July 22.
Reamer, Adjustable. O. Kylin. 1,502,574; July 22.
Receptacle, Metal. C. L. Moorman. 1,502,112; July 22.
Reel: *See*—
Tape reel.
Reel support. D. Nasta. 1,502,518; July 22.
Reflector. W. Cline. 1,502,617; July 22.
Refrigerator. J. Schulde. 1,502,064; July 22.
Release rigging. T. H. Goodnow and W. S. Schroeder. 1,502,306; July 22.
Respirator. W. H. Wood. 1,502,450–1; July 22.
Retort, Carbonizing and revivifying. R. Vachler. 1,502,600; July 22.
Reversing mechanism. G. C. Martin. 1,502,150; July 22.
Rim-attaching table. C. G. Anderson. 1,501,980; July 22.
Rim, Demountable. A. C. Hargrave. 1,502,630; July 22.
Rim, Demountable. J. A. McQueen. 1,501,964; July 22.
Rim, Demountable. J. S. Multer. 1,502,516; July 22.
Rim-punching machine, E. J. Grace. 1,502,097; July 22.
Ring: *See*—
Lighting-fixture ring. Piston ring.
Road-roller scraper attachments, Double control for. W. T. Beatty, F. S. Davis, and F. D. Wilson. 1,502,086; July 22.
Rod packing. J. W. Shepard. 1,501,927; July 22.
Roofing, Decorative. H. Abraham. 1,502,003; July 22.
Roundabout. O. F. Olson. 1,502,484; July 22.
Rubber and the like, Machine for cutting. C. Rasmussen. 1,502,120; July 22.
Rule, Leather-estimating slide. M. H. Reymond. 1,501,920; July 22.
Sales rack. W. W. Kelly. Des. 65,278; July 22.
Sand, Method of and apparatus for treating oil. W. McArthur. 1,502,261; July 22.
Sanding machine. J. A. St. Clair. 1,502,130; July 22.
Sandwich dispenser. G. A. Bannister. 1,502,325; July 22.
Sash fastener. S. Segal. 1,502,351; July 22.
Sash, Slidable window. H. E. Campbell. 1,502,644; July 22.
Saw-sharpening machine. E. P. Armstrong. 1,502,085; July 22.
Scale, Automatic. H. C. Schaper. 1,502,443; July 22.
Scoop, Self-weighing. H. Fine. 1,502,181; July 22.
Scoring can bodies, Machine for. S. E. Allerton. 1,501,893; July 22.
Screen: *See*—
Headlight screen. Window screen.
Pump screen.

Screw machine, Automatic. F. P. Glosh. 1,502,467; July 22.
Scrubbing machine, Floor-. S. Magaton. 1,502,148; July 22.
Seal, Open-face sleeve. E. J. Brooks. 1,502,458; July 22.
Seat: *See*—
Radio mast seat.
Sewing machine. J. C. Ringe. 1,501,971; July 22.
Sewing machines, Strip-feeding mechanism for. J. Boston. 1,502,544; July 22.
Sewing machines, Feeding mechanism for. L. Onderdonk and A. J. Wohlpart. 1,501,968; July 22.
Sewing machines, Presser foot for. G. S. Gatchell. 1,501,901; July 22.
Sewing machines, Thread-tensioning means for. A. A. Merritt. 1,502,048; July 22.
Shade, curtain, or awning roller stop. G. D. Hill. 1,502,197; July 22.
Sharpener for drill steels. A. E. Peters and M. S. Parkhill. 1,501,918; July 22.
Sharpeners, Oiling device for drill. A. E. Peters. 1,501,917; July 22.
Shaving-stick container. P. K. Williams. 1,502,496; July 22.
Sheet material, Machine for trimming. J. E. Gartside. 1,502,095; July 22.
Sheet-turning device. J. D. Conti. 1,502,176; July 22.
Shelf support. J. H. Boye. 1,502,288; July 22.
Shell, Inflammable. H. Safford. 1,502,400; July 22.
Shipping box. H. L. Shulman. 1,502,162; July 22.
Shipping container, Knockdown. J. J. Cain. 1,502,334; July 22.
Shock absorber. A. J. Bockwitz. 1,502,231; July 22.
Shock absorber. W. S. Peterson. 1,502,209; July 22.
Shock absorber. A. Waterman. 1,502,364; July 22.
Shock-absorber axle bracket. C. W. Meggenhofen. 1,502,313; July 22.
Shoe tongue. C. M. Haddox. 1,502,429; July 22.
Shoe-tree-forming machine. O. Olson. 1,502,485; July 22.
Shoveling and loading device, Combined. E. T. Kell. 1,502,143; July 22.
Shuttle, Self-threading. J. Northrop. 1,502,397; July 22.
Sign, Advertising. A. C. Ford. Des. 65,258; July 22.
Sign, Advertising. A. R. Lundquist. Des. 65,289; July 22.
Signal: *See*—
Automobile signal. Vehicle signal.
Marine disaster signal.
Signal. F. T. Vanatta. Re15,879; July 22.
Signal-actuating device for dispatch systems. J. A. Bauer. 1,502,327; July 22.
Smoke consumer. W. Petersen and C. D. Miller. 1,502,585; July 22.
Snap hook. J. P. Mattson. 1,501,961; July 22.
Snowplow. F. C. Hayes. 1,502,430; July 22.
Snowplow, Truck. D. A. Sargent. 1,502,591; July 22.
Soap-dispensing machine. I. J. Nelson. 1,502,347; July 22.
Solid particles from a gas stream connecting them, Apparatus for separating. M. W. Carty. 1,502,135; July 22.
Speed control. G. F. Spiva. 1,502,594; July 22.

Well tool. F. I. Getty. 1,502,427; July 22.
Wells, Device for oil and gas. W. H. Lyne. 1,502,106; July 22.
Wells, Whipstock for. F. I. Getty. 1,502,428; July 22.
Wheel: *See*—
Steel wheel. Traction wheel.
Steering wheel.
Wheel. T. R. Hasley. 1,502,632; July 22.
Wheel puller. D. S. Lambert and C. B. Rader. 1,502,103; July 22.
Winding cores, Machine for. L. Scusa. 1,501,921; July 22.
Windmill. J. A. Johanson. 1,502,433; July 22.
Window. C. J. Jackson. 1,502,142; July 22.
Window-control means. W. C. Grob. 1,502,468; July 22.
Window operator, Casement-. R. B. Worthington. 1,502,132; July 22.
Window screen. S. Reel. 1,501,970; July 22.
Windshield wiper. M. J. Rafferty. 1,502,589; July 22.
Wire and rope clamp. K. Arnstein. 1,502,417; July 22.
Wire and rope clamping device. K. Arnstein. 1,502,418; July 22.
Wire bale tie. A. J. Gerrard and P. Wright. 1,502,625; July 22.
Wire fabric. E. L. Benedict. 1,502,012; July 22.
Wire stretcher. G. A. Lovatt. 1,502,389; July 22.
Woolen and silk materials, Electroscopic apparatus for testing the genuineness of. A. Bernini. 1,502,330; July 22.
Workholder. C. G. Casey. 1,502,611; July 22.
Wrench. W. Gordon. 1,501,903; July 22.
Wrench. J. T. McCann. 1,502,044; July 22.
Wrench and manufacturing the same. J. Helwig. 1,502,192; July 22.
Wringer. A. W. Altorfer. 1,502,225; July 22.
Zirconium containing composition and making the same. H. S. Cooper. 1,502,422; July 22.

CLASSIFICATION OF PATENTS

ISSUED JULY 22, 1924.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 2.3: 1,502,346
6: 1,502,505
32: 1,502,014
2— 38: 1,502,481
42: 1,502,000
1,502,436
70: 1,502,614
106: 1,502,533
176: 1,502,202
201: 1,502,160
3— 3: 1,502,563
11: 1,502,415

Adamac, Frank, Laurelton, assignor to R. Felix, New York, N. Y. Base for lamps or the like. Des. 65,317; July 29.
Addograph Company. (See Crawley, Mansfield C., assignor.)
Advance Products Corporation. (See Lippert, A. C., and Sinko, assignors.)
Aggers, Samuel A., Denver, Colo. Hook. 1,502,706; July 29.
Agricola, Herman A., jr., assignor of forty-nine per cent to J. E. Lane, Atlanta, Ga. Attachment for printing presses. 1,503,222; July 29.
Ainsworth, Harry G., Kentland, Ind. Inwardly-operating door-control mechanism. 1,502,707; July 29.
Airgas Burner Company, The. (See Blanchard, Thomas R., assignor.)
Aktiebolaget Gerh. Arehns Mekaniska Verkstad. (See Ekström, G. C., Johnson, and Örström, assignors.)
Allain, Jacques, Montreal, Quebec, Canada. Padlock. 1,503,341; July 29.
Allan, William G., assignor to The Toronto Power Company, Limited, Toronto, Canada. Electrode. 1,502,708; July 29.
Allen, John M., St. Johnsbury, Vt. Auto lock. 1,502,933; July 29.
Allgemeine Elektricitäts-Gesellschaft. (See Münzinger, Friedrich, assignor.)
Alsted, Edward P., Truesdell, Wis. Ring-wheel chuck. 1,503,102; July 29.
Alvord, Earl B., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Making sodium sulphide. 1,503,013; July 29.
Amend, George C., Des Moines, Iowa. Combined cooler display case and refrigerator. 1,502,972; July 29.
American Arch Company. (See Denney, Guy C., assignor.)
American Lead Pencil Company. (See Kubler, Edwin C., assignor.)
American Narrow Fabric Company. (See Brown, Arnold V., assignor.)
American Saw and Manufacturing Company. (See Ericson, Carl L., assignor.)
American Telephone and Telegraph Company. (See Espenschied, Lloyd, assignor.)
American Tube and Stamping Company, The. (See Armstrong, Walter G., assignor.)
American Voith Contact Company. (See Priem, Paul, assignor.)
American Wiremold Company. (See Murphy, Daniel H., assignor.)
Amey, John, Long Island City, N. Y., and F. W. Becker, Rutherford, N. J. Luggage carrier. 1,503,083; July 29.
Anderson, Harry T. (See Hausson, Soren, assignor.)
Anderson Manufacturing Company. (See Anderson, Oscar F., assignor.)
Anderson, Oscar F., Somerville, assignor to Anderson Manufacturing Company, Everett, Mass. Spring cover for automobiles. 1,502,649; July 29.
Angelillo, Salvatore, Plantsville, Conn. Tire chain. 1,503,292; July 29.
Anschutz, John, Washington, D. C. Bread toaster. 1,502,894; July 29.
Ansco Photoproducts, Inc. (See Clark, E. C., and Polhemus, assignors.)
Antilotti, William A., and E. C. Jones, Atlanta, Ga. Demountable-rim lug. 1,503,342; July 29.
Archer, John F., Trinidad, Colo. Automobile signal. 1,503,103; July 29.
Armstrong, Edwin H. (See Pupin, M. I., and Armstrong.)
Armstrong, James P., and J. V. Armstrong, Lancaster, N. Y. Clock escapement. 1,503,104; July 29.
Armstrong, Joseph V. (See Armstrong, James P. and J. V.)
Armstrong, Percy A. E., Londonville, assignor to Ludlum Steel Company, Watervliet, N. Y. Carburizing box and the like and making same. 1,502,973; July 29.
Armstrong, Walter G., assignor to The American Tube and Stamping Company, Bridgeport, Conn. Lifting jack. 1,503,343; July 29.
Arnstein, Karl, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Skeleton framework construction for airships and the like. 1,503,293; July 29.
Aronson, Louis V., Newark, N. J. Cigar clipper and lighter. 1,502,974; July 29.
Ashe, William O., Yonkers, assignor to Nathan Manufacturing Company, New York, N. Y. Gauge cock. 1,502,650; July 29.
Assmann, Frank A., jr., Chicago, Ill., assignor to Continental Can Company, Syracuse, N. Y. Strip-sealed container. 1,503,256; July 29.
Astrom, John L., assignor to Fort Wayne Engineering & Mfg. Co., Fort Wayne, Ind. Mounting for deep-well-pump heads. 1,502,651; July 29.
Atlas Railway Signal Company. (See Loughridge, Matthew H., assignor.)
Austin, Charles U. (See Parker, F. B., and Austin.)
Autographic Register Co. (See Oliver, Walter E., assignor.)
Automatic Electric Company. (See Ray, Arthur J., assignor.)
Babcock, Fletcher F., Parsons, Kans. Metal-boring tool. 1,502,652; July 29.
Bailey, Prentiss, New Hartford, N. Y. Baler. 1,503,183; July 29.
Bailey, Stephen L., Bristol, England. Saddle. 1,502,975; July 29.
Bain, Forée, La Grange, Ill. Wrench. 1,503,084; July 29.
Baird, Andrew H., Edinburgh, Scotland. Universal clamp. 1,503,344; July 29.
Baird, Hansel S., Denver, Colo. Back for brushes. 1,503,014; July 29.
Bakelite Corporation. (See Turkington, Victor H., assignor.)
Baleker, Martin, assignor to Marquette Tool & Manufacturing Co., Chicago, Ill. Pressure pad. 1,503,105; July 29.
Baldwin, Clarence K., Chicago, Ill., assignor to Robins Conveying Belt Company. Apparatus for quenching coke. 1,502,977; July 29.
Baldwin, Clarence K., Chicago, Ill., and M. J. Pos, New York, N. Y., assignors to Robins Conveying Belt Company. Troughing support for conveyer belts. 1,502,976; July 29.
Balfour, Guthrie & Company. (See Jones, Paul R., assignor.)
Barber, William J., East Cleveland, assignor to The E. & N. Manufacturing Company, Cleveland, Ohio. Child's vehicle. 1,502,838; July 29.
Barber, William J., East Cleveland, assignor to The E. & G. Manufacturing Company, Cleveland, Ohio. Child's vehicle. 1,502,839; July 29.
Barene, Otto E., Brooklyn, N. Y. Triple-mast coal hoist. 1,503,106; July 29.
Barnard, John A., Philadelphia, Pa. Jet agitator for fuel-feeding devices. 1,502,760; July 29.
Barneby, Oscar L., Cleveland, Ohio. Apparatus for treating gases. 1,502,895; July 29.
Barneby, Oscar L., Detroit, Mich. Utilization of vegetable materials and manufacture of gas adsorbent and decolorizing carbons. 1,502,896; July 29.
Barneby, Oscar L., Columbus, Ohio. Apparatus for separating and recovering gases. 1,502,897; July 29.
Barnett, Abraham B., Roanoke, Va. Means for testing track circuits. 1,502,934; July 29.
Barnstead, Sidney G., Cambridge, Mass. Receptacle cover. 1,503,015; July 29.
Bart, Belle, New York, N. Y. Astrological chart. 1,502,761; July 29.
Barton, George A., Kansas City, Mo. Bottle holder. 1,503,016; July 29.
Baruch, Samuel, New York, N. Y. Brassière. 1,502,762; July 29.
Basky, Anton, New York, N. Y. Pointing machine. 1,503,017; July 29.
Bassler, Robert E., Brooklyn, N. Y. Aircraft-arresting device. 1,502,653; July 29.
Bastian-Blessing Company, The. (See Bastian, Charles L., assignor.)
Bastian, Charles L., assignor to The Bastian-Blessing Company, Chicago, Ill. Dispensing apparatus. 1,503,107; July 29.

Bauer, Frederick, Milwaukee, Wis. Automobile signal. 1,503,108; July 29.
Beard, Charles L., Chester, Pa. Electric clock. 1,502,840; July 29.
Beard, John E., Kansas City, Mo. Automobile brake. 1,503,412; July 29.
Beaver Products Company, The. (See Robinson, Charles G., assignor.)
Beck, Albert, assignor to McGill Metal Products Company, Chicago, Ill. Change maker. 1,502,709; July 29.
Beck, Albert, Chicago, Ill., assignor to McGill Metal Products Company. Change carrier. 1,502,710; July 29.
Becker, Frederick W. (See Amey, John, assignor.)
Bee, Francis X., Philadelphia, Pa. Coin detector for vending machines. 1,503,223; July 29.
Beechler, Arthur J., and G. L. McKay, Detroit, Mich. Screen and storm window. 1,503,018; July 29.
Behn, Guido G., assignor to Essex Motors, Detroit, Mich. Speedometer drive. 1,502,841; July 29.
Behrman, Alfred H. (See Phoenix, F. I., and Behrman.)
Beiswenger, Jacob C., Jackson, Mich. Cutout for exhaust pipes. 1,502,842; July 29.
Bell & Howell Company. (See Howell, Albert S., assignor.)
Bell & Howell Company. (See McNabb, Joseph H., assignor.)
Bellocchio, John, New York, N. Y. Window ventilator. 1,503,109; July 29.
Berg, Albert R., Rochester, N. Y. Micrometer gauge. 1,502,806; July 29.
Berg, Frederick O., Spokane, Wash. Tent. 1,502,898; July 29.
Berger, Christian, New York, N. Y. Catalytic heating method and apparatus. 1,502,807; July 29.
Berger, Frank, Stoughton, Wis. Cooking utensil. 1,502,843; July 29.
Berger, Joseph, Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Work-supporting arm for sewing machines. 1,503,258; July 29.
Bergve, Einar, Skolen, near Christiania, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Production of concentrated nitric acid. 1,503,259; July 29.
Berlin, Harry S., assignor to The Victor Rubber Company, Springfield, Ohio. Pneumatic-tire tread. Des. 65,318; July 29.
Bernardini, Samuel F., and P. Della Casse, Cuddy, Pa. Cuff button. 1,502,899; July 29.
Bernstrom, Harry W., Edgewood, R. I. Combined reenforce and leveler. 1,503,148; July 29.
Bingham, Tom, Montreal, Quebec, Canada. Indicator. 1,503,345; July 29.
Bingman, Frederick P., assignor to Fisher Body Corporation, Detroit, Mich. Painting booth. 1,502,844; July 29.
Bingman, Harry B., Robinson, Kans. Attachment for corn shellers. 1,503,149; July 29.
Bishop, William G., Oklahoma City, Okla. Game. 1,503,294; July 29.
Bixler, Lewis S., assignor to Kenton Hardware Co., Kenton, Ohio. Toy auto circus calliope. Des. 65,319; July 29.
Bixler, Lewis S., assignor to Kenton Hardware Co., Kenton, Ohio. Toy auto circus animal cage. Des. 65,320; July 29.
Blache, Walter C., Englewood, N. J. Racket. 1,502,845; July 29.
Blackstone Manufacturing Company. See Oberg, Gunnard A., assignor.)
Blaine, Joseph R., Oak Park, assignor to Miehle Printing Press & Mfg. Co., Chicago, Ill. Portable antioffset device. 1,503,224; July 29.
Blake, Elf J., Buffalo, N. Y., assignor to Gould Coupler Company. Regulator. 1,503,085; July 29.
Blake, Elf J., Buffalo, N. Y., assignor to Gould Coupler Company. Generator suspension. 1,503,086; July 29.
Blanchard, Thomas R., assignor, by mesne assignments, to The Airgas Burner Company, Minneapolis, Minn. Device for controlling the flow of gases. 1,502,654; July 29.
Blore, Bernard W., Norwalk, Conn., assignor to Connecticut Lace Works, Inc. Lace. Des. 65,321; July 29.
Blumer, Edward, Dayton, Ohio. Windshield cleaner. 1,503,346; July 29.
Bohrer, August, Jersey City, N. J. Shade and curtain bracket. 1,502,935; July 29.
Bolton, Wright, jr., New Bedford, and N. M. Paull, Fairhaven, Mass. Ceiling rosette. 1,502,655; July 29.
Bombardi, John, Rosebank, N. Y. Unloading apparatus. 1,503,019; July 29.
Bongers, Arnold H., assignor of one-half to G. Boudou, London, England. Hairdressing appliance. 1,503,295; July 29.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Car roof. 1,502,656; July 29.
Borcherdt, Walter O., Austinville, Va., assignor to The New Jersey Zinc Company, New York, N. Y. Apparatus for trenting pulps. 1,502,657; July 29.
Borroughs, Joseph N., Oakland, Calif. Soap dispenser and container. 1,502,936; July 29.
Boudou, Gaston. (See Bongers, Arnold H., assignor.)
Bousquet, William J., Springfield, Mass., assignor, by mesne assignments, to S. Sisisky, Thompsonville, Conn. Vending machine. 1,503,260; July 29.
Bowen, John M., Newark, N. J. Cleaning implement. 1,503,449; July 29.
Bowman, Wm. I. (See Crawford, James T., assignor.)
Boyd, John S., assignor to John S. Boyd Co., Inc., Williamstown, Mass. Textile fabric. Des. 65,322; July 29.
Boyd, John S., assignor to John S. Boyd Co., Inc., Williamstown, Mass. Textile fabric. Des. 65,323; July 29.
Boyd, John S., assignor to John S. Boyd Co., Inc., Williamstown, Mass. Textile fabric. Des. 65,324; July 29.
Boyd, John S., Co. (See Boyd, John S., assignor.)
Bradley, Edward, Ogden, Ill. Pipe wrench. 1,503,296; July 29.
Bremner, Maurice D. K., Chicago, Ill. Protective envelope for garments. 1,503,460; July 29.
Breon, Cora L. (See Breon, Maurice P., assignor.)
Breon, Maurice P., assignor to C. L. Breon, Newport News, Va. Tire-removing machine. 1,503,225; July 29.
Brigner, Wesley J., Grano, N. Dak. Gate. 1,502,937; July 29.
Briles, Larkin, Davis Creek, Calif. Wrench. 1,502,900; July 29.
Bristow, Bruce A., Toronto, Ontario, Canada. Hydraulic power device. 1,502,901; July 29.
Brockbank, Clarence G., Philadelphia, Pa., assignor to Ross-Taconv Crucible Company. Refractory article and making the same. 1,503,150; July 29.
Broughton, Walter C., Kansas City, Mo. Sectional roof. 1,503,110; July 29.
Broussouse, Fernand L., Paris, France, assignor, by mesne assignments, to The Westinghouse Air Brake Company, Wilmerding, Pa. Compressor of air and other fluids. 1,503,261; July 29.
Brower, Arthur T. (See Clark, E. C., and Brower.)
Brown, Abraham J., Reading, Pa. Charm. Des. 65,325; July 29.
Brown, Arnold V., Worcester, Mass., assignor to American Narrow Fabric Company. Buckle base. 1,503,020; July 29.
Brown, Arthur J., New York, N. Y. Lifting jack. 1,503,087; July 29.
Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Weft feeler for looms. 1,503,413; July 29.
Brown, Charles J., River Falls, Wis. Mechanical toy. 1,503,262; July 29.
Brown, Harold M., assignor to Corona Typewriter Company, Inc., Groton, N. Y. Typewriting machine. 1,503,021; July 29.
Brown, John R., assignor to The Reliance Gauge Column Company, Cleveland, Ohio. Water column. 1,502,808; July 29.
Brown, Lee R., Chickasha, Okla. Cloth-measuring machine. 1,502,902; July 29.
Brown, Robert S., assignor to The New Britain Machine Company, New Britain, Conn. Metal-working machine. 1,503,111; July 29.
Browning, John M., Ogden, Utah. Firearm. 1,502,658; July 29.
Bruhn, Henry F., Herndon, Kans. Attachment for tractors. 1,503,348; July 29.
Brunell, Homer A. (See Burtnett, Everett R., assignor.)
Brunes, August, Pequot, Minn. Ice-cream-can lifter. 1,503,347; July 29.
Brunswick-Balke-Collender Company, The. (See Drost, Thomas, assignor.)
Bryan, George A., Peru, Ind., assignor to Bryan Harvester Company, Inc. Engine mounting for steam-propelled vehicles. 1,502,978; July 29.
Bryan Harvester Company. (See Bryan, George A., assignor.)
Bryant, Harriet C., Potsdam, N. Y. Card-table cover. 1,503,088; July 29.
Bugbee, Lucian W., Indianapolis, Ind. Pencil and making the same. 1,502,763; July 29.
Burnham, George A., Saugus, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Company. Electric switch. 1,503,022; July 29.
Burrows, Charles W., New York, N. Y. Holding attachment for sound receivers. 1,503,226; July 29.
Burtnett, Everett R., assignor of one-half to H. A. Brunell, Los Angeles, Calif. Internal-combustion engine. 1,503,184; July 29.
Burtnett, Everett R., assignor of one-half to H. A. Brunell, Los Angeles, Calif. Piston-valve structure for internal-combustion engines. 1,503,185; July 29.
Buscham, C. A., Mfg. Co. (See Buscham, Christian A., assignor.)
Buscham, Christian A., assignor to C. A. Buscham Mfg. Co., Irvington, N. J. Vanity case. 1,503,112; July 29.
Butler, Frank L., Chicago, Ill. Insulated coupling for electric fixtures. 1,502,938; July 29.
Cadwell, Sidney M., Leonia, N. J., assignor to The Naugatuck Chemical Company. Vulcanizing rubber with condensation products of ammonia and aldehydes as accelerators. 1,503,113; July 29.
Cagle, James G., Marion, Ill. Groundworking member. 1,502,711; July 29.
Cahalane, Daniel C., Hillsdale, N. J. Inkstand. Des. 65,326; July 29.
Calagans, Willie, Gary, Ind. Aeroplane. 1,503,297; July 29.
Callahan, Michael J., New York, N. Y. Ventilating unit. 1,503,089; July 29.

Campbell, Daniel, Philadelphia, Pa. Vehicle lamp 1,503,114; July 29.
Campbell, John A., Carbondale, Ill. Hatrack for automobiles. 1,503,298; July 29.
Campbell, Wilfred, Schenectady, N. Y., assignor to General Electric Company. Steam-turbine rotor and avoiding wave phenomena therein. 1,502,903; July 29.
Campbell, Wilfred, Schenectady, N. Y., assignor to General Electric Company. Elastic-fluid turbine rotor and avoiding tangential buckets vibration therein. 1,502,904; July 29.
Canon, Glen L., Carson, Iowa. Calculator. 1,503,299; July 29.
Carbide and Carbon Chemicals Corporation. (See Curme, Henry R., assignor.)
Carborundum Company, The. (See Tone, Frank J., assignor.)
Carichoff, Eugene R., Schenectady, N. Y., assignor to General Electric Company. Electromagnet. 1,503,090; July 29.
Carichoff, Eugene R., Schenectady, N. Y., assignor to General Electric Company. Magnetic blow-out device. 1,503,091; July 29.
Carlson, Gustav W., assignor to The Eaton Axle & Spring Company, Cleveland, Ohio. Lubrication of automotive vehicle knuckles. 1,502,659; July 29.
Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Making articles of pressed metal. 1,503,023; July 29.
Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Sheet-metal rocker arm and making the same. 1,503,263; July 29.
Carnes, Joseph F., Ceresco, and J. F. Halder, Battle Creek, Mich. Machine for mining or recovering marl and the like. 1,502,660; July 29.
Carr, Edward G., Milwaukee, Wis., assignor to The Lakewood Engineering Company, Cleveland, Ohio. Construction car. 1,502,846; July 29.
Carr Fastener Company. (See Elwell, George H., assignor.)
Carter, Lionel A., St. Louis, Mo. Lathe. 1,503,115; July 29.
Carter, Robert A., jr., Bay Ridge, Brooklyn, N. Y. Method of and apparatus for automatic cleaning and automatic control of mechanical grates. 1,503,092; July 29.
Carver, Ernest E. (See Marrian, H. H. B., and Carver.)
Case, George A., Joplin, Mo. Pneumatic vehicle drive. 1,503,264; July 29.
Casse, Paris D. (See Bernardini, S. F., and Casse.)
Catlin, Robert M., Franklin, N. J., assignor to Catlin Shale Products Company, Wilmington, Del. Shale-distillation apparatus. 1,503,093; July 29.
Catlin Shale Products Company. (See Catlin, Robert M., assignor.)
Celite Company, The. (See Ritchie, Charles F., assignor.)
Chapatte, Julia, Tuxedo Park, N. Y. Automatic hand knitting machine. 1,503,024; July 29.
Chappell, William R. (See Poole, Amos R., assignor.)
Chard, Lodge Y., Newcastle, Ind. Multiple-purpose tool holder. 1,502,712; July 29.
Chase, Elroy A., Northfield, Vt. Granite-working tool. 1,503,026; July 29.
Chassernaux, Emile, Paris, France. Flash-light apparatus. 1,502,939; July 29.
Chicago Pneumatic Tool Company. (See Page, Clarence, assignor.)
Chicago Railway Equipment Company. (See Janus, William, assignor.)
Chipman, Paul, Detroit, Mich. Filing receptacle. 1,503,227; July 29.
Christensen, Christen, assignor to Electrical Engineers Equipment Co., Chicago, Ill. Fuse and mounting. 1,503,228; July 29.
Christiansen, Lawrence P., Iron Mountain, Mich. Two-tooth setter. 1,503,151; July 29.
Cincinnati Butchers' Supply Company, The. (See Schmidt, Oscar C., assignor.)
Citizens of the United States of America. (See Townsend, James S., assignor.)
Clark, Edwin C., Canton, and A. T. Brower, Cleveland, Ohio. Tone modifiers for phonographs. 1,502,764; July 29.
Clark, Ezra C., Binghamton, and J. F. Polhemus, Johnson City, assignors, by mesne assignments, to Ansco Photoproducts, Inc., New York, N. Y. Automatic film-winding camera. 1,503,300; July 29.
Clark, Louis F., Potrerillos, Chile. Treating solutions of metals. 1,503,229; July 29.
Clay, John A., assignor of one-half to R. H. Hull, Miami, Fla. Automobile wrench. 1,503,349; July 29.
Cleary, Thomas J., deceased, and G. F. Quinn, Pittsburgh, Pa.; I. C. Treacy, administratrix. Gas regulator. 1,503,301; July 29.
Closure Service Company, The. (See Dalrymple, Frank M., assignor.)
Cocanari, Silvio, Antwerp, assignor to Gevaert Photo-Producten, N. V., Oude-God, near Antwerp, Belgium. Photographic apparatus. 1,503,302; July 29.
Colgin, Saladine E., Dallas, Tex. Compound for curing and coloring meats. 1,502,905; July 29.
Collier, Barron G., Inc. (See Johnston, Richard A., assignor.)
Collier, David H., Nevins Township, Vigo County, Ind. Vehicle side curtain. 1,503,303; July 29.
Collins, George D., et al. (See Smith, Louie F., assignor.)
Collins, George R., Chicago, Ill. Cosmetic jar. Des. 65,327; July 29.
Collins, Myron, et al. (See Smith, Louie F., assignor.)
Collins, Thomas. (See Cook, J. W., and Collins.)
Collins, Walter H., Summit, N. J. Drinking fountain. 1,502,847; July 29.
Columbia Phonograph Company. (See Feltner, James E., assignor.)
Comiskey, Richard M., Quincy, Ill. Cylinder. 1,502,906; July 29.
Concrete Steel Company. (See Curley, James F., assignor.)
Condit Electrical Manufacturing Company. (See Burnham, George A., assignor.)
Conley, Kurt H., Bridgeport, Conn. Power transmission for electric-current generators. 1,503,116; July 29.
Connecticut Lace Works, Inc. (See Blore, Bernard W., assignor.)
Connors, Cornelius J., Los Angeles, Calif. Auto lock. 1,502,809; July 29.
Conrad, Frank, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Tuning system of antennæ. 1,502,848; July 29.
Constant Heat Pack Corporation. (See Perrault, Oscar L., assignor.)
Continental Can Company. (See Assmann, Frank A., jr., assignor.)
Conwell, L. R. (See Hornecker, George, assignor.)
Cook & Co., Manchester Limited. (See Cook, J. W., and Collins, assignors.)
Cook, John W., Manchester, and T. Collins, Hale, near Manchester, assignors to Cook & Co., Manchester Limited, Manchester, England. Knot-tying apparatus. 1,502,713; July 29.
Coolidge, William D., Schenectady, N. Y., assignor to General Electric Company. X-ray device. 1,502,907; July 29.
Copeland, Robert J., Toronto, Ontario, Canada. Book cover. 1,502,979; July 29.
Corona Typewriter Company, Inc. (See Brown, Harold M., assignor.)
Covert, Martin B., Indianapolis, Ind. Fitting pistons. 1,502,765; July 29.
Covich, Louis D., et al. (See Lee, Harry G., assignor.)
Cox, Herbert T., Long Beach, Calif. Automobile direction indicator. 1,502,940; July 29.
Cozatt, Commodore P., Danville, Ill. Spring wheel. 1,502,908; July 29.
Craig, Emmett T., and C. F. Sills, Memphis, Tenn. Tractor-wheel tread. 1,502,752; July 29.
Cramer, Stuart W., jr., Philadelphia, Pa., assignor to Cramerton Mills, Incorporated. Warp condenser. 1,503,094; July 29.
Cramerton Mills, Incorporated. (See Cramer, Stuart W., jr., assignor.)
Cramp, William, & Sons Ship and Engine Building Company. (See Overn, John, jr., assignor.)
Crawford, Earl A., and G. P. La Mere, Hudson Falls, N. Y. Bib. 1,503,117; July 29.
Crawford, James T., Marigold, assignor of one-half to W. I. Bowman, Bogue Chitto, Miss. Cultivator attachment. 1,503,414; July 29.
Crawley, Mansfield C., Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif. Typewriting machine. 1,503,027; July 29.
Crawley, Mansfield C., Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif. Typewriting machine. 1,503,028; July 29.
Crawley, Mansfield C., Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif. Typewriting machine. 1,503,029; July 29.
Crawley, Mansfield C., Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif. Typewriting machine. 1,503,030; July 29.
Crawley, Mansfield C., Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif. Typewriting machine. 1,503,031; July 29.
Crawley, Mansfield C., Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif. Typewriting machine. 1,503,032; July 29.
Crawley, Mansfield C., Groton, N. Y., assignor to Addograph Company, Los Angeles, Calif. Typewriting machine. 1,503,033; July 29.
Crompton & Knowles Loom Works. (See Ryon, Eppa H., assignor.)
Crumley, James A., assignor of one-third to E. L. Keller, Charleston, W. Va. Pumping rig. 1,502,714; July 29.
Crumley, James A., assignor of one-third to E. L. Keller, Charleston, W. Va. Bull wheel and mounting therefor. 1,502,715; July 29.
Crumley, Le Roy A., New York, N. Y., assignor to The Rogers Silver Plate Co. Lighting-fixture part. Des. 65,328; July 29.
Crumley, Le Roy A., New York, N. Y., assignor to The Rogers Silver Plate Co. Lighting-fixture part. Des. 65,329; July 29.
Cuno, Charles H., assignor to The Cuno Engineering Corporation, Meriden, Conn. Spool construction. 1,502,980; July 29.
Cuno Engineering Corporation, The. (See Cuno, Charles H., assignor.)

Curley, James F., Yonkers, assignor to Concrete Steel Company, New York, N. Y. Insert for concrete construction. 1,502,766; July 29.

Curme, Henry R., Clendenin, W. Va., assignor to Carbide and Carbon Chemicals Corporation. Oxidizing dibenzyl. 1,502,941; July 29.

Currier, Hiram D., Chicago, and G. R. Eaton, Oak Park, assignors to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,503,095; July 29.

Currier, Hiram D., Chicago, and G. R. Eaton, Oak Park, assignors to Kellogg Switchboard and Supply Company, Chicago, Ill. Call-distributing system. 1,503,096; July 29.

Curtis, Kenneth L., New York, N. Y. Refrigerating. 1,503,456; July 29.

Curtis, Kenneth L., New York, N. Y. Refrigerating apparatus. 1,503,457; July 29.

Curtis, Kenneth L., New York, N. Y. Pump. 1,503,458; July 29.

Cutler-Hammer Mfg. Co., The. (See Reed, Harrison P., assignor.)

Cutler-Hammer Mfg. Co., The. (See Stoekle, Erwin R., assignor.)

Cutler, Orlin J. (See Gilbert, Israel B., assignor.)

Dahlberg, C. F. (See Munroe, Treadway B., assignor.)

Dahlberg, C. F. (See Shaw, John K., assignor.)

Dalrymple, Frank M., Brooklyn, N. Y., assignor, by mesne assignments, to The Closure Service Company. Capping machine. 1,503,034; July 29.

Daly, John J., Newton Center, Mass. Shoe. 1,502,716; July 29.

Damon, George B., Belvidere, N. J., assignor of one-half to Vulcan Iron Works, Wilkes-Barre, Pa. Briquetting. 1,503,304; July 29.

Daving, Joseph, Brooklyn, N. Y. Bracelet watch. 1,503,097; July 29.

Davis, John B., Springfield, assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass. Liquid-dispensing apparatus. 1,503,035; July 29.

Davis, Thomas A., assignor of one-half to O. Sims, Paris, Ill. Cuff fastener. 1,503,230; July 29.

Davis, William, Chicago, Ill. Power transmitter. 1,502,767; July 29.

Davis, William R., assignor of one-half to T. Tweddle, Toronto, Ontario, Canada. Safety bank check. 1,502,981; July 29.

Dayton Engineering Laboratories Company, The. (See Hunt, John H., assignor.)

De Clairmont, Adolfo, Toledo, Ohio. Spark plug. 1,502,768; July 29.

Deere & Company. (See Silver, Walter H., assignor.)

Deflassieux, Fleury, Paris, France, assignor to General Electric Company. Asynchronous motor. 1,502,909; July 29.

Delco-Light Company. (See Joy, Henry B., assignor.)

Delco-Light Company. (See McLuen, Charles L., assignor.)

De Leeuw, Adolph L., Plainfield, N. J. Sink trap. 1,503,118; July 29.

Delevoye, Robert E. C., Paris, and E. A. F. Dumaine, Neuilly-sur-Seine, assignors to Société Anonyme des Anciens Etablissements Hotchkiss & Cie., Levallois-Perret, Seine, France. Brake-actuating mechanism. 1,503,350; July 29.

Dennedy, James H., Detroit, Mich. Electric switch. 1,502,717; July 29.

Denney, Guy C., Hinsdale, Ill., assignor to American Arch Company. Arch construction for fire boxes. 1,503,231; July 29.

Depalm, Anton, Cambria, Ill. Stump puller. 1,503,036; July 29.

Dick, Ralph H., assignor to The Safe-Cabinet Company, Marietta, Ohio. Vault. 1,502,982; July 29.

Di Cossimo, Pietro, West Pittsburg, Pa. Multigraphing machine. 1,502,810; July 29.

Diefenthäler, Philipp A., Heidelberg, assignor to the Firm Heinrich Lanz, Mannheim, Baden, Germany. Production of gray cast iron. 1,502 983; July 29.

Dieges & Clust. (See Dieges, Charles J., assignor.)

Dieges, Charles J., assignor to Dieges & Clust, New York, N. Y. Ring. Des. 65,330; July 29.

Dietrick, Matthias A., Patton, Pa. Window screen. 1,503,037; July 29.

Dilas, Harry, Bay City, Mich. Combined candy box and receptacle file. 1,502,910; July 29.

Distance Speed Recording Company. (See Wallbillich, Anthony F., assignor.)

Dixton, H. L., Company. (See Sterrett, Walter R., assignor.)

Dodds, Ethan I. (See Flannery, J. R., and Dodds.)

Doern, William G., Milwaukee, Wis. Evaporating apparatus. 1,502,911; July 29.

Dolaro, Benjamin B., New York, N. Y. Window-cleaner's scaffold and chair. 1,503,305; July 29.

Dominick, Franklin, New York, N. Y. Plug attachment. 1,503,306; July 29.

Downie, John D., Winnipeg, Manitoba, Canada. Washing machine. 1,502,942; July 29.

Draper, Charles T., assignor to The Draper Manufacturing Company, Cleveland, Ohio. Steel-barrel making. 1,503,038; July 29.

Draper Corporation. (See Brown, Carl D., assignor.)

Draper Corporation. (See Hull, Alfred A., assignor.)

Draper Manufacturing Company, The. (See Draper, Charles T., assignor.)

Dreis, Edward J., San Francisco, Calif. Punch press. 1,503,119; July 29.

Droll, Joseph W., Chicago, Ill., assignor to Droll Patents Corporation of Delaware. Mattress-roll-forming mechanism. 1,503,351; July 29.

Droll, Joseph W., Chicago, Ill., assignor to Droll Patents Corporation of Delaware. Mattress-beating machine. 1,503,352; July 29.

Droll Patents Corporation of Delaware. (See Droll, Joseph W., assignor.)

Drost, Thomas, Elmhurst, N. Y., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Cue rack. 1,503,120; July 29.

Dugon, Alexander L., London, England. Recording pressure gauge, indicator, and other measuring instrument. 1,503,353; July 29.

Dumaine, Emile A. F. (See Delevoye, R. E. C., and Dumaine.)

Dunhill, Alfred, London, England. Case for pipes and for cigars and cigarette holders. 1,503,354; July 29.

Dunn, William G., Clarinda, Iowa. Motor support. 1,502,943; July 29.

Durand & Huguenin, S. A. (See Lombard, Théodore, assignor.)

Dürr, Ludwig, assignor to the Firm: Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Motor-testing chamber. 1,503,307; July 29.

E. & N. Manufacturing Company, The. (See Barber, William J., assignor.)

Earhart, David S., Wauchula, Fla. Ventilator. 1,502,944; July 29.

Eaton Axle & Spring Company, The. (See Carlson, Gustav W., assignor.)

Eaton, George R. (See Currier, H. D., and Eaton.)

Edmunds & Jones Corporation. (See Kerwin, Thomas J., assignor.)

Effertz, Harry P., Union Hill, N. J. Boat propulsion. 1,503,232; July 29.

Ehmen, John J., Clayton, assignor of one-third to J. J. Emminga, Golden, Ill. Antislipping device. 1,502,718; July 29.

Ehret, Cornelius D., Philadelphia, Pa. Method of and apparatus for electrically transmitting intelligence. 1,503,308; July 29.

Ehrlich, Jacob, Belleville, assignor to Verona Chemical Co., North Newark, N. J. Production of nitroso-meta-cresol and its application to the separation of meta-cresol and paracresol. 1,502,849; July 29.

Ehrlinger, Edmund P., Jamesville, Wis. Printer's galley and assembling printers' material. 1,503,152; July 29.

Eisenschmid, William, Etna, assignor to Pittsburgh Taximeter Company, Pittsburgh, Pa. Odometer. 1,502,719; July 29.

Ekström, Gunnar C., Stockholm, B. A. E. Johnson, Appelviken, near Stockholm, and G. Örström, assignors to Aktiebolaget Gerh. Arehns Mekaniska Verstad, Stockholm, Sweden. Assembling apparatus for cards and grouped cigarettes. 1,503,355; July 29.

Electric Auto-Lite Company, The. (See Lewellyn, John A., assignor.)

Electric Auto-Lite Company, The. (See Sippel, E. H., and Hager, assignors.)

Electric Controller & Manufacturing Company, The. (See Hall, Jay H., assignor.)

Electric Water Sterilizer & Ozone Company. (See Hartman, Harry B., assignor.)

Electrical Engineers Equipment Co. (See Christensen, Christen, assignor.)

Electrical Engineers Equipment Company. (See Getts, Frank E., assignor.)

Electrical Engineers Equipment Company. (See Jacobs, Ernest H., assignor.)

Elliott, Samuel T., Big Cabin, Okla. Propeller drive. 1,503,356; July 29.

Ellis, Albert E., Marion, Ill. Valve. 1,503,309; July 29.

Ellis, Carleton, Montclair, N. J. Making colloidal bodies. 1,502,945; July 29.

Elwell, George H., Cleveland, Ohio, assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. 1,503,442; July 29.

Emminga, John J. (See Ehmen, John J., assignor.)

Ensign, William B., New York, N. Y. Governor valve. 1,503,357; July 29.

Entz, Theodore B., New York, N. Y., assignor to Gould Storage Battery Company. Storage battery. 1,503,098; July 29.

Ericson, Carl L., Longmeadow, assignor to American Saw and Manufacturing Company, Springfield, Mass. Band-saw joint and making the same. 1,503,310; July 29.

Errock, William H., Alton Bay, N. H. Lamp pedestal. Des. 65,331; July 29.

Esh, Barnett. (See Livsey, Lucien E., assignor.)

Esnault-Pelterie, Robert, Paris, France. Percussion pump. 1,502,984; July 29.

Espenschied, Lloyd, Hollis, N. Y., assignor to American Telephone and Telegraph Company. High-frequency multiplex signaling system. 1,502,811; July 29.

Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. High-frequency multiplex signaling system. 1,502,812; July 29.

Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. High-frequency multiplex signaling system. 1,502,813; July 29.

Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. High-frequency multiplex signaling system. 1,502,814; July 29.

Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. High-frequency multiplex signaling system. 1,502,815; July 29.

Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. High-frequency multiplex signaling system. 1,502,816; July 29.

Espenschied, Lloyd, Queens, N. Y., assignor to American Telephone and Telegraph Company. High-frequency multiplex signaling system. 1,502,817; July 29.

Essex Motors. (See Behn, Guido G., assignor.)

Evans, Alfred H., Bronx, N. Y. Concrete mold. 1,503,358; July 29.

Evans, S. W., & Son. (See Lutz, J., and Evans, assignors.)

Evans, Wayne S. (See Lutz, J., and Evans.)

Evers, John H., Irvington, N. J. Connecter for tire chains. 1,502,985; July 29.

Excelsior Steel Furnace Company. (See Menk, Rudolph W., assignor.)

Fabricius-Bjerre, Ejnar, Fredericksberg, near Copenhagen, Denmark. Absorbent pad. 1,503,359; July 29.

Falls, Alexander S., Chicago, Ill. Desk. 1,503,233; July 29.

Farbenfabriken vorm. Friedr. Bayer and Co. (See Haller, Josef, assignor.)

Farbenfabriken vorm. Friedr. Bayer and Co. (See Weiler, Max, assignor.)

Farmer, Clyde C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Car discharge valve and signal switch. 1,503,311; July 29.

Fassinger, Charles, Carrick, assignor to Oliver Iron & Steel Corporation, Pittsburgh, Pa. Heading machine. 1,503,312; July 29.

Fasting, Johan S., Valby, near Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y. Rotary kiln. 1,503,186; July 29.

Fazio, James, Venice, Calif. Display stand. Des. 65,332; July 29.

Felix, Rudolph. (See Adamac, Frank, assignor.)

Feltner, James E., Hancock, Md., assignor, by mesne assignments, to Columbia Phonograph Company, Inc. Nonset stop for phonographs. 1,502,769; July 29.

Ferguson, George A. (See Tufts, Philip E., assignor.)

Fieber, Paul A., Baraboo, Wis. Eyeshield. 1,502,661; July 29.

Filson, Seaman D., Cleveland, Ohio. Snubber for vehicle springs. 1,502,818; July 29.

Finkelstein, Robert, Brooklyn, assignor to Hirschberg & Company, New York, N. Y. Hat. 1,502,720; July 29.

Finklestein, David, et al. (See Lee, Harry G., assignor.)

Fischer, Albert B., Atco, N. J. Console set. Des. 65,333; July 29.

Fisher Body Corporation. (See Bingman, Frederick P., assignor.)

Fisher, Martin T., New York, N. Y. Cooking chart. 1,502,850; July 29.

Fitchett, Frank, Cincinnati, Ohio. Radiator cap for water-cooled automobile engines. 1,503,187; July 29.

Flannery Bolt Company. (See Flannery, J. R., and Dodds, assignors.)

Flannery, John R., and E. I. Dodds, assignors to Flannery Bolt Company, Pittsburgh, Pa. Stay-bolt structure. 1,503,121; July 29.

Flaugh, George N. (See Rouzer, C. A., and Flaugh.)

Floyd, William B., Denver, Colo. Artificial tooth. 1,503,313; July 29.

Fohmann, Edwin C., Philadelphia, Pa. Game. 1,503,415; July 29.

Ford, Henry, Dearborn, Mich. Automotive railway car. 1,503,454; July 29.

Fort Wayne Engineering & Mfg. Co. (See Astrom, John L., assignor.)

Foster, Uri D., assignor to The Hart & Hegeman Manufacturing Company, Hartford, Conn. Metal-working machine. 1,503,153; July 29.

Fox, De Witt, New York, N. Y. Game-score register. 1,502,662; July 29.

Francis, Daniel H., Grand Junction, Colo. Shale retort. 1,503,234; July 29.

Frank, Harry S., St. Louis, Mo. Machine for making multiple molds and castings. 1,503,122; July 29.

Franklin Baker Company. (See Tenney, Dwight, assignor.)

Franklin, Edwin J., Kellogg, Idaho. Clean-cow bar. 1,503,039; July 29.

Fredricks, John T., et al. (See Prator, Ernest P., assignor.)

French, George F., Manchester, England. Appliance for tensioning or tightening seat webbing and the like. 1,503,314; July 29.

Frenler, Henry C., Troy, N. Y. Egg separator. 1,502,770; July 29.

Frey, Ernst, Troisdorf, near Cologne-on-the-Rhine, Germany. Fuel-injection device for diesel motors without compressors. 1,502,946; July 29.

Friday, Charles E. (See Halverson, John, assignor.)

Fried. Krupp Aktiengesellschaft. (See Pfretzschner, Jakob, assignor.)

Fried. Krupp Aktiengesellschaft. (See Schlafer, Valentin, assignor.)

Friedberger-Aaron Manufacturing Company. (See Goldsmith, Henry F., assignor.)

Friedman, William F. (See Sabine, P. E., and Friedman.)

Friesell, Frank M., San Francisco, Calif. Ankle tension board and arch developer. 1,502,947; July 29.

Frohn, Leonard J., Lynbrook, N. Y. Feed-interrupting mechanism for paper-feeding machines. 1,502,663; July 29.

Frolick, George N., Buffalo, N. Y., assignor to F. S. Wendling, Cleveland, Ohio. Electric heater. 1,502,819; July 29.

Frost, Leslie E., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Spraying machine. 1,502,823; July 29.

Fruitt, Cearles A., Walla Walla, Wash. Direction signal. 1,502,664; July 29.

Fuller, Cland E., New York, N. Y. Finger-course unit. car. 1,503,452; July 29.

Funk, Warren S., Sioux Falls, S. Dak. Antiglare goggles. 1,502,820; July 29.

Furr, Harry L., Harrisonburg, Va. Signal-operating means. 1,503,040; July 29.

Fyr-Fyter Company, The. (See Iddings, Roscoe C., assignor.)

G. & G. Fixture Co., The. (See Walker, Ernest A., assignor.)

Gail, John F., Evanston, Ill., assignor to Simmons Company, Kenosha, Wis. Electric welding. 1,503,315; July 29.

Galbraith, James N., Mexico, Mexico. Fuel-oil burner. 1,503,041; July 29.

Gale, George W., Greeley, Colo. Magazine rotary drill bit. 1,502,851; July 29.

Gall, Friedrich, Kiel, Germany. Electric connecting device for floating or submarine vessels. 1,503,238; July 29.

Gamewell Fire Alarm Telegraph Company. (See Suren, Nathan H., assignor.)

Gandell, William R. K., London, England. Holder for strips of emery, carborundum, glass-covered tapes, cloth, or paper. 1,503,416; July 29.

Gardner, William P., Governors Island, N. Y. Automatic lawn-watering machine. 1,503,360; July 29.

General Electric Company. (See Campbell, Wilfred, assignor.)

General Electric Company. (See Carichoff, Eugene R., assignor.)

General Electric Company. (See Coolidge, William D., assignor.)

General Electric Company. (See Deflassieux, Fleury, assignor.)

General Electric Company. (See Leiter, Susan B., assignor.)

General Electric Company. (See Stone, Charles W., assignor.)

General Electric Company. (See Whitaker, Frank P., assignor.)

General Electric Company. (See Young, Wilbur L., assignor.)

General Railway Signal Company. (See Leake, Richard C., assignor.)

Gerberholtz, Jack, Brooklyn, N. Y. Game board. Des. 65,334; July 29.

Getts, Frank E., assignor to Electrical Engineers Equipment Company, Chicago, Ill. Cable-end bell. 1,503,235; July 29.

Gevaert Photo-Producten, N. V. (See Cocanari, Silvio, assignor.)

Gibson, William L., Trenton, Mo. Locomotive flag staff and container. 1,503,154; July 29.

Gilbert & Barker Manufacturing Company. (See Davis, John B., assignor.)

Gilbert, Israel B., assignor of one-half to O. J. Cutler, Cincinnati, Ohio. Device for automatically grinding valves for combustion engines. 1,503,417; July 29.

Gill, Willie, Montreal, Quebec, Canada. Cover for receptacles. 1,502,948; July 29.

Gillit, Perry A., Rowden, Tex. Sanitary ear for buckets. 1,502,949; July 29.

Gimurtsina, Christos, assignor, by mesne assignments, to Sphinx Sanitary Appliance Co., New York, N. Y. Catamenial appliance. 1,503,361; July 29.

Gish, Walter, and H. L. Thomas, Palco, Kans. Washing machine. 1,502,986; July 29.

Glass, Samuel, and S. Wohl, Newark, N. J. Traveling bag. 1,502,987; July 29.

Goldman, Barney, New York, N. Y. Tire protector. 1,503,265; July 29.

Goldsmith, Henry F., assignor to Friedberger-Aaron Manufacturing Company, Philadelphia, Pa. Lace trimming. Des. 65,335; July 29.

Goodrich, B. F., Company, The. (See Wacker, Henry, assignor.)

Goodwin, Ernest G., New York, N. Y., assignor to J. A. Pilcher, Roanoke, Va. Six-wheel car truck. 1,502,988; July 29.

Goodyear Tire & Rubber Company, The. (See Kimmich, Elmer G., assignor.)

Gordon, David D., Chicago, Ill., assignor to McGill Manufacturing Company, Valparaiso, Ind. Switch. 1,502,665; July 29.

Gösmann, Willy, Hannover, Germany. Burner. 1,503,042; July 29.

Gould Coupler Company. (See Blake, Eli J., assignor.)

Gould Storage Battery Company. (See Entz, Theodore B., assignor.)

Gould Storage Battery Company. (See Osborne, Willard B., assignor.)
Gould Storage Battery Company. (See Snyder, Almond H., assignor.)
Govis, Nicketas C., Seattle, Wash. Belt buckle. 1,502,771; July 29.
Grady, Bartholomew E., jr., Somerville, Mass. Sounding board. 1,502,666; July 29.
Grasselli Chemical Company, The. (See Alvord, Earl B., assignor.)
Gravell, James H., Elkins Park, Pa. Process and material for preparing metal for coating. 1,503,443; July 29.
Graves, Thomas, Memphis, Tenn. Egg tester. 1,502,721; July 29.
Gray, Arthur G., London, England. Derrick or crane. 1,502,667; July 29.
Gray, Paul L., (See Spooner, L. R., and Gray.)
Grebbrook, Hans C., Chicago, Ill. Wind motor. 1,502,950; July 29.
Greer, Benjamin J., Poynor, Tex. Lock. 1,503,043. July 29.
Griffitts, Elmer A., Calgary, Alberta, Canada. Combination mounting for motors and fittings. 1,503,099; July 29.
Grimberg, John, New York, N. Y. Garment hanger. 1,503,236; July 29.
Grinham, Frederick, assignor of one-third to O. J. Savin, one-sixth to J. C. Stiles, and one-sixth to H. K. Wagner, St. Louis, Mo. Apparatus for improving and increasing the useful results obtainable from gasoline or other fuel in internal-combustion engines and the like. 1,502,772; July 29.
Grondahl, Lars O., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling system. 1,503,317; July 29.
Grondahl, Lars O., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,503,318; July 29.
Grondahl, Lars O., Pittsburgh, and L. F. Howard, Edgewood Borough, assignors to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,503,316; July 29.
Grout, Frank M. (See Titus, G. S., and Grout.)
Guenther, Arthur G. G., assignor to Signode System, Inc., Chicago, Ill. Stretching tool. 1,503,237; July 29.
Gueritey, Charles, assignor to Passaic Metal Ware Co., Passaic, N. J. Spout-soldering machine. 1,502,773; July 29.
Gunn, Earl G., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,503,239; July 29.
Haarlander, Otto J., South Orange, assignor to New Jersey Patent Company, West Orange, N. J. Phonograph cabinet. Des. 65,336; July 29.
Haarlander, Otto J., South Orange, assignor to New Jersey Patent Company, West Orange, N. J. Phonograph cabinet. Des. 65,337; July 29.
Haas, Adrian, Hounslow, England. Machine for the manufacture of envelopes. 1,503,155; July 29.
Hager, Harold H. (See Sippel, E. H., and Hager.)
Haight, Hiram H., Milwaukee, Wis. Rotary pump. 1,503,362; July 29.
Halder, Joseph F. (See Carnes, J. F., and Halder.)
Hall, Jay H., Cleveland Heights, assignor to The Electric Controller & Manufacturing Company, Cleveland, Ohio. Motor-control system. 1,503,156; July 29.
Hall, Rebecca A., assignor of one-half to R. E. Hall, Cincinnati, Ohio. Server. 1,503,363; July 29.
Hall, Ruth E. (See Hall, Rebecca A., assignor.)
Haller, Josef, Wiesdorf, near Cologne-on-the-Rhine, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne, Germany. New azodyestuffs. 1,503,044; July 29.
Halliday, Alexander, Prince Rupert, British Columbia, Canada. Crusher for mineral ores. 1,503,157; July 29.
Halversen, Birger F., assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Producing mixtures of nitrogen and hydrogen. 1,503,319; July 29.
Halverson, John, assignor of one-half to C. E. Friday, Madison, Wis. Skate. 1,502,951; July 29.
Hanks, Silvia N., Okolona, Miss. Railway-crossing gate. 1,503,444; July 29.
Hansson, Soren, assignor of one-half to H. T. Anderson, Butler, Pa. Four-point flexible support and safety device for railway brakes. 1,503,045; July 29.
Hardel, Jean A., Paris, France. Accurate thread cutting and grinding machine. 1,503,320; July 29.
Harding, George A., et al. (See Whitson, Lincoln L., assignor.)
Harding, Hazel L., et al. (See Whitson, Lincoln L., assignor.)
Harkins, James J., Pittsburgh, and O. F. Orman, McKeesport, Pa., assignors of four-fifths to said Harkins and one-fifth to said Orman. Apparatus for the manufacture of seamless steel tubes. 1,503,158; July 29.
Harnly, David H., Chicago, Ill. Awning. 1,502,774; July 29.
Harrington, Samuel A., Portland, Oreg. Windshield sprayer. 1,502,821; July 29.
Harris Automatic Press Company, The. (See Harrold, Charles W., assignor.)
Harris, De Witt C., Pineland, Fla. Typewriter carriage. 1,503,100; July 29.
Harris, De Witt C., Pineland, Fla. Line-space mechanism. 1,503,123; July 29.
Harrison, George D., North Attleboro, Mass., assignor to Providence Stock Company of Providence, R. I. Bracelet. 1,503,445; July 29.
Harrold, Charles W., assignor to The Harris Automatic Press Company, Cleveland, Ohio. Printing press and other like machines. 1,502,668; July 29.
Hart & Hegeman Manufacturing Company, The. (See Foster, Uri D., assignor.)
Hart, Edward J., Philadelphia, Pa. Underfeed stoker. 1,503,240; July 29.
Hartel, Henry W., Philadelphia, Pa. Lock switch. 1,503,321; July 29.
Hartman, Harry B., assignor to Electric Water Sterilizer & Ozone Company, Scottdale, Pa. Ozone generator. Re15,880; July 29.
Harvey-Hanes Machine Corporation. (See Weiffenbach, Casper, assignor.)
Harvey, Ralph, Etna, Pa. Washing process and machine therefor. 1,502,852; July 29.
Haupt, Hans, Berlin-Charlottenburg, Germany. Belt fastener. 1,503,322; July 29.
Hawaiian Pineapple Company. (See Hoyt, Simes T., assignor.)
Hayes, Benjamin P., Kansas City, Mo., assignor, by mesne assignments, to International Accounting Machine Co., New York, N. Y. Printer table for registers or like machines. 1,502,669; July 29.
Hayes, Elmer A., Dover, Minn. Wire stretcher and splicer. 1,503,418; July 29.
Hayes, John F., et al. (See Klepper, Eberhard, assignor.)
Haywood, Charles E., Larkins, Fla. Spraying machine. 1,503,159; July 29.
Heasley, Jacob M., Pittsburgh, Pa. Combination tool. 1,503,323; July 29.
Hedglon, Mead, assignor to Syracuse Washing Machine Corporation, Syracuse, N. Y. Shaft coupling. 1,503,446; July 29.
Heffron, Amos S., Philadelphia, Pa. Stiff-leg derrick. 1,502,989; July 29.
Hein, George N., San Francisco, Calif. Lever-operated adjusting mechanism. 1,503,160; July 29.
Helser, David R., Olympia, Wash. Vehicle-wheel. 1,503,046; July 29.
Hendrickson, Eli, Seattle, Wash. Tool construction. 1,503,047; July 29.
Henrici, Fritz W. A., assignor to Henrici Laundry Machinery Company, Boston, Mass. Reversing mechanism. 1,503,447; July 29.
Henrici Laundry Machinery Company. (See Henrici, Fritz W. A., assignor.)
Henson, James A., et al. (See Smith, Louie F., assignor.)
Herlitz, Hans, Gothenburg, Sweden. Calculating machine. 1,502,952; July 29.
Herzog, Robert, Berlin, assignor to C. Lorenz Aktiengesellschaft, Lorensweg, Berlin-Tempelhof, Germany. Means for producing electric oscillations by an electric arc. 1,503,324; July 29.
Hickok Manufacturing Company. (See Shields, Lowell W., assignor.)
Hildick, Walter H., East Orange, and H. Semlear, jr., Ridgewood, N. J. Sealing device for receptacles such as bottles. 1,502,775; July 29.
Hilditch, Robert M. (See Mathieson, James, assignor.)
Hilger, Adam, Limited. (See Twyman, Frank, assignor.)
Hill, Charles A., Port Huron, Mich., assignor to A. Mueller, trustee, Decatur, Ill. Die-guiding means for forging presses. 1,502,722; July 29.
Hill, Clyde E., Fort Logan, Colo. Spray nozzle. 1,502,822; July 29.
Hill, George F., Middle Brighton, Victoria, Australia. Headlight of motor cars and like road vehicles. 1,502,670; July 29.
Hillmer, Max L., and L. O. Parker, assignors to Remy Electric Company, Anderson, Ind. Engine-starter gearing. 1,502,671; July 29.
Hirschberg & Company. (See Finkelstein, Robert, assignor.)
Hobart Manufacturing Company, The. (See Johnston, Herbert L., assignor.)
Hoffman, Adolf, Lackawanna, N. Y. Combination lock. 1,502,672; July 29.
Hoffman, Henry R., Chicago, Ill. Automatic transmission for motor vehicles. 1,502,953; July 29.
Hokanson, Otto A., assignor to Woodstock Typewriter Company, Woodstock, Ill. Ribbon vibrator for typewriters. 1,502,853; July 29.
Hole, Sidney, Hassocks, England. Closure means for milk churns. 1,502,673; July 29.
Hollander, Frederick W. (See Hollander, William H., F. W., and G.)
Hollander, Gus. (See Hollander, William H., F. W., and G.)
Hollander, William H., F. W., and G., Port Arthur, Tex. Antiglare headlight. 1,502,723; July 29.
Holley, Earl. (See Meloche, Daniel H., assignor.)
Holser, Raymond F., and J. V. Lopez, Santa Maria, Calif. Vine pick-up. 1,502,776; July 29.
Honecker, A. L. (See Tooley, Edwin H., assignor.)
Hoppes, John J., Springfield, Ohio. Hydroelectric power plant. 1,503,124; July 29.
Horn, Gustav A., Jeannette, assignor to Westmoreland Specialty Company, Grapeville, Pa. Bowl or similar article. Des. 65,338; July 29.

Hornecker, George, assignor to L. R. Conwell, Elmhurst, N. Y. Box. 1,503,161; July 29.
Horwitt, Paul H., assignor to Independent Paper Mills Inc., Brooklyn, N. Y. Dispenser for paper towels and like articles. 1,503,241; July 29.
Howard, Lemuel F. (See Grondahl, L. O., and Howard.)
Howard, Stanley R., East Milton, Mass., assignor, by mesne assignments, to State Street Trust Company, trustee. Package stop mechanism. 1,502,724; July 29.
Howat, John B., assignor to Sharon Hardware Manufacturing Company, Sharon, Pa. Door-hanger mechanism. 1,503,364; July 29.
Howell, Albert S., assignor to Bell & Howell Company, Chicago, Ill. Automatic light-control apparatus for photographic-printing machines. 1,502,954; July 29.
Hoyoux, Pierre, Rochester, Pa. Catching-off machine. 1,503,188; July 29.
Hoyt, Simes T., assignor to Hawaiian Pineapple Company, Limited, Honolulu, Hawaii. Method and apparatus for handling and transporting sugar cane. 1,503,365; July 29.
Huber, Bernard, Oakland, Calif. Floor-polishing machine. 1,503,048; July 29.
Hubers, Henry W. (See Neuwerk, Peter, assignor.)
Hnestis, Thomas B., Bristol, R. I., assignor to National India Rubber Company. Circular-feed attachment. 1,503,242; July 29.
Hueter, Louis H., San Francisco, Calif. Cartridge-reloading tool. 1,502,824; July 29.
Hufnagel, Fred, St. Louis, Mo. Dustguard. 1,502,777; July 29.
Hug, Christian J., assignor to The Hug Company, Highland, Ill. Road-surfacing machine. 1,502,825; July 29.
Hug Company, The. (See Hug, Christian J., assignor.)
Hughes, Charles R., Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill. Concealed-stitch binding machine. 1,502,778; July 29.
Hughes, Marguerite, Johnson City, Tenn. Doll statuette. Des. 65,339; July 29.
Hull, Alfred A., Knoxville, Tenn., assignor to Draper Corporation, Hopedale, Mass. Thread-cutting temple for looms. 1,503,448; July 29.
Hull, Matthew R., assignor to Rex Manufacturing Company, Connersville, Ind. Connecter for demountable automobile doors. 1,503,419; July 29.
Hull, Robert H. (See Clay, John A., assignor.)
Hunt, John H., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Ignition system. 1,502,674; July 29.
Huntoon, William C., East Greenwich, R. I. Collapsible tube. 1,502,779; July 29.
Hutchinson, Thomas C., Duluth, Minn. Grain-door remover. 1,502,854; July 29.
Hutton, Ernest, Fairmont, W. Va. Blasting gun. 1,503,420; July 29.
Huyc, Joseph G., New Orleans, La. Box. 1,502,780; July 29.
Hydraulic Pressed Steel Company, The. (See Klaus, Fred R., assignor.)
Iddings, Roscoe C., assignor to The Fyr-Fyter Company, Dayton, Ohio. Fire extinguisher with a single delivery tube. 1,503,125; July 29.
Imperial Steam Appliance Company. (See Vincent, Louis N., assignor.)
Independent Paper Mills Inc. (See Horwitt, Paul H., assignor.)
Indiana Manufacturing Company, The. (See Wagner, Louis H., assignor.)
Inland Manufacturing Company. (See Kim, Julius, assignor.)
Innes, William F., Stoughton, Mass. Roof connection. 1,503,421; July 29.
International Accounting Machine Co. (See Hayes, Benjamin P., assignor.)
Iroquois China Company. (See Lukens, Randolph E., assignor.)
Jacobs, Ernest H., assignor to Electrical Engineers Equipment Company, Chicago, Ill. Fuse and mounting. 1,503,266; July 29.
James, Francis F., Philadelphia, Pa. Shackle bolt. 1,503,162; July 29.
James, Frank F., Kensington, near Sydney, New South Wales, Australia. Apparatus for attachment to photographic cameras whereby panoramic-view photographs can be produced. 1,503,437; July 29.
Jameson, Clarence W., Lombard, Ill. Electric switch. 1,502,855; July 29.
Jamison, William J., Chicago, Ill. Fishing hook. 1,502,781; July 29.
Janus, William, St. Louis County, Mo., assignor to Chicago Railway Equipment Company, Chicago, Ill. Malleable support bracket. 1,502,826; July 29.
Jaray, Paul, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Radiator covering. 1,503,366; July 29.
Jeavons, Albert, assignor to John T. Thompson (Wolverhampton) Limited, Wolverhampton, England. Steam superheater. 1,503,163; July 29.
Jefferson Forge Products Company. (See Wade, Charles E., assignor.)
Jennings, Oliver S., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Switch mechanism. 1,502,827; July 29.
Ježek, Anton, Hopkins, Minn. Automobile bumper. 1,503,049; July 29.
Johns-Manville, Inc. (See Kieselbach, Henry A., assignor.)
Johnson, Alvin P., Swampscott, Mass. Confectionery box. Des. 65,340; July 29.
Johnson, Bror A. E. (See Ekström, G. C., Johnson, and Örström.)
Johnson, Grover C., Wichita Falls, Tex. Oil-well pump. 1,502,955; July 29.
Johnston, Herbert L., assignor to The Hobart Manufacturing Company, Troy, Ohio. Grinder for coffee and the like. 1,502,675; July 29.
Johnston, Richard A., assignor to Barron G. Collier, Inc., New York, N. Y. Advertising-card holder. 1,502,782; July 29.
Jones, Edgar C. (See Antilotti, W. A., and Jones.)
Jones, Paul R., Porterville, assignor to Balfour, Guthrie & Company, San Francisco, Calif. Insecticide. 1,502,956; July 29.
Jorstad, Osmund M., East Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Overhead trolley system. 1,502,828; July 29.
Joy, Henry B., Detroit, Mich., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Compressor or like device. 1,502,914; July 29.
Jurk, August H., and P. Syracuse, Buffalo, N. Y. Rotary toothbrush. 1,503,050; July 29.
Karpeles, Maurice J., Providence, R. I. Jewelry box. Des. 65,341; July 29.
Karpeles, Maurice J., Providence, R. I. Jewelry box. Des. 65,342; July 29.
Kaspar & Esh. (See Livsey, Lucien E., assignor.)
Kaufman, Jacob, Toronto, Ontario, Canada. Ventilated cap. 1,502,856; July 29.
Kaup, Charles H., Whittier, Calif. Valve for irrigating apparatus. 1,503,189; July 29.
Keenan Piston Sleeve and Engine Corporation. (See Keenan, Thomas, assignor.)
Keenan, Thomas, Brooklyn, assignor to Keenan Piston Sleeve and Engine Corporation, New York, N. Y. Explosive engine. 1,503,267; July 29.
Keller, Elvyn L. (See Crumley, James A., assignor.)
Kellogg Switchboard and Supply Company. (See Currier, H. D., and Eaton, assignors.)
Kellogg Switchboard and Supply Company. (See Shull, William G., assignor.)
Kelvinator Corporation. (See Mercer, William D., assignor.)
Kemper, Charles M., Kansas City, Mo. Car-door mechanism. 1,502,783; July 29.
Kempton, Willard H., Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Insulated strain rod. 1,502,829; July 29.
Kendall, William G., Newark, N. J. Hinge for vanity cases. 1,503,367; July 29.
Kennedy, Bert, Gloversville, N. Y. Baseball cover. 1,502,784; July 29.
Kenton Hardware Co. (See Bixler, Lewis S., assignor.)
Keppeler, Frank J., Milwaukee, Wis. Attachment for saw filing and setting machines. 1,502,725; July 29.
Kerwin, Thomas J., Chicago, Ill., assignor to Edmunds & Jones Corporation. Pushbutton switch. 1,502,785; July 29.
Kewish, John T., New York, N. Y. Automatic rifle. 1,502,676; July 29.
Kidder, Wellington P., Jamaica Plain, Mass., assignor, by mesne assignments, to Rochester Industries, Inc., Rochester, N. Y. Typewriting machine. 1,502,830; July 29.
Kiefer, Edward J., New York, N. Y. Glass-cutting machine. 1,502,990; July 29.
Kielberg, Henry, Martins Ferry, Ohio, assignor to Whitaker-Glessner Company, Wheeling, W. Va. Detachable cover for collapsible oven casings. 1,503,268; July 29.
Kieselbach, Henry A., Montclair, N. J., assignor to Johns-Manville, Inc. Heating apparatus and operating same. 1,503,368; July 29.
Kiessling, Max, Waterbury, Conn. Snap fastener. 1,503,051; July 29.
Kifer, John H. (See Secrest, George R., assignor.)
Kim, Julius, assignor to Inland Manufacturing Company, Inc., Pittsburgh, Pa. Sanitary cover. 1,503,190; July 29.
Kimball, Wallace D., and A. E. Rideout, assignors to Standard Sealing Equipment Corporation, New York, N. Y. Sealing machine for filled cartons. 1,503,126; July 29.
Kimmerle, Daniel S. (See Kimmerle, Larned T. and D. S.)
Kimmerle, Larned T. and D. S., San Francisco, Calif. Press. 1,502,957; July 29.
Kimmich, Elmer G., Akron, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Belt and making the same. 1,503,453; July 29.
Kinner, Lucius L., Ocean Park, Calif. Badge or similar article. Des. 65,343; July 29.
Kintner, Samuel M., Pittsburgh, Pa., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company. System of control. 1,502,831; July 29.
Kirtlan, Clarence D., Visalia, Calif. Cultivator tooth. 1,502,832; July 29.
Kittelson, Halmer C., Fargo, N. Dak., assignor to Standard Chain Company, Inc., of the State of Minnesota. Automobile tread chain. 1,503,191; July 29.

Kitzelman, Frank, assignor to Acorn Wire & Iron Works, Chicago, Ill. Window guard. 1,502,833; July 29.

Klancher, John. (See Soots, B., Klancher, Magrath, and Van Brimer.)

Klauber, Laurence M., San Diego, Calif. Automatic circuit-making switch for high-potential circuits. 1,503,269; July 29.

Klaus, Fred R., assignor to The Hydraulic Pressed Steel Company, Cleveland, Ohio. Rim-rolling machine. 1,503,270; July 29.

Klepper, Eberhard, Crimmitschau, Germany, assignor of three-eighths to H. Stern, New York, N. Y., thirty-seven and one-half per cent to J. F. Hayes, Washington, D. C., and twenty-five per cent to S. B. Sutphin, W. F. Ross, and R. W. Ross. Producing crinkled paper and product obtained thereby. 1,503,431; July 29.

Klingbeil, Gottlieb L. E., Omaha, Nebr. Child's educational appliance. 1,502,991; July 29.

Koebbe, Philip H., Barnhart, Mo. Frost-line drain valve for pumps. 1,502,834; July 29.

Kraft, Henry P., Ridgewood, N. J. Valve for atomizer bulbs or the like. 1,502,786; July 29.

Krammer, Henry E., New York, N. Y. Flying-boat fuselage. 1,503,052; July 29.

Kratzmueller, Louis R., Chicago, Ill. Knife and shield. 1,503,053; July 29.

Kruger, Charles M., et al. (See Sendig, Max H., assignor.)

Kubler, Edwin C., Springfield, N. Y., assignor to American Lead Pencil Company. Display stand for pencils. Des. 65,344; July 29.

Kudler, Adolph, and H. Rosenthal, Los Angeles, Calif. Tape feeder, moistener, and cutting appliance. 1,503,164; July 29.

Kumpfel, Josef, Alt-Ehrenberg Czechoslovakia. Process of and apparatus for forming bast-wood fibers for making fabrics and webs. 1,502,912; July 29.

Kuntz, William J., assignor to McGann Manufacturing Company, Incorporated, York, Pa. Rotary drier. 1,503,054; July 29.

Kuykendall, William, Los Angeles, Calif. Cleaning compound. 1,503,450; July 29.

L. S. & N. Corporation. (See Leland, H. H., and New, assignors.)

Lakewood Engineering Company, The. (See Carr, Edward G., assignor.)

La Mere, George P. (See Crawford, E. A., and La Mere.)

Landfear, Elsie D., Jersey City, N. J. Rag doll. Des. 65,345; July 29.

Lane, Alfred M., St. Louis, Mo. Screen for pivoted window sashes. 1,503,325; July 29.

Lane, George S., San Francisco, Calif., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Vehicle brake-control device. 1,503,326; July 29.

Lane, Joseph E. (See Agricola, Herman A., jr., assignor.)

Langton, George H., Princeton, W. Va. Draft gear. 1,503,192; July 29.

Lanphere, Clive W., Brooklyn, N. Y. Sanitary dispensing measure. 1,502,992; July 29.

Lanphere, Clive W., New York, N. Y. Dispensing device for granular materials. 1,503,127; July 29.

Lanz, Firm Heinrich. (See Diefenthäler, Philipp A., assignor.)

Lasker, William W., Brooklyn, assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York, N. Y. Rotary switch electrical timed sorter. 1,502,993; July 29.

Laukhuff, Alfred, Shorewood, Wis. Change-speed gearing. 1,502,787; July 29.

Laurila, Julius E., Worcester, Mass. Making putty. 1,503,422; July 29.

Lautenschlager, William F., Cincinnati, Ohio, assignor to The Peerless Machinery Company, Boston, Mass. Micrometric connection. 1,503,165; July 29.

Lavoie, Alphonse J., Montreal, Quebec, Canada. Vehicle brake. 1,502,726; July 29.

Lavoie, Alphonse J., Montreal, Quebec, Canada. Transmission joint and shock absorber. 1,502,727; July 29.

Lavoie, Alphonse J., Montreal, Quebec, Canada. Steering mechanism. 1,502,728; July 29.

Lavoie, Joseph P., Montreal, Quebec, Canada. Piston. 1,503,369; July 29.

Law, Harry C., Hastings upon Hudson, N. Y. Centrifugal drier. 1,502,677; July 29.

Leake, Richard C., assignor to General Railway Signal Company, Rochester, N. Y. Tower indicator. 1,502,913; July 29.

Lee, Frank, Clearwater, Nebr. Corn-husking apparatus. 1,502,994; July 29.

Lee, Harry G., assignor of one-third to L. D. Covich and two-thirds to D. Finklestein, Boston, Mass. Gasoline gauge. 1,502,788; July 29.

Leich Electric Co. (See Leich, Oscar M., assignor.)

Leich, Oscar M., assignor to Leich Electric Co., Genoa, Ill. Telephone receiver. 1,503,243; July 29.

Leinert, Charles H., Chicago, Ill. Valve for compressors. 1,503,271; July 29.

Leiter, Susan B., Schenectady, N. Y., assignor to General Electric Company. Treating copper and the product thereof. 1,502,857; July 29.

Leland, Hoyt H., East Orange, N. J., and G. A. New, New York, N. Y., assignors to L. S. & N. Corporation. Process and apparatus for coating corset steels. 1,503,128; July 29.

Lester, Dudley W. (See Warwick, Rogers M., assignor.)

Lewellyn, John A., assignor, by mesne assignments, to The Electric Auto-Lite Company, Toledo, Ohio. Coil-winding machine. 1,503,272; July 29.

Lewers, Thomas R. (See Shikora, F. R., and Lewers.)

Lewis, Lloyd V., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,503,166; July 29.

Liberman, Bernard and L., and W. M. Reichart, Philadelphia, Pa.; said L. Liberman and said Reichart assignors to said Bernard Liberman. Cigar-bunching machine. 1,502,995; July 29.

Liberman, Leon. (See Liberman, Bernard and L., and Reichart.)

Lincoln Electric Company, The. (See Lincoln, John C., assignor.)

Lincoln, John C., assignor to The Lincoln Electric Company, Cleveland, Ohio. Arc welding. 1,502,789; July 29.

Lindhard, Povl T., Brooklyn, assignor to F. L. Smidth & Co., New York, N. Y. Rotary cooler for cement clinkers, etc. 1,503,103; July 29.

Lippert, Aloysius C., Kenosha, Wis., and J. A. Sinko, assignors to Advance Products Corporation, Chicago, Ill. Assembling radiator caps. 1,502,729; July 29.

Liptak Fire Brick Arch Co. (See Liptak, Michael, assignor.)

Liptak, Michael, St. Paul, assignor to Liptak Fire Brick Arch Co., Minneapolis, Minn. Furnace arch. 1,502,790; July 29.

Little, Philip, jr., assignor to The Strong Scott Manufacturing Company, Minneapolis, Minn. Air-heating means. 1,502,858; July 29.

Little, Robert A., Woodstock, Va. Grain huller. 1,503,423; July 29.

Little, Robert A., Hazelton, W. Va. Spring wheel. 1,503,424; July 29.

Livsey, Lucien E., Brooklyn, assignor to B. Esh, New York, N. Y. Finger ring. Des. 65,340; July 29.

Loetscher, Martin B., Hollywood, Calif. Hinged cap. 1,502,996; July 29.

Lombard, Théodore, assignor to the Firm Durand & Huguenin S. A., Basel, Switzerland. Mordant dyestuffs and making same. 1,503,194; July 29.

Longue, René, Pantin, France. Means for lubricating and cooling submerged and insulated electric motor. 1,502,730; July 29.

Lopez, Joseph V. (See Holser, R. F., and Lopez.)

Lorenz, C., Aktiengesellschaft. (See Herzog, Robert, assignor.)

Lott, Carl, Horgen, Switzerland. Device for driving shafts at a low and uniform speed by an electromotor. 1,502,958; July 29.

Loughridge, Matthew H., Bogota, N. J., assignor to Atlas Railway Signal Company. Rail bond. 1,502,836; July 29.

Lovelace, Harry M., Vallejo, Calif. Steering gear. 1,502,731; July 29.

Lowe, Clifford O., Sweetgrass County, Mont. Table. 1,503,195; July 29.

Luce, Grafton E., Chicago, Ill. Thrust bearing. 1,502,859; July 29.

Luce, Grafton E., Chicago, Ill. Brick, and wall construction. 1,503,327; July 29.

Ludlum Steel Company. (See Armstrong, Percy A. E., assignor.)

Luftschiffbau Gesellschaft mit beschränkter Haftung. (See Stahl, Karl, assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Arnstein, Karl, assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Dürr, Ludwig, assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Jarny, Paul, assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Stahl, Karl, assignor.)

Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Wilcke, Oscar, assignor.)

Lukens, Randolph E., assignor to Iroquois China Company, Syracuse, N. Y. Plate or similar article. Des. 65,347; July 29.

Lunkenheimer Company, The. (See Stickle, Frederick A., assignor.)

Lutz, John, and W. S. Evans, assignors to S. W. Evans & Son, Philadelphia, Pa. Means for fastening tips to umbrella ribs. 1,503,273; July 29.

Lydon, Timothy, Baltimore, Md. Wall and ceiling structure. 1,502,732; July 29.

MacNeill, John B. (See Sandin, M. J., and MacNeill.)

Magrath, Charles B., Chicago, Ill. Mobile power mechanism. 1,503,056; July 29.

Magrath, Homer A. (See Soots, B., Klancher, Magrath, and Van Brimer.)

Maguet, Martial, Maxeville, France. Reducing fused slag to granular form. 1,502,793; July 29.

Majcen, Othmar, New York, N. Y. Gas stove. 1,503,198; July 29.

Marquette Tool & Manufacturing Co. (See Balcker, Martin, assignor.)

Marquette Tool & Manufacturing Company. (See Nelson, John, assignor.)

Marrian, Harry H. B., and E. E. Carver, Vancouver, British Columbia, Canada. Aerial transporter. 1,502,997; July 29.

Martin, Earl T., Proctor, Minn. Spark plug. 1,502,960; July 29.

Martin, Frank C., Plattsmouth, assignor to M. F. Martin, Omaha, Nebr. Internal-combustion engine. 1,503,370; July 29.

Martin, Guillermo L., La Plata, Argentina. Wheel. 1,503,057; July 29.

Martin, Karter S., Tarrant City, Ala. Wash-kettle furnace. 1,502,837; July 29.

Martin, Mathew F. (See Martin, Frank C., assignor.)

Martin, Royal E., Mansfield, Ohio. Means for removably clamping valves to pneumatic tubes or the like. 1,503,199; July 29.

Martin, Trevillie O., Jackson, Tenn., assignor of one-half to W. T. Young, Indianapolis, Ind., and one-half to W. H. Timmons, Jackson, Tenn. Valve. 1,502,734; July 29.

Martin, Ulva R., Faber, Va. Nursery accessory. 1,503,425; July 29.

Marvel, Edward W., Philadelphia, Pa. Automatically-operative controlling mechanism for heaters. 1,503,276; July 29.

Matheson, James, assignor of one-half to R. M. Hilditch, Toronto, Ontario, Canada. Carpenter's miter. 1,502,735; July 29.

Mattingly, Albertus B., New York, N. Y. Attachment for sewing machines. 1,502,998; July 29.

Matz, Charles F., Dubuque, Iowa. Harrow. 1,503,200; July 29.

Maximum Power Co. (See Sibley, Frederick H., assignor.)

McAdams, George F., Brooklyn, N. Y. Ruling machine. 1,503,196; July 29.

McAllister, William H., Linden, Pa. Caster socket. 1,503,328; July 29.

McComb, Albert R., Indianapolis, Ind. Humidor. 1,502,733; July 29.

McCreary, Harry, Indiana, Pa. Non-skid tire. Des. 65,348; July 29.

McCrum, Douglas S., Saranac Lake, N. Y. Variable condenser. 1,502,860; July 29.

McCuen, Charles L., Detroit, Mich., assignor, by mesne assignments, to Delco-Light Company, Dayton, Ohio. Refrigerating apparatus. 1,502,791; July 29.

McDaniel, Clarence, Columbus, Ohio. Musical instrument. 1,503,197; July 29.

McElroy, John J., assignor to The Westinghouse Air Spring Company, New Haven, Conn. Automatic air spring. 1,503,274; July 29.

McFaddin, Harrison D., East Orange, N. J. Interchangeable support for electric fixtures. 1,503,275; July 29.

McGann Manufacturing Company. (See Kuntz, William J., assignor.)

McGee, Spanish, Skinston, W. Va. Tire chain. 1,502,792; July 29.

McGill Manufacturing Company. (See Gordon, David D., assignor.)

McGill Metal Products Company. (See Beck, Albert, assignor.)

McGuckin, John J., Brooklyn, N. Y. Valve-seat reamer. 1,503,055; July 29.

McIntyre, Michael J., Eden, N. Y. Musical toy. 1,502,835; July 29.

McKay, George L. (See Beechler, A. J., and McKay.)

McNabb, Joseph H., assignor to Bell & Howell Company, Chicago, Ill. Film-splicing apparatus. 1,502,959; July 29.

McOmber, Loren W., Peoria, Ill. Traffic light. Des. 65,349; July 29.

Meloche, Daniel H., assignor to E. Holley, Detroit, Mich. Metal mold. 1,502,861; July 29.

Menk, Rudolph W., Joliet, assignor to Excelsior Steel Furnace Company, Chicago, Ill. Air circulator. 1,502,862; July 29.

Mercer, William D., assignor to Kelvinator Corporation, Detroit, Mich. Valve mechanism. 1,502,736; July 29.

Meredith, Jaquelin M., Norfolk, Va. Wheel rim. 1,503,426; July 29.

Merseles, Henry R., assignor to H. E. Merseles, Bronxville, N. Y. Washing machine. 1,502,863; July 29.

Merseles, Herbert E., Bronxville, N. Y. Pump. 1,502,678; July 29.

Merseles, Herbert E. (See Merseles, Henry R., assignor.)

Meyer, H. H., Packing Company. (See Nekring, Alfred J., assignor.)

Meyer, Joseph K., assignor of one-third to D. Pell and one-third to F. Siegenthaler, St. Louis, Mo. Butter-slicing machine. 1,503,201; July 29.

Meyer, Joseph P., Mapleton, Iowa. Attachment for gas engines. 1,503,371; July 29.

Michle Printing Press & Mfg. Co. (See Blaine, Joseph R., assignor.)

Mikovits, John L., and F. Petersell, East Pittsburgh, Pa. Phonograph-record-cleaning brush. 1,503,058; July 29.

Miles, Charles H., jr., Birmingham, Ala. Wheel puller. 1,502,129; July 29.

Miller, Gustave L., Genesco, Ill. Automatic bolt adjustment for bearings. 1,502,737; July 29.

Miller, Pearl E., Nescopeck, Pa. Hatbox. 1,502,999; July 29.

Milligan, Joseph F., Swissvale, Pa. Confection. 1,502,864; July 29.

Mills, John H., St. Louis, Mo. Hogshead for redrying, recuring, and resweating tobacco. 1,503,167; July 29.

Mitchell, Alfred J., St. Boniface, Manitoba, Canada. Dishwashing machine. 1,503,427; July 29.

Mitchell, Edward A., London, England. Means for controlling flow and pressure of fluid in fluid-distributing systems. 1,503,329; July 29.

Monnia, Eugene F. (See Woodcock, B. E., Monnia, and Reese.)

Moody, Lewis F., Philadelphia, Pa. Hydraulic pump. 1,502,865; July 29.

Moore, Arthur, Chanute, Kans. Lamp support. 1,502,866; July 29.

Moore, Edward T., Syracuse, N. Y. Electrical apparatus for automatically controlling peak demands. 1,503,130; July 29.

Moroso, Stephen O., Coster, N. J. Concrete cap and sill block for building purposes. 1,503,059; July 29.

Morrison, Donald R. (See Shannon, S. Q., assignor.)

Morterud, Einar, Christiania, Norway. Apparatus for transmitting heat from one liquid to another. 1,503,428; July 29.

Mott, Ollie E., Adrian, Mich. Suspender construction. 1,502,738; July 29.

Mouren, Lucien J. L., Asnieres, France. Apparatus for automatically solving spherical triangles. 1,502,794; July 29.

Mousel, Mike A., Elmwood, Wis. Record cabinet. 1,503,330; July 29.

Mueller, Adolph, trustee. (See Hill, Charles A., assignor.)

Mueller, Moritz L., assignor to Northwest Blower Kiln Company, Seattle, Wash. Method of and apparatus for kiln-drying lumber. 1,503,168; July 29.

Mulford, Braden N., Fountain Head, Tenn. Single-article-delivery device. 1,503,277; July 29.

Müller, Friederich, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Milling cutter. 1,503,060; July 29.

Munroe, Treadway B., New Orleans, La., assignor to C. F. Dahlberg, Minneapolis, Minn. Preventing the natural deterioration of bagasse fibers. 1,503,202; July 29.

Münzinger, Friedrich, assignor to the Firm Allgemeine Elektricitäts-Gesellschaft, Berlin, Germany. Cushioning device for liquid conveyed under pressure. 1,502,739; July 29.

Murnane, Cornelius, Balaclava, Victoria, assignor to Murnane Tractor Ltd., Melbourne, Australia. Farm tractor. 1,503,278; July 29.

Murnane Tractor Ltd. (See Murnane, Cornelius, assignor.)

Murphy, Daniel H., West Hartford, assignor to American Wiremold Company, Hartford, Conn. Tension device. 1,503,203; July 29.

Murphy, Daniel H., West Hartford, assignor to American Wiremold Company, Hartford, Conn. Tension device. 1,503,204; July 29.

Murphy, P. H., Company. (See Bonsall, Charles D., assignor.)

Murray, John D., San Francisco, Calif. Nozzle tip. 1,503,001; July 29.

Murray, Thomas B., Liphook, England. Clutch and flywheel combination for motor-vehicle engines. 1,503,331; July 29.

Muther, Lorenz, Newton, Mass. Folding machine. 1,502,867; July 29.

Muther, Lorenz, Newton Center, Mass. Eyeleting machine. 1,502,868; July 29.

Muther, Lorenz. (See Reynolds, Charles Q., assignor.)

Myers, Eugene V., East Orange, N. J., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Dust cap for tire valves. 1,502,740; July 29.

Nagy, Stephen, Irvington, assignor of one-half to N. Viehmann, Newark, N. J. Pump for internal-combustion engines. 1,503,002; July 29.

Nardi, Romolo, Camden, N. J. Magazine pencil. 1,503,244; July 29.

Nathan Manufacturing Company. (See Ashe, William O., assignor.)

National India Rubber Company. (See Huestis, Thomas B., assignor.)

National Paper Products Company. (See Osterman, Bertram P., assignor.)

Naugatuck Chemical Company, The. (See Cadwell, Sidney M., assignor.)

Nealir, Jacob E., Hartsdale, N. Y. Match safe. 1,502,961; July 29.

Nekring, Alfred J., assignor to The H. H. Meyer Packing Company, Cincinnati, Ohio. Device for removing rind from bacon. 1,503,003; July 29.

Neldner, Edward E. and V., Milwaukee, Wis. Safety crank. 1,503,205; July 29.

Neldner, Vincent. (See Neldner, Edward E. and V.)

Nelson, Jennings, Chicago, Ill. Hydrometer syringe. 1,503,332; July 29.

Nelson, John, assignor to Marquette Tool & Manufacturing Company, Chicago, Ill. Power press. 1,503,131; July 29.

Nemecek, Milo V., and R. Stroppel, Cedar Rapids, Iowa. Can-capping machine. 1,502,869; July 29.

Neuwerk, Peter, Moline, Ill., assignor to H. W. Hubers, Davenport, Iowa. Timing device for washing machines. 1,502,915; July 29.

New Britain Machine Company, The. (See Brown, Robert S., assignor.)
New, Gustavus A. (See Leland, H. H., and New.)
New Jersey Patent Company. (See Haarlander, Otto J., assignor.)
New Jersey Zinc Company, The. (See Borchers, Walter O., assignor.)
Nicol, David A., Huntingdon, Quebec, Canada. Plowshare. 1,502,741; July 29.
Nixon, Leroy, Easton, Pa. Pulsator. 1,503,279; July 29.
Norman, Orville P., Los Angeles, Calif. Reciprocating movement. 1,502,870; July 29.
Norris, Almon E., Brookline, Mass. Grab. 1,503,333; July 29.
Norris, Rolla V., Porterville, Calif. Oil reservoir for motors. 1,503,334; July 29.
Norsk Hydro Elektrisk Kvaelstofaktieselskab. (See Berge, Einar, assignor.)
Norsk Hydro Elektrisk Kvaelstofaktieselskab. (See Halvorsen, Birger F., assignor.)
North East Electric Company. (See Sullivan, Raymond H., assignor.)
Northwest Blower Kiln Company. (See Mueller, Moritz L., assignor.)
Norwalk Tire and Rubber Company, The. (See Russell, William F., assignor.)
Noyes, Charles H., Mondamin, Iowa. Glove. 1,502,871; July 29.
Nutt, Buell W., assignor to The Safety Equipment Service Company, Cleveland, Ohio. Protective hood. 1,502,679; July 29.
Oberg, Gunnard A., assignor to Blackstone Manufacturing Company, Jamestown, N. Y. Sliding door and lock for washing machine cylinders. 1,502,872; July 29.
Oberg, Gunnard A., assignor to Blackstone Manufacturing Company, Jamestown, N. Y. Perforated sheet metal. 1,502,873; July 29.
O'Dell, Edward O., Aroya, Colo. Ensilage cutter 1,502,742; July 29.
Ojerholm, Arthur W., Worcester, Mass., assignor, by mesne assignments, to Worcester Electric Tool Company. Combination valve grinder and drill. 1,503,206; July 29.
Oliver Iron & Steel Corporation. (See Fussinger, Charles, assignor.)
Oliver, Walter E., assignor to Autographic Register Co., Hoboken, N. J. Manifolding device. 1,502,680; July 29.
Orman, Otto F. (See Harkins, J. J., and Orman.)
Örström, Gustaf. (See Ekström, G. C., Johnson, and Örström.)
Osborne, Willard B., Elma, N. Y., assignor to Gould Storage Battery Company. Storage battery. 1,503,069; July 29.
Osbourne, Alfred S., Ingram, Pa. Power reverse gear. 1,503,280; July 29.
Osterman, Bertram P., assignor to National Paper Products Company, San Francisco, Calif. Packing crate for huts. 1,502,962; July 29.
Ottinger, Leon, New York, N. Y. Handle-attaching means for door latches. 1,503,281; July 29.
Ovalite Company The. (See Adamac, Frank.)
Overn, John, jr., Philadelphia, Pa., assignor to William Cramp & Sons Ship and Engine Building Company. Shaft bearing for hydraulic machines. 1,503,459; July 29.
Paasche, Jens A., Chicago, Ill. Pneumatic painting apparatus. 1,503,282; July 29.
Pacholke, Otto C., Brooklyn, N. Y. Apparatus for killing poultry. 1,503,372; July 29.
Packard Motor Car Company. (See Gunn, Earl G., assignor.)
Parker, Lee H., assignor to Spray Engineering Company, Boston, Mass. Spray nozzle. 1,503,438; July 29.
Parker, Leslie O. (See Hillmer, M. L., and Parker.)
Passaic Metal Ware Co. (See Gueritey, Charles, assignor.)
Page, Clarence, Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Cutting tool. 1,502,743; July 29.
Page, George S., Chatham, N. J. Game apparatus. 1,503,283; July 29.
Parker, Frank B., and C. U. Austin, Rochester, N. Y. Lubricating system for valve stems. 1,503,257; July 29.
Parker, Frederick R., Chicago, Ill. High potential electricity arrester. 1,503,284; July 29.
Parker, Frederick R., Chicago, Ill. Producing uniform Voltaic cells. 1,503,285; July 29.
Parker, Herschel G., Philipsburg, Pa. Funnel. 1,503,373; July 29.
Parker, Humphrey F., New York, N. Y. Heat transfer system for aircraft. 1,503,374; July 29.
Parker, James E., Norfolk, Va. Peanut digger. 1,502,795; July 29.
Parker, James E., Norfolk, Va. Conveyer for peanut diggers. 1,502,796; July 29.
Parker, John J., Paterson, N. J. Vaporizer. 1,503,004; July 29.
Paull, Norman M. (See Bolton, W., jr., and Paull.)
Pavia, Luigi, Allentown, Pa. Shuttle. 1,503,286; July 29.
Peerless Machinery Company, The. (See Lautenschlager, William F., assignor.)
Pell, David, et al. (See Meyer, Joseph K., assignor.)
Pendergast, Frederick W., deceased, Cambridge, Mass.; G. T. Pendergast, administratrix. Motor. 1,503,061; July 29.
Pendergast, Frederick W., deceased, Cambridge, Mass.; G. T. Pendergast, administratrix. Mop. 1,503,062; July 29.
Pendergast, Grace T., administratrix. (See Pendergast, Frederick W.)
Pendergast, Overton W., Terre Haute, Ind. Printing consecutive numbers. 1,503,375; July 29.
Perrault, Oscar L., assignor to Constant Heat Pack Corporation, Albany, N. Y. Composition for chemical heaters. 1,502,744; July 29.
Perry, George E., Chicago, Ill. Dental appliance. 1,503,063; July 29.
Perry, William H., Burdett, Alberta, Canada. Automatic wagon brake. 1,502,797; July 29.
Peters, John F., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transformer frame. 1,502,874; July 29.
Petersell, Frank. (See Mikovits, J. L., and Petersell.)
Pfretzschner, Jakob, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Device for cutting an inductive resistance out of circuit without sparking. 1,503,376; July 29.
Phoenix, Frank L., and A. H. Behrman, Reedsburg, Wis. Cleaning device. 1,502,798; July 29.
Pilcher, John A. (See Goodwin, Ernest G., assignor.)
Pippin, John W., Oklahoma City, Okla. Underreamer. 1,503,377; July 29.
Pittsburgh Taximeter Company. (See Eisenschmid, William, assignor.)
Pizzutiello, Leopold, New York, N. Y. Hat. 1,503,287; July 29.
Platt, George R., Hillsboro, N. C. Loom shuttle block. 1,502,963; July 29.
Plymouth Stamped Metal Company, The. (See Voisard, Louis F., assignor.)
Polhemus, John F. (See Clark, E. C., and Polhemus.)
Pommersheim, John, East Pittsburgh, Pa. Shingle construction. 1,502,681; July 29.
Poole, Amos R., assignor to W. R. Chappell, New York, N. Y. Cover-fastening clasp. 1,503,288; July 29.
Pope, Orson M., Seattle, Wash. Variable-speed transmission mechanism. 1,503,005; July 29.
Pos, Marius J. (See Baldwin, C. K., and Pos.)
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,502,916; July 29.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Interoffice trunking system. 1,502,917; July 29.
Powers Accounting Machine Corporation. (See Lasker, William W., assignor.)
Powers, Robert T., sr., North Oxford, Mass. Power strap. 1,503,207; July 29.
Prator, Ernest P., assignor of one-third to J. T. Fredricks, Leeper, and one-third to J. R. Stephens, St. Louis, Mo. Valve. 1,503,132; July 29.
Pratt & Whitney Company. (See Müller, Friederich, assignor.)
Price, George W., Leaksville, N. C. Cooling apparatus for motor vehicles. 1,502,745; July 29.
Prickett, Clyde W., Winterset, Iowa. Concrete and wood floor construction device. Re15,881; July 29.
Priem, Paul, Heidenheim-on-the-Brenz, Germany, assignor to American Voith Contact Company, Inc., New York, N. Y. Wood grinder. 1,503,289; July 29.
Providence Stock Company. (See Harrison, George D., assignor.)
Prym, Heinrich, Stolberg, Rheinland, Germany. Packing or filling body for filters. 1,503,208; July 29.
Pupin, Michael I., Norfolk, Conn., and E. H. Armstrong, Yonkers, N. Y., assignors to Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa. Tone-producing radioreceiver. 1,502,875; July 29.
Purser, Joseph E., Bristol, England. Money box. 1,502,876; July 29.
Quaresima, Luigi, Amsterdam, N. Y. Shuttle for carpet-weaving looms. 1,503,290; July 29.
Quinn, George F. (See Cleary, T. J., and Quinn.)
Rause, Paul J., South Orange, N. J. Illuminated top. 1,503,006; July 29.
Ray, Arthur J., assignor to Automatic Electric Company, Chicago, Ill. Automatic telephone system. 1,502,877; July 29.
Read, Henry, assignor to B. S. Stuart, Denver, Colo. Playing card. Des. 65,350; July 29.
Reed, Harrison P., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Motor controller. 1,503,245; July 29.
Reed, John H., Maumee, assignor of one-half to A. Swartz, Toledo, Ohio. Ignition device. 1,502,682; July 29.
Rees, Ben, Anaheim, Calif. Latch lock. 1,503,209; July 29.
Rees, Helen R., Portland, Oreg. Finger ring for crocheting. 1,502,799; July 29.
Reese, Albert C. (See Woodcock, B. E., Monnia, and Reese.)
Reichart, William M. (See Liberman, Bernard and L., and Reichart.)

Reichenberg, James, London, England. Watchcase. Des. 65,351; July 29.
Reid, Albert T., Leavenworth, Kans. Toilet case. 1,503,378; July 29.
Rejcek, Valentin F., Penelope, Tex. Antiskid device. 1,502,878; July 29.
Reliance Gauge Column Company, The. (See Brown, John R., assignor.)
Remington, Arthur L., assignor to Warp Compressing Machine Company, Worcester, Mass. Machine for forming yarn packages. 1,503,381; July 29.
Remy Electric Company. (See Hillmer, M. L., and Parker, assignors.)
Remy Electric Company, The. (See Replogle, James B., assignor.)
Renz, George W., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,503,064; July 29.
Replogle, James B., Detroit, Mich., assignor to The Remy Electric Company. Electric throttle governor. 1,502,800; July 29.
Rex Manufacturing Company. (See Hull, Matthew R., assignor.)
Reynolds, Charles Q., St. Louis, Mo., assignor to L. Muther, Newton, Mass. Skiving machine. 1,503,169; July 29.
Rideout, Arthur E. (See Kimball, W. D., and Rideout.)
Rimmer, Robert, Wigan, England. Golf putter. 1,503,291; July 29.
Ritchie, Charles F., Lompoc, Calif., assignor to The Celite Company, Los Angeles, Calif. Production of a filtration accelerator. 1,503,133; July 29.
Rixmann, George, et al. (See Sargent, William H., assignor.)
Roach, Jesse E., Los Angeles, Calif. Pencil. Des. 65,352; July 29.
Robertson, Lillian W. (See Smith, Mildred K., assignor.)
Robins Conveying Belt Company. (See Baldwin, C. K., and Pos, assignors.)
Robins Conveying Belt Company. (See Baldwin, Clarence K., assignor.)
Robins, John C., Birmingham, England. Apparatus for mixing, grinding, refining, or treating liquid material such as liquid chocolate. 1,503,379; July 29.
Robinson, Charles G., Buffalo, N. Y., assignor, by mesne assignments, to The Beaver Products Company, Inc. Paper-making apparatus. 1,503,246; July 29.
Rochester Industries, Inc. (See Kidder, Wellington P., assignor.)
Rockwood, George I., Worcester, Mass. Air exhauster for dry-pipe sprinkler systems. 1,502,879; July 29.
Rockwood Sprinkler Company of Massachusetts. (See Carlson, Hjalmar G., assignor.)
Rodgerson, William J., Toronto, Ontario, Canada. Fluid-power generator. 1,502,964; July 29.
Roempke, Harold C., Indianapolis, Ind. Teetering roundabout. 1,502,746; July 29.
Rogers Silver Plate Co., The. (See Crumley, Le Roy A., assignor.)
Rose, Fay E., Montague, Mich. Chicken feeder. 1,503,335; July 29.
Rosen, David, New York, N. Y., and C. Schnickerling, Weehawken, N. J.; said Schnickerling assignor to S. Rubinsky, New York, N. Y. Battery construction. 1,503,380; July 29.
Rosenbaum, Alvin H. (See Tolk, G., and Rosenbaum.)
Rosenthal, Henry. (See Kudler, A., and Rosenthal.)
Rosenzweig, Julius, New York, N. Y. Adjustable cap. 1,503,007; July 29.
Ross, Ralph W., et al. (See Klepper, Eberhard, assignor.)
Ross, Robert C., Dundee, Scotland. Roller blind and the like. 1,503,336; July 29.
Ross-Tacony Crucible Company. (See Brockbank, Clarence J., assignor.)
Ross, William F., et al. (See Klepper, Eberhard, assignor.)
Rouzer, Charles A., and G. N. Flaugh, Fort Wayne, Ind. Repair device for train-pipe hose. 1,503,247; July 29.
Rubinsky, Samuel. (See Rosen, D., and Schickerling, assignors.)
Rudman, George C., Clinton, Iowa. Barred window. 1,503,248; July 29.
Rudzik, Martin. (See Windish, Fred, assignor.)
Rumsfield, Ernest L., Chicago, Ill. Tool for removing wheels from axle shafts of motor vehicles and the like. 1,503,249; July 29.
Russell, William F., assignor to The Norwalk Tire and Rubber Company, Norwalk, Conn. Accelerating the vulcanization of natural or artificial india rubber or rubberlike substances. 1,503,429; July 29.
Russell, William F., assignor to The Norwalk Tire & Rubber Company, Norwalk, Conn. Vulcanizing rubber. 1,503,430; July 29.
Ryan, Walter D., Schenectady, N. Y. Headlight. 1,502,683; July 29.
Ryan, Walter D., Schenectady, N. Y. Housing for headlights. 1,502,684; July 29.
Rybicky, Antonina, New London, Conn. Cigarette and match box. 1,503,008; July 29.
Ryan, Thomas A., Yonkers, N. Y. Sanitary housing for toothbrushes. 1,503,134; July 29.
Ryon, Eppa H., Waltham, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Drop-box mechanism for looms. 1,502,880; July 29.
Saad, Bedri, Yakima, Wash. Check protector. 1,503,382; July 29.
Sabine, Paul E., and W. F. Friedman, Geneva, Ill., assignors to said Paul E. Sabine, trustee. Apparatus for and method of rapid transmission of telegraphic messages. 1,503,250; July 29.
Sachs, Solomon, New York, N. Y. Foldable turntable for talking machines. 1,502,747; July 29.
Safe-Cabinet Company, The. (See Dick, Ralph H., assignor.)
Safety Equipment Service Company, The. (See Nutt, Buell W., assignor.)
Salinger, Morris, Brooklyn, assignor, by mesne assignments, to P. Salinger, New York, N. Y. Clock case. Des. 65,353; July 29.
Salinger, Pauline. (See Salinger, Morris, assignor.)
Sandin, Maurits J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Fuse. 1,502,881; July 29.
Sandin, Maurits J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Refillable fuse. 1,502,882; July 29.
Sandin, Maurits J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Refillable fuse. 1,502,883; July 29.
Sandin, Maurits J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Refillable fuse. 1,502,884; July 29.
Sandin, Maurits J., Wilkinsburg, and J. B. MacNeill, Pittsburgh, Pa., assignors to Westinghouse Electric & Manufacturing Company. Refillable fuse. 1,502,885; July 29.
Sarfaty, Morton P., New York, N. Y. Drying rack. 1,502,685; July 29.
Sargent, Charles E., Rock Island, Ill. Internal-combustion engine. 1,503,383; July 29.
Sargent, William H., Clayton, Mo., assignor of one-third to G. Rixmann and one-third to J. Seidel, St. Louis, Mo. Truck-hauling attachment for tractors. 1,503,135; July 29.
Savage, Edward S., Rochester, N. Y. Toy vehicle. 1,503,009; July 29.
Savin, Oliver J., et al. (See Grinham, Frederick, assignor.)
Schaaff, Louis W., Hoboken, N. J. Wrench. 1,503,136; July 29.
Schein, Alexander E., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Means for balancing rotors. 1,503,431; July 29.
Scherer, Walter G., Cleveland, Ohio. Door and window catch. 1,502,891; July 29.
Schickerling, Conrad. (See Rosen, D., and Schickerling.)
Schidrowitz, Philip, London, England, assignor to Vultex Limited, St. Heller, Jersey, Channel Islands. Manufacture of paper and other fibrous compositions. 1,502,686; July 29.
Schimmel, Harry, New York, N. Y. Mattress. 1,502,966; July 29.
Schläfer, Valentin, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Percussion fuse. Re15,882; July 29.
Schleich Studios, Inc. (See Schleich, William F., assignor.)
Schleich, William F., assignor to Schleich Studios, Inc., New York, N. Y. Bird cage. 1,502,748; July 29.
Schmidt, Oscar C., assignor to The Cincinnati Butchers' Supply Company, Cincinnati, Ohio. Scraping means for carcass-dehairing machines. 1,502,749; July 29.
Schneider, Hermann. (See Straub, F., and Schneider.)
Schoof, William, Milwaukee, Wis. Implement handle. 1,503,251; July 29.
Schrader's, A., Son Incorporated. (See Myers, Eugene V., assignor.)
Schragin, Kuno, Berlin, Germany. Manufacturing self-cooling tires. 1,503,432; July 29.
Schroeder, Arthur C., Syracuse, N. Y. Indicating signal for vehicles. 1,503,010; July 29.
Scott, Leland L., Savannah, Mo. Two-cycle internal-combustion engine. 1,502,918; July 29.
Sealey, David A., New York, N. Y. Balanced diaphragm for sound transmitters. 1,503,011; July 29.
Secrest, George R., Melfae, Mont., assignor of one-half to J. H. Kifer, Hardin, Mont. Heater. 1,502,750; July 29.
Seib, Frank A., Detroit, Mich. Shoe. 1,502,919; July 29.
Seidel, Julius, et al. (See Sargent, William H., assignor.)
Seigle, William R., New York, N. Y. Insulation fabric. 1,503,337; July 29.
Semlear, Harry, jr. (See Hildick, W. H., and Semlear.)
Sendig, Max H., assignor of one-third to R. E. Sendig and one-third to C. M. Kruger, St. Louis, Mo. Ignition device. 1,502,687; July 29.
Sendig, Rudolf E., et al. (See Sendig, Max H., assignor.)
Serafini, Angelo, Erie, Pa. Automobile wheel chain mechanism. 1,503,012; July 29.
Severns, William, Chicago, Ill. Mop. 1,502,688; July 29.
Sewell, Edgar S., West Scarboro, Me. Valve gear for internal-combustion engines. 1,503,384; July 29.
Seyfarth, Edward, Dixon, Ill. Method and means of merchandising piece goods. 1,502,689; July 29.
Seyler, Lester J., Port Arthur, Ontario, Canada. Stake windlass. 1,502,965; July 29.

Seymour, Benjamin F., Washington, D. C. Vehicle body suspension. 1,503,065; July 29.
Seymour, Benjamin F., Washington, D. C. Resilient transmission and bearing. 1,503,137; July 29.
Shaffer, James F. (See Shaffer, Robert R. and J. F.)
Shaffer, Robert R. and J. F., Crawfordsville, Iowa. Float valve. 1,503,433; July 29.
Shallcross Control Systems Co. (See Shallcross, Wilmer M., assignor.)
Shallcross, Wilmer M., assignor to Shallcross Control Systems Co., Milwaukee, Wis. Furnace. 1,502,886; July 29.
Shallenberg, Walter A., Salem, Ohio. Air compressor for motor vehicles. 1,502,751; July 29.
Shannon, S. Q., assignor to D. R. Morrison, Los Angeles, Calif. Auto lock and traction device. 1,503,210; July 29.
Sharon Hardware Manufacturing Company. (See Howatt, John B., assignor.)
Shartle Brothers Machine Company, The. (See Shartle, Charles W., assignor.)
Shartle, Charles W., assignor to The Shartle Brothers Machine Company, Middletown, Ohio. Producing paper pulp and apparatus therefor. 1,503,138; July 29.
Shaw, John K., Minneapolis, assignor to C. F. Dahlberg, St. Paul, Minn. Plaster board having hard and soft portions. 1,503,211; July 29.
Shettlemore, Walter E., Chicago, Ill. Signal-light casing. Des. 65,354; July 29.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Buckle. 1,503,338; July 29.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Work-holding means for stapling machines or the like. 1,503,339; July 29.
Shikora, Fred R., and T. R. Lewers, Kelowna, British Columbia, Canada. Orchard heater. 1,503,066; July 29.
Showers, Ernest S., Michigamme, Mich. Child's vehicle. 1,503,067; July 29.
Shull, William G., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Telephone system. 1,503,252; July 29.
Shwayder, Maurice B., Denver, Colo. Attaching plate for suitcases or similar articles. Des. 65,335; July 29.
Sibley, Frederick H., Reno, Nev., assignor to Maximum Power Co., Wilmington, Del. Oil-well pumper. 1,502,690; July 29.
Siegenthaler, Fred, et al. (See Meyer, Joseph K., assignor.)
Signode System, Inc. (See Guenther, Arthur G. G., assignor.)
Sills, Clarence F. (See Craig, E. T., and Sills.)
Silver, Walter H., assignor to Deere & Company, Moline, Ill. Wheel hub. 1,502,920; July 29.
Simmons Company. (See Gail, John F., assignor.)
Simon, Philip H., Huntington, Ind. Mop. 1,503,385; July 29.
Sims, Orion. (See Davis, Thomas A., assignor.)
Sinclair, Harry M., Toledo, Ohio. Cleaning composition. 1,503,253; July 29.
Sinko, John A. (See Lippert, A. C., and Sinko.)
Sippel, Ernest H., and H. H. Hager, assignor, by mesne assignments to The Electric Auto-Lite Company, Toledo, Ohio. Armature-winding machine. 1,503,254; July 29.
Sisisky, Samuel. (See Bousquet, William J., assignor.)
Skinner Automotive Device Co. (See Skinner, Ralph L., assignor.)
Skinner, Ralph L., assignor to Skinner Automotive Device Co., Inc., Sacramento, Calif. Internal-combustion-engine oil and fuel appliance. 1,502,921; July 29.
Skinner, Ralph L., Detroit, Mich., assignor to Skinner Automotive Device Co., Inc., Sacramento, Calif. Internal-combustion-engine construction. 1,502,922; July 29.
Skinner, Ralph L., Detroit, Mich., assignor to Skinner Automotive Device Co., Inc., Sacramento, Calif. Piston for internal-combustion engines. 1,502,923; July 29.
Sladek, Louis J., Sycamore, Ill. Inflating nozzle and tire gauge. 1,503,068; July 29.
Sliger, Leonard, Indianapolis, Ind. Relief valve for internal-combustion engines. 1,502,753; July 29.
Slobin, Louis, Newark, N. J. Corner fastening for beds. 1,503,434; July 29.
Smidth, F. L., & Co. (See Fasting, Johan S., assignor.)
Smidth, F. L., & Co. (See Lindhard, Povl T., assignor.)
Smith, Frederick W. (See Walker, Herbert A., assignor.)
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,503,069; July 29.
Smith, John B., assignor to Western Cartridge Company, East Alton, Ill. Detonating or blasting cap. 1,502,754; July 29.
Smith, John W., Philadelphia, Pa. Propeller blade. 1,503,170; July 29.
Smith, Louie F., South Houston, assignor of one-half to G. D. Collins, Houston, three-eighths to J. A. Henson, and one-eighth to M. Collins, Harris County, Tex. Oil burner. 1,502,691; July 29.
Smith, Mildred K., Mount Vernon, N. Y., assignor of one-half to L. W. Robertson, Scottsdale, Ariz. Doll. Des. 65,356; July 29.
Smythe, Jonathan P., Washington, D. C. Water heater. 1,502,802; July 29.
Snyder, Almond H., Lancaster, N. Y., assignor to Gould Storage Battery Company. Storage battery. 1,503,070; July 29.
Snyder, Jacob R., assignor to The Star Rebound Controller Company, Cleveland, Ohio. Rebound controller. 1,502,755; July 29.
Société Anonyme des Anciens Etablissements Hotchkiss & Cie. (See Delevoye, R. E. C., and Dumaine, assignors.)
Société Anonyme des Ateliers de Sécheron. (See Werz, Jacob, assignor.)
Society of Chemical Industry in Basle. (See Straub, F., and Schneider, assignors.)
Sommer, Hugo H., Madison, Wis. Ice-cream-overrun tester. 1,502,967; July 29.
Soots, Burl, J. Klancher, H. A. Magrath, and G. Van Brimer, Pueblo, Colo. Safety reverse ratchet brake. 1,503,139; July 29.
Sperry Gyroscope Company, The. (See Schein, Alexander E., assignor.)
Sperry Gyroscope Company, The. (See Tanner, Harry L., assignor.)
Sphinx Sanitary Appliance Co. (See Gimurtsina, Christos, assignor.)
Spooner, Lee R., and P. L. Gray, Watertown, S. Dak. Coin-control lock for vending machines. 1,503,071; July 29.
Spooner, Lee R., and P. L. Gray, Watertown, S. Dak. Vending machine. 1,503,072; July 29.
Spray Engineering Company. (See Parker, Lee H., assignor.)
Stahl, Karl, assignor to the Firm: Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Airship goudola. 1,503,140; July 29.
Stahl, Karl, assignor to the Firm: Luftschiffbau Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Shock absorber for aerial vehicle. 1,503,386; July 29.
Standard Chain Company, Inc., of the State of Minnesota. (See Kittelson, Halmer C., assignor.)
Standard Sealing Equipment Corporation. (See Kimball, W. D., and Rideout, assignors.)
Stanley, Charles A., Wichita, Kans. Inductive static drain for oil-storage tanks. 1,502,924; July 29.
Star Rebound Controller Company, The. (See Snyder, Jacob R., assignor.)
State Street Trust Company, trustee. (See Howard, Stanley R., assignor.)
Steinau, Norvin J., Louisville, Ky. Advertising display signs. 1,503,212; July 29.
Steinberger, Louis, Brooklyn, N. Y. Insulated connecter. 1,503,073; July 29.
Stephens, John R., et al. (See Prator, Ernest P., assignor.)
Stephenson, Leonard D., Auburn, Calif. Hub and spoke connection. 1,503,435; July 29.
Stern, Herman, et al. (See Klepper, Eberhard, assignor.)
Sterrett, Walter R., Carnegie, assignor to H. L. Dixon Company, Pittsburgh, Pa. Leer conveyer. 1,502,692; July 29.
Stevens, Enoch P., deceased, Morgan Park, Chicago, Ill.; M. A. Stevens, executrix. Kiln. 1,503,455; July 29.
Stevens, Mary A., executrix. (See Stevens, Enoch P.)
Stickle, Frederick A., assignor, by mesne assignments, to The Lunkenheimer Company, Cincinnati, Ohio. Rewirable metal screen. 1,502,893; July 29.
Stiles, John C., et al. (See Grinham, Frederick, assignor.)
Stinson, Harold S., St. Louis, Mo. Adding machine. 1,503,171; July 29.
Stirling, Clarence C., Hartford, Conn. Electric switch. 1,503,141; July 29.
Stoekle, Erwin R., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Motor controller. 1,503,213; July 29.
Stoekle, Erwin R., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Induction relay. 1,503,255; July 29.
Stone, Charles W., Schenectady, N. Y., assignor to General Electric Company. Projectile. 1,502,925; July 29.
Storrs, Aaron P., assignor to Storrs Mica Company, Owego, N. Y. Transparency and making the same. 1,502,694; July 29.
Storrs Mica Company. (See Storrs, Aaron P., assignor.)
Straub, Fritz, Basel, and H. Schneider, Riehen, near Basel, assignors to The Society of Chemical Industry in Basle, Basel, Switzerland. Intermediate product and the manufacture of the same. 1,503,172; July 29.
Strnad, Louis G., Chicago, Ill. Toothbrush and paste holder. Des. 65,357; July 29.
Stromberg-Carlson Telephone Manufacturing Company. (See Powell, Winfred T., assignor.)
Strong Scott Manufacturing Company, The. (See Little, Philip, jr., assignor.)
Stroppel, Rudolf. (See Nemecek, M. V., and Stroppel.)
Stuart, Barnwell S. (See Read, Henry, assignor.)
Sturges, Arthur H., Omaha, Nebr. Fuel-saving device. 1,503,387; July 29.
Sullivan, Raymond H., assignor to North East Electric Company, Rochester, N. Y. Vibratory regulator. 1,503,214; July 29.
Sundh, August, Hastings upon Hudson, N. Y., and W. Westerman, Detroit, Mich. Indicator for mills. 1,502,695; July 29.

Suren, Nathan H., Needham, assignor to Gamewell Fire Alarm Telegraph Company of Newton Upper Falls, Mass. Fire-alarm system. 1,503,439; July 29.
Susseles, Abraham, Brooklyn, N. Y. Display device. 1,503,142; July 29.
Suter, John H., Los Angeles, Calif. Method of and means for fuel injection for internal-combustion motors. 1,502,926; July 29.
Sutphin, Samuel B., et al. (See Klepper, Eberhard, assignor.)
Swartz, Albert. (See Reed, John H., assignor.)
Sweet, Harrison S., Utica, N. Y. Fluid-pressure brake. 1,502,927; July 29.
Swensen, Abraham, deceased, Minneapolis, Minn.; M. Swensen, special administratrix. Adjustable ventilator device. 1,502,887; July 29.
Swensen, Mary, special administratrix. (See Swensen, Abraham.)
Swift, George W., jr., assignor to George W. Swift, Jr., Inc., Bordentown, N. J. Plate clamp and headline marker for printing presses. 1,503,074; July 29.
Swift, George W., Jr., Inc. (See Swift, George W., jr., assignor.)
Syracuse, Paul. (See Jurk, A. H., and Syracuse.)
Syracuse Washing Machine Corporation. (See Hedglon, Mead, assignor.)
Taber, Lurl, Detroit, Mich. Silo. 1,503,388; July 29.
Tanner, Harry L., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Vertical gyroscopic compass. 1,503,436; July 29.
Taylor, Lester M., Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Starting mechanism for gas engines. 1,503,075; July 29.
Taylor, Matthew A., Los Angeles, Calif. Stamp-affixing device. 1,503,389; July 29.
Tenney, Dwight, New York, N. Y., assignor to Franklin Baker Company, Philadelphia, Pa. Paring machine. 1,503,390; July 29.
Teske, Julius F., Mobridge, S. Dak. Folding bed for automobiles. 1,503,391; July 29.
Thomas, Herbert L. (See Glish, W., and Thomas.)
Thomson, Alexander, Sourlake, Tex. Wash-pipe valve. 1,502,696; July 29.
Thompson, Arthur W., Ottawa, Ontario, Canada. Combined pump and distributor. 1,502,756; July 29.
Thompson, James L., Greensburg, Pa. Storage-battery tester. 1,502,928; July 29.
Thompson, John T., (Wolverhampton) Limited. (See Jeavons, Albert, assignor.)
Thompson, Robert G., Seattle, Wash. Fuel-saving device. 1,503,215; July 29.
Tilliman, Ferdinand J., assignor to Yard-O-Meter Corporation, St. Louis, Mo. Calculating machine. 1,503,076; July 29.
Timmons, William H., et al. (See Martin, Trevillie O., assignor.)
Titus, George S., and F. M. Grout, Minneapolis, Minn. Making leavened bread. 1,502,888; July 29.
Tolk, George, and A. H. Rosenbaum, Brooklyn, N. Y. Telephone attachment casing. Des. 65,358; July 29.
Tomasek, Frank, Chicago, Ill. Automobile bumper. Des. 65,359; July 29.
Tone, Frank J., assignor to The Carborundum Company, Niagara Falls, N. Y. Sectional grinding wheel. 1,502,697; July 29.
Tooley, Edwin H., Oshawa, Ontario, Canada, assignor to A. L. Honeker, Wallace, Idaho. Powder dispenser. 1,502,698; July 29.
Toronto Power Company, The. (See Allan, William G., assignor.)
Townsend, James S., Charleston, S. C., dedicated, by mesne assignments, to the citizens of the United States of America. Attachment for roller cotton gins. 1,503,077; July 29.
Traubel, Henry J., Cresskill, N. J. Amusement railway. 1,502,699; July 29.
Treacy, Irene C., administratrix. (See Cleary, T. J., and Quinn.)
Tucker, Henry T., Fort Smith, Ark. Polish mop. 1,502,968; July 29.
Tufts, Philip E., Delisle, assignor to G. A. Ferguson, Saskatoon, Saskatchewan, Canada. Grain-car door. 1,503,173; July 29.
Turkington, Victor H., Chicago, Ill., assignor to Bakelite Corporation, New York, N. Y. Cold-molding process and product thereof. 1,503,392; July 29.
Tuttle, James K., Oakland, Calif. Olive-stuffing machine. 1,502,929; July 29.
Twardowsky, John, assignor to Universe Corporation, Chicago, Ill. Door latch. 1,503,393; July 29.
Tweddle, Thomas. (See Davis, William R., assignor.)
Twyman, Frank, assignor to Adam Hilger, Limited, London, England. Annealing and apparatus used therein. 1,502,969; July 29.
Uher, Frank J., Berwyn, Ill., assignor to Underwood Typewriter Company, New York, N. Y. Typewriter attachment. 1,503,216; July 29.
Underwood Typewriter Company. (See Renz, George W., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Underwood Typewriter Company. (See Uher, Frank J., assignor.)
Union Special Machine Company. (See Berger, Joseph, assignor.)
Union Special Machine Company. (See Hughes, Charles R., assignor.)
Union Switch and Signal Company, The. (See Grondahl, L. O., and Howard, assignors.)
Union Switch & Signal Company, The. (See Grondahl, Lars O., assignor.)
Union Switch & Signal Company, The. (See Lewis, Lloyd V., assignor.)
Universe Corporation. (See Twardowsky, John, assignor.)
Upton, Charles A., St. Paul, Minn. Lawn edger. 1,503,143; July 29.
Vacher, Clement, Kelowna, British Columbia, Canada. Sprayer. 1,503,394; July 29.
Vallez, Henry A., Bay City, Mich. Cake cutter for filter presses. 1,502,700; July 29.
Van Breiner, George. (See Soots, B., Klancher, Magrath, and Van Breiner.)
Van Der Bijl, Hendrik J., Pretoria, South Africa, assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and system for radio-signaling. 1,502,889; July 29.
Van Houten, Augustus S., Newark, N. J. Artificial denture. 1,502,970; July 29.
Van Nostrand, Abraham, Sea Cliff, N. Y. Loose-leaf check book and flexible binder therefor. 1,502,757; July 29.
Van Valkenburg, Hermon L., Milwaukee, Wis. Panel board. 1,503,340; July 29.
Vasgreen, Con J., Mogollon, N. Mex. Clothes pounder. 1,503,395; July 29.
Veasey, John H., Johannesburg, Transvaal, South Africa. Clamp. 1,502,890; July 29.
Verona Chemical Co. (See Ehrlich, Jacob, assignor.)
Victor Rubber Company, The. (See Berlin, Harry S., assignor.)
Viehmann, Nikolas. (See Nagy, Stephen, assignor.)
Villaul, Joseph, Brooklyn, N. Y. Figure wheel toy. 1,502,758; July 29.
Vincent, Louis N., assignor to Imperial Steam Appliance Company, Seattle, Wash. Flange lubricator. 1,503,174; July 29.
Voigt, Edmund, Chicago, Ill. Electrolysis suspension hook. 1,503,396; July 29.
Voisard, Louis F., assignor to The Plymouth Stamped Metal Company, Galion, Ohio. Machine for making shoe-trees. 1,502,891; July 29.
Von Soden-Fraunhofen, Graf Alfred, assignor, by mesne assignments, to Zahnradfabrik Gesellschaft, Friedrichshafen, Germany. Change-speed gear. 1,502,701; July 29.
Voulgares, John A., Cleveland, Ohio. Hat-renovating apparatus. 1,503,217; July 29.
Vulcan Iron Works. (See Damon, George B., assignor.)
Vultex Limited. (See Schidrowitz, Philip, assignor.)
Wacker, Henry, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Facing cover for wheel assemblies. 1,503,397; July 29.
Wade, Charles E., assignor to Jefferson Forge Products Company, Detroit, Mich. Metal wheel. 1,502,759; July 29.
Wagner, Hugh K., et al. (See Grinham, Frederick, assignor.)
Wagner, Louis H., assignor to The Indiana Manufacturing Company, Indianapolis, Ind. Grain-saving device for thrashing machines. 1,502,702; July 29.
Walker, Ernest A., assignor to The G. & G. Fixture Co., Newark, N. J. Lantern. Des. 65,360; July 29.
Walker, Herbert A., Fullerton, assignor to F. W. Smith, Whittier, Calif. Brake drum or the like. 1,503,175; July 29.
Wallace, Abraham, Oakland, Calif. Toothbrush. 1,502,971; July 29.
Wallbillich, Anthony F., Newark, N. J., assignor, by mesne assignments, to Distance Speed Recording Company, New York, N. Y. Speed indicator and recorder. 1,503,078; July 29.
Walling, Joseph M., Houston, Tex. Auxiliary tire carrier. 1,502,703; July 29.
Walsh, Henry J. (See Walsh, John P., assignor.)
Walsh, John P., Cambridge, Mass., assignor to H. J. Walsh, Syracuse, N. Y. Nonskid attachment for vehicle wheels. 1,503,079; July 29.
Walz, Fredrick, Burnside, Conn. Automatically-closing wrench. 1,502,892; July 29.
Ward, Harris G., Seattle, Wash. Street indicator for passenger vehicles. 1,502,893; July 29.
Waring, James H., assignor of one-half to G. E. Zirkelbach, Milwaukee, Wis. Collapsible-tube holder. 1,503,176; July 29.
Warp Compressing Machine Company. (See Remington, Arthur L., assignor.)
Warwick, Rogers M., Eastlake, Fla., assignor of one-half to D. W. Lester, Wilmette, Ill. Dispensing cardcase. 1,503,144; July 29.
Way, John F., Yantic, Conn. Starting gauge for looms. 1,503,398; July 29.
Webb, John E., McGregor, Iowa. Hypodermic needle. 1,503,399; July 29.
Webb, John E., McGregor, Iowa. Fishhook. 1,503,400; July 29.

Weber, Charles. (See Weber, Kenneth L., assignor.)
Weber, Kenneth L., Augusta, Ga., assignor of one-third to C. Weber, Cincinnati, Ohio. Mold. 1,502,803; July 29.
Wechsler, David, New York, N. Y. Photogalvanograph. 1,503,401; July 29.
Wedig, John H., Granite City, Ill. Hypotubule syringe. 1,503,218; July 29.
Wedig, John H., Granite City, Ill. Hypoampul syringe. 1,503,219; July 29.
Wedig, John H., Granite City, Ill. Hypodermic syringe. 1,503,220; July 29.
Weiffenbach, Casper, assignor to Harvey-Hanes Machine Corporation, Buffalo, N. Y. Apparatus for filling and weighing cans. 1,503,402; July 29.
Weiler, Max, Elberfeld, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Triarylmethane dye. 1,503,177; July 29.
Wells, George F., San Francisco, Calif. Waffle iron. —Des. 65,361; July 29.
Wendling, Frank S. (See Frolick, George N., assignor.)
Wendling, George X., San Francisco, Calif. Lock-joint receptacle. 1,503,178; July 29.
Wentorf, Robert H., West Bend, Wis., assignor to West Bend Aluminum Company. Valve. 1,503,145; July 29.
Werhan, Mack P., Bennington, Kans. Automatic water cut-off. 1,502,930; July 29.
Werz, Jacob, assignor to Société Anonyme des Ateliers de Sécheron, Geneva, Switzerland. Device for transmitting the rotary motion of a motor to the wheels of vehicles. 1,503,221; July 29.
West Bend Aluminum Company. (See Wentorf, Robert H., assignor.)
Westerman, William. (See Sundh, A., and Westerman.)
Western Cartridge Company. (See Smith, John B., assignor.)
Western Electric Company. (See Van Der Bijl, Hendrik J., assignor.)
Westinghouse Air Brake Company, The. (See Broussouse, Fernand L., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Lane, George S., assignor.)
Westinghouse Air Spring Company. (See McElroy, John J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Conrad, Frank, assignor.)
Westinghouse Electric & Manufacturing Company. (See Frost, Leslie E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Jennings, Oliver S., assignor.)
Westinghouse Electric and Manufacturing Company. (See Jorstad, Osmund M., assignor.)
Westinghouse Electric and Manufacturing Company. (See Kempton, Willard H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kintner, Samuel M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Peters, John F., assignor.)
Westinghouse Electric and Manufacturing Company. (See Pupin, M. I., and Armstrong, assignors.)
Westinghouse Electric & Manufacturing Company. (See Sandin, M. J., and MacNeill, assignors.)
Westinghouse Electric & Manufacturing Company. (See Sandin, Maurits J., assignor.)
Westinghouse Electric and Manufacturing Company. (See Taylor, Lester M., assignor.)
Westmoreland Specialty Company. (See Horn, Gustav A., assignor.)
Wethling, Harry D., Orange, N. J. Electric permutation lock. 1,503,403; July 29.
Wheeler, William I., Scottville, Ill. Power-transmission mechanism. 1,503,404; July 29.
Wheeler, William I., Scottville, Ill. Safety device for vehicles. 1,503,405; July 29.
Wheeler, William I., Scottville, Ill. Template. 1,503,406; July 29.
Whitaker, Frank P., Rugby, England, assignor to General Electric Company. Dynamo-electric machine. 1,502,931; July 29.
Whitaker-Glessner Company. (See Kiellberg, Henry, assignor.)
Whitson, Lincoln L., assignor of one-fourth to H. L. Harding and G. A. Harding, Van Nuys, Calif. Oil gauge for crank cases. 1,503,179; July 29.
Wilcke, Oscar, assignor to the Firm Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Bomb-throwing device. 1,503,407; July 29.
Williams, Guy R., Attleboro, Mass. Garment-marking device. 1,503,080; July 29.
Williams, Horace S., Brooklyn, N. Y. Paper-cutting machine. 1,503,408; July 29.
Willis, Donald W., Canton, Ohio. Spark plug. 1,503,081; July 29.
Wilson, Henry M. (See Wilson, Hiram N., assignor.)
Wilson, Hiram N., assignor to H. M. Wilson, Omaha, Nebr. Safety tire valve. 1,502,704; July 29.
Wilson, John, and Sons, Limited. (See Wilson, Samuel S., assignor.)
Wilson, Samuel S., Meyerton, assignor to John Wilson and Sons, Limited, Johannesburg, Transvaal, South Africa. Manufacturing tiles, sheets, and other articles or products from asbestos or like materials. 1,503,409; July 29.
Windham, William W., Olympia, Wash. Plumb bob. 1,502,804; July 29.
Windish, Fred, assignor of one-half to M. Rudzik, Hartford, Conn. Safety pressure device. 1,503,180; July 29.
Winter, Thomas N., Delaware, Ohio. Automobile spring. 1,503,181; July 29.
Wisner, James T., New York, N. Y. Device for forming hollow articles of plastic material. 1,502,805; July 29.
Witherow Steel Company. (See Witherow, William P., assignor.)
Witherow, William P., Pittsburgh, assignor to Witherow Steel Company, Neville Island, Pa. Die rolling. 1,502,705; July 29.
Witt, Carl A., Los Angeles, Calif. Motor-meter mounting. 1,503,146; July 29.
Wittstein, Charles T. and F. H., Newark, N. J. Monogram medallion ring. Des. 65,362; July 29.
Wittstein, Francis H. (See Wittstein, Charles T. and F. H.)
Wohl, Samuel. (See Glass, S., and Wohl.)
Woodbridge, Joseph L., Philadelphia, Pa. Means for interconverting alternating and direct current. 1,503,440; July 29.
Woodcock, Byron E., E. F. Monnin, and A. C. Reese, Scranton, Pa. Traverse mechanism. 1,503,441; July 29.
Woodstock Typewriter Company. (See Hokanson, Otto A., assignor.)
Worcester Electric Tool Company. (See Ojerholm, Arthur W., assignor.)
Worthington Pump and Machinery Corporation. (See Aborn, George P., assignor.)
Wright-Buncher Mfg. Co. (See Wright, Roland T., assignor.)
Wright, Roland T., assignor to Wright-Buncher Mfg. Co., St. Louis, Mo. Spark plug. 1,503,182; July 29.
Wynn, Mabel, Los Angeles, Calif. Combination washcloth and doll. Des. 65,363; July 29.
Yard-O-Meter Corporation. (See Tillman, Ferdinand J., assignor.)
Yates Machine Company. (See Yates, Thomas J., assignor.)
Yates, Thomas J., assignor to Yates Machine Company, Salem, Mass. Combined closure and marker for bags. 1,503,410; July 29.
Young, Wilbur L., Fort Wayne, Ind., assignor to General Electric Company. Electric heater. 1,502,932; July 29.
Young, William T., et al. (See Martin, Trevillie O., assignor.)
Zahnradfabrik, Gesellschaft. (See Von Soden-Fraunhofen, Graf A., assignor.)
Zeidler Economy Spring Pad Co. (See Zeidler, William A., assignor.)
Zeidler, William A., assignor to Zeidler Economy Spring Pad Co., Inc., New York, N. Y. Pad for laundry and other machines. 1,503,147; July 29.
Zimmerman, Frank J., Modesto, Calif. Apparatus for testing battery jars. 1,503,411; July 29.
Zirkelbach, George E. (See Waring, James H., assignor.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 29TH DAY OF JULY, 1924.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Absorbent pad. E. Fabricius-Bjerre. 1,503,359; July 29.
Acid, Production of concentrated nitric. E. Bergve. 1,503,259; July 29.
Adding machine. H. S. Stinson. 1,503,171; July 29.
Advertising-card holder. R. A. Johnston. 1,502,782; July 29.
Aerial transporter. H. H. B. Marrian and E. E. Carver. 1,502,997; July 29.
Aeroplane. W. Calagans. 1,503,297; July 29.
Air and other fluids, Compressor of. F. L. Broussouse. 1,503,261; July 29.
Air circulator. R. W. Menk. 1,502,862; July 29.
Aircraft-arresting device. R. E. Bassler. 1,502,653; July 29.
Aircraft, Heat-transfer system for. H. F. Parker. 1,503,374; July 29.
Air-heating means. P. Little, jr. 1,502,858; July 29.
Airship gondola. K. Stabl. 1,503,140; July 29.
Airships, Skeleton framework construction for. K. Arnstein. 1,503,293; July 29.
Air spring. Automatic. J. J. McElroy. 1,503,274; July 29.
Ankle tension board and arch developer. F. M. Friesell. 1,502,947; July 29.
Annealing and apparatus used therein. F. Twyman. 1,502,969; July 29.
Antennæ tuning system. F. Conrad. 1,502,848; July 29.
Antioffset device, Portable. J. R. Blaine. 1,503,224; July 29.
Antiskid device. V. F. Rejček. 1,502,878; July 29.
Antislipping device. J. J. Ehmen. 1,502,718; July 29.
Armature-winding machine. E. H. Sippel and H. H. Hager. 1,503,251; July 29.
Asynchronous motor. F. Deflassieux. 1,502,909; July 29.
Auto lock. J. M. Allen. 1,502,933; July 29.
Auto lock. C. J. Connors. 1,502,809; July 29.
Auto lock and traction device. S. Q. Shannon. 1,503,210; July 29.
Automatically-closing wrench. F. Walz. 1,502,892; July 29.
Automobile brake. J. E. Beard. 1,503,412; July 29.
Automobile bumper. A. Ježek. 1,503,049; July 29.
Automobile bumper. F. Tomasek. Des. 65,359; July 29.
Automobile direction indicator. H. T. Cox. 1,502,940; July 29.
Automobile doors, Connecter for demountable. M. R. Hull. 1,503,419; July 29.
Automobile engines, Radiator cap for water-cooled. F. Fitchett. 1,503,187; July 29.
Automobile hat rack. J. A. Campbell. 1,503,298; July 29.
Automobile signal. J. F. Archer. 1,503,103; July 29.
Automobile signal. F. Bauer. 1,503,108; July 29.
Automobile spring. T. N. Winter. 1,503,181; July 29.
Automobile tread chain. H. C. Kittelson. 1,503,191; July 29.
Automobile wheel chain mechanism. A. Serafini. 1,503,012; July 29.
Automobile wrench. J. A. Clay. 1,503,349; July 29.
Automobiles, Spring cover for. O. F. Anderson. 1,502,649; July 29.
Awning. D. H. Harnly. 1,502,774; July 29.
Azodyestuffs, New. J. Haller. 1,503,044; July 29.
Bacon, Device for removing rind from. A. J. Nehring. 1,503,003; July 29.
Badge or similar article. L. L. Kinner. Des. 65,343; July 29.
Bag: *See*—
Traveling bag.
Bagasse fibers, Preventing the deterioration of. T. B. Munroe. 1,503,202; July 29.
Bags, Combined closure and marker for. T. J. Yates. 1,503,410; July 29.
Baler. P. Bailey. 1,503,183; July 29.
Band-saw joint and making same. C. L. Ericson. 1,503,310; July 29.
Bar: *See*—
Cow bar.
Barrel making, Steel-. C. T. Draper. 1,503,038; July 29.
Baseball cover. B. Kennedy. 1,502,784; July 29.
Battery: *See*—
Storage battery.
Battery construction. D. Rosen and C. Schickerling. 1,503,380; July 29.
Battery jars, Apparatus for testing. F. J. Zimmerman. 1,503,411; July 29.
Bearing for hydraulic machines, Shaft. J. Overn, jr. 1,503,459; July 29.
Bearing, Thrust. G. E. Luce. 1,502,859; July 29.
Bearings, Automatic bolt adjustment for. G. L. Miller. 1,502,737; July 29.
Bed for automobiles, Folding. J. F. Teske. 1,503,391; July 29.
Beds, Corner fastening for. L. Slobin. 1,503,434; July 29.
Belt and making same. E. G. Kimmich. 1,503,453; July 29.
Belt fastener. H. Haupt. 1,503,322; July 29.
Belts, Troughing support for conveyer. C. K. Baldwin and M. J. Pos. 1,502,976; July 29.
Bib. E. A. Crawford and G. P. La Mere. 1,503,117; July 29.
Binding machine, Concealed-stitch. C. R. Hughes. 1,502,778; July 29.
Bit: *See*—
Drill bit.
Block: *See*—
Loom shuttle block.
Board: *See*—
Panel board. Sounding board.
Plaster board.
Boat propulsion. H. F. Effertz. 1,503,232; July 29.
Bolt: *See*—
Shackle bolt.
Bomb-throwing device. O. Wilcke. 1,503,407; July 29.
Book and flexible binder therefor, Loose-leaf check. A. Van Nostrand. 1,502,757; July 29.
Book cover. R. J. Copeland. 1,502,979; July 29.
Bottle holder. G. A. Barton. 1,503,016; July 29.
Bowl or similar article. G. A. Horn. Des. 65,338; July 29.
Box: *See*—
Cigarette and match box. Money box.
Hat box.
Box. G. Hornecker. 1,503,161; July 29.
Box. J. G. Huye. 1,502,780; July 29.
Box and receptacle file, Combined candy. H. Dilas. 1,502,910; July 29.
Bracelet. G. D. Harrison. 1,503,445; July 29.
Bracket: *See*—
Shade and curtain bracket. Support bracket.
Brake: *See*—
Automobile brake. Vehicle brake.
Fluid-pressure brake. Wagon brake.
Ratchet brake.
Brake-actuating mechanism. R. E. C. Delevoye and E. A. F. Dumaine. 1,503,350; July 29.
Brake drum or the like. H. A. Walker. 1,503,175; July 29.
Brasslère. S. Baruch. 1,502,762; July 29.
Bread, Making leavened. G. S. Titus and F. M. Grout. 1,502,888; July 29.
Brick, and wall construction. G. E. Luce. 1,503,327; July 29.
Briquetting. G. B. Damon. 1,503,304; July 29.
Brush, Phonograph-record-cleaning. J. L. Mikovits and F. Petersell. 1,503,058; July 29.
Brushes, Back for. H. S. Baird. 1,503,014; July 29.
Buckle. L. W. Shields. 1,503,338; July 29.
Buckle base. A. V. Brown. 1,503,020; July 29.
Buckle, Belt. N. C. Govis. 1,502,771; July 29.
Burner: *See*—
Oil burner.
Burner. W. Gösmann. 1,503,042; July 29.
Butter-slicing machine. J. K. Meyer. 1,503,201; July 29.
Button, Cuff. S. F. Bernardini and P. Della Casse. 1,502,899; July 29.
Cabinet, Record. M. A. Mousel. 1,503,330; July 29.
Cable end bell. F. E. Getts. 1,503,235; July 29.
Cage, Bird. W. F. Schleich. 1,502,748; July 29.
Calculating machine. H. Herlitz. 1,502,952; July 29.
Calculating machine. F. J. Tillman. 1,503,076; July 29.
Calculator. G. L. Canon. 1,503,299; July 29.
Call-distributing system. H. D. Currier and G. R. Eaton. 1,503,096; July 29.
Camera, Automatic film-winding. E. C. Clark and J. F. Pelhemus. 1,503,300; July 29.

Cameras whereby panoramic-view photographs can be produced, Apparatus for attachment to photographic. F. F. James. 1,503,437; July 29.
Can-capping machine. M. V. Nemecek and R. Stroppel. 1,502,869; July 29.
Cans, Apparatus for filling and weighing. C. Weiffenbach. 1,503,402; July 29.
Cap, Adjustable. J. Rosenzweig. 1,503,007; July 29.
Cap, Hinged. M. B. Loetscher. 1,502,996; July 29.
Cap, Ventilated. J. Kaufman. 1,502,856; July 29.
Capping machine. F. M. Dalrymple. 1,503,034; July 29.
Car, Automotive railway. H. Ford. 1,503,454; July 29.
Car, Construction. E. G. Carr. 1,502,846; July 29.
Car door, Grain-. P. E. Tufts. 1,503,173; July 29.
Car-door mechanism. C. M. Kemper. 1,502,783; July 29.
Car, Finger-course unit. C. E. Fuller. 1,503,452; July 29.
Car roof. C. D. Bonsall. 1,502,656; July 29.
Carburizing box and the like and making same. P. A. E. Armstrong. 1,502,973; July 29.
Cardcase, Dispensing. R. M. Warwick. 1,503,144; July 29.
Card, Playing. H. Read. Des. 65,350; July 29.
Cards and grouped cigarettes, Assembling apparatus for. G. C. Ekström, B. A. E. Johnson, and G. Örström. 1,503,355; July 29.
Carrier: *See*—
Change carrier. Tire carrier.
Luggage carrier.
Cartridge-reloading tool. L. H. Hueter. 1,502,824; July 29.
Case: *See*—
Cardcase. Vanity case.
Toilet case.
Caster socket. W. H. McAllister. 1,503,328; July 29.
Catalytic heating method and apparatus. C. Berger. 1,502,807; July 29.
Catamenial appliance. C. Gimurtsina. 1,503,361; July 29.
Catching-off machine. P. Hoyoux. 1,503,188; July 29.
Ceiling rosette. W. Bolton, jr., and N. M. Paull. 1,502,655; July 29.
Centrifugal drier. H. C. Law. 1,502,677; July 29.
Change carrier. A. Beck. 1,502,710; July 29.
Change maker. A. Beck. 1,502,709; July 29.
Charm. A. J. Brown. Des. 65,325; July 29.
Chart, Astrological. B. Bart. 1,502,761; July 29.
Chart, Cooking. M. T. Fisher. 1,502,850; July 29.
Check protector. B. Saad. 1,503,382; July 29.
Check, Safety bank. W. R. Davis. 1,502,981; July 29.
Churns, Closure means for milk. S. Hole. 1,502,673; July 29.
Cigar-bunching machine. B. and L. Liberman and W. M. Reichart. 1,502,995; July 29.
Cigar clipper and lighter. L. V. Aronson. 1,502,974; July 29.
Cigarette and match box. A. Rybicky. 1,503,008; July 29.
Circuit-without sparking, Device for cutting an inductive resistance out of. J. Pfretzschner. 1,503,376; July 29.
Circuits, Means for testing track. A. B. Barnett. 1,502,934; July 29.
Clamp: *See*—
Universal clamp.
Clamp. J. H. Veasey. 1,502,890; July 29.
Clasp: *See*—
Cover-fastening clasp.
Cleaner: *See*—
Windshield cleaner.
Cleaning composition. H. M. Sinclair. 1,503,253; July 29.
Cleaning compound. W. Kuykendall. 1,503,450; July 29.
Cleaning device. F. I. Phoenix and A. H. Behrman. 1,502,798; July 29.
Cleaning implement. J. M. Bowen. 1,503,449; July 29.
Clinkers, etc., Rotary cooler for cement. P. T. Lindhard. 1,503,193; July 29.
Clock case. M. Salinger. Des. 65,353; July 29.
Clock, Electric. C. L. Beard. 1,502,840; July 29.
Clock escapement. J. P. and J. V. Armstrong. 1,503,104; July 29.
Clothes pounder. C. J. Vasgreen. 1,503,395; July 29.
Cock, Gauge. W. O. Ashe. 1,502,650; July 29.
Coil-winding machine. J. A. Lewellyn. 1,503,272; July 29.
Coke, Apparatus for quenching. C. K. Baldwin. 1,502,977; July 29.
Cold-molding process and product thereof. V. H. Turkington. 1,503,392; July 29.
Collapsible tube. W. C. Huntoon. 1,502,779; July 29.
Colloidal bodies, Making. C. Ellis. 1,502,945; July 29.
Combination lock. A. Hoffman. 1,502,672; July 29.
Compass, Vertical gyroscopic. H. L. Tanner. 1,503,436; July 29.
Compressor or like device. H. B. Joy. 1,502,914; July 29.
Concrete and wood floor construction device. C. W. Prickett. Re15,881; July 29.
Concrete cap and sill block for building purposes. S. O. Moroso. 1,503,059; July 29.
Concrete construction, Insert for. J. F. Curley. 1,502,766; July 29.
Concrete mold. A. H. Evans. 1,503,358; July 29.
Condenser, Variable. D. S. McCrum. 1,502,860; July 29.
Confection. J. F. Milligan. 1,502,864; July 29.
Confectionery box. A. P. Johnson. Des. 65,340; July 29.
Console set. A. B. Fischer. Des. 65,333; July 29.
Container, Strip-sealed. F. A. Assmann, jr. 1,503,256; July 29.
Control system. S. M. Kintner. 1,502,831; July 29.
Controller, Motor. E. R. Stoekle. 1,503,213; July 29.
Cooking utensil. F. Berger. 1,502,843; July 29.
Copper and the product thereof, Treating. S. B. Leiter. 1,502,857; July 29.
Corn-husking apparatus. F. Lee. 1,502,994; July 29.
Corn-sheller attachment. H. B. Bingman. 1,503,149; July 29.
Corset steels, Process and apparatus for coating. H. H. Leland and G. A. New. 1,503,128; July 29.
Cosmetic jar. G. R. Collins. Des. 65,327; July 29.
Coupling: *See*—
Snaft coupling.
Cover-fastening clasp. A. R. Poole. 1,503,288; July 29.
Cow bar, Clean-. E. J. Franklin. 1,503,039; July 29.
Crank, Safety. E. E. and V. Neldner. 1,503,205; July 29.
Crate for hats, Packing. B. P. Osterman. 1,502,962; July 29.
Cue rack. T. Drost. 1,503,120; July 29.
Cuff fastener. T. A. Davis. 1,503,230; July 29.
Cultivator attachment. J. T. Crawford. 1,503,414; July 29.
Cultivator tooth. C. D. Kirtlan. 1,502,832 July 29.
Current, Means for interconverting alternating and direct. J. L. Woodbridge. 1,503,440; July 29.
Cutter: *See*—
Ensilage cutter. Milling cutter.
Cutting tool. C. Page. 1,502,743; July 29.
Cylinder. R. M. Comiskey. 1,502,906; July 29.
Dehairing machines, Scraping means for carcass-. O. C. Schmidt. 1,502,749; July 29.
Delivery device, Single-article-. B. N. Mulford. 1,503,277; July 29.
Dental appliance. G. E. Perry. 1,503,063; July 29.
Denture, Artificial. A. S. Van Houten. 1,502,970; July 29.
Derrick or crane. A. G. Gray. 1,502,667; July 29.
Derrick, Stiff-leg. A. S. Heffron. 1,502,989; July 29.
Desk. A. S. Falls. 1,503,233; July 29.
Detonating or blasting cap. J. B. Smith. 1,502,754; July 29.
Die-guiding means for forging presses. C. A. Hill. 1,502,722; July 29.
Die rolling. W. P. Witherow. 1,502,705; July 29.
Digger: *See*—
Peanut digger.
Direction signal. C. A. Fruitt. 1,502,664; July 29.
Dishwashing machine. A. J. Mitchell. 1,503,427; July 29.
Dispensing apparatus. C. L. Bastian. 1,503,107; July 29.
Display case and refrigerator, Combined cooler. G. C. Amend. 1,502,872; July 29.
Display device. A. Susseles. 1,503,142; July 29.
Display stand. J. Fazio. Des. 65,332; July 29.
Display stand for pencils. E. C. Kubler. Des. 65,344; July 29.
Doll. M. K. Smith. Des. 65,356; July 29.
Doll, Rag. E. D. Landfear. Des. 65,345; July 29.
Door and window catch. W. G. Scherer. 1,502,801; July 29.
Door-control mechanism, Inwardly-operating. H. G. Ainsworth. 1,502,707; July 29.
Door-hanger mechanism. J. B. Howat. 1,503,364; July 29.
Door latch. J. Twardowsky. 1,503,393; July 29.
Door remover, Grain-. T. C. Hutchinson. 1,502,854; July 29.
Drier: *See*—
Centrifugal drier. Rotary drier.
Drill bit, Magazine rotary. G. W. Gale. 1,502,851; July 29.
Drinking fountain. W. H. Collins. 1,502,847; July 29.
Drying rack. M. P. Sarfaty. 1,502,685; July 29.
Dustguard. F. Hufnagel. 1,502,777; July 29.
Dye, Triarylmethane. M. Weiler. 1,503,177; July 29.
Dyestuffs and making same, Mordant. T. Lombard. 1,503,194; July 29.
Educational appliance, Child's. G. L. E. Klingbeil. 1,502,991; July 29.
Egg separator. H. C. Frenier. 1,502,770; July 29.
Egg tester. T. Graves. 1,502,721; July 29.
Electric-current generators, Power transmission for. K. H. Conley. 1,503,116; July 29.
Electric fixtures, Interchangeable support for. H. D. McFaddin. 1,503,275; July 29.
Electric heater. G. N. Frolick. 1,502,819; July 29.
Electric heater. W. L. Young. 1,502,932; July 29.
Electric machine, Dynamo-. F. P. Whitaker. 1,502,931; July 29.
Electric oscillations by an electric arc, Means for producing. R. Herzog. 1,503,324; July 29.
Electric permutation lock. H. D. Wethling. 1,503,403; July 29.
Electric switch. G. A. Burnham. 1,503,022; July 29.
Electric switch. J. H. Dennedy. 1,502,717; July 29.
Electric switch. C. W. Jameson. 1,502,835; July 29.
Electric switch. C. C. Stirling. 1,503,141; July 29.
Electrical apparatus for automatically controlling peak demands. E. T. Moore. 1,503,130; July 29.

Electricity arrester, High-potential. F. R. Parker. 1,503,284; July 29.
Electrode. W. G. Allan. 1,502,708; July 29.
Electrolysis suspension hook. E. Voigt. 1,503,396; July 29.
Electromagnet. E. R. Carichoff. 1,503,090; July 29.
Emery, carborundum, glass-covered tapes, cloth, or paper, Holder for strips of. W. R. K. Gandell. 1,503,416; July 29.
Engine: *See*—
Explosive engine.
Internal-combustion engine.
Engine construction, Internal-combustion. R. L. Skinner. 1,502,922; July 29.
Engine mounting for steam-propelled vehicles. G. A. Bryan. 1,502,978; July 29.
Engine oil and fuel appliance, Internal-combustion. R. L. Skinner. 1,502,921; July 29.
Engine-starter gearing. M. L. Hillmer and L. O. Parker. 1,502,671; July 29.
Engines, Attachment for gas. J. P. Meyer. 1,503,371; July 29.
Engines, Clutch and flywheel combination for motor-vehicle. T. B. Murray. 1,503,331; July 29.
Engines, Pump for internal-combustion. S. Nagy. 1,503,002; July 29.
Engines, Relief valve for internal-combustion. L. Sliger. 1,502,753; July 29.
Engines, Starting mechanism for gas. L. M. Taylor. 1,503,075; July 29.
Engines, Valve gear for internal-combustion. E. S. Sewell. 1,503,384; July 29.
Ensilage cutter. E. O. O'Dell. 1,502,742; July 29.
Envelopes, Machine for the manufacture of. A. Haas. 1,503,155; July 29.
Evaporating apparatus. W. G. Doern. 1,502,911; July 29.
Eyeleting machine. L. Muther. 1,502,868; July 29.
Eyeshield. P. A. Fleber. 1,502,661; July 29.
Exhaust pipes, Cut-out for. J. C. Beiswenger. 1,502,842; July 29.
Explosive engine T. Keenan. 1,503,267; July 29.
Fabric: *See*—
Insulation fabric.
Fastener, Separable. G. H. Elwell. 1,503,442; July 29.
Feed attachment, Circular-. T. B. Huestis. 1,503,242; July 29.
Feeder, Chicken. F. E Rose. 1,503,335; July 29.
Feed-water-heating system. G. P. Aborn. 1,503,082; July 29.
Fibers for making fabrics and webs, Process of and apparatus for forming bast-wood. J. Klimpfel. 1,502,912; July 29.
Filing receptacle. P. Chipman. 1,503,227; July 29.
Film-splicing apparatus. J. H. McNabb. 1,502,959; July 29.
Filtration accelerator, Production of a. C. F. Ritchie. 1,503,133; July 29.
Finger ring. L. E. Linsey. Des. 65,346; July 29.
Finger ring for crocheting. H. R. Rees. 1,502,799; July 29.
Fire-alarm system. N. H. Suren. 1,503,439; July 29.
Firearm. J. M. Browning. 1,502,658; July 29.
Fire boxes, Arch constructions for. G. C. Denney. 1,503,231; July 29.
Fire extinguisher with a single delivery tube. R. C. Iddings. 1,503,125; July 29.
Fishhook. J. E. Webb. 1,503,400; July 29.
Fishing hook. W. J. Jamison. 1,502,781; July 29.
Flange lubricator. L. N. Vincent. 1,503,174; July 29.
Flash-light apparatus. E. Chasseraux. 1,502,939; July 29.
Floor-polishing machine. B. Huber. 1,503,048; July 29.
Fluid in fluid-distributing systems, Means for controlling flow and pressure of. E. A. Mitchell. 1,503,329; July 29.
Fluid-pressure brake. H. S. Sweet. 1,502,927; July 29.
Flying-boat fuselage. H. E. Krammer. 1,503,052; July 29.
Folding machine. L. Muther. 1,502,867; July 29.
Fountain: *See*—
Drinking fountain.
Frame: *See*—
Transformer frame.
Fuel-feeding devices, Jet agitator for. J. A. Barnard. 1,502,760; July 29.
Fuel-saving device. A. H. Sturges. 1,503,387; July 29.
Fuel-saving device. R. G. Thompson. 1,503,215; July 29.
Funnel. H. G. Parker. 1,503,373; July 29.
Furnace: *See*—
Wash-kettle furnace.
Furnace. W. M. Shelleress. 1,502,886; July 29.
Furnace arch. M. Liptak. 1,502,790; July 29.
Fuse. M. J. Sandin. 1,502,881; July 29.
Fuse and mounting. C. Christensen. 1,503,228; July 29.
Fuse and mounting. E. H. Jacobs. 1,503,266; July 29.
Fuse, Percussion. V. Schläfer. Re15,882; July 29.
Fuse, Refillable. M. J. Sandin. 1,502,882–5; July 29.
Game. W. G. Bishop. 1,503,294; July 29.
Game. E. C. Fohmann. 1,503,415; July 29.
Game apparatus. G. S. Page. 1,503,283; July 29.
Game board. J. Gerberholtz. Des. 65,334; July 29.
Game-score register. D. Fox. 1,502,662; July 29.
Garment hanger. J. Grimberg. 1,503,236; July 29.
Garment-marking device. G. R. Williams. 1,503,080; July 29.
Garments, Protective envelope for. M. D. K. Bremner. 1,503,460; July 29.
Gas regulator. T. J. Cleary and G. F. Quinn. 1,503,301; July 29.
Gases, Apparatus for separating and recovering. O. L. Barnebey. 1,502,897; July 29.
Gases, Apparatus for treating. O. L. Barnebey. 1,502,895; July 29.
Gases, Device for controlling the flow of. T. R. Blanchard. 1,502,654; July 29.
Gasoline gauge. H. G. Lee. 1,502,788; July 29.
Gasoline or other fuel in internal-combustion engines, Apparatus for improving and increasing the useful results obtainable from. F. Grinham. 1,502,772; July 29.
Gate: *See*—
Railway-crossing gate.
Gate. W. J. Brigner. 1,502,937; July 29.
Gauge: *See*—
Gasoline gauge. Micrometer gauge.
Gear, Change-speed. Graf A. von Soden-Fraunhofen. 1,502,701; July 29.
Gear, Draft. G. H. Langton. 1,503,192; July 29.
Gear, Power reverse. A. S. Osbourne. 1,503,280; July 29.
Gearing, Change-speed. A. Laukhuff. 1,502,787; July 29.
Generator: *See*—
Ozone generator. Power generator.
Generator suspension. E. J. Blake. 1,503,086; July 29.
Gins, Attachment for roller cotton. J. S. Townsend. 1,503,077; July 29.
Glass-cutting machine. E. J. Kiefer. 1,502,990; July 29.
Glove. C. H. Noyes. 1,502,871; July 29.
Goggles, Antiglare. W. S. Funk. 1,502,820; July 29.
Golf putter. R. Rimmer. 1,503,291; July 29.
Governor, Electric throttle. J. B. Replogle. 1,502,800; July 29.
Grab. A. E. Norris. 1,503,333; July 29.
Grain huller. R. A. Little. 1,503,423; July 29.
Granite-working tool. E. A. Chase. 1,503,026; July 29.
Granular-materials-dispensing device. C. W. Lanphere. 1,503,127; July 29.
Grates, Method of and apparatus for automatic cleaning and automatic control of mechanical. R. A. Carter, jr. 1,503,092; July 29.
Grinder for coffee and the like. H. L. Johnston. 1,502,675; July 29.
Grinding wheel, Sectional. F. J. Tone. 1,502,697; July 29.
Groundworking member. J. G. Cagle. 1,502,711; July 29.
Gun, Blasting. E. Hutton. 1,503,420; July 29.
Hairdressing appliance. A. H. Bongers. 1,503,295; July 29.
Handle: *See*—
Implement handle.
Hanger: *See*—
Garment hanger.
Harrow. C. F. Matz. 1,503,200; July 29.
Hat. R. Finkelstein. 1,502,720; July 29.
Hat. L. Pizzutiello. 1,503,287; July 29.
Hatbox. P. E. Miller. 1,502,999; July 29.
Hat-renovating apparatus. J. A. Voulgares. 1,503,217; July 29.
Heading machine. C. Fassinger. 1,503,312; July 29.
Headlight. W. D. Ryan. 1,502,683; July 29.
Headlight, Antiglare. W. H. F. W., and G. Hollander. 1,502,723; July 29.
Headlight housing. W. D. Ryan. 1,502,684; July 29.
Headlight of motor cars and like road vehicles. G. F. Hill. 1,502,670; July 29.
Heat from one liquid to another, Apparatus for transmitting. E. Morterud. 1,503,428; July 29.
Heater: *See*—
Electric heater. Water heater.
Orchard heater.

Painting booth. F. P. Bingman. 1,502,844; July 29.
Panel board. H. L. Van Valkenburg. 1,503,340; July 29.

Paper and other fibrous compositions, Manufacture of. P. Schidrowitz. 1,502,686; July 29.
Paper and product obtained thereby, Producing crinkled. E. Klepper. 1,503,451; July 29.
Paper-cutting machine. H. S. Williams. 1,503,408; July 29.
Paper-feeding machines, Feed-interrupting mechanism for. L. J. Frohn. 1,502,663; July 29.
Paper-making apparatus. C. G. Robinson. 1,503,246; July 29.
Paper pulp and apparatus therefor, Producing. C. W. Shartle. 1,503,138; July 29.
Paper towels and like articles, Dispenser for. P. H. Horwitt. 1,503,241; July 29.
Paring machine. D. Tenney. 1,503,390; July 29.
Peanut digger. J. E. Parker. 1,502,795; July 29.
Peanut diggers, Conveyer for. J. E. Parker. 1,502,796; July 29.
Pencil. J. E. Roach. Des. 65,352; July 29.
Pencil and making the same. L. W. Bugbee. 1,502,763; July 29.
Pencil, Magazine. R. Nardi. 1,503,244; July 29.
Phonograph cabinet. O. J. Haarlander. Des. 65,336–7; July 29.
Phonograph tone modifiers. E. C. Clark and A. T. Brower. 1,502,764; July 29.
Phonographs, Nonset stop for. J. E. Feltner. 1,502,769; July 29.
Photogalvanograph. D. Wechsler. 1,503,401; July 29.
Photographic apparatus. S. Cocanari. 1,503,302; July 29.
Photographic-printing machines, Automatic light-control apparatus for. A. S. Howell. 1,502,954; July 29.
Piece goods, Method and means of merchandising. E. Seyfarth. 1,502,689; July 29.
Pipe wrench. E. Bradley. 1,503,296; July 29.
Pipes and for cigar and cigarette holders, Case for. A. Dunhill. 1,503,354; July 29.
Piston. J. P. Lavoie. 1,503,369; July 29.
Piston for internal-combustion engines. R. L. Skinner. 1,502,923; July 29.
Piston-valve structure for internal-combustion engines. E. R. Burtnett. 1,503,185; July 29.
Pistons, Fitting. M. B. Covert. 1,502,765; July 29.
Plaster board having hard and soft portions. J. K. Shaw. 1,503,211; July 29.
Plate or similar article. R. E. Lukens. Des. 65,347; July 29.
Plowshare. D. A. Nicol. 1,502,741; July 29.
Plug attachment. F. Dominick. 1,503,306; July 29.
Plumb bob. W. W. Windham. 1,502,804; July 29.
Pointing machine. A. Basky. 1,503,017; July 29.
Poultry, Apparatus for killing. O. C. Pacholke. 1,503,372; July 29.
Powder dispenser. E. H. Tooley. 1,502,698; July 29.
Power device, Hydraulic. B. A. Bristow. 1,502,901; July 29.
Power generator, Fluid-. W. J. Rodgerson. 1,502,964; July 29.
Power mechanism, Mobile. C. B. Magrath. 1,503,056; July 29.
Power press. J. Nelson. 1,503,131; July 29.
Power strap. R. T. Powers, sr. 1,503,207; July 29.
Power-transmission mechanism. W. I. Wheeler. 1,503,404; July 29.
Power transmitter. W. Davis. 1,502,767; July 29.
Press: *See*—
Power press. Punch press.
Press. L. T. and D. S. Kimmerle. 1,502,957; July 29.
Presses, Cake cutter for filter. H. A. Vallez. 1,502,700; July 29.
Presses, Plate clamp and headline marker for printing. G. W. Swift, jr. 1,503,074; July 29.
Pressure pad. M. Balcher. 1,503,105; July 29.
Printer table for registers or like machines. B. P. Hayes. 1,502,669; July 29.
Printer's galley and assembling printers' material. E. P. Ehrlinger. 1,503,152; July 29.
Printing consecutive numbers. O. W. Pendergast. 1,503,375; July 29.
Printing press and other like machine. C. W. Harrold. 1,502,668; July 29.
Printing press-attachment. H. A. Agricola, jr. 1,503,222; July 29.
Projectile. C. W. Stone. 1,502,925; July 29.
Propeller blade. J. W. Smith. 1,503,170; July 29.
Propeller drive. S. T. Elliott. 1,503,356; July 29.
Puller: *See*—
Stump puller. Wheel puller.
Pulps, Apparatus for treating. W. O. Borcherdt. 1,502,657; July 29.
Pulsator. L. Nixon. 1,503,279; July 29.
Pump. K. L. Curtis. 1,503,458; July 29.
Pump. H. E. Merseles. 1,502,678; July 29.
Pump and distributor, Combined. A. W. Thompson. 1,502,756; July 29.
Pump heads, Mounting for deep-well-. J. I. Astrom. 1,502,651; July 29.
Pump, Hydraulic. L. F. Moody. 1,502,865; July 29.
Pump, Oil-well. G. C. Johnson. 1,502,955; July 29.
Pump, Percussion. R. Esnault-Pelterie. 1,502,984; July 29.
Pump, Rotary. H. H. Haight. 1,503,362; July 29.
Pumping rig. J. A. Crumley. 1,502,714; July 29.
Pumps, Frost-line drain valve for. P. H. Koebbe. 1,502,834; July 29.
Punch press. E. J. Dreis. 1,503,119; July 29.
Pushbutton switch. T. J. Kerwin. 1,502,785; July 29.
Putty, Making. J. E. Laurila. 1,503,422; July 29.
Rack: *See*—
Automobile hat rack. Drying rack.
Cue rack.
Racket. W. C. Blache. 1,502,845; July 29.
Radiator caps, Assembling. A. C. Lippert and J. A. Sinko. 1,502,729; July 29.
Radioreceiver, Tone-producing. M. I. Pupin and E. H. Armstrong. 1,502,875; July 29.
Radiosignaling, Method of and system for. H. J. Van Der Bijl. 1,502,889; July 29.
Radiator covering. P. Jaray. 1,503,366; July 29.
Rail bond. M. H. Loughridge. 1,502,836; July 29.
Ratchet brake, Safety reverse. B. Soots, J. Klancher, H. A. Magrath, and G. C. Van Brimer. 1,503,139; July 29.
Railway, Amusement. H. J. Traubel. 1,502,699; July 29.
Railway brakes, Four-point flexible support and safety device for. S. Hansson. 1,503,045; July 29.
Railway-crossing gate. S. N. Hanks. 1,503,444; July 29.
Railway-traffic-controlling apparatus. L. V. Lewis. 1,503,166; July 29.
Rebound controller. J. R. Snyder. 1,502,755; July 29.
Receptacle cover. S. G. Barnstead. 1,503,015; July 29.
Receptacle cover. W. Gill. 1,502,948; July 29.
Reciprocating movement. O. P. Norman. 1,502,870; July 29.
Recording pressure gauge, Indicator, and other measuring instrument. A. L. Dugon. 1,503,353; July 29.
Reenforce and leveler, Combined. H. W. Bernstrom. 1,503,148; July 29.
Refractory article and making the same. C. J. Brockbank. 1,503,150; July 29.
Refrigerating. K. L. Curtis. 1,503,456; July 29.
Refrigerating apparatus. K. L. Curtis. 1,503,457; July 29.
Refrigerating apparatus. C. L. McCuen. 1,502,791; July 29.
Register: *See*—
Game-score register.
Regulator: *See*—
Gas regulator. Vibratory regulator.
Regulator. E. J. Blake. 1,503,085; July 29.
Retort, Shale. D. H. Francis. 1,503,234; July 29.
Reversing mechanism. F. W. A. Henrici. 1,503,447; July 29.
Rifle, Automatic. J. T. Kewish. 1,502,676; July 29.
Rim lug, Demountable. W. A. Antilotti and E. C. Jones. 1,503,342; July 29.
Rim-rolling machine. F. R. Klaus. 1,503,270; July 29.
Ring. C. J. Dieges. Des. 65,330; July 29.
Ring-wheel chuck. E. P. Alsted. 1,503,102; July 29.
Road-surfacing machine. C. J. Hug. 1,502,825; July 29.
Rocker arm and making same, Sheet-metal. H. G. Carlson. 1,503,263; July 29.
Rod: *See*—
Insulated strain rod.
Roller blind and the like. R. C. Ross. 1,503,336; July 29.
Roof connection. W. F. Innes. 1,503,421; July 29.
Roof, Sectional. W. C. Broughton. 1,503,110; July 29.
Rotary drier. W. J. Kuntz. 1,503,054; July 29.
Rotors, Means for balancing. A. E. Schein. 1,503,431; July 29.
Rubber or rubberlike substances, Accelerating the vulcanization of natural or artificial india. W. F. Russell. 1,503,429; July 29.
Rubber, Vulcanizing. W. F. Russell. 1,503,430; July 29.
Rubber with condensation products of ammonia and aldehydes as accelerators, Vulcanizing. S. M. Cadwell. 1,503,113; July 29.
Ruling machine. G. F. McAdams. 1,503,196; July 29.
Saddle. S. L. Bailey. 1,502,975; July 29.
Safety pressure device. F. Windish. 1,503,180; July 29.
Sanitary cover. I. Kim. 1,503,190; July 29.
Sanitary dispensing measure. C. W. Lanphere. 1,502,992; July 29.
Sanitary ear for buckets. P. A. Gillit. 1,502,949; July 29.
Saw filing and setting machines, Attachment for. F. J. Koppeler. 1,502,725; July 29.
Screen: *See*—
Metal screen. Window screen.
Screen and storm window. A. J. Beechler and G. L. McKay. 1,503,018; July 29.
Screen for pivoted window sashes. A. M. Lane. 1,503,325; July 29.
Sealing device for receptacles such as bottles. W. H. Hilldick and H. Semlear, jr. 1,502,775; July 29.
Sealing machine for filled cartons. W. D. Kimball and A. E. Rideout. 1,503,126; July 29.
Seat webbing and the like, Appliance for tensioning or tightening. G. F. French. 1,503,314; July 29.
Separator: *See*—
Egg separator.
Server. R. A. Hall. 1,503,363; July 29.
Sewing-machine attachment. A. B. Mattingly. 1,502,998; July 29.
Sewing machines, Work-supporting arm for. J. Berger. 1,503,258; July 29.
Shackle bolt. F. F. James. 1,503,162; July 29.
Shade and curtain bracket. A. Bohrer. 1,502,935; July 29.

Shaft coupling. M. Hedglon. 1,503,446; July 29.
Shafts at a low and uniform speed by an electromotor, Device for driving. C. Lott. 1,502,958; July 29.
Shale-distillation apparatus. R. M. Catlin. 1,503,093; July 29.
Sheet metal, Perforated. G. A. Oberg. 1,502,873; July 29.
Shingle construction. J. Pommersheim. 1,502,681; July 29.
Shoe. J. J. Daly. 1,502,716; July 29.
Shoe. F. A. Seib. 1,502,919; July 29.
Shoe-trees, Machine for making. L. F. Voisard. 1,502,891; July 29.
Shuttle. L. Pavia. 1,503,286; July 29.
Sign, Advertising display. N. J. Steinau. 1,503,212; July 29.
Signal: *See*—
Automobile signal. Vehicle indicating signal.
Direction signal.
Signal-light casing. W. E. Shettlemore. Des. 65,354; July 29.
Signal-operating means. H. L. Furr. 1,503,040; July 29.
Signaling, Railway. L. O. Grondahl. 1,503,318; July 29.
Signaling, Railway. L. O. Grondahl and L. F. Howard. 1,503,316; July 29.
Signaling system, High-frequency multiplex. L. Espenschied. 1,502,811–17; July 29.
Signaling system, Railway. L. O. Grondahl. 1,503,317; July 29.
Silo, L. Tabor. 1,503,388; July 29.
Sink trap. A. L. De Leeuw. 1,503,118; July 29.
Skate. J. Halverson. 1,502,951; July 29.
Skiving machine. C. Q. Reynolds. 1,503,169; July 29.
Slag to granular form, Reducing fused. M. Maguet. 1,502,793; July 29.
Snap fastener. M. Kiessling. 1,503,051; July 29.
Soap dispenser and container. J. N. Borroughs. 1,502,936; July 29.
Sodium sulphide, Making. E. B. Alvord. 1,503,013; July 29.
Soldering machine, Spout-. C. Gueritey. 1,502,773; July 29.
Sound receivers, Holding attachment for. C. W. Burrows. 1,503,226; July 29.
Sound transmitters, Balanced diaphragm for. D. A. Sealey. 1,503,011; July 29.
Sounding board. B. E. Grady, jr. 1,502,666; July 29.
Spark plug. A. de Clairmont. 1,502,768; July 29.
Spark plug. E. T. Martin. 1,502,960; July 29.
Spark plug. D. W. Willis. 1,503,081; July 29.
Spark plug. R. T. Wright. 1,503,182; July 29.
Speed indicator and recorder. A. F. Wallbillich. 1,503,078; July 29.
Speed transmission mechanism, Variable-. O. M. Pope. 1,503,005; July 29.
Speedometer drive. G. G. Behn. 1,502,841; July 29.
Spool construction. C. H. Curo. 1,502,980; July 29.
Sprayer. C. Vacher. 1,503,394; July 29.
Sprayer, Windshield. S. A. Harrington. 1,502,821; July 29.
Spraying machine. L. E. Frost. 1,502,823; July 29.
Spraying machine. C. E. Haywood. 1,503,159; July 29.
Spring: *See*—

Typewriters, Ribbon vibrator for. O. A. Hokanson. 1,502,853; July 29.
Typewriting machine. H. M. Brown. 1,503,021; July 29.
Typewriting machine. M. C. Crawley. 1,503,027–33; July 29.
Typewriting machine. W. P. Kidder. 1,502,830; July 29.
Typewriting machine. G. W. Renz. 1,503,064; July 29.
Typewriting machine. J. A. B. Smith. 1,503,069; July 29.
Umbrella ribs, Means for fastening tips to. J. Lutz and W. S. Evans. 1,503,273; July 29.
Underreamer. J. W. Pippin. 1,503,377; July 29.
Universal clamp. A. H. Baird. 1,503,344; July 29.
Unloading apparatus. J. Bombardi. 1,503,019; July 29.
Valve. A. E. Ellis. 1,503,309; July 29.
Valve. T. O. Martin. 1,502,734; July 29.
Valve. E. P. Prator. 1,503,132; July 29.
Valve. R. H. Wentorf. 1,503,145; July 29.
Valve and signal switch, Car discharge. C. C. Farmer. 1,503,311; July 29.
Valve, Float. R. R. and J. F. Shaffer. 1,503,433; July 29.
Valve for atomizer bulbs or the like. H. P. Kraft. 1,502,786; July 29.
Valve for compressors. C. H. Leinert. 1,503,271; July 29.
Valve for irrigating apparatus. C. H. Kaup. 1,503,189; July 29.
Valve, Governor. W. B. Ensign. 1,503,357; July 29.
Valve grinder and drill, Combination. A. W. Ojerholm. 1,503,206; July 29.
Valve mechanism. W. D. Mercer. 1,502,736; July 29.
Valve-seat reamer. J. J. McGuckin. 1,503,055; July 29.
Valve stems, Lubricating system for. F. B. Parker and C. U. Austin. 1,503,257; July 29.
Valve, Wash-pipe. A. Thomson. 1,502,696; July 29.
Valves for combustion engines, Device for automatically grinding. I. B. Gilbert. 1,503,417; July 29.
Valves to pneumatic tubes or the like, Means for removably clamping. R. E. Martin. 1,503,199; July 29.
Vanity case. C. A. Buscham. 1,503,112; July 29.
Vanity-case hinge. W. G. Kendall. 1,503,367; July 29.
Vaporizer. J. J. Parker. 1,503,004; July 29.
Vault. R. H. Dick. 1,502,982; July 29.
Vegetable materials and manufacture of gas adsorbent and decolorizing carbons, Utilization of. O. L. Barnebey. 1,502,896; July 29.
Vehicle body suspension. B. F. Seymour. 1,503,065; July 29.
Vehicle brake. A. J. Lavoie. 1,502,726; July 29.
Vehicle brake-control device. G. S. Lane. 1,503,326; July 29.
Vehicle, Child's. W. J. Barber. 1,502,838–9; July 29.
Vehicle, Child's. E. S. Showers. 1,503,067; July 29.
Vehicle curtain. E. Ackerman. 1,503,101; July 29.
Vehicle drive, Pneumatic. G. A. Case. 1,503,264; July 29.
Vehicle knuckles, Lubrication of automotive. G. W. Carlson. 1,502,659; July 29.
Vehicle indicating signal. A. C. Schroeder. 1,503,010; July 29.
Vehicle, Motor. E. G. Gunn. 1,503,239; July 29.
Vehicle side curtain. D. H. Collier. 1,503,303; July 29.
Vehicle springs, Snubber for. S. D. Filson. 1,502,818; July 29.
Vehicle wheel. D. R. Heiser. 1,503,046; July 29.
Vehicles, Air compressor for motor. W. A. Shallenberg. 1,502,751; July 29.
Vehicles, Automatic transmission for motor. H. R. Hoffman. 1,502,953; July 29.
Vehicles, Cooling apparatus for motor. G. W. Price. 1,502,745; July 29.
Vehicles, Safety device for. W. T. Wheeler. 1,503,405; July 29.
Vehicles, Shock absorber for aerial. K. Stahl. 1,503,386; July 29.
Vehicles, Street indicator for passenger. H. G. Ward. 1,502,893; July 29.
Vending machine. W. J. Bousquet. 1,503,260; July 29.
Vending machine. L. R. Spooner and R. L. Gray. 1,503,072; July 29.
Vending machines, Coin-control lock for. L. R. Spooner and P. L. Gray. 1,503,071; July 29.
Vending machines, Coin detector for. F. X. Bee. 1,503,223; July 29.
Ventilating unit. M. J. Callahan. 1,503,089; July 29.
Ventilator: *See*—
Window ventilator.
Ventilator. D. S. Earhart. 1,502,944; July 29.
Ventilator device, Adjustable. A. Swensen. 1,502,887; July 29.
Vessels, Electric connecting device for floating or submarine. F. Gall. 1,503,238; July 29.
Vibratory regulator. R. H. Sullivan. 1,503,214; July 29.
Vine pick-up. R. F. Holser and J. V. Lopez. 1,502,776; July 29.
Voltaic cells, Producing uniform. F. R. Parker. 1,503,285; July 29.
Waffle iron. G. F. Wells. Des. 65,361; July 29.
Wagon brake, Automatic. W. H. Perry. 1,502,797; July 29.
Wall and ceiling structure. T. Lydon. 1,502,732; July 29.
Warp condenser. S. W. Cramer, jr. 1,503,094; July 29.
Washcloth and doll, Combination. M. Wynn. Des. 65,363; July 29.
Wash-kettle furnace. K. S. Martin. 1,502,837; July 29.
Washing machine. J. D. Downie. 1,502,942; July 29.
Washing machine. W. Gish and H. L. Thomas. 1,502,986; July 29.
Washing machine. H. R. Merseles. 1,502,863; July 29.
Washing-machine cylinders, Sliding door and lock for G. A. Oberg. 1,502,872; July 29.
Washing-machine timing device. P. Neuwerk. 1,502,915; July 29.
Washing process and machine therefor. R. Harvey. 1,502,852; July 29.
Watch, Bracelet. J. Daving. 1,503,097; July 29.
Watchcase. J. Reichenberg. Des. 65,351; July 29.
Water column. J. R. Brown. 1,502,808; July 29.
Water cut-off, Automatic. M. P. Werhan. 1,502,930; July 29.
Water heater. J. P. Smythe. 1,502,802; July 29.
Watering machine, Automatic lawn-. W. P. Gardner. 1,503,360; July 29.
Wheel: *See*—
Grinding wheel. Spring wheel.
Metal wheel. Vehicle wheel.
Wheel. G. L. Martin. 1,503,057; July 29.
Wheel and mounting therefor, Bull. J. A. Crumley. 1,502,715; July 29.
Wheel assemblies, Facing cover for. H. Wacker. 1,503,397; July 29.
Wheel puller. C. H. Miles, jr. 1,503,129; July 29.
Wheel rim. J. M. Meredith. 1,503,426; July 29.
Wheel tread, Tractor-. E. T. Craig and C. F. Sills. 1,502,752; July 29.
Wheels from axle shafts of motor vehicles, Tool for removing. E. L. Rumsfield. 1,503,249; July 29.
Wheels, Nonskid attachment for vehicle. J. P. Walsh. 1,503,079; July 29.
Wheels of vehicles, Device for transmitting the rotary motion of a motor to the. J. Werz. 1,503,221; July 29.
Welding, Arc. J. C. Lincoln. 1,502,789; July 29.
Welding, Electric. J. F. Gall. 1,503,315; July 29.
Well pumper, Oil-. F. H. Sibley. 1,502,690; July 29.
Wind motor. H. C. Greenbrook. 1,502,950; July 29.
Windshield cleaner. E. Blumer. 1,503,346; July 29.
Windlass, Stake. L. J. Seyler. 1,502,965; July 29.
Window, Barred. G. C. Rudman. 1,503,248; July 29.
Window-cleaner's scaffold and chair. B. B. Dolaro. 1,503,305; July 29.
Window guard. F. Kitzelman. 1,502,833; July 29.
Window screen. M. A. Dietrick. 1,503,037; July 29.
Window ventilator. J. Bellocchio. 1,503,109; July 29.
Wire stretcher and splicer. E. A. Hayes. 1,503,418; July 29.
Wood grinder. P. Priem. 1,503,289; July 29.
Wrench: *See*—
Automatically-closing wrench. Automobile wrench.
Pipe wrench.
Wrench. F. Bain. 1,503,084; July 29.
Wrench. L. Briles. 1,502,900; July 29.
Wrench. L. W. Schaaff. 1,503,136; July 29.
X-ray device. W. D. Coolidge. 1,502,907; July 29.
Yarn packages, Machine for forming. A. L. Remington. 1,503,381; July 29.

CLASSIFICATION OF PATENTS

ISSUED JULY 29, 1924.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 1: 1,502,891
4: 1,503,339
2— 10: 1,502,661
42: 1,502,762
50: 1,503,117
149: 1,502,820
161: 1,502,871
175: 1,502,720
176: 1,502,856
182: 1,503,287
197: 1,503,007
202: 1,502,679
5— 119: 1,503,391
300: 1,503,434
359: 1,502,966
7— 9: 1,503,323
10— 12: 1,503,312
129: 1,503,153
12— 55: 1,502,867
15— 23: 1,503,050
99: 1,503,048
117: 1,503,449
120: 1,502,688
136: 1,502,971
147: 1,503,062
153: 1,503,385
176: 1,503,014
227: 1,502,798
229: 1,502,968
253: 1,503,346
16— 39: 1,503,328
17— 1: 1,503,372
18: 1,502,749
18— 15: 1,502,803
47.5: 1,502,763
53: 1,503,113
1,503,429
1,503,430
55: 1,503,392
1,503,432
19— 48: 1,503,077
20— 1.4: 1,503,388
20: 1,503,364
22: 1,502,783
27: 1,503,173
40.5: 1,502,821
71: 1,502,833
1,503,248
22— 65: 1,503,122
126: 1,502,861
200: 1,502,983
23— 1: 1,503,259
10: 1,503,319
13: 1,503,013
24— 19: 1,503,247
30.5: 1,503,410
36: 1,503,322
77: 1,503,445
109: 1,502,899
110: 1,503,230
140: 1,502,919
180: 1,502,771
191: 1,503,020
1,503,338
208: 1,503,051
211: 1,503,442
233: 1,502,985
242: 1,502,706
243: 1,502,890
248: 1,503,288
25— 42: 1,503,409
120: 1,502,805
127: 1,503,358
145: 1,503,455
157: 1,503,150
28— 27: 1,503,094
29— 14: 1,503,406
26: 1,503,206
60: 1,503,111
84: 1,502,729
85: 1,502,957
1,503,129
1,503,249

(Order No. 2,868.)

U. S. Patent Office, *Washington, June 4, 1924.*

Acting under the provisions of section 487 of the Revised Statutes of the United States, as amended February 18, 1922, Mr. William H. Mulligan, of 627 R. I. Hospital Trust Building, Providence, R. I., whose registration number is 10,963, has this day been disbarred from practice before the United States Patent Office.

THOMAS E. ROBERTSON,
Commissioner.

Interference Notices.

U. S. Patent Office, *Washington, July 10, 1924.*

John H. Coyle, his assigns or legal representatives, take notice:

An interference has been declared by this Office between the application of the Medico-Dental Specialty Co., 238 Broadway, San Diego, Calif., for registration of a trade-mark and trade-mark registered July 22, 1902, No. 38,645, to John H. Coyle, Thomasville, Ga. The Office having been unable to secure service upon said Coyle, notice is hereby given that unless said Coyle, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, July 17, 1924.*

William P. Dunham, his assigns or legal representatives, take notice:

An interference having been declared by this Office between Kaufmann Bros. & Bondy, 33 East Seventeenth Street, New York, N. Y., for registration of a trade-mark and trade-mark registered January 21, 1919, No. 124,192, to William P. Dunham, 501 Fifth Avenue, New York, N. Y., and a notice of such declaration sent by registered mail to said William P. Dunham at the said address having been returned by the post-office authorities as undeliverable, notice is hereby given that unless said William P. Dunham, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, July 21, 1924.*

The Vim Medicine Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between J. P. Miller, Box 56, Port Gibson, Miss., for registration of a trade-mark and trade-mark registered February 28, 1905, No. 44,243, to The Vim Medicine Co., 510 National Union Building, Toledo, Ohio, and a notice of such declaration sent by registered mail to The Vim Medicine Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless The Vim Medicine Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, July 21, 1924.*

American Chemical Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the Waverly Oil Works Company, Fifty-fourth Street and Allegheny Valley Railroad, Pittsburgh, Pa., for registration of a trade-mark and trade-mark registered August 6, 1895, No. 26,907, to the American Chemical Co., Minneapolis, Minn., and a notice of such declaration sent by registered mail to the American Chemical Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless the American Chemical Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

ADJUDICATED PATENTS.

DECISIONS IN PATENT AND TRADE-MARK CASES.

U. S. District Court—Eastern District of New York.

HAMMER *v.* ROBERTSON, COMMISSIONER OF PATENTS.

Decided July 10, 1923; supplemental opinion July 16, 1923.

[291 Fed. Rep. 656.]

BILL IN EQUITY—SUIT UNDER SECTION 4915, REVISED STATUTES—EX PARTE CASES—JURISDICTION OF COURT.

Under Revised Statutes, section 739 (Comp. St., sec. 1033), a suit under section 4915, Compiled Statutes, section 9460, by an applicant for a patent, whose application has been refused, against the Commissioner of Patents to compel issuance of the patent must be brought in the Federal court of the District of Columbia, of which District defendant is an inhabitant.

IN EQUITY.

Suit by Peter Hammer against Thomas E. Robertson, Commissioner of Patents. On motion of defendant to dismiss bill. Granted.

Messrs. Hauff & Warland (*Mr. William E. Warland* of counsel) for the plaintiff.

Mr. Ralph C. Greene (*Mr. Howard Osterhout* of counsel) for the defendant.

GARVIN, *Dis. J.:*

This is a motion by defendant for an order dismissing the bill of complaint herein for want of jurisdiction. The action, to compel the issue of a patent, was brought in the eastern district of New York against the defendant, as Commissioner of Patents. The defendant contends that this court has no jurisdiction, inasmuch as the action must be brought in the Federal court of the District of Columbia, where the Commissioner of Patents has his official residence.

The real objection of the plaintiff to bringing suit in the District of Columbia is that the court of appeals of that District has affirmed a decision of the Patent Office refusing plaintiff a patent, and naturally may be expected to decide similarly any action brought by plaintiff to compel the issue of the same patent. From a decision in the last-mentioned action, plaintiff asserts that there is no appeal to the Supreme Court of the United States, while defendant as stoutly maintains that such an appeal lies.

The contention of the defendant that this court has no jurisdiction is based upon his claim that section 739 of the United States Revised Statutes controls, and is a bar to the instant suit in this district. That section reads as follows:

Civil suits—Where to be brought.—Except as provided in the five succeeding sections, no person shall be arrested in one district for trial in another, in any civil action before a district court; and, except as provided in the six succeeding sections, no civil suit shall be brought in any district court against any person by any original process or proceeding in any other district than that whereof he is an inhabitant but where the jurisdiction is founded only on the fact that the action is between citizens of different States, suit shall be brought only in the district of the residence of either the plaintiff or the defendant.

The case of *Butterworth* v. *Hill*, 114 U. S. 128; 5 Sup. Ct. 796; 29 L. Ed. 119; 31 O. G. 1043, is relied upon by the Government. The facts there are similar to those involved in the question now before the court, and unless the decision therein has been overruled or modified by later judicial expression or by statute it must be held to control here. The plaintiff answers the Government's contention by a reference to section 4915 of the United States Revised Statutes (Comp. St. sec. 9460) which reads as follows:

Whenever a patent on application is refused, either by the Commissioner of Patents or by the Supreme Court of the District of Columbia upon appeal from the Commissioner the applicant may have remedy by bill in equity; and the court having cognizance thereof, on notice to adverse parties and other due proceedings had, may adjudge that such applicant is entitled, according to law, to receive a patent for his invention, as specified in his claim, or for any part thereof, as the facts in the case may appear. And such adjudication, if it be in favor of the right of the applicant, shall authorize the Commissioner to issue such patent on the applicant filing in the Patent Office a copy of the adjudication, and otherwise complying with the requirements of law. In all cases, where there is no opposing party, a copy of the bill shall be served on the Commissioner; and all the expenses of the proceeding shall be paid by the applicant, whether the final decision is in his favor or not.

This section refers to the right of an unsuccessful applicant for a patent having "remedy by bill in equity, and the court having cognizance thereof" on notice to parties, etc., may adjudge that such applicant receive a patent.

The plaintiff contends that *Butterworth* v. *Hill*, supra, does not now control, for the reason that the decision in that case was rendered in 1886; and that under the then existing law an appeal could be taken as of right to the United States Supreme Court from the Supreme Court of the District of Columbia; that in 1893 the Court of Appeals for the District of Columbia was established by an act which provided that the right of appeal from the Commissioner of Patents previously vested in the Supreme Court of the District of Columbia should be vested in the Court of Appeals for the District of Columbia. It is settled in matters involving a decision of the Commissioner of Patents no appeal may be taken to the United States Supreme Court from a decision of the Court of Appeals of the District of Columbia. *Frash* v. *Moore*, 211 U. S. 1; 29 Sup. Ct. 6; 53 L. Ed. 65; 137 O. G. 230; *Atkins* v. *Moore*, 212 U. S. 285; 29 Sup. Ct. 390; 53 L. Ed. 515; 212 O. G. 285; *Baldwin Co.* v. *Howard*, 256 U. S. 35; 41 Sup. Ct. 405; 65 L. Ed. 816; 256 O. G. 35. These cases, however, are no authority for the proposition that no appeal may be taken from a decision of the Court of Appeals of the District of Columbia affirming or reversing a decision of the Supreme Court of the District of Columbia.

The plaintiff contends that it would be illogical, if not unjust, to hold that, if an applicant in

an ex parte proceeding is unable to obtain a patent, he must start suit in the Supreme Court of the District of Columbia in order to avail himself of section 4915, supra, by reason of the refusal of the Commissioner of Patents to appear elsewhere, inasmuch as the Supreme Court of the District of Columbia would be bound by any former decision of the Court of Appeals of that District.

The plaintiff refers to many authorities which he claims justify the court in finding that, when Congress enacted Section 4915, it was thereby intended that, both in interference and in ex parte cases, the unsuccessful plaintiff should have a fair and impartial trial in a court of equity in a proceeding de novo, and should not be remanded to the Patent Office or to a court which has been held to be a branch of that Office. It seems to be well settled that the Court of Appeals for the District of Columbia is a part of or one of the tribunals of the Patent Office. *Clements* v. *Kirby* (C. C. A.) 274 Fed. 575; 292 O. G. 879, and cases therein cited. There would be much in the point, if plaintiff had no right of appeal to the Supreme Court.

The contention of plaintiff that no appeal lies to the United States Supreme Court from the decision of an action in equity brought in the Supreme Court of the District of Columbia is not well founded. Section 8 of the act of February 9, 1893 (ch. 74, 27 Stat. 436), reads as follows:

> That any final judgment or decree of the said court of appeals may be reexamined and affirmed, reversed, or modified by the Supreme Court of the United States, upon writ of error or appeal, in all causes in which the matter in dispute, exclusive of costs, shall exceed the sum of five thousand dollars, in the same manner and under the same regulations, as heretofore provided for in cases of writs of error on judgment or appeals from decrees rendered in the Supreme Court of the District of Columbia, and also in cases, without regard to the sum or value of the matter in dispute, wherein is involved the validity of any patent or copyright or in which is drawn in question the validity of a treaty or statute of or an authority exercised under the United States.

From this it is clear, I think, first, that this action must be brought in the Federal court of the District of Columbia; and, second, that the plaintiff, if unsuccessful there, may appeal to the Court of Appeals of the District of Columbia and then to the United States Supreme Court.

The motion is granted, and the bill is dismissed, for want of jurisdiction.

SUPPLEMENTAL OPINION.

Since the foregoing opinion was filed my attention has been called to the case of *Chott* v. *Ewing*, 237 U. S. 197; 35 Sup. Ct. 571; 59 L. Ed. 913; 215 O. G. 1264, which seems to hold that section 250 of the Judicial Code (Comp. St. sec. 1227), which supersedes section 8 of the act of February 9, 1893, does not provide for an appeal from the Court of Appeals of the District of Columbia to the Supreme Court of the United States in patent cases. It therefore appears that no appeal would lie in an action of that character. However, this does not seem in any way to affect the soundness of my conclusion with respect to the district in which the defendant must be sued, and my decision must remain unaltered, except to express the regret that plaintiff should be compelled to resort to a court which he feels has already determined the issues of his case. It is to be hoped that this omission will be corrected by Congressional action as soon as opportunity offers.

U. S. District Court—Eastern District of New York.

IN RE HAMMER.

Decided June 3, 1924.

1. BILL IN EQUITY—SUIT UNDER SECTION 4915 REVISED STATUTES.

   The court would not be justified in holding that section 4915, Revised Statutes, gives a new definition to the term "bill in equity" by enlarging that description to include a special procedure in the nature of an application for a writ of mandamus.

2. SAME—SAME.

   A suit under this section is a plenary suit in equity to which all rules of practice in such suits are applicable. Such an action requires parties and the issuance of process.

3. SAME—SAME—PARTIES.

   The Commissioner of Patents is a necessary party in the event that there is no other opposing party.

In equity to procure the issuance of a patent under section 4915, United States Revised Statutes.

Messrs. Hauff & Warland (*Mr. William E. Warland* of counsel) for Hammer.

Mr. Ralph C. Greene (*Mr. Howard Osterhout*) counsel.

GARVIN, *J.:*

This is a motion to dismiss the bill of complaint herein for want of jurisdiction. The action or proceeding is at least unusual. Peter Hammer is named as plaintiff. No defendant or respondent is named. It is stated that the action was brought to compel the issuance of a patent under section 4915 United States Revised Statutes, which reads as follows:

> Sec. 4915. Whenever a patent on application is refused, either by the Commissioner of Patents or by the Supreme Court of the District of Columbia upon appeal from the Commissioner, the applicant may have remedy by bill in equity; and the court having cognizance thereof, on notice to adverse parties and other due proceedings had, may adjudge that such applicant is entitled, according to law, to receive a patent for his invention, as specified in his claim, or for any part thereof, as the facts in the case may appear. And such adjudication, if it be in favor of the right of the applicant, shall authorize the Commissioner to issue such patent on the applicant filing in the Patent Office a copy of the adjudication, and otherwise complying with the requirements of law. In all cases, where there is no opposing party, a copy of the bill shall be served on the Commissioner; and all the expenses of the proceeding shall be paid by the applicant, whether the final decision is in his favor or not.

[1, 2, 3] An action for the relief which plaintiff now seeks was previously brought by plaintiff against the Commissioner of Patents as defendant. The latter appeared specially and moved to dismiss for want of jurisdiction. The motion was granted. *Hammer* v. *Robertson*, 291 Fed. 656; 325 O. G. 3. While the meaning of section 4915 is not altogether clear, the court would not be justified in holding that the section gives a new definition to the term "bill in equity" by enlarging that description to include a special proceeding in the nature of an application for a writ of mandamus. Indeed, it has been expressly held in *Dover* v. *Greenwood*, 177 Fed. 946, that a suit under this section is a plenary suit in equity to which all rules of practice in such suits are applicable. It is elementary that such an action requires parties and the issuance of process. In the older case of *Graham* v. *Teeter*, 25 Fed. 525, it was held that the Commissioner of Patents is not a necessary party to an action under section 4915, supra, where there is an opposing party. Obviously it follows that the Commissioner would be a necessary party in the event that there was no other opposing party. It was stated in *Morgan* v. *Daniels*, 153 U. S. 120, 124; 67 O. G. 811—

> it [an action under section 4915] is a controversy between two individuals over a question of fact which has once been settled by a special tribunal, intrusted with full power in the premises.

The case of *Central Ry. Signal Co. et al.* v. *Jackson*, 254 Fed. 103, has been carefully considered. It is the decision of a district court and does not pass upon the point involved, as the opinion plainly states. Certain observations in the opinion, merely dicta, seem contrary to the conclusion herein reached, but I can not consider them as controlling.

To allow the present proceeding would be to permit the plaintiff so called herein to avoid the effect of the requirement that the Commissioner of Patents be sued in the district of his official residence which was decided in *Hammer* v. *Robertson*, supra.

The relief which Peter Hammer, who calls himself "plaintiff" in the instant proceeding, seeks is against the Commissioner of Patents. The latter has appeared specially and moves to dismiss. The court is of the opinion that the motion should be granted.

Court of Appeals of the District of Columbia.

EVERSHARP PENCIL COMPANY *v.* AMERICAN SAFETY RAZOR CORPORATION.

No. 1,548. Decided April 7, 1924.

1. TRADE-MARK—NAME OF ANOTHER INDIVIDUAL, FIRM, CORPORATION, OR ASSOCIATION—"EVERSHARP."

   The provisions of the Trade-Mark Act do not permit an individual, firm, corporation, or association of another name to affect the good will of an established individual, firm, corporation, or association, built up under his or its name, through adoption of that name or the salient and characteristic feature of that name as a trade-mark.

2. SAME—SAME—SAME—NAME COUPLED WITH A DESIGN.

   The law does not permit the applicant corporation to adopt the dominant word in the name of the opposer corporation as a trade-mark, even with the representation of an arrow printed across the word.

3. SAME—NAME OF REGISTRANT.

   An individual, firm, corporation, or association may register his or its name as a trade-mark, provided that the registration be so accomplished as not to prevent a like use of the same name by others similarly entitled.

Mr. J. H. Milans and *Mr. C. T. Milans* for Eversharp Pencil Co.

Mr. W. Lee Helms for American Safety Razor Corporation.

Before SMYTH, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

ROBB, *J.:*

This is a trade-mark opposition proceeding in which the Eversharp Pencil Company, a corporation, opposes registration by the American Safety Razor Corporation of the word "Eversharp" as a trade-mark for razors, razor blades, safety razors and safety-razor blades.

In the agreed statement of facts it appears that the appellant company was incorporated in 1916, when it succeeded to the business and good will of Keeran & Co., including the trade-mark "Eversharp," which mark appellant since has continued to apply to its mechanical pencils and leads therefor. It further appears—

> that the trademark "Eversharp" constitutes the salient and characteristic feature of the corporate name of opposer.

In the statement accompanying its application for registration, appellee alleged June 20, 1920, as the earliest date of its use of the mark.

The Examiner of Interferences sustained the opposition because opposer was incorporated prior to applicant's earliest date. The Assistant Commissioner reversed the decision, the ground of the ruling being that applicant uses the word "Eversharp" in connection with an arrow, as follows:

The presence of this arrow, under the view of the Assistant Commissioner, renders applicant's mark sufficiently distinctive. In other words, he held that the mark is not "merely that of a corporate name." The question for decision, therefore, is whether one of two corporations of different names may adopt as its trade-mark the dominating feature of the corporate name of the other, under any circumstances.

[1, 2, 3] In *National Cigar Stands Co.* v. *Frishmuth Bro. & Co.*, 324 O. G. 675, we ruled that the provisions of the Trade-Mark Act that no mark shall be registered which—

> consists merely in the name of an individual, firm, corporation, or association not written, printed, impressed or woven in some particular or distinctive manner,

do not permit an individual, firm, corporation or association of another name to affect the good will of an established individual, firm, corporation or association, built up under his or its name, through adoption of that name as a trade-mark; that the real purpose of these provisions was to permit an individual, firm, corporation or association to register his or its name as a trade-mark provided that the registration be so accomplished as not to prevent a like use of the same name by others similarly entitled. That ruling is applicable and controlling here. See also: *Asbestone Co.* v *The Philip Carey Mfg. Co.*, 41 App. D. C., 507; 200 O. G. 857; *Mansfield Tire & Rubber Co.* v. *Ford Motor Co.*, 44 App. D. C. 205; 222 O. G. 1056; *Beechnut Cereal Co.* v. *Beech-Nut Packing Co.*, 51 App. D. C. 5; 273 Fed. 367; 287 O. G., 407; *Howard Co.* v. *Baldwin Co.*, and *Howard Co.* v. *Valley Gem Piano Co.*, 48 App. D. C. 437, and *Tinker* v. *Patterson Dental Supply Co.*, 53 App. 37; 287 Fed. 1014; 310 O. G. 489.

The decision therefore is reversed and the opposition sustained.

Reversed.

Mr. Chief Justice SMYTH dissents, upon the ground that applicant's mark does not consist merely in the corporate name of the opposer.

U. S. Circuit Court of Appeals—Fourth Circuit.

SMITHEY *v.* ROBERTSON, COMMISSIONER OF PATENTS.

Decided May 6, 1924.

1. INVENTION—AGGREGATION OF ELEMENTS—NO UNITARY RESULT.

Where the gasoline and oil registers of the claims have neither a mechanical nor a cooperative relation with the speedometer or the odometer elements, each operating independently of the other, and when combined forming but a mere aggregation of unrelated elements not cooperating to produce a unitary result, *Held* that the claims are unpatentable.

2. SAME — SAME — COMBINATION OPERATION ENTIRELY THROUGH THE INTELLIGENCE OF THE USER.

A combination operating entirely through the intelligence of the user is not sufficient of itself to constitute a valid combination.

APPEAL from the District Court of the United States for the District of Maryland, at Baltimore.

Before WOODS and WADDILL, Circuit Judges, and WEBB, District Judge.

Mr. C. J. Williamson for Smithey.

Mr. Theodore A. Hostetler for the Commissioner of Patents.

WADDILL, *Cir. J.:*

This is an appeal from a decree of the United States District Court for the District of Maryland rendered on the 9th day of February, 1923, dismissing complainant's bill.

The bill was filed pursuant to the provisions of section 4915 of the Revised Statutes of the United States, as amended by the act of February 9th, 1893, (sec. 4915 R. S., 8 Comp. Stat. Ann. sec. 9460, p. 10392, amended act, sec. 9456, Comp Stat. Ann. p. 10374, 27 Stat. L. 436), praying that the complainant be adjudged by the court entitled to receive a patent for his invention particularly specified in his claims, notwithstanding the fact that the same had been refused and adjudicated against him by the proper authorities authorized to issue patents.

The section in question as amended provides briefly that whenever a patent on application is refused, either by the Commissioner of Patents or by the Court of Appeals for the District of Columbia, the appellant may have a remedy by bill in equity, and the court having cognizance thereof, on notice being given as required by the act, may adjudge such applicant is entitled according to law to receive a patent for his invention, as specified in his claim, or for any part thereof as the facts in the case may appear, and in case of an adjudication favorable to the applicant, to authorize the Commissioner to issue such patent upon the applicant filing in the Patent Office a copy of the court's adjudication and otherwise complying with the law.

The appellant's application was for a patent for an improvement in oil-registering devices, dated May 23rd, 1916, Serial Number 99,345, and contained three claims, as follows:

1. An apparatus substantially as described comprising a casing, an odometer or odometers therein for indicating the results accomplished, said odometers being automatically operated in securing such results, and a pair of registers arranged laterally to each other, and adapted to indicate the material or materials consumed in effecting the result indicated by the odometers, and means for manually operating said registers, said means consisting of devices projecting laterally beyond the casing at the opposite sides thereof and symmetrically disposed, as and for the purposes set forth.

2. An apparatus substantially as described comprising a casing, odometers therein for indicating the total and trip mileage, said odometers being automatically operated, and an oil register and a gasoline register in the casing and arranged laterally to each other, and having means whereby they may be manually operated, substantially as set forth.

3. An apparatus substantially as described comprising a casing, odometers for indicating the results accomplished, said odometers being automatically operated in securing such results, and a manually operated and controlled register or registers for indicating the material or materials consumed for effecting such results.

The application as respects the three claims set forth, was duly considered in the Patent Office, first by a Primary Examiner, then by the Examiners in Chief, and finally by the Commissioner, and a patent refused. From this action an appeal was taken to the Court of Appeals for the District of Columbia, and the decision appealed from was affirmed.

Upon filing the bill in the district court of Maryland, the case was fully heard on testimony adduced, with the result that the decree dismissing the bill of complaint complained of was entered, from which this appeal was taken.

The assignments of error present for the consideration of the court whether the district court erred in holding that appellant's claims were without patentable invention, and in denying the relief prayed for, and dismissing the bill.

Careful examination and consideration of the record in this case shows that in the Patent Office as well by the Primary Examiner as by the Examiners in Chief and the Commissioner of Patents, a thorough investigation of the question of the patentability or nonpatentability of the complainant's devices was had, and after careful deliberation, it was determined that the claims were nonpatentable for lack of novelty; and the Primary Examiner and the Examiners in Chief reached the conclusion that whatever there was of novelty in the supposed invention, it had been theretofore anticipated in the prior art by others. The Court of Appeals of the District of Columbia (*in re Smithey*, 265 Fed. 1014; 276 O. G. 211) upon appeal, affirmed this action, and held that placing within the casing of an ordinary speedometer and odometer a manually-operated register as an independent unit to record the quantity of gas and oil supplied to an automobile, was not a valid combination for which a patent could be granted.

[1] After the fullest consideration, we find ourselves in full accord with the views of the Commissioner of Patents and the Court of Appeals of the District of Columbia affirming the same, with respect

to the nonpatentability of the claims in question. The principle upon which the element of patentability arises, resulting from a combination of devices, is well understood; and it will be found that the claims made in this case do not present such novelty as would warrant the issuance of a patent therefor. There is no such relation of the parts of the proposed appliance one to the other, and no such coacting one with the other as to produce a true result. The gasoline and oil registers have neither a mechanical nor a cooperative relation with the speedometer or the odometer elements. Each operates independently of the other, and combined are but a mere aggregation of unrelated elements not co-operating to produce a unitary result, and therefore unpatentable.

[2] We concur fully with the Commissioner of Patents and the Court of Appeals for the District of Columbia in the view that the combination in question is one operating entirely through the intelligence of the user, and hence not sufficient of itself to constitute a valid combination. *In re Smithey*, 265 Fed. 1014, supra, and cases cited; *Schmid* v. *Scovill Mfg. Co.*, 37 Fed. 345; *Autosales Gum &c. Co.* v. *Caille Bros. Co.*, 224 Fed. 473; *Gas Machinery Co.* v. *U. S. Gas Improvement Co.*, 228 Fed. 684; *Willard* v. *Union Tool Co.*, 253 Fed. 48, 53, 54; *Muser* v. *Bell*, 278 Fed. 904, 912; *Gross* v. *Frank*, 293 Fed. 702; *Hailes* v. *Van Wormer*, 87 U. S. 353, 368; *Brinkerhoff* v. *Aloe*, 143 U. S. 515; *Richards* v. *Chase Elevator Co.*, 158 U. S. 299, 302; 71 O. G. 1456; *Office Specialty Co.* v. *Fenton etc. Co.*, 174 U. S. 492, 498; 87 O. G. 1608.

Full consideration has been given to the authorities cited by the appellant, and in our opinion they do not serve to produce a result different from that announced herein as bearing on the claims in issue in this case.

The decision of the district court appealed from will be affirmed with costs.

Affirmed.

Des. 61,264. (See 61,263.)

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,340,657, E. Jacobus, Lightning arrester, decided May 29, 1924, claim 8.

Pat. 1,372,617, S. P. Fullinwider, Submarine mine, decided June 23, 1924, claim 21.

Pat. 1,405,552, F. H. Nicholson, Railway-traffic-controlling apparatus, claims 1, 2, 7, and 10.

Disclaimers.

1,305,705.—*Millard F., Field* and *Charles D. Lanning*, Boston, Mass. WARP-UNITING MECHANISM. Patent dated June 3, 1919. Disclaimer filed July 5, 1924, by the assignee, *Barber-Colman Company.*

Hereby enters this disclaimer to the following claims of said Letters Patent, to wit:

Nos. 1, 2, 3, 4, 6, 8, 9, 11, 15, 16, 17, 26, 27, 29, 30, 32, 34, 35, 36, 37, 38, 39, 40, 44, 45, 46, 47, 48, 49, 50, 53, 54, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 84, 85, 86, 91, 92, 93, 94.

1,486,206.—*William M. Venable*, Pittsburgh, Pa. BIN. Patent dated March 11, 1924. Disclaimer filed July 23, 1924, by the assignee, *Blaw-Knox Company.*

Hereby enters this disclaimer to claims 16, 17, 18, 19, and 30.

TRADE-MARKS

OFFICIAL GAZETTE, AUGUST 5, 1924.

[VOL. 325. No. 1.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 141,984. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) LEE-GREEFKENS CO. INC., San Francisco, Calif. Filed Jan. 8, 1921.

PARAMOUNT

Particular description of goods.—Ice-Cream Powder, Nougat Cream, Pie Filling, Food-Flavoring Extracts, Gelatin Powders, and Fruit Essences.

Claims use since Aug. 10, 1919.

Ser. No. 159,648. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CENTRAL FOOD PRODUCTS COMPANY, Chicago, Ill. Filed Feb. 21, 1922.

LIGHT HOUSE

Particular description of goods.—Shortening Compound Composed of Beef Fat.

Claims use since July 1, 1921.

Ser. No. 161,953. (CLASS 13. HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES. AMERICAN TAP BUSH CO., Detroit, Mich. Filed Apr. 10, 1922.

Peerless

Applicant disclaims the right to the exclusive use of the word "Peerless" except as used in connection with the mark as shown, but without waiving any of its common-law rights thereto.

Particular description of goods.—Cereal-Beverage Cooling and Dispensing Outfits Fully Equipped with Tubes, Taps, Hose, Pumps, and the Like.

Claims use since 1899.

Ser. No. 162,374. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NONMETALLIC TIRES.) BOSTON WOVEN HOSE & RUBBER COMPANY, Cambridge, Mass. Filed Apr. 17, 1922.

BOSTON WOVEN HOSE & RUBBER COMPANY BULL DOG BELT

No claim is made to the word "Belt" apart from the mark shown in the drawing.

Particular description of goods.—Rubber Belting, Stitched Canvas Belting, Rubber Packing, Rubber or Rubber and Fabric Hose, Rubber or Rubber and Fabric Tires for Vehicles, Rubber Tubing, and Fruit-Jar Rings.

Claims use since about July 1, 1890.

Ser. No. 163,684. (CLASS 12. CONSTRUCTION MATERIALS.) MURPHY-MCEUEN COMPANY, Chicago, Ill. Filed May 11, 1922.

M M Company

Particular description of goods.—Felt Asphalt.

Claims use since Feb. 1, 1922.

Ser. No. 164,453. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) SHERMAN L. PARMENTER, New York, N. Y. Filed May 24, 1922.

NUART

Particular description of goods.—Transfer Sets Containing Crayons, Pencils, Brushes, Water Colors, Slates, Celluloid Outline Sheets, Frames for Same, Transfer Sticks, and Pictures.
Claims use since May 3, 1921.

Ser. No. 166,828. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) HOLLANDSCHE CACAO- EN CHOCOLADEFABRIEKEN V/H BENSDORP & Co., Amsterdam, Netherlands. Filed July 15, 1922.

ROYAL DUTCH

Particular description of goods.—Cocoa.
Claims use since 1888.

Ser. No. 167,815. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) HOLLANDSCHE CACAO- EN CHOCOLADEFABRIEKEN V/H BENSDORP & Co., Amsterdam, Netherlands. Filed Aug. 4, 1922.

Particular description of goods.—Cocoa.
Claims use since 1888.

Ser. No. 168,036. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) GUNZE SEISHI KABUSHIKI KWAISHA, Ayabe-Machi, Japan. Filed Aug. 10, 1922.

The words "Best Filature" are disclaimed apart from the mark shown in the drawing. VANO

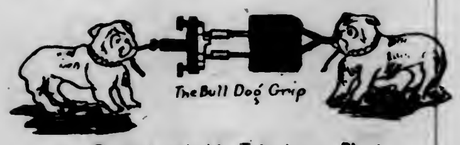
Particular description of goods.—Power-Driven Blowers and Fans for Drafting and Ventilating Purposes.
Claims use since Jan. 1, 1921.

Ser. No. 183,736. (CLASS 34. HEATING, LIGHTING, AND VENTILATING APPARATUS, NOT INCLUDING ELECTRICAL APPARATUS.) COPPUS ENGINEERING CORPORATION, Worcester, Mass. Filed July 27, 1923.



Particular description of goods.—Power-Driven Blowers and Fans for Drafting and Ventilating Purposes.
Claims use since Jan. 1, 1921.

Ser. No. 186,362. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HIRAM GILL, Carthage, Miss. Filed Sept. 29, 1923.

Gill Salv

Particular description of goods.—Pharmaceutical Preparation, a Healing Salve.
Claims use since Aug. 20, 1923.

Ser. No. 186,703. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) JOHN FIETH. New York, N. Y. Filed Oct. 8, 1923.

The words "Interchangeable Telephone Plug" being disclaimed. The representation of the goods is disclaimed apart from the remainder of the mark.

Particular description of goods.—Radio Jack Plugs.

Claims use since 1921.

Ser. No. 187,075. (CLASS 12. CONSTRUCTION MATERIALS.) WOODHEAD LUMBER COMPANY, Los Angeles, Calif. Filed Oct. 16, 1923.

Particular description of goods.—Lumber, Sash, and Doors, and Composition Asphaltic Roofing Paper, Asbestos Shingles, and Redwood and Cedar Shingles.

Claims use since January, 1917.

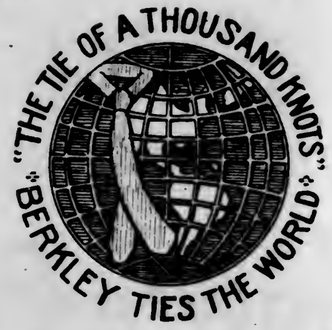
Ser. No. 187,350. (CLASS 12. CONSTRUCTION MATERIALS.) HENRY RUBEN, doing business as To-Rain-On Products Co. (Not Inc.), Chicago, Ill. Filed Oct. 22, 1923.

REIGN-ON

Particular description of goods.—Roof Cement.

Claims use since Sept. 1, 1923.

Ser. No. 187,373. (CLASS 27. HOROLOGICAL INSTRUMENTS.) BERNA WATCH CO., S. A., St. Imier, Switzerland. Filed Oct. 23, 1923.



The words "Swiss Made" are disclaimed apart from the mark as shown in the drawing.

Particular description of goods.—Watches, Watch Movements, Timing Watches, Stop Watches, Watchcases, and Watch Dials.

Claims use since January, 1909.

Ser. No. 187,845. (CLASS 39. CLOTHING.) BERKLEY KNITTING COMPANY, Philadelphia, Pa. Filed Nov. 2, 1923.

The representation of the necktie is not applicant's trade-mark apart from the mark shown in the drawing. The lines on the drawing are not intended to designate or fix any particular color.

Particular description of goods.—Neckties and Cravats.

Claims use since Sept. 14, 1923.

Ser. No. 188,465. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) MALLY PEABODY BEACH, Ridgefield, Conn. Filed Nov. 17, 1923.

SCRUB

Particular description of goods.—Floating Toys.

Claims use since about Aug. 1, 1921.

Ser. No. 188,514. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) THE APEX ELECTRICAL MANUFACTURING COMPANY, Cleveland, Ohio. Filed Nov. 19, 1923.

RÖTAREX

Kook-Rite

Particular description of goods.—Electrical Cookers.

Claims use since June 13, 1923.

Ser. No. 188,516. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) THE APEX ELECTRICAL MANUFACTURING COMPANY, Cleveland, Ohio. Filed Nov. 19, 1923.

Kook-Rite

Particular description of goods.—Electrical Cookers.

Claims use since Nov. 9, 1922.

Ser. No. 188,528. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) HARRY B. BURT, Youngstown, Ohio. Filed Nov. 19, 1923.

Good Humor

Trade-mark "Good Humor" shown in accompanying drawing.

Particular description of goods.—Ice-Cream Suckers.

Claims use since about December, 1921.

Ser. No. 188,678. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) DANIEL N. HITCHCOCK, doing business as Purity Chemical Co., Seattle, Wash. Filed Nov. 22, 1923.

Purity

Particular description of goods.—Disinfectant Liquids.

Claims use since Nov. 1, 1920.

Ser. No. 188,767. (CLASS 13. HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES.) THE MURDOCK MFG. & SUPPLY COMPANY, Cincinnati, Ohio. Filed Nov. 23, 1923. Under ten-year proviso.

MURDOCK

Particular description of goods.—Hydrants, Street Washers, Drinking Fountains, Stationary Fillers for Automobile Radiators, Railway Water-Service Box, Horse-Watering Fonts, and Rubber Heads.

Claims use since 1853.

Ser. No. 188,892. (CLASS 43. THREAD AND YARN.) THE CORTICELLI SILK COMPANY, Northampton, Mass. Filed Nov. 26, 1923.

NONOTUCK

Particular description of goods.—Thread of Cotton, Silk, or Cotton and Silk or of Other Fibrous Material for Sewing, Crocheting, Embroidering, Knitting, Etc.

Claims use since about 1855.

Ser. No. 188,893. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) THE CORTICELLI SILK CO., Florence, Mass. Filed Nov. 26, 1923. Under ten-year proviso.

Particular description of goods.—Silk Fabrics.

Claims use since about Jan. 6, 1893.

Ser. No. 188,915. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) JOSEPH H. LOWDEN, Elyria, Ohio. Filed Nov. 26, 1923.

LOWDRAINER

Particular description of goods.—Apparatus for Automobile Service Stations for Receiving and Conveying Liquids Drained from Automobiles.
Claims use since July 1, 1923.

Ser. No. 189,099. (CLASS 12. CONSTRUCTION MATERIALS.) CHENEY LIME COMPANY, Allgood, Ala. Filed Dec. 1, 1923.

No claim made for the words "Superfine," "White Lime," "Shelby," and "Saginaw, Alabama" apart from the mark shown in the drawing. The words "Shelby Lime Works" forming a feature of the trade-mark constitute the name of a plant owned and operated by applicant.

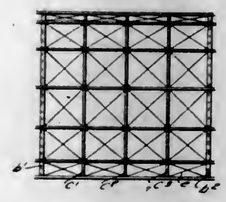
REISSUES

AUGUST 5, 1924.

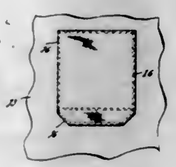
15,883. CASH REGISTER. EDWARD J. VON PEIN, Dayton, Ohio, assignor to The National Cash Register Company, Dayton, Ohio. Filed May 23, 1924. Serial No. 715,492. Original No. 1,371,653, dated Mar. 15, 1921, Serial No. 291,433, filed Apr. 21, 1919. 9 Claims. (Cl. 235—3.)

1. In a machine of the class described, the combination of a plurality of sets of manipulative devices, an operating member common to all of said devices and operated by the devices of one set said member carrying an obstruction, a rocking frame operated by the devices of another set, and an arm carried by said rocking frame normally engaging the obstruction on the operating member to prevent movement of said member.



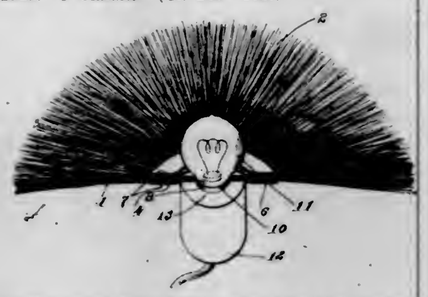
15,884. MAGNETIC CHUCK. OSWALD CORADI and HENRI GRAF-BUCHLER, Zurich, Switzerland. Filed Feb. 16, 1924. Serial No. 693,445. Original No. 1,412,776, dated Apr. 11, 1922, Serial No. 394,819, filed July 8, 1920. 15 Claims. (Cl. 175—367.)

1. A magnetic chuck comprising a plurality of adjacent magnets having top faces and lateral faces, respectively in planes at right angles to each other, the respective faces of each magnet being spaced apart from the faces of any other magnet.



7. A magnetic chuck comprising in combination, a base, a plurality of integral extensions formed thereon, and coils wound about said extensions whereby the magnetic paths within the chuck are entirely within a single member.

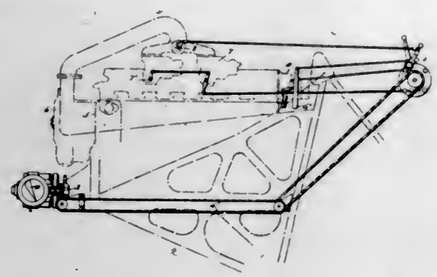
15,885. SKELETON FRAME CONSTRUCTION FOR AIRSHIPS AND THE LIKE. KARL ARNSTEIN, Friedrichshafen, Germany, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany, a Firm. Filed June 14, 1924. Serial No. 720,145. Original No. 1,456,497, dated May 29, 1923, Serial No. 550,885, filed Apr. 8, 1922. 1 Claim. (Cl. 244—3.)



The method of making rigid skeleton frames for air ships which consists in connecting spaced longitudinal supporting members to transversely arranged supporting rings, bracing an auxiliary ring by aid of bracing members, inserting said auxiliary ring intermediate said supporting rings and parallel to said supporting rings and removing said bracing members.

15,886. PATCH POCKET. ALFRED C. BARROW, Lynchburg, Va., assignor, by mesne assignments, to Patent Pocket Corporation, Lynchburg, Va., a Corporation of Virginia. Filed June 3, 1924. Serial No. 717,667. Original No. 1,457,812, dated June 5, 1923, Serial No. 558,669, filed May 5, 1922. 4 Claims. (Cl. 2—248.)

1. The combination with a garment body, of a facing for forming a pocket therewith, said facing being of double ply construction adjacent its lower end with the inner ply of less width than the outer ply, the sides of the latter being folded over at the side edges of the inner ply, and stitching securing the sides and lower end of the facing to the said body, said inner ply being connected to the outer ply by stitching above the bottom of the pocket.

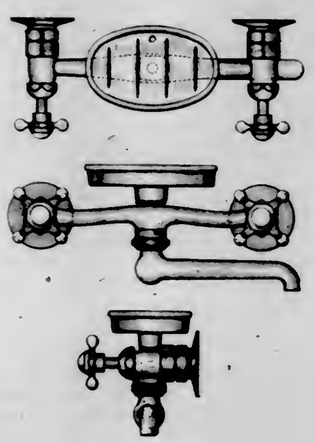


15,887. TINSEL REFLECTOR. BERNARD E. FRANKE, Baltimore, Md., assignor to The George Franke Sons Company, a Corporation of Maryland. Filed Apr. 22, 1924. Serial No. 708,321. Original No. 1,479,037, dated Jan. 1, 1924, Serial No. 630,204, filed Apr. 6, 1923. 5 Claims. (Cl. 240—103.)

1. The combination with a light bulb and socket of a reflector composed of radiating tinsel and a central holder for the tinsel consisting of a disk having a central aperture to pass the shank of the bulb.

15,888. SYNCHRONIZING CONTROL MECHANISM FOR REVERSIBLE-PITCH PROPELLERS. ERNEST G. MCCAULEY, Dayton, Ohio. Filed Feb. 9, 1924. Serial No. 691,852. Original No. 1,458,214, dated June 12, 1923, Serial No. 497,056, filed Aug. 30, 1921. 18 Claims. (Cl. 244—25.)

1. In an aircraft having an internal combustion engine and a reversible propeller, the combination with means for operating the throttle valve of the engine and a device for changing the angularity of the blades of the propeller, of a mechanism for controlling the movements of said throttle valve in accordance with the angular position of the propeller blades when changing from a forward to a reverse pitch, a compensating device for



permitting the actuation of said means to an "off" position regardless of the position of said mechanism, said compensating device having further compensating means permitting said throttle valve to remain in an "off" position when the angular position of the blades is being changed from a full reverse to a forward or a normal flying position.

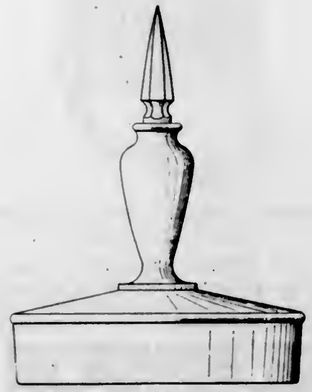
DESIGNS

AUGUST 5, 1924.

65,364. FAUCET. EVERETT H. BICKLEY, Upper Darby, Pa. Filed Oct. 3, 1922. Serial No. 3,875. Term of patent 3½ years.

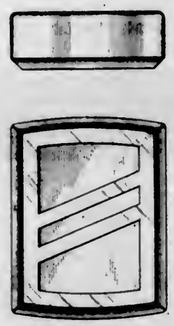
The ornamental design for a faucet substantially as shown.

65,365. ARM FOR LIGHTING FIXTURES. MICHAEL B. BOWEN, Decatur, Ill., assignor to Faries Manufacturing Company, Decatur, Ill., a Corporation of Illinois. Filed Nov. 15, 1922. Serial No. 4,295. Term of patent 3½ years.



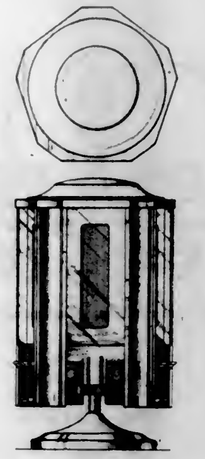
The ornamental design for an arm for lighting fixtures, as shown.

65,366. FINGER RING. BYARD F. BROMAN, Philadelphia, Pa. Filed Feb. 28, 1923. Serial No. 5,328. Term of patent 14 years.



The ornamental design for a finger ring, as shown.

65,367. COMBINED PUFF BOWL AND PERFUME BOTTLE. HARRY G. DALZELL, Chicago, Ill., assignor to Fostoria Glass Company, Moundsville, W. Va., a Corporation of West Virginia. Filed Jan. 10, 1923. Serial No. 4,857. Term of patent 14 years.



The ornamental design for a combined puff bowl and perfume bottle as shown.

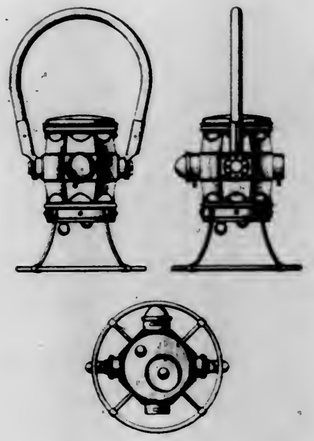
65,368. CLAMP FOR AUTOMOBILE BUMPER. WILLIAM J. GROTENHUIS, Chicago, Ill., assignor, by mesne assignments, to Biflex Products Company, Waukegan, Ill., a Corporation of Delaware. Filed Aug. 26, 1921. Serial No. 495,830. Term of patent 7 years.

The ornamental design for clamp for automobile bumper, as shown.

65,369. DISPLAY STAND FOR PACKAGED GOODS. AUGIE L. HANSEN, Chicago, Ill., assignor to Hansen Manufacturing Company, County of Cook, Ill., a Corporation of Illinois. Filed June 4, 1924. Serial No. 9,798. Term of patent 7 years.

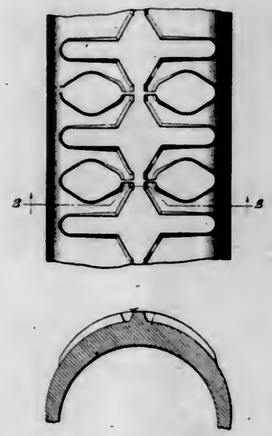
The ornamental design for a display stand for packaged goods as shown.

65,370. RADIATOR CAP. GEORGE R. HARVEY, Bedford, Ind. Filed July 22, 1921. Serial No. 486,895. Term of patent 3½ years.



The ornamental design for a radiator cap as shown.

65,371. SOUND-AMPLIFYING HORN. JESSE B. HAWLEY, Wilmette, Ill. Filed June 16, 1923. Serial No. 6,516. Term of patent 14 years.



The ornamental design for a sound amplifying horn as shown.

65,372. ELECTRIC LANTERN. ARTHUR W. HELMHOLTZ, Harrisburg, Ill. Filed Apr. 25, 1924. Serial No. 9,403. Term of patent 14 years.

The ornamental design for an electric lantern as shown.

65,373. RUBBER TIRE. LE ROY PARK HOLLOWAY, Akron, Ohio, assignor to American Rubber and Tire Company, Akron, Ohio. Filed Apr. 14, 1922. Serial No. 1,750. Term of patent 7 years.

The ornamental design for a rubber tire as shown.

65,374. LAMP SHADE. FRANK M. KATZ, New York, N. Y., assignor to Frank M. Katz & Co. Inc., New York, N. Y. Filed Nov. 17, 1923. Serial No. 7,804. Term of patent 3½ years.

The ornamental design for a lamp shade, as shown.

65,375. PILE FABRIC. CLARENCE V. KOZLAY, New York, N. Y., assignor to Blumenthal & Co. Inc., New York, N. Y., a Corporation of New York. Filed June 6, 1924. Serial No. 9,814. Term of patent 7 years.

The ornamental design for a pile fabric, as shown.

65,376. HANDKERCHIEF. FRANK DAL LAGO, Jersey City, N. J., and JACOB S. JASKOW, New York, N. Y. Filed Mar. 21, 1924. Serial No. 9,014. Term of patent 3½ years.

The ornamental design for a handkerchief, as shown.

65,377. UPHOLSTERY BRAID. DAVID M. LENDING, Brooklyn, N. Y. Filed June 7, 1924. Serial No. 9,820. Term of patent 3½ years.

The ornamental design for upholstery braid as shown.

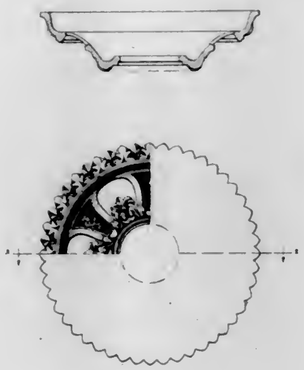
65,378. SALT AND PEPPER SHAKER OR SIMILAR ARTICLE. WILLIAM GIBBON MCILVAIN, Philadelphia, Pa. Filed May 7, 1924. Serial No. 9,508. Term of patent 3½ years.

The ornamental design for a salt and pepper shaker or similar article as shown.

65,379. SALT AND PEPPER SHAKER OR SIMILAR ARTICLE. WILLIAM GIBBON MCILVAIN, Philadelphia, Pa. Filed May 7, 1924. Serial No. 9,509. Term of patent 3½ years.

The ornamental design for a salt and pepper shaker or similar article as shown.

65,380. SPOON OR SIMILAR ARTICLE. WILLIAM F. MOWBY, Wallingford, Conn., assignor to International Silver Co., Meriden, Conn., a Corporation of New Jersey. Filed June 12, 1924. Serial No. 9,861. Term of patent 7 years.



The ornamental design for a spoon or similar article, as shown.

65,381. SPOON OR SIMILAR ARTICLE. WILLIAM F. MOWBY, Wallingford, Conn., assignor to International Silver Co., Meriden, Conn., a Corporation of New Jersey. Filed June 12, 1924. Serial No. 9,862. Term of patent 7 years.

The ornamental design for a spoon or similar article, as shown.

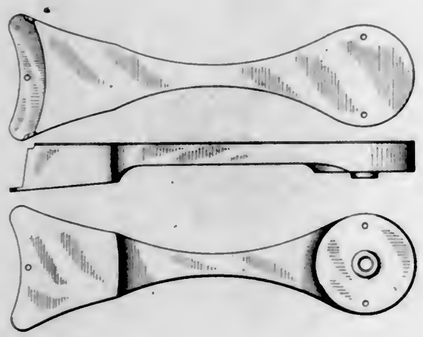
65,382. SCREW ADAPTER FOR LIGHTING FIXTURES. BARNET NEWLAND, New York, N. Y. Filed Mar. 29, 1924. Serial No. 9,114. Term of patent 3½ years.

The ornamental design for a screw adapter for lighting fixtures, as shown.

65,383. WALL BRACKET. BARNET NEWLAND, New York, N. Y. Filed Apr. 5, 1924. Serial No. 9,163. Term of patent 3½ years.

The ornamental design for a wall bracket, as shown.

65,384. LACE. WINSLOW A. PARSONS, Wellesley, Mass., assignor to Richmond Lace Works, New York, N. Y., a Corporation of Maine. Filed June 3, 1924. Serial No. 9,785. Term of patent 14 years.



The ornamental design for lace as shown.

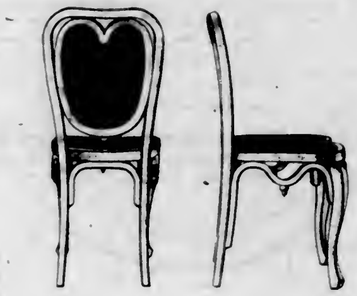
65,385. RING. BARNET PUSRIN, New York, N. Y. Filed June 4, 1924. Serial No. 9,792. Term of patent 3½ years.

The ornamental design for a ring, as shown.

65,386. ARM FOR LIGHTING FIXTURES. GROSVENOR P. ROBINSON, Summit, and WILLIAM T. BLACKWELL, Westfield, N. J.; said Robinson assignor of one-half to Lighting Studios Company, New York, N. Y., a Corporation of New York. Filed June 7, 1924. Serial No. 9,816. Term of patent 7 years.

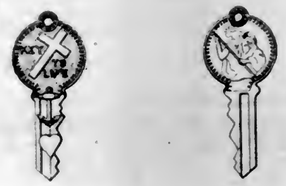
The ornamental design for an arm for lighting fixtures, as shown.

65,387. EMBROIDERED TEXTILE FABRIC. BENJAMIN SCHWARTZ, New York, N. Y., assignor to Gelberg & Schwartz, New York, N. Y., a Firm consisting of Herman Gelberg and Benjamin Schwartz. Filed Mar. 18, 1924. Serial No. 8,983. Term of patent 3½ years.



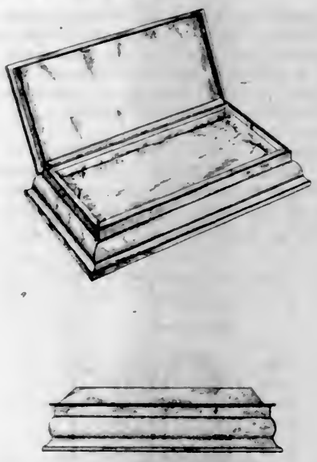
The ornamental design for an embroidered textile fabric as shown.

65,388. EMBROIDERED TEXTILE FABRIC. BENJAMIN SCHWARTZ, New York, N. Y., assignor to Gelberg & Schwartz, New York, N. Y., a Firm consisting of Herman Gelberg and Benjamin Schwartz. Filed Mar. 18, 1924. Serial No. 8,984. Term of patent 3½ years.



The ornamental design for an embroidered textile fabric as shown.

65,389. BENT-WOOD CHAIR. JULIUS SKVARENINA, Chicago, Ill., assignor to Peter Flaska, Gustav Sojak, John Flaska, and Julius Skvarenina, in trust for the Partnership known as The American Bent Wood Chair Company, Chicago, Ill. Filed June 5, 1924. Serial No. 9,800. Term of patent 14 years.

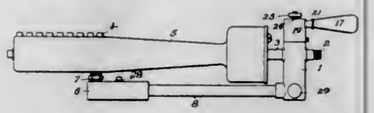


The ornamental design for bent wood chair, as shown.

65,390. CHARM OR SIMILAR ARTICLE. JOSEPH H. SWIFT, North Attleboro, Mass. Filed July 28, 1923. Serial No. 6,885. Term of patent 7 years.

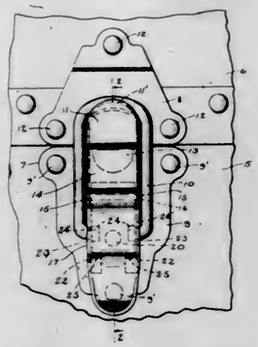
The ornamental design for a charm, or similar article as shown.

65,391. JEWELRY BOX. MAURICE J. KARPELES, Providence, R. I. Filed Feb. 6, 1924. Serial No. 8,548. Term of patent 14 years.



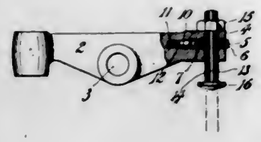
The ornamental design for a jewelry box, as shown.

PATENTS



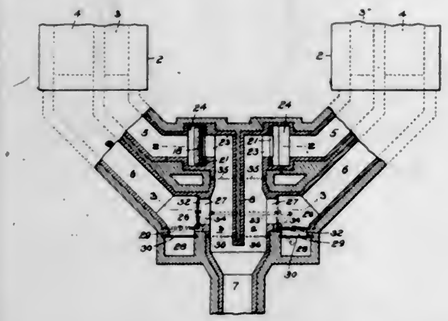
GRANTED AUGUST 5, 1924.

1,503,461. DEVICE FOR REGULATING THE SUPPLY OF FUEL FOR GAS BURNERS. JOHN H. ACKROYD, Bridgeport, Conn. Filed Aug. 11, 1920. Serial No. 402,878. 10 Claims. (Cl. 236—50.)



7. In combination with a gas burner, means for supplying gas to the burner, heat controlled means responsive to the temperature of a wall of the burner and adapted to shut off a portion of said gas supply and to maintain such portion shut off so long as the remaining portion of said gas supply is permitted to burn.

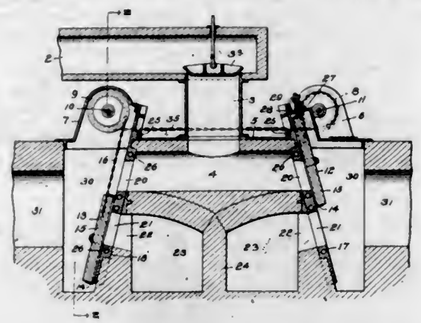
1,503,462. TRUNK FIXTURE. CARL P. ALBERT, Racine, Wis., assignor to Greene Mfg. Co., Racine, Wis., a Corporation of Wisconsin. Filed May 27, 1921. Serial No. 472,997. 3 Claims. (Cl. 292—247.)



1. A trunk fixture, comprising a one piece cover member formed of sheet metal and having a flat uncut attaching portion and an integral outwardly and upwardly projecting hook-like portion and a downwardly extending tongue, a one piece body member formed of sheet metal and having an outwardly projecting socket portion with an inturned upper flange and which socket portion is entered by the tongue, said socket portion having downwardly projecting eyed ears, a clamping lever pivotally connected to the eyed ears, a spring member mounted on the body portion and extending between the eyed ears, a pivot pin extending through the eyed ears, a clamping lever having one end portion folded over on itself and extending around the pivot pin and forming a shoulder engageable with the spring, the opposite side edge portions of said clamping lever being flanged inwardly and provided with alined openings, and a link member having its end portions extending through the alined openings of the cramping lever and flattened to form shoulders to prevent the withdrawal of said end portions, the looped portion of said link member having a locking engagement with the hook portion of the cover member.

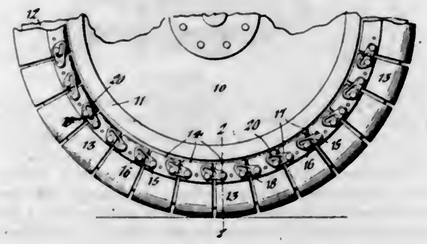
1,503,463. VALVE-ADJUSTMENT DEVICE. ARTHUR J. AMOS and WILLIAM F. VILLIERS, Castlemaine, Victoria, Australia, assignors of one-third to Charles Edmond Cording, Bendigo, Victoria, Australia. Filed Sept. 1, 1921. Serial No. 497,783. 7 Claims. (Cl. 123—90.)

1. A valve tappet mounted for adjustment through a threading movement, a member held against longitudinal movement and coupled for sliding cooperation with the tappet, and means cooperating with said member to produce audible notification of the movement of the member in either direction in that operation of the member tending to turn the tappet.



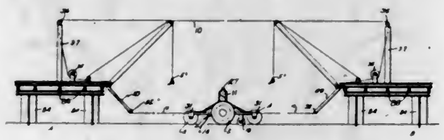
1,503,464. REGENERATIVE-FURNACE CONSTRUCTION. WALTER O. AMSLER, Pittsburgh, Pa. Filed May 21, 1920. Serial No. 383,254. 15 Claims. (Cl. 277—5.)

1. In a reversible regenerative furnace, the combination with gas and air reversing valves, of horizontally disposed fluid passageways disposed adjacent said valves, the communicating fluid passages adjacent the gas valve being so arranged in line with one another and in the same horizontal planes, that the flow of gas through the passages is not deflected from its path of flow in proximity to the valve, and the communicating fluid passages adjacent the air valve being arranged in line with one another and in the same horizontal plane.



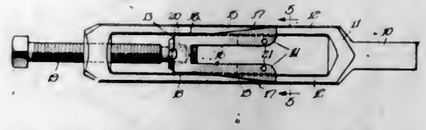
1,503,465. REVERSING VALVE FOR REGENERATIVE FURNACES. WALTER O. AMSLER, Pittsburgh, Pa. Filed May 21, 1920. Serial No. 383,255. 4 Claims. (Cl. 277—6.)

1. In a reversing valve structure, the combination with oppositely disposed gas regenerator flues and a chimney flue disposed within the masonry of a furnace, vertically movable slide valves controlling the passage of gases



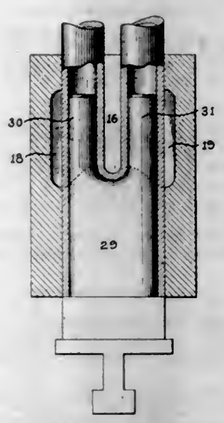
between the regenerator and chimney flue, horizontally disposed ports over which the valves slide, and a baffle wall interposed between said valves.

1,503,466. OVERSHOE FOR TIRES. HERBERT S. BENNETT, Jamestown, N. Y. Filed Dec. 1, 1923. Serial No. 678,024. 8 Claims. (Cl. 152—16.)



1. An overshoe for tires, comprising a plurality of sections arranged in an annular series about the tire, pivot pins carried by said sections, and links pivotally connecting said sections with one another, each link being permanently mounted on the pivot pin of one section and detachably engaging the opposing pivot pin of an adjoining section.

1,503,467. CABLE-OPERATED PLOW. ARMANDO BERTELLA, Detroit, Mich. Filed May 25, 1923. Serial No. 641,370. 6 Claims. (Cl. 104—169.)

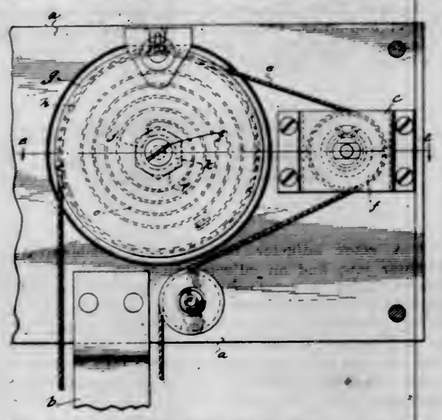


1. In a cable operated plow, a pair of draft machines adapted to draw the plow therebetween each comprising a subframe provided with driving wheels, means for driving the wheels, a table rotatably mounted on each subframe, a drum rotatably mounted upon each table, means for rotating the table or drum independently, a subframe for the plow mounted on wheels, a cable connecting the two drums and being wound thereabout, the ends of the cable passing from the drums and being connected to the subframe of the plow, means carried by the plow for taking up the slack in the cable between the draft machines, a frame rotatably mounted on the subframe and carrying a series of plows, and means connecting the plow frame and subframe of the plow whereby raising of the plow frame and subsequent lowering thereof turns the same about on the subframe of the plow.

1,503,468. SLACK-ADJUSTER MECHANISM. LAWRENCE W. BIEKER, Hammond, Ind., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed July 3, 1922. Serial No. 572,372. 4 Claims. (Cl. 188—197.)

2. A slack adjuster including, in combination, an adjuster jaw, and an adjuster block having arms with flanges which cooperate with said jaw for maintaining said block in position with respect to said jaw, said arms being movable into one position to permit passage of one of said flanges during the application of said block to said jaw and said arms being movable into another position to place the flanges into cooperative association with said jaw.

1,503,469. METHOD OF AND APPARATUS FOR FORGING MANIFOLDS ON PIPES. THOMAS F. BIRMINGHAM, Hammond, Ind., assignor to The Superheater Company, New York, N. Y., a Corporation of Delaware. Filed Feb. 21, 1922. Serial No. 538,278. 10 Claims. (Cl. 29—157.6.)

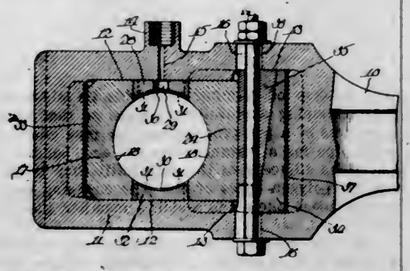


1. The process of forming manifolds on pipes which comprises clamping a plurality of pipes so that they lie at the corners of a polygon, heating the pipe ends, splitting each pipe for a distance from its end, bending outward portions adjacent to the slits until they lie in the sides of the polygon edges of one pipe engaging those of the two adjacent ones, and welding together the engaging edges.

5. A die for forming manifolds on pipes, comprising a female and a male member, said female member having a plurality of spaces, adapted to receive pipes to be operated on, arranged at the vertices of a polygon, there being a cavity bounded by planes tangent to the spaces extending from one end of the female member, the male

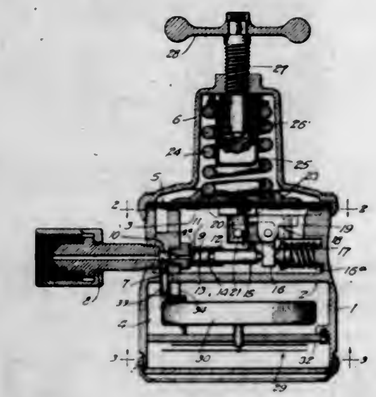
member having a body portion and legs shaped generally complementary to the cavity and spaces of the female member but being smaller, so that when it is inserted in it it is spaced everywhere from its walls.

1,503,470. WINDOW-REGULATOR BEARING. ALBERT BIRÓ and ERNEST E. HEINTZ, Detroit, Mich. Filed Aug. 27, 1923. Serial No. 659,401. 8 Claims. (Cl. 64—66.)



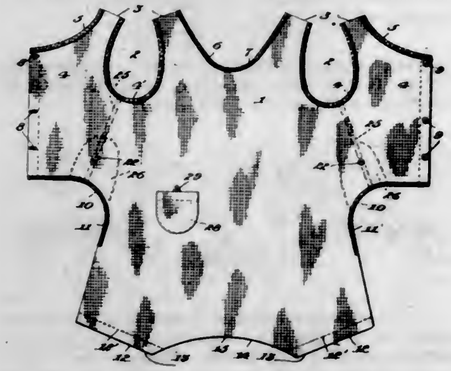
1. In a window regulator bearing, the combination of a plate, a stud secured therein provided with a hollow open end forming a journal bearing, a rotatable member having a cup-like journal adapted to fit into the hollow of the stud, and means passing through the center of the journal and anchored in the journal bearing for tying the two together for permitting them to rotate, one in the other.

1,503,471. SAFETY-RAZOR-BLADE STROPPER. WILLIAM M. BRECK, Cleveland, Ohio. Filed Apr. 24, 1922. Serial No. 556,238. 6 Claims. (Cl. 51—153.)



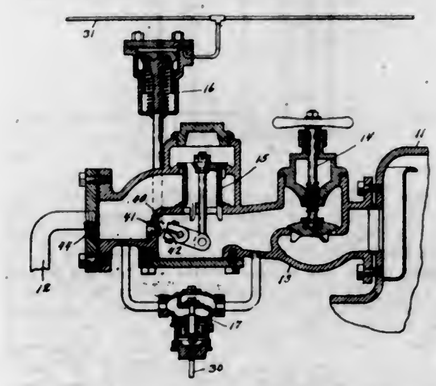
3. A stropping device having a supporting portion engageable between the blade clamping plates of a safety razor.

1,503,472. ROD BRASS. ELMER J. BREWSTER and JOHN MURRIN, Chicago, Ill. Filed Nov. 19, 1923. Serial No. 675,528. 4 Claims. (Cl. 64—55.)



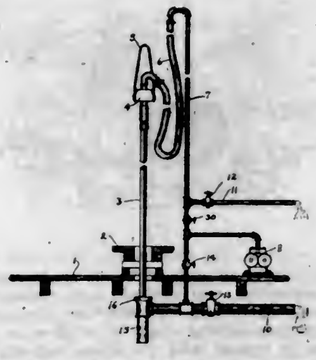
1. A rod brass consisting of a frame carried by the rod and four independently movable sections interlocking with one another and located within said frame, two of said sections being spaced from each other and arranged in longitudinal relation with respect to the said rod and the other two of said sections being spaced from one another and interposed between the adjacent surfaces of the two first named sections, each of said sections having an arcuate inner face, and said four sections having co-acting faces disposed at right angles to the planes of their outer contiguous surfaces.

1,503,473. PRESSURE REGULATOR. JOHN B. BURDETT, Highland Park, Ill. Filed Apr. 19, 1923. Serial No. 633,243. 8 Claims. (Cl. 50—23.)



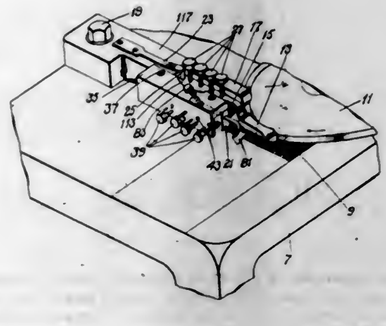
1. In a pressure regulator, the combination of a housing having a transverse partition forming two chambers within the housing, one of said chambers constituting the pressure chamber and having a passage leading into it, and regulator pressure-indicating mechanism mounted in the other chamber and having a tube connection leading through the partition to the inlet passage and a tube connection leading through the partition to the pressure chamber.

1,503,474. CHILD'S COMBINATION UNDERGARMENT. FANNY BUSENBURG, Pine Bluff, Ark. Filed Sept. 10, 1923. Serial No. 661,924. 3 Claims. (Cl. 2—80.)



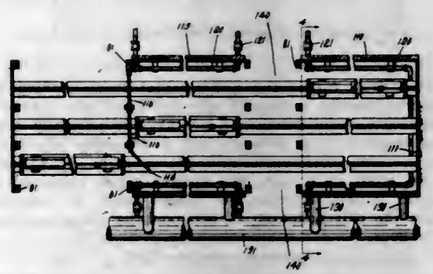
1. A child's undergarment, comprising a single piece front cut out in its upper edge with a central neck opening 6 and cut out at opposite sides thereof, as at 2—2, to form the pairs of shoulder strap extensions 3—3; each pair of extensions being joined to form shoulder straps, integral back forming extensions 4—4 at opposite sides of said front curved on their upper edges to correspond with the central neck opening and at their lower edges extending inwardly to the narrower lower portion of said front portion; the narrower lower portion of the front extending down to form leg portions, and inclined inwardly to a curved crotch portion, and a seat secured at its lower crotch forming curve to the crotch portion of the front and secured along a portion of its sides to the sides of the lower portion of said front portion to form leg openings, a wtistband on the upper drop portion of the seat member, and suitable fastenings for the back forming extensions and the waistband.

1,503,475. LOCOMOTIVE BOOSTER SYSTEM. FRANCIS J. CARTY, Roxbury, Mass., assignor to Franklin Railway Supply Company, a Corporation of Delaware. Filed June 6, 1923. Serial No. 643,668. 13 Claims. (Cl. 105—48.)



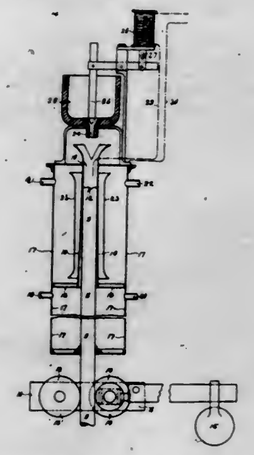
1. The combination with a locomotive booster engine and a throttle valve therefor, of means continually operative when supplied with steam to admit heating steam to said engine, and hand-operated means to control simultaneously the supply of steam to said continually-operative means and to said throttle valve.

1,503,476. APPARATUS FOR WELL DRILLING. WILLIAM L. CHILDS and LOUIS A. GODBOLD, Houston, Tex., assignors to Hughes Tool Company, Houston, Tex., a Corporation of Texas. Filed May 24, 1921. Serial No. 472,114. 4 Claims. (Cl. 255—24.)



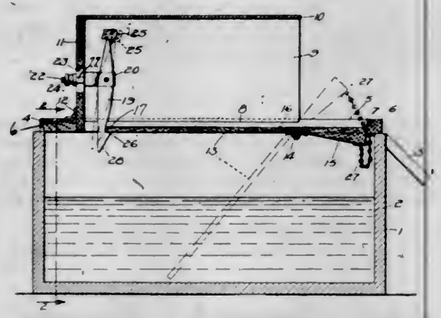
1. In a drilling apparatus the combination of a well casing, a drill stem rotatable therein and having a fluid tight fit with the upper end thereof, a pump, a connecting pipe between said pump and said casing, another connecting pipe between said drill stem and said pump, a valve controlled outlet in each of said pipes and further valves in said pipes whereby the fluid may be circulated from said pump through said drill stem in either direction for the purpose described.

1,503,477. SKIVING MACHINE. FRANK W. CHRISTY, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Aug. 24, 1923. Serial No. 659,173. 9 Claims. (Cl. 69—16.)



9. A machine of the class described having, in combination, a rotary disk knife, a cylindrical feed roll, an angularly adjustable presser-foot adapted to hold the work against the roll and by its position to determine the character of the scarf produced, a spring tending at all times to move the foot toward one limit of its adjustment, and a plurality of stops any one of which may be rendered operative to determine the position in which the foot shall be held by the spring.

1,503,478. APPARATUS FOR DOPING AIRPLANE WINGS. FRANK O. CLEMENTS, Dayton, Ohio, assignor, by mesne assignments, to Dayton-Wright Company, Dayton, Ohio, a Corporation of Delaware. Filed Aug. 28, 1918. Serial No. 251,760. 3 Claims. (Cl. 24—40.)

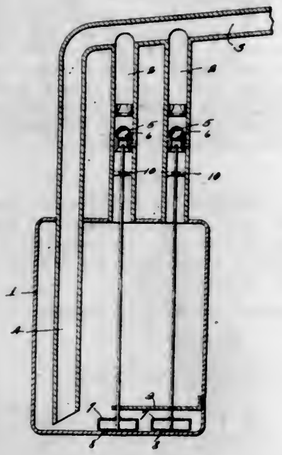


1. In an apparatus for doping the fabric covering of airplane parts, a track; a frame slidably mounted on said track and adapted for carrying therein the part to be doped; and a plurality of booths surrounding said track, each booth adapted to receive and completely house the frame.

1,503,479. PROCESS AND APPARATUS FOR THE CONTINUOUS CASTING OF RODS, BARS, AND THE LIKE. ALLAN COATS, Castlehead, Paisley, Scotland. Filed Dec. 2, 1919. Serial No. 341,918. 32 Claims. (Cl. 207—11.)

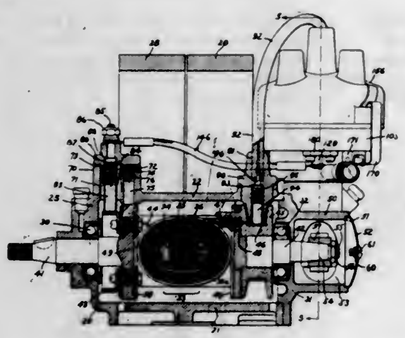
1. In apparatus of the class described, the combination of a mold, and means for pouring molten metal into said mold in a stream between the middle of the mold and its wall and adjacent the latter.

1,503,480. TRAP. ALLEN B. COBBS, Chicago, Ill. Filed Mar. 2, 1922. Serial No. 540,524. 4 Claims. (Cl. 43—70.)



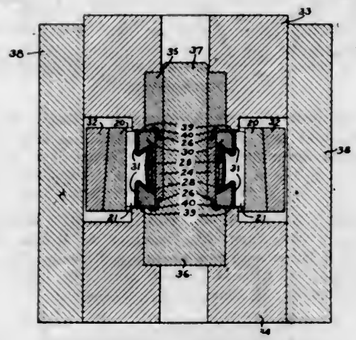
1. A trap comprising a horizontal frame having an opening therein, a gravity operated trap door pivotally mounted on said frame and arranged to normally close said opening from beneath, and a vertically adjustable trigger supported upon said frame arranged to normally latch said door, said trigger being fashioned to receive a bait, whereby the trigger may be actuated when the bait is moved to occasion the release of said trap door.

1,503,481. PROCESS OF FORMING SODIUM CARBONATE. HERBERT EDWIN COCKSEDGE, Hartford, England, assignor to The Solvay Process Company, Solvay, N. Y., a Corporation of New York. Filed Oct. 31, 1922. Serial No. 598,121. 7 Claims. (Cl. 23—22.)



1. The process of forming sodium carbonate which consists in heating a compound having the formula $Na_2CO_3.3NaHCO_3$ at a temperature above 100° C.

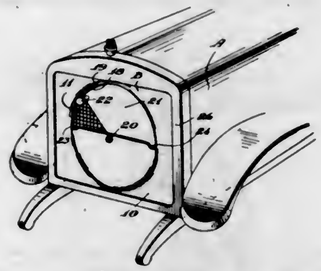
1,503,482. VALVE MECHANISM FOR REFRIGERATING APPARATUS. FERNAN O. CONILL, Marseille, France. Filed Nov. 1, 1921. Serial No. 512,082. 10 Claims. (Cl. 62—120.)



2. The combination of a closed receptacle for a gas held in solution and releasable by heating the receptacle, an outlet for the gas, a valve for controlling said outlet, and means in the receptacle and operable by the pressure of the gas released during the heating to open the valve, said means comprising a pocket in the receptacle for receiving a portion of the solution, the pocket being movable by the pressure of the gas evolved therein, and connections between the movable pocket and the valve for transmitting the motion of the pocket to the valve, substantially as and for the purpose specified.

1,503,483. MAGNETO. OLIVER F. CONKLIN and JOHN A. VANNEMAN, Anderson, Ind., assignors to The Remy Electric Company, a Corporation of Indiana. Filed Dec. 17, 1919. Serial No. 345,580. 7 Claims. (Cl. 123—149.)

1. In a magneto, the combination with field magnets and an armature; of a magneto frame of conducting material supporting said magnets and armature; collector rings supported by said armature and connected with the windings thereof; collector brushes; a conducting member in contact with the frame and attached to one of the brushes; a non-conducting member supporting the other brush upon the frame; and common securing provisions for both said means.

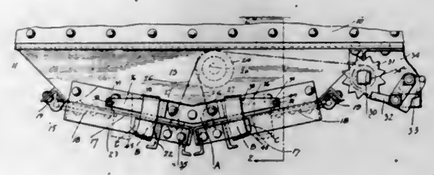


1,503,484. COMMUTATOR AND PROCESS OF MANUFACTURE. OLIVER F. CONKLIN, Anderson, Ind., assignor to Remy Electric Company, Anderson, Ind., a Corporation of Indiana. Filed Aug. 23, 1920. Serial No. 405,438. 8 Claims. (Cl. 29—155.5.)

1. The method of making commutators which comprises assembling an annulus of commutator bars, a hollow core located centrally of the annulus, and independently movable clamping rings located on the core and adapted to engage the annulus of bars; applying pressure initially directly to the clamping rings to force them against the annulus while centering the core with respect to the annulus and rings so that the ends of the core extend the same distance outside the rings; then applying pressure to the ends of the core to cause the end edges of the core to flare outwardly and finally to be bent reversely back against the outsides of the clamping rings, the direct pressure against the clamping rings being removed as the said reverse flare against the clamping rings begins.

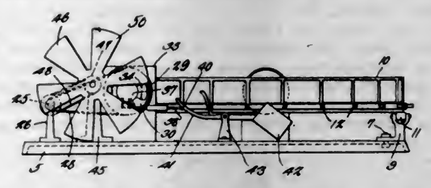
8. A commutator comprising an annulus of commutator bars separated by nonconducting members, clamping rings bearing against the sides of the bars and a central hollow core having relatively thin end edges reversely curled back against the clamping rings, and having an intermediate portion which is relatively thick, said intermediate portion being broached or internally knurled to provide for driving engagement with a shaft.

1,503,485. AUTOMOBILE RADIATOR SHIELD. ERNEST CONLEY, Sherbrooke, Quebec, Canada. Filed Feb. 4, 1922. Serial No. 534,206. 1 Claim. (Cl. 257—132.)



An automobile radiator shield comprising a substantially rectangular plate formed with peripheral offset edges engaging the radiator head, a circular bulge projecting from the centre of the plate and formed with a semi-circular opening, a semi-circular closing element mounted in the circular projection to close the opening, an operating knob on the closing element, and notches in the plate to house the knob.

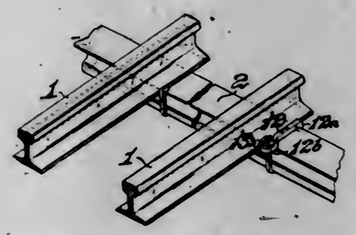
1,503,486. REFRIGERATOR-DOOR CONSTRUCTION. LLOYD G. COPEMAN, Flint, Mich. Filed June 25, 1923. Serial No. 647,598. 5 Claims. (Cl. 72—97.)



1. In a refrigerator construction, a door lining in the form of a hollow tile block provided with a drip flange.

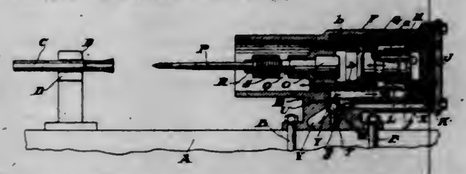
1,503,487. CAR-DOOR-LOCKING DEVICE. MILLARD FILLMORE COX, Louisville, Ky. Filed Apr. 30, 1923. Serial No. 635,474. 10 Claims. (Cl. 105—308.)

10. In a railway car including a body and a plurality of transverse dumping doors pivoted thereto and meeting with their free edges adjacent each other, the combination with a bracket secured to the car body centrally between the doors, said bracket being provided with outwardly extending opposite runways spaced from the car body; of means for securing the outer ends of the runways to the side of the car body and holding them in spaced relation thereto; a bracket secured to the side of each door, said bracket being provided with an over-hanging portion spaced from the door and in alinement with the adjacent runway, said overhanging portion being provided with a beveled end; and a link movable on the runway, said link being provided with vertical walls on opposite sides of the runway, and upper inclined wall engaging the runway and a lower inclined wall adapted to engage the lower edge of the door bracket when the link is moved towards the free edge of the door to thereby force the door to closed position, and positively hold the same closed.



1,503,488. DISPLAY DEVICE. THOMAS G. CRAVER, Mount Hope, W. Va., assignor of one-fourth to M. L. Parker, Mount Hope, W. Va., and one-fourth to Lem Douglas, Scarbro, W. Va. Filed Apr. 1, 1922. Serial No. 548,734. 3 Claims. (Cl. 88—27.)

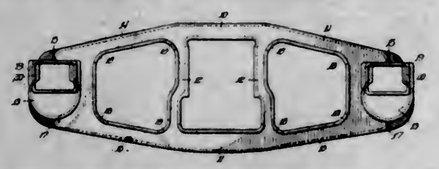
1. In a device of the class described, a pair of associated distinct projecting apparatus, a rotatable carriage for carrying slides, operating adjacent to one of the projecting apparatus to display matter contained on the slides supported by the carriage, said projecting



apparatus being focused to a common area, a stationary plate disposed before one projecting apparatus, and having a line of openings, means for closing the openings of the plate intermittently, and a shutter mechanism operated by the movement of the carriage.

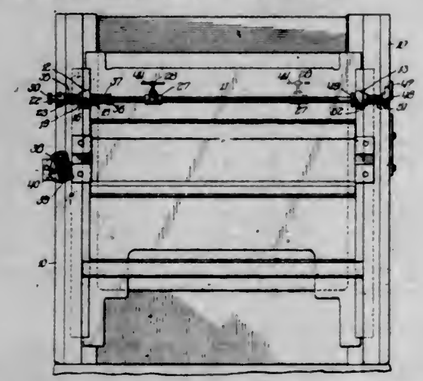
1,503,489. RAIL FASTENER. WILLIAM DALTON, Schenectady, N. Y. Filed Aug. 17, 1923. Serial No. 657,945. 5 Claims. (Cl. 238—314.)

1. A track fastener, for use with ties formed from old rails or of analogous section, comprising a retainer member extending across the tie on one side of the rail and having a recessed portion to receive the rail flange; a combined retainer member and tie-engaging bar, shaped to engage under a part of the tie, and having a portion resting on the top thereof, on the other side of the rail, and having an end engaged with an end of said retainer member; and means for clamping said ends together to secure the fastener to the tie.



1,503,490. SHANK AND BIT PUNCH. JESSE DITSON and ARTHUR E. PETERS, Littleton, Colo., assignors to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Jan. 6, 1921. Serial No. 435,477. 4 Claims. (Cl. 76—5.)

1. In a shank and bit punch, the combination with a drill steel clamp of a pin punch for opening the bore of a drill steel placed in the clamp, a stationary casing, a hammer cylinder having a plunger head and movable forwardly and rearwardly in said casing by fluid pressure for advancing the punch toward and withdrawing it away from the clamp, a fluid actuated piston hammer in said cylinder for delivering repeated blows to the punch when engaged in the bore of the drill steel, a passageway through said cylinder into said casing forwardly of said plunger head to conduct motive fluid into said cylinder, and a valve for distributing motive fluid to the casing both behind and in front of said plunger head during the movement of the hammer cylinder in one direction while constantly supplying motive fluid to actuate the piston hammer to cause it to automatically deliver such repeated blows in rapid succession on both the forward and rearward movements of the hammer cylinder.



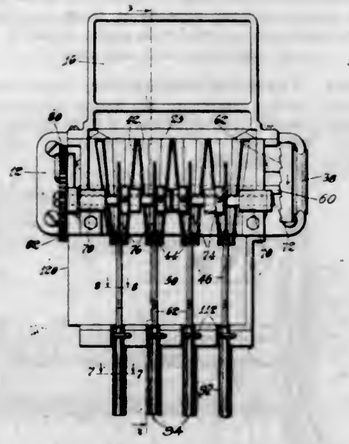
1,503,491. TRUCK SIDE FRAME. HARRY E. DOERR, St. Louis, Mo., assignor to Scullin Steel Co., St. Louis, Mo., a Corporation of Missouri. Filed Oct. 9, 1922. Serial No. 593,225. 4 Claims. (Cl. 105—205.)

1. A side frame including upper and lower members and journal boxes all cast integrally, said upper and lower members respectively joining said journal box at the upper and lower points thereof along the transverse

vertical center line whereby strains incident to cooling in the mold will be equally distributed between said upper and lower members.

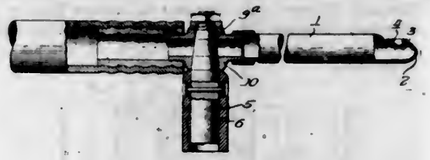
1,503,492. SIDE-GUIDE MECHANISM. EDWARD F. DUDLEY, Oak Park, Ill., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 25, 1922. Serial No. 546,610. 18 Claims. (Cl. 271—59.)

1. In a printing press, the combination of a member extending across the printing press, a sheet engaging side register member mounted thereon, and means for giving said sheet engaging member a lateral movement against a side edge of a sheet for side registering the sheet of material at either side of the press.



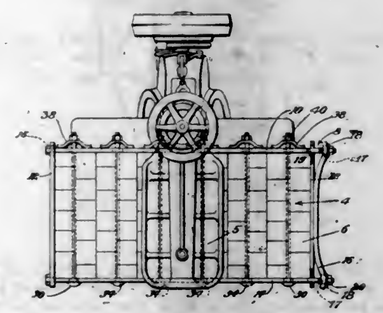
1,503,493. CHILD'S SWING. JAMES M. EIFFE, Fultonville, N. Y., assignor to White Mop Wringer Company, Fultonville, N. Y., a Corporation of New York. Filed Oct. 26, 1923. Serial No. 670,830. 2 Claims. (Cl. 155—58.)

1. In a device of the character described, a hoop-shaped frame having its ends bent downwardly to form a shoulder and thence horizontally toward each other, a seat



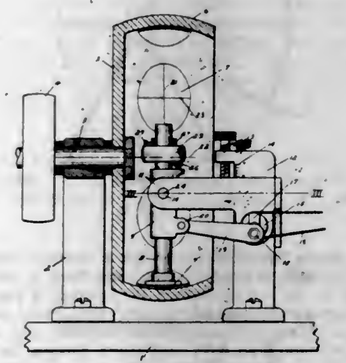
located within the hooped shaped frame notched to receive the dowawardly extended ends of the frame and resting upon the horizontally disposed portions of the frame to which it is secured, an arcuate transverse member secured to the opposite walls of the hoop-shaped frame, a pair of upright members having their lower ends secured to the underside of the seat and their upper ends attached to the transverse arcuate member and means for suspending the hoop-shaped member from a suitable support.

1,503,494. FEEDING APPARATUS. WILLIAM E. ELLIOTT, Grand Rapids, Mich., assignor to American Button & Fastener Co., Augusta, Me., a Corporation of Maine. Filed Aug. 18, 1919. Serial No. 318,287. 20 Claims. (Cl. 1—3.)



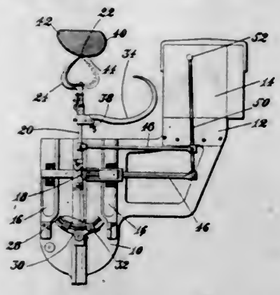
12. In a feeding apparatus, a plurality of chutes situated side by side, means for vibrating the chutes laterally, means common to the chutes for supplying staples thereto, and a plurality of raceways fixed against movement and to which the chutes deliver.

1,503,495. BOILER-WASHING NOZZLE. EDWARD FRANCIS FOLLIN, Great Falls, Mont. Filed Mar. 23, 1922. Serial No. 545,966. 2 Claims. (Cl. 122—405.)



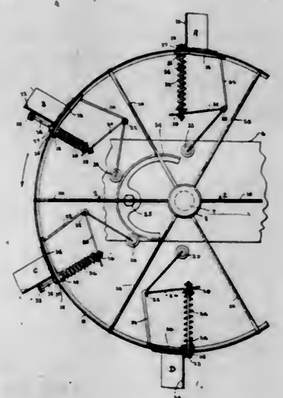
1. A boiler washing nozzle, comprising a tubular member adapted for intrusion through the washout plug opening of a boiler and having a lateral discharge orifice at its intruded end, and longitudinal and transverse handles on said nozzle in rear of the intruding portion thereof; said discharge orifice comprising a delivery nipple; and the intruded end of the nozzle having a flattened wall in which said nipple is inserted; the overall dimensions of the intruded portion of the nozzle including the nipple being less than the diameter of such an opening.

1,503,496. CUTTING BLOCK. WILLIAM R. FORSYTH, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 23, 1923. Serial No. 634,106. 14 Claims. (Cl. 164—58.)



1. A clamping frame for a cutting block comprising interconnected side and end clamping members for exerting pressure on the block in directions both longitudinally and transversely of the block, and spring members for applyig yielding pressure upon all sides of the block.

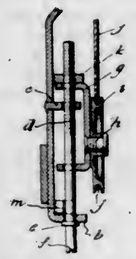
1,503,497. LENS-GRINDING MACHINE. ANNA ESTELLE GLANCY, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed July 3, 1922. Serial No. 572,755. 3 Claims. (Cl. 51—55.)



1. In a machine of the character described, the combination with a rotatable wheel having a flange laterally extending therefrom and adapted to receive a plurality of lenses on its inner periphery, a bracket arranged in proximity to the wheel and having a portion extending within the flange portion, a pivoted sleeve carried by the bracket, a rotatable shaft carried by the sleeve, a lens surfacing tool carried by one end of the rotatable shaft, means to rotate the shaft, a pitman connected to the sleeve, and means to drive the pitman whereby to oscillate the sleeve and rotatable shaft therein transversely of the flange, and means to rotate the wheel and flange.

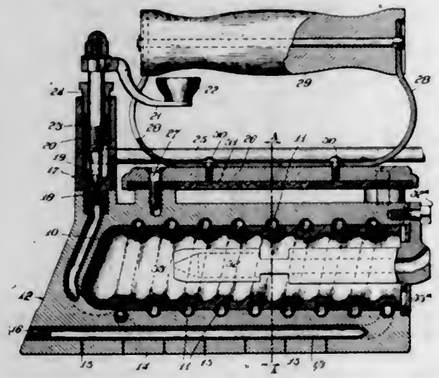
1,503,498. LAST-MEASURING MACHINE. JOHN B. HADAWAY, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Sept. 17, 1918. Serial No. 254,413. 27 Claims. (Cl. 33—122.)

1. A mechanical integrator having a plurality of relatively movable tracer arms, each carrying a tracing point, means for mounting the arms so that they are arranged to have their tracing points simultaneously at the same operative position when desired, to facilitate the interchange of tracing arms during an operation.



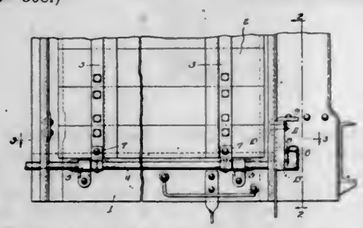
1,503,499. TRACTION-WHEEL-TOOTH-CLEANING DEVICE. FRANK M. HEINIG, Watertown, Wis. Filed Nov. 6, 1922. Serial No. 599,454. 1 Claim. (Cl. 301—144.)

The herein described device for a traction wheel having an opening through its rim, comprising a fixed tooth secured to the rim juxtaposed the opening, a plate member movable radially along the face of said fixed tooth and having a shank portion passing through said opening, means in connection with said shank portion for moving said plate member inwardly, and cam means for moving said plate member outwardly, said first mentioned plate moving means comprising a spring coiled about said shank portion and a crank connected to said shank and having a roller on one end which rides along the edge of said cam means.



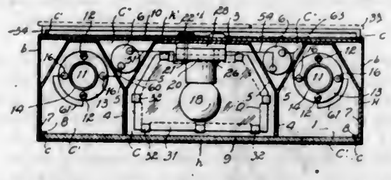
1,503,500. WINDOW-REGULATOR WHEEL BEARING. ERNEST E. HEINTZ, Detroit, Mich., assignor to Ternstedt Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Aug. 27, 1923. Serial No. 659,450. 5 Claims. (Cl. 64—52.)

1. In a window regulator wheel bearing, the combination of a supporting member, a vertical spindle provided with an abutment fixable at various points along the supporting member, a bracket supported on the spindle to rock on a vertical axis, a wheel rotatably supported on the bracket, and a linear member running over the wheel,



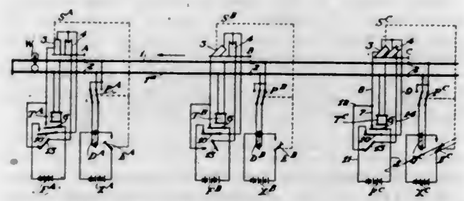
said bracket being arranged to be abutted by the abutment of the spindle for the purpose of tensioning the linear member and positively hold it in such position of tension.

1,503,501. PRESSING IMPLEMENT. LOUIS HOFFMAN, Duluth, Minn., assignor, by mesne assignments, to Steam Pressing Iron Company, a Corporation of Delaware. Filed Mar. 1, 1920. Serial No. 362,624. 7 Claims. (Cl. 68—26.)



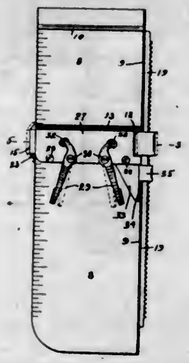
1. A moistening and pressing implement comprising, in combination, a metal core, tubing surrounding said core, and a body of cast metal in which said core and tubing are embedded, said tubing being provided with a discharge opening to direct moisture to the material being pressed.

1,503,502. DOOR-CONTROLLING MEANS. WILLIAM J. HOSCEIT, Chicago, Ill., assignor to Rodger Ballast Car Company, Chicago, Ill., a Corporation of Maine. Filed June 19, 1922. Serial No. 569,296. 8 Claims. (Cl. 105—308.)



1. A dump car having side swinging doors, an operating rod provided with means for forcing said doors to closed position, said operating rod being provided with abutment means, and a sliding wedge member cooperating with said abutment means to hold said abutment means.

1,503,503. AUTOMOBILE SIGNAL. JULIUS JAMETON, St. Louis, Mo. Filed Feb. 25, 1922. Serial No. 539,172. 1 Claim. (Cl. 177—329.)

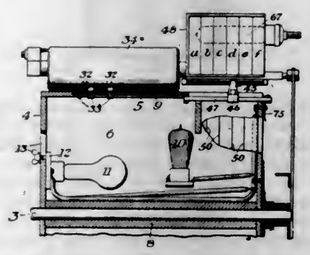


A signal device for automobiles comprising a housing having a detachable bottom, a partition member in said housing, said member being bent so as to divide the housing into three compartments, a pair of lamps in the center compartment, said lamps being mounted on the partition member, a lamp in each outer compartment, a translucent panel in one wall of the housing, and a colored partition interposed between one lamp in the center compartment and the translucent panel.

1,503,504. RAILWAY SIGNALING. IRA K. JOHNSON, Caldwell, N. J., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Aug. 23, 1920. Serial No. 405,366. 12 Claims. (Cl. 246—45.)

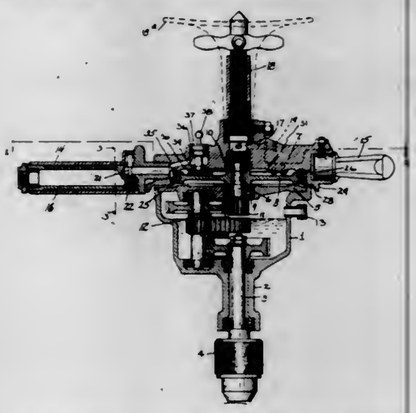
9. In combination, a track circuit including a source of current and a polarized relay, means for reversing the polarity of the current supplied to said track circuit by said source, means for increasing the voltage applied to said track circuit when said reversing means is operated, and a signal controlled by said relay.

1,503,505. PRINTER'S STICK. JOHN H. JONES, Sioux City, Iowa. Filed June 23, 1923. Serial No. 647,317. 4 Claims. (Cl. 276—39.)



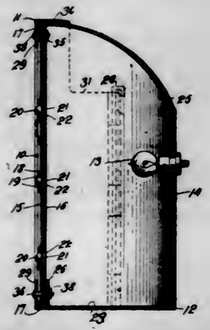
2. A printer's stick embodying a floor having flanged and unflanged edges, a rack on the outer side of the flange, a second rack on the underside of the floor adjacent the unflanged edge thereof, a block mounted upon and movable longitudinally of the floor, a knee carried by the block, toothed detent bars slidably supported by the block and movably toward and from each other to accordingly engage and disengage their teeth from the racks, a yieldable link between the bars holding them normally engaged with the racks, and levers fulcrumed on the block for disengaging the bars from the racks.

1,503,506. PENCIL. CHARLES R. KEERAN, Chicago, Ill. Filed May 4, 1921. Serial No. 466,860. 2 Claims. (Cl. 120—17.)



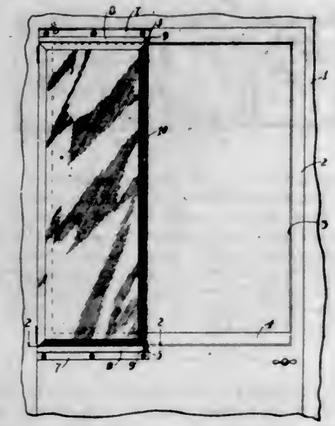
1. A pencil having in its body a longitudinal bore, a toothed plunger slidably arranged within the bore, and means for propelling the plunger comprising a lever pivoted at one end to the body, a leaf spring secured to the opposite end of the lever and extended toward its pivoted end, the free end of the spring being bent upon itself and away from the lever to engage with the plunger whereby it may propel the same with each oscillation of the lever, substantially as described.

1,503,507. PRINTING APPARATUS. MICHAEL J. KOCH and HARRY B. BOOSE, Pittsburgh, Pa. Filed Nov. 15, 1921. Serial No. 515,252. 23 Claims. (Cl. 95—73.)



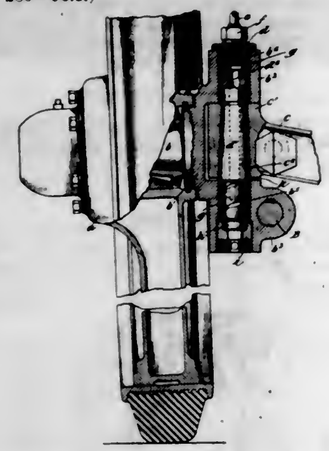
1. In a printing apparatus, a rotating drum having a uniformly curved periphery, means dividing the drum into a series of light compartments each having an exposure opening, an independently regulable light source for each compartment, and a flexible belt extending partly around the periphery of said drum and cooperating with said exposure openings, substantially as described.

1,503,508. FLUID-OPERATED TURBINE ENGINE. GEORGE L. KRABER, Lakewood, Ohio, assignor, by mesne assignments, to The Cleveland Industrial Development Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 24, 1921. Serial No. 439,445. 8 Claims. (Cl. 253—2.)



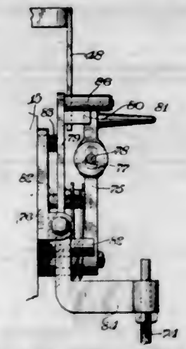
1. In a turbine engine of the character described, the combination of a casing, a rotor mounted therein, and a brake comprising a resilient plate directly co-operative with said rotor to stop same when desired.

1,503,509. AUTOMOBILE LICENSE PLATE AND HOLDER THEREFOR. WILLIAM KRAMER, New York, N. Y., assignor to Spot-Light License Plate and Mfg. Co., Inc., New York, N. Y., a Corporation of New York. Filed May 11, 1923. Serial No. 638,210. 5 Claims. (Cl. 40—133.)



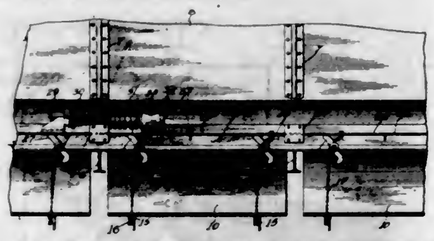
1. A license plate and holder therefor for automobiles and the like, said plate being oblong and bearing the necessary license numerals in conspicuous permanent outlines and said numerals each being closely apertured by a single row of holes, said plate being solid except at said apertures defining the numerals and the general face of said plate and that of said numerals having contrasting colors, and said numerals being embossed forwardly and forming a recess or chamber behind them, and a series of glass eyes having convex forward portions projecting through said apertures and themselves defining the same numerals, said eyes at their back portions being seated in said recesses behind the numerals and closely engaging the edges of the apertures in the numerals, and said holder being secured to said plate and having a chamber at the back thereof containing an electric lamp bulb and a reflector.

1,503,510. WINDSHIELD FOR CLOSED MOTOR CARS. ALBERT S. MARGASON, San Jose, Calif. Filed Aug. 18, 1923. Serial No. 658,154. 1 Claim. (Cl. 296—84.)



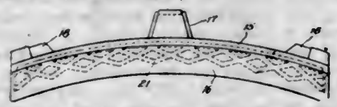
A shield for car windows comprising a pair of brackets, each bracket comprising a triangular portion having a flange turned at right angles thereto along the edge of one leg of the triangle, and means for securing the same to a door, that edge of the element forming the hypothenuse of the triangle being turned at right angles to the normal plane of the element and provided with a groove, and a transparent shield fixedly mounted in the opposing grooves of the two triangular elements.

1,503,511. STEERING KNUCKLE. ALFRED F. MASURY, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed May 31, 1921. Serial No. 473,814. 1 Claim. (Cl. 280—96.1.)



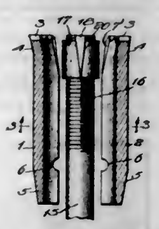
In combination with a steering knuckle and vehicle axle provided with a vertically tapered opening through its end, a tapered knuckle pin passing through the tapered opening and supporting the axle, the steering knuckle being provided in its upper and lower arms with openings for the upper and lower ends of the knuckle pin, a screw threaded adjustably in the lower arm of the knuckle in line with the pin, said screw having a recess in its upper face, a hardened thrust button having parallel upper and lower faces seated horizontally in said recess and presenting an upper bearing surface of substantially the same area as the lower bearing surface of the pin and on which the pin is directly supported.

1,503,512. AUTOMATIC STOP FOR BOTTLE WASHERS. GEORGE J. MEYER, Milwaukee, Wis., assignor to Geo. J. Meyer Manufacturing Company, Milwaukee, Wis., a Corporation of Wisconsin. Original application filed Nov. 22, 1915, Serial No. 62,706. Divided and this application filed June 9, 1919. Serial No. 302,883. 4 Claims. (Cl. 192—125.)



1. A stop mechanism for bottle washing machines and the like, comprising a clutch actuating shouldered rod, a spring pressed arm engaging the shoulder of the rod, a pivotally mounted stop for engaging and holding the arm, means for swinging the stop out of its engagement with the arm, and a dog pivotally mounted on the stop to engage the arm when released by the stop and disengaged from the arm when the stop is returned to its normal position.

1,503,513. CAR CONSTRUCTION. JOHN PEARSON, Chicago, Ill. Filed Dec. 9, 1921. Serial No. 521,118. 11 Claims. (Cl. 105—288.)

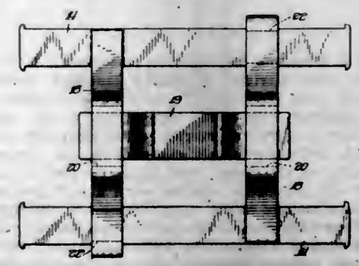


1. In a dump car, a door, means slidably movable on said car for controlling the movement of said door, and a hook pivotally mounted on said car, engageable with said door to hold it in raised position, said slidably movable means positively actuating said hook to its door-engaging position.

1,503,514. BRAKE SHOE. CLIFTON D. PETTIS, New York, N. Y. Filed Dec. 6, 1923. Serial No. 678,793. 19 Claims. (Cl. 188—254.)

3. In a brake shoe, a reinforcing shell comprising a back and side walls, the side walls being of varying thickness.

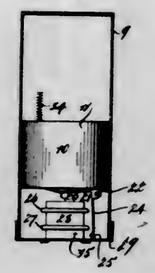
1,503,515. EXPANSION SHELL. JOHN H. PHILLIPS, Chicago, Ill. Original application filed July 21, 1919, Serial No. 312,243. Patent No. 1,379,210, dated May 24, 1921. Divided and this application filed Feb. 19, 1921. Serial No. 446,373. 5 Claims. (Cl. 85—2.4.)



1. An expansion shell of the kind described comprising a tubular body split longitudinally and having wedge-shaped recesses formed at the opposed edges of said split at one end thereof, the sides of said recesses being convergently tapered from the inner to the outer periphery, and cooperating means having wedge-shaped sides and bevelled rearwardly of the outer edges thereof and insertable into said recesses so as to bear against the faces of the side walls thereof and expand said shell.

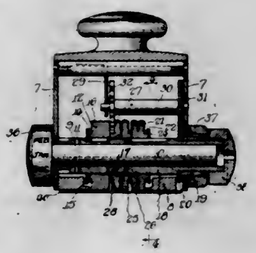
1,503,516. COLLAPSIBLE CARTON. WILLIAM A. V. PORTER, New York, N. Y., assignor to David Weil's Sons Lithographic Company, Brooklyn, N. Y., a Corporation of New York. Filed May 18, 1920. Serial No. 382,430. 4 Claims. (Cl. 206—44.)

1. A collapsible carton comprising, a bottom panel, side panels, a rear panel, a top panel, said top panel being adapted to act as a complete and substantially flat cover for the carton when in box formation and being also foldable forwardly against the front of the rear panel to expose part of its outer surface forwardly for display purposes, and tongues carried by the side panels adjacent the rear panel for securing said top panel against the front of the rear panel in said folded position.



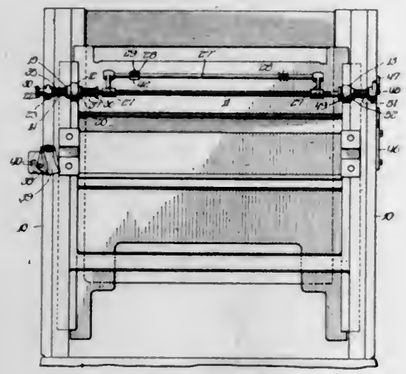
1,503,517. SIX-WHEEL-TRUCK BOLSTER. LAWRENCE RICHARDSON, Louisville, Ky. Filed Aug. 6, 1923. Serial No. 655,828. 7 Claims. (Cl. 105—195.)

1. In a bolster for six-wheel trucks, the combination of a unitary transverse bolster member and longitudinal bolster member, and a second unitary transverse bolster



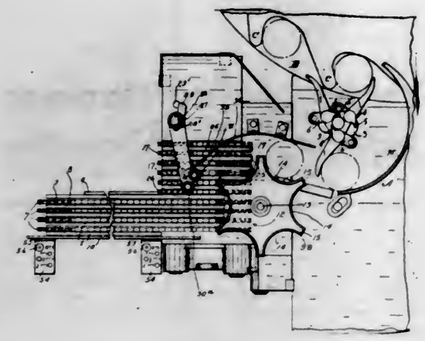
member and longitudinal bolster member, said units being separate and interlocked for giving the required flexure for load equalizing and at the same time minimize the extent to which the truck can get out of square.

1,503,518. SOUND-PRODUCING DEVICE. FRANK G. SCHNEIDER, Brooklyn, N. Y. Filed July 12, 1922. Serial No. 574,417. 4 Claims. (Cl. 46—46.)



3. In a sound producing device, a casing open at one end, a plunger within same, having an opening at one end thereof and at one side of the center of the plunger, a lever carried by the plunger, a valve operable by the lever to open and close said opening, a cap for the open end of the casing, and means carried by the cap to cooperate with said lever to actuate the valve to close and open said opening alternately, when said plunger moves away from the said cap.

1,503,519. HAND STAMP. MORRIS SHERAS, Chicago, Ill., assignor to A. D. Joslin Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Sept. 23, 1922. Serial No. 589,981. 6 Claims. (Cl. 101—96.)

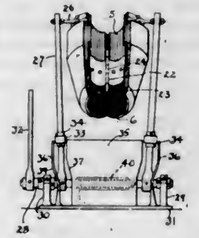


1. In a stamp, a combination comprising a movable housing, type carriers adjustably mounted therein in alignment, said type carriers comprising a middle type carrier together with a left type carrier to the left side thereof and a right type carrier to the right side thereof, adjustable indicator wheels mounted on the exterior of the housing in alignment, said indicator wheels comprising a middle indicator together with a left indicator to the left side thereof and a right indicator to the right side thereof, operable connections joining the middle, left and right indicators respectively with the middle, left and right type carriers, whereby the type carriers may be adjusted by operation of the indicators, and the indicators being provided with legible characters corresponding to the type on their conjoined type carriers.

1,503,520. SIDE-GUIDE MECHANISM. BURT D. STEVENS, Evanston, Ill., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 25, 1922. Serial No. 546,718. 10 Claims. (Cl. 271—59.)

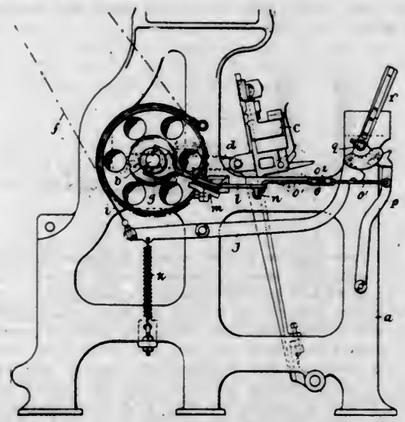
1. In a printing press, the combination of a supporting member, a bar extending across the press and supported from said supporting member and which is adapted to extend completely across a sheet of material being fed for preventing buckling of the latter.

1,503,521. FEEDER FOR BOTTLES AND SIMILAR RECEPTACLES. GUSTAV STRANDT, Milwaukee, Wis., assignor to Milwaukee Dairy Supply Manufacturing Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed July 15, 1920. Serial No. 396,420. 22 Claims. (Cl. 198—22.)



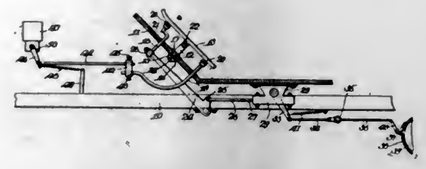
1. A feeder for bottles, including the combination with a rotary star wheel, of a traveling bottle-support for delivering and holding bottles between the arms of the star wheel, a bottle receiving table, a resilient gate regulating the delivery of bottles by the star wheel from the traveling support to the receiving table, a set of revolving arms on said table, each adapted to remove one of the bottles from the star wheel, and means for varying the rate of movement of said arms to pass them between the bottles with a quick stroke, and to engage them while retarded.

1,503,522. EMERGENCY OR AUXILIARY BRAKE. WALTER J. TAYLOR, Detroit, Mich. Filed Oct. 2, 1922. Serial No. 591,902. 11 Claims. (Cl. 188—5.)



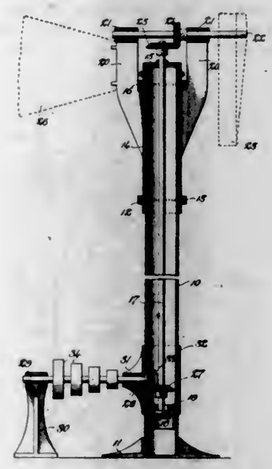
1. In an emergency brake the combination with the frame and spring of a vehicle chassis, of a member secured to said spring, a ground engaging member, means secured to said frame for positioning said ground engaging member, and means for resiliently transmitting stresses from said ground engaging member to said first mentioned member secured to the spring.

1,503,523. PIPE-SUPPORTING SLIP. WILLIAM C. THOMAS, JAMES C. DICKENS, and JESSE W. FOWLER, Houston, Tex. Filed Nov. 19, 1923. Serial No. 675,573. 9 Claims. (Cl. 24—249.)



1. In a device of the character described, a pipe gripping means comprising two slips each made up of a plurality of jaws, said jaws being mounted on central arcuate plates, means whereby said slips are hinged together at one end to allow said slips to open, and teeth on said jaws arranged vertically at one end and horizontally at the other end.

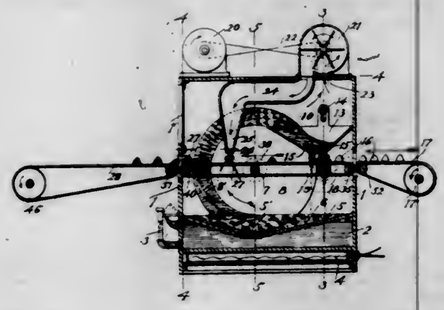
1,503,524. CONTROLLER FOR LOOMS. WILLIAM S. WELLS, South Bethlehem, Pa., assignor to Benjamin Eastwood Company, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 10, 1923. Serial No. 611,722. 8 Claims. (Cl. 192—17.)



1. A mechanism of the class described including a braking means and a power-controlling means each movable back and forth from one to the other of the on and off positions and one yieldingly held in one and the other yieldingly held in the other of said positions, and a unitary handle movable back and forth and on movement in one direction being adapted to shift each of said means from the position in which it is yieldingly held to the other of said positions, each of the first two means being yieldingly held, independently of the handle, in its said position.

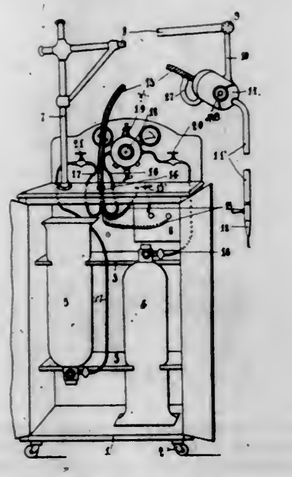
1,503,525. COMBINED ACCELERATOR AND BRAKE CONTROLLING MECHANISM. WILLIAM DAVIS, Chicago, Ill. Filed May 5, 1923. Serial No. 636,950. 2 Claims. (Cl. 74—81.)

1. In a device of the class described, the combination with a supporting standard, of a member tiltably mounted thereon, of controlling rods mounted for back and forth movement with respect to said member on opposite sides of said standard and adapted to be moved in one direction by said tiltable member, a suitably fulcrumed bell crank lever connected near the free end of its longer arm to one of said controlling rods, a cooperating rack bar and pinion mounted adjacent the fulcrum of said lever, a connection uniting the rack bar and the shorter arm of said lever, a crank on the shaft of said pinion, and means operatively connecting the outer portion of said crank to a part to be operated thereby.



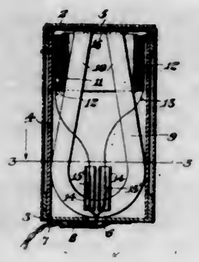
1,503,526. MOUNT FOR WINDMILLS. CONSTANCE DULAK, West, Tex. Filed Oct. 22, 1923. Serial No. 670,118. 3 Claims. (Cl. 170—76.)

1. A mount for windmills comprising a tubular column, a sleeve rotatably mounted on said column, a cap detachably secured on one end of said column and acting to retain said sleeve in assembly therewith, arms extending from said sleeve, a shaft journaled in said arms, a wind wheel on said shaft, a second shaft extending into the column, intermeshing gears on said shafts respectively,



said second mentioned shaft having bearing near one end in said cap and at its other end being supported within the columns and means for transmitting power from said second shaft exteriorly of the column from a point on said shaft within the column.

1,503,527. CHOCOLATE-COATING MACHINE. GEORGE A. DUMAS, Chicopee Falls, Mass. Filed July 10, 1923. Serial No. 650,710. 9 Claims. (Cl. 91—3.)

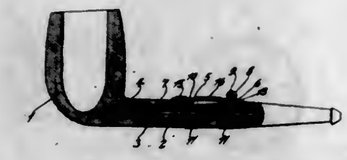


1. In combination, a machine for coating confections, an inclosing casing having a receptacle therein for receiving a coating material, rotatable disks located in the receptacle and having a portion of their opposite surfaces immersed in the coating material, means for rotating the disks, means for removing the coating material only from the sides of the disks, a hopper to receive the removed material, said hopper having a discharge outlet opening, and conveyor mechanisms for receiving the material to be coated, the conveyor which carries the material to be coated being located below the outlet openings of the hopper, and means for actuating the conveyors for removing the coated confections from the machine.

1,503,528. LOCAL ANÆSTHESIS OUTFIT. FRANÇOIS JOSEPH FABRET, Nice, France. Filed June 20, 1922. Serial No. 569,742. 8 Claims. (Cl. 128—257.)

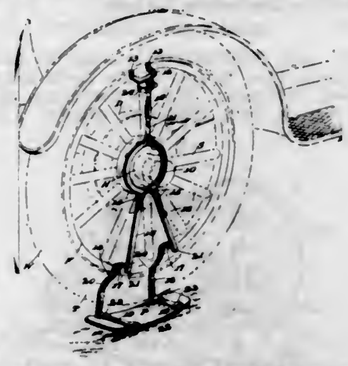
4. Apparatus for producing local anæsthesia, comprising a blow-pipe; a heat-exchanger; a support from which the heat-exchanger is suspended; and separate pipes extending to said heat-exchanger in juxtaposition to each other and leading therefrom to said blow-pipe for supplying to the latter an inert gas and a vaporizable and expansible refrigerant for cooling said gas.

1,503,529. RADIO TELEPHONE RECEIVER. MAX S. FINLEY, Indianapolis, Ind. Filed July 10, 1922. Serial No. 573,967. 1 Claim. (Cl. 179—117.)



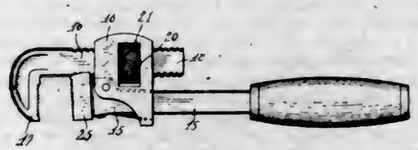
In a telephone receiver a double walled cylindrical casing having its walls arranged in spaced relation, an apertured head for each end of said casing formed with an inwardly extending annular flange inserted between the said walls, a horseshoe magnet secured within said casing, a coil surrounding the poles of said magnet and having the terminal wires thereof passing out through the aperture in one of said heads, a diaphragm secured to and extending across the aperture in the other head, and means for connecting said terminal wires with a receiving set.

1,503,530. PRIMING MIXTURE FOR PROPELLENT EXPLOSIVES. CLARENCE I. B. HENNING, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed June 16, 1921. Serial No. 478,078. 5 Claims. (Cl. 52—4.)



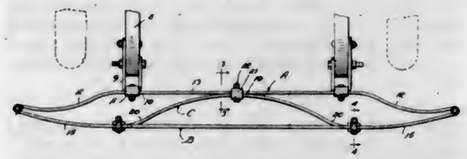
1. An igniting mixture for small arms ammunition containing trinitrobenzene, said mixture being ignited but not detonated when struck lightly, and being adapted to ignite a propellent explosive.

1,503,531. TOBACCO PIPE. FRANK T. HITES, St. Louis, Mo. Filed July 22, 1922. Serial No. 576,753. 3 Claims. (Cl. 131—12.)



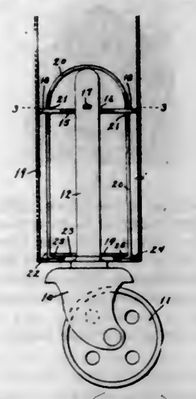
1. In a tobacco pipe, a bowl, a stem in connection with the bowl having a smoke passage opening therethrough from the bowl and having an inclined passage from the smoke passage toward one side of the stem, and a groove in said side of the stem into which the inclined passage opens, a band encircling the stem and being rigid therewith and having a slot therethrough opening into said groove, a longitudinally movable slide for closing said groove, means in connection with said band preventing said slide from turning around the stem and guiding said slide in its longitudinal movements, and a wire in connection with said slide extending through said inclined passage.

1,503,532. LIFTING JACK FOR MOTOR VEHICLES. ABNER L. HOLTON, Big Stone Gap, Va. Filed Nov. 3, 1922. Serial No. 598,832. 14 Claims. (Cl. 254—94.)



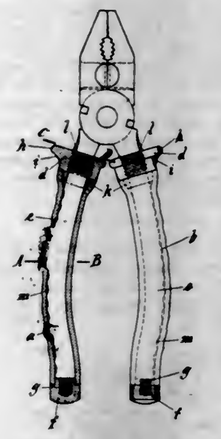
1. In combination, a wheel, a frame adapted to be extended across the full internal diameter of the wheel and having means to effectively engage opposed points of the felly of said wheel, and ground-engaging means carried by one end of the frame adapted to elevate the wheel when said wheel is rotated a predetermined degree.

1,503,533. HAND WRENCH. LUTHER JOHNS, Oak Park, Ill., assignor to Vaughan & Bushness Manufacturing Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 21, 1922. Serial No. 583,122. 1 Claim. (Cl. 81—180.)



In a wrench of the character described, the combination of a relatively long and rigid body part, a swinging frame pivotally mounted thereon, an adjusting jaw member having a shank portion substantially parallel with the body part mounted in said swinging frame for adjustments in the longitudinal directions of the body part, the adjusting jaw member having a clamping surface substantially opposite the end of the body member, and a jaw member mounted at the work-gripping end of the body part so as to have lateral tilting movements relative to the longitudinal side faces of said body part, the tilting jaw member having a clamping surface opposite the clamping surface of the adjusting jaw member.

1,503,534. BUMPER. WARD M. JONES, Chicago, Ill. Filed Aug. 20, 1923. Serial No. 658,330. 3 Claims. (Cl. 293—55.)

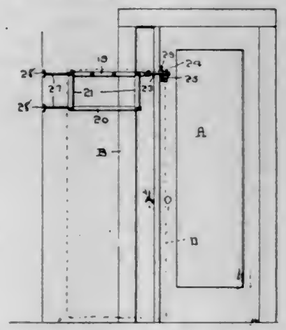


2. In an automobile bumper, an inner member and an outer member in spaced relation and hinged together at the ends, the inner member being a single bar and the outer member being composed of two vertically spaced parallel bars, and a half elliptic spring clamped to the mid-point of the inner member and its ends in slotted engagement with the outer member.

1,503,535. CASTER CENTERING AND RETAINING DEVICE. ROBERT S. KIRKPATRICK, Des Moines, Iowa, assignor to J. B. Ladd, Des Moines, Iowa. Filed June 5, 1922. Serial No. 565,947. 3 Claims. (Cl. 16—39.)

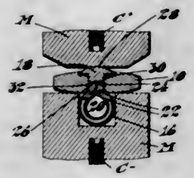
1. The combination with a load object having a cylindrical opening and a caster having a stem of less diameter than said opening, of a centering and retaining device comprising a disk pivotally mounted on said stem and engaging the lower surface of said load object, a spring yoke carried by said disk and embracing said stem and having its closed end resting on the upper end of said stem, said yoke having frictional contact with the walls of said opening, a bearing and spreading plate carried by said yoke and pivoted on said stem at a considerable distance above said disk, and means connected with said stem above said plate to prevent downward movement of said stem relative to said plate.

1,503,536. TOOL INSULATOR SPECIALLY FOR THE HANDLES OF PLIERS AND THE LIKE. GUSTAV KLAUKE, Remscheid, Germany. Filed July 10, 1923. Serial No. 650,726. 1 Claim. (Cl. 16—116.)



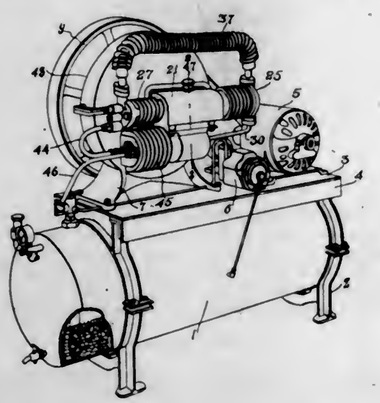
A tool insulating cover for handles of pliers or the like, comprising in combination a rubber sleeve covering the handle, a guard securely attached on the upper end of the handle and having a set off lower end designed to receive the upper end of said sleeve and an ebonite button securely fixed on the lower end of the handle and having a set off upper end designed to receive the lower end of said rubber sleeve.

1,503,537. CAP. DAVID KNOPFLER, New York, N. Y. Filed Nov. 21, 1923. Serial No. 676,172. 2 Claims. (Cl. 2—201.)



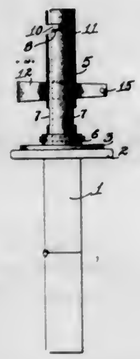
1. A cap comprising a headpiece, side flaps depending therefrom, said flaps adapted to be moved into upper and lower position, the ends of the side flaps when in upper position adapted to be folded over to assume a substantially horizontal position for a portion of their length on said headpiece, and means on said headpiece positioned substantially midway between the apex and base thereof to maintain the ends of said side flaps in folded-over position.

1,503,538. EXTENSIBLE SCREEN. BENJAMIN KUGLER, Chicago, Ill. Filed Apr. 3, 1923. Serial No. 629,580. 2 Claims. (Cl. 156—14.)



1. A screen for swinging closures comprising a support, a frame formed with spaced, horizontal and vertical members, the ends of each of the horizontal members adjacent the support being formed with openings through which the support is loosely engaged to permit slidable and pivotal movement of the frame relative the support, a link pivotally connected with the remaining end of the uppermost horizontal frame member, and said link being pivotally connected with the closure and adapted to fold upon the frame upon movement of the closure to a closed position.

1,503,539. METHOD OF MAKING BUTTONS. ALBERT LATHAM, Beverly, Mass., assignor to American Button & Fastener Co., Augusta, Me., a Corporation of Maine. Filed Jan. 9, 1919. Serial No. 270,304. 7 Claims. (Cl. 78—92.)

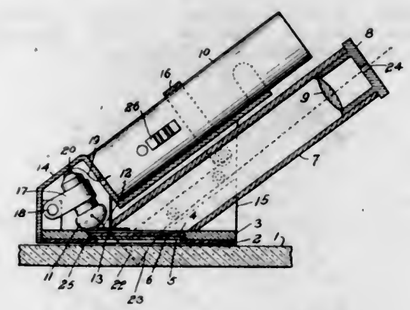


7. The method of making buttons having a body, an eye provided with a double shank extending into the body and a stud co-operating with the shank within the body, which consists in forming the portions of the shank with converging surfaces and the stud with a depression to receive said surfaces, and subjecting the shank portions and stud to pressure and the heating effect of an electric current to join them within the body.

1,503,540. AIR COMPRESSOR. JAMES W. LAWHEAD, Wilmington, Ohio, assignor to The Au-To Compressor Company, Wilmington, Ohio, a Corporation of Ohio. Filed Nov. 20, 1922. Serial No. 602,041. 4 Claims. (Cl. 230—27.)

1. The combination with a cylinder casing having a slot in one side wall, the edges of said slot constituting guides for a guide block, of a guide block mounted in said guides to reciprocate longitudinally of said casing, a housing portion adjacent the casing and having an oil sump therein, a piston reciprocably mounted in said casing, a pin secured to said piston and passing through the guide block to project therefrom, and a rotating cam mounted in said housing and extending into said sump and having a groove wherein said pin engages.

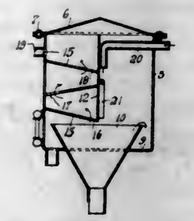
1,503,541. ELECTRODE HOLDER. HENRY THOMAS LINTOTT, South San Francisco, and HENRY JOHN CHARBONNEAU, San Francisco, Calif. Filed Jan. 4, 1923. Serial No. 610,610. 3 Claims. (Cl. 219—14.)



1. In a device of the class described, a hollow tubular member, a slot in said member made to receive an electrode, a pin for clamping the electrode in said slot, and a wedging device for actuating the pin.

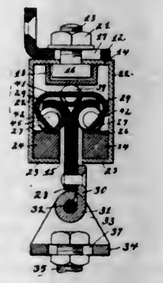
1,503,542. MACHINE FOR FEEDING AND DELIVERING TOP LIFTS. THOMAS LUND, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Aug. 4, 1919. Serial No. 315,168. 5 Claims. (Cl. 198—33.)

1. In a machine of the character described, the combination of a lift feeding mechanism having a restricted entrance opening of a size and shape to permit a lift to enter only in an edgewise direction, means for separating and transferring lifts from a promiscuous mass and a deflector arranged between the lift separating and transferring means and the lift feeding mechanism, to guide the lifts correctly into the feeding mechanism.



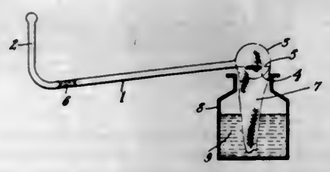
1,503,543. GLASS-THICKNESS GAUGE. WILLIAM ORLAND LYTLE, Ford City, Pa., assignor to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed Aug. 7, 1923. Serial No. 656,224. 4 Claims. (Cl. 88—14.)

1. In combination, a glass thickness gauge comprising an observation member adapted to be placed with its base upon the plate of glass whose thickness is to be measured, a transparent scale extending transversely of the observation member at its base in parallelism with the surface of the glass plate, an indicating means opposite one end of the scale, and a source of illumination above the indicating means, the relation of the indicating means and scale being such that a beam of light from the source of illumination will pass the indicating means and be reflected upward from the lower surface of said plate onto the scale, showing such means upon the scale.



1,503,544. COMBINED SAND AND WATER TRAP. ROBERT J. MAJORS and HARRY ANDERSON, Coalinga, Calif. Filed Oct. 25, 1921. Serial No. 510,348. 8 Claims. (Cl. 210—58.)

1. A combined sand and water trap comprising a tank; means to supply oil into said tank; a partition within said tank extending from side to side and from the top to near the bottom thereof; a plurality of baffles extending from said partition to the side of said tank and being disposed at an angle thereto, said baffles being on the opposite side of said partition to said oil supply, an outlet for the oil above said baffles; a sand receptacle in the bottom of said tank concentric therewith and spaced

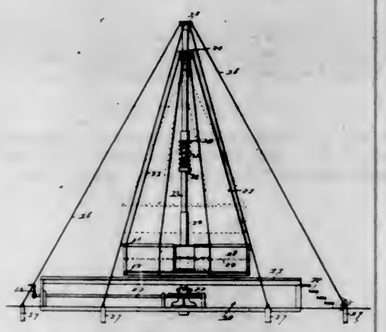


therefrom; an outlet in said receptacle for said sand; a closure for said opening; and an outlet in the bottom of said tank; and a closure for said opening.

1,503,545. DOOR HANGER. FRANCIS J. MEAGHER, New York, N. Y. Filed Nov. 2, 1922, Serial No. 598,615. Renewed June 3, 1924. 5 Claims. (Cl. 16—88.)

1. In a door hanger, a housing having a slot in its bottom, a track within the housing upon opposite sides of said slot, a rail of substantially Y-section with its lower portion extended through said slot, balls interposed between the out-turned portions of said rail and said tracks, and means bridging said out-turned portions and having depending portions serving to retain said balls in place.

1,503,546. METHOD AND APPARATUS FOR OBTAINING REPEATED MOVEMENT OF A LIQUID AND ITS VAPOR. ALAN W. C. MENZIES, Princeton, N. J. Filed Dec. 1, 1920. Serial No. 427,645. 12 Claims. (Cl. 73—151.)

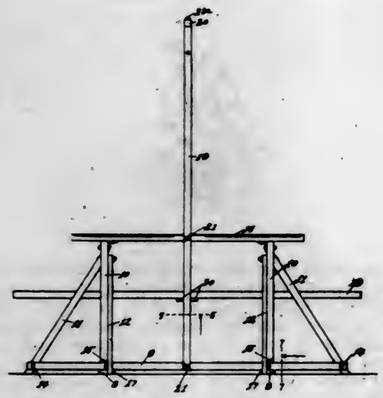


1. An article of manufacture comprising a pair of closed vapor chambers, a tube connecting the same located to permit flow of liquid and vapor between the chambers, a volatile liquid contained therein, means for creating such temperature difference between said chambers as to vaporize the liquid in one chamber and condense the vapor in the other to repeatedly transfer vapor form the vaporizing chamber to the other chamber, and liquid from the latter to the former through said tube.

1,503,547. BRAN FOOD FLAKES. NATHAN MINNEBERG, Minneapolis, Minn. Filed Jan. 12, 1923. Serial No. 612,290. 2 Claims. (Cl. 99—10.)

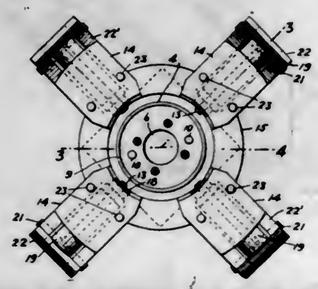
2. The process of producing bran flakes which consists in providing a plurality of portions of a cereal bran; hydrolyzing said portions to different degrees; making a mixture of said hydrolyzed portions and adding thereto other portions in substantially a raw state; and crisping a mixture of all of said portions to a palatable condition.

1,503,548. AMUSEMENT DEVICE. CHARLES O. MOYER, Lock Haven, Pa. Filed Mar. 18, 1922. Serial No. 544,774. 2 Claims. (Cl. 46—27.)



2. An amusement device having a vertically revoluble mast and means for communicating revoluble movement thereto, a car revolubly mounted concentric with and independently of the mast and provided with an upstanding sleeve surrounding the mast for sliding and rotary movement thereon, a cushioning device carried by the mast for impact with the extremity of the sleeve, said cushioning device comprising an upper fixed collar and a lower movable collar slidable longitudinally of the mast, and a compression spring interposed between said collars and having terminal engagement therewith.

1,503,549. APPARATUS FOR COOKING PULP-MAKING FIBERS. TREADWAY B. MUNROE, Forest Glen, Md., assignor to C. F. Dahlberg, New Orleans, La. Filed Dec. 3, 1921, Serial No. 519,747. Renewed June 20, 1924. 7 Claims. (Cl. 92—7.)

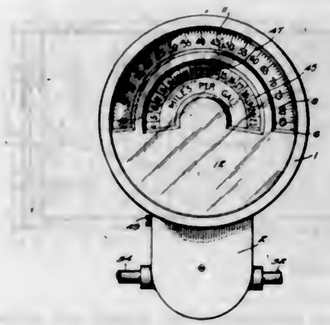


1. In an apparatus for continuously preparing vegetable fibers the combination of a tank open to the atmosphere adapted to receive and hold said fibers and a solution capable of reacting thereon; a second tank comprising an open ended drum, adapted to receive said solution and fibers from said first tank; means comprising a travelling foraminous surface adapted to transfer said fibers from said first to said second tanks; means for heating said second tank; means for separating said fibers from said solution; means for returning said solution to said second tank; and means also open to the atmosphere associated with said tanks adapted to wash any surplus solution from said fibers, substantially as described.

1,503,550. GYMNASTIC APPARATUS. IRA R. NELSON and FREDERICK W. LAMBIE, Minneapolis, Minn. Filed Aug. 20, 1921, Serial No. 493,987. Renewed June 16, 1924. 5 Claims. (Cl. 46—69.)

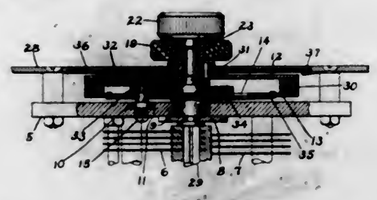
1. An apparatus of the class described comprising, a pair of transverse base members, side frames, secured to said base members, said side frames having parallel bars at their upper ends a vertical frame secured to said side frames, and consisting of a pair of uprights and a cross beam connecting their upper ends.

1,503,551. BAND-PUNCHING MACHINE. BUDD G. NICE, Ogontz, Pa. Filed Jan. 23, 1923. Serial No. 614,360. 4 Claims. (Cl. 164—90.)



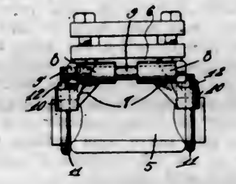
1. A band punching machine comprising in combination a tubular plug having radially arranged dies provided through its curved wall, a knock-out normally spring projecting from the top of the plug, radially arranged punches aligned with the dies and retractable to permit of the application of the flange of a band to the knock-out, radially arranged rocking levers having one of their arms disposed for co-operation with the punches and the other of their arms extended inwards, endwise movable pins co-operating with the last named ends of the levers and projecting inwards, springs for positioning the pins and punches, and a reciprocating head provided with a spring pressed pad adapted to contact with the flange of a band prior to contact with the head of the pins.

1,503,552. MILES-PER-GALLON REGISTER. THOMAS L. PARKER, Wibaux, Mont. Filed Apr. 3, 1922. Serial No. 549,178. 6 Claims. (Cl. 235—1.)



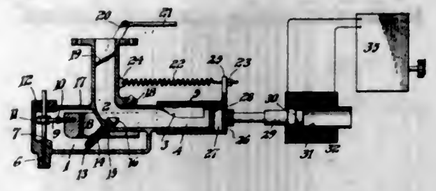
1. In a device of the character described, a speedometer casing having an extension forming a meter casing, an indicating member arranged in said casing and connected to the vehicle to vary its position according to

the speed of the vehicle, a disk mounted adjacent said indicating member, said disk being provided with suitable indicia to indicate mileage per unit of fuel consumed, a rotatably mounted element arranged in said



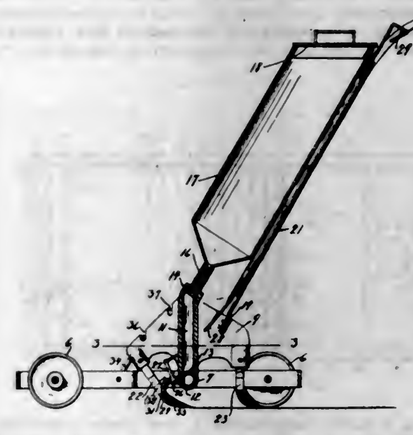
meter casing and adapted to alter its position according to the flow of fuel through said casing, a spring adapted to normally retain said disk in a zero indicating position, and connections between said rotatably mounted element and said disk to vary the position of said disk.

1,503,553. ELECTRICAL CONDENSER. EDWIN L. POWELL, Washington, D. C. Filed Aug. 5, 1922. Serial No. 579,901. 3 Claims. (Cl. 74—7.)



1. A control mechanism including a support, a spindle journaled in said support, means for rotating said spindle in extension thereof, a gear housing affixed to said spindle, a train of gears in said housing imparting motion thereto, a second means for rotating said spindle through said gearing and housing, and means for limiting the motion of said spindle including a slot in said housing and a stud affixed to said support and positioned in said slot.

1,503,554. ADJUSTABLE STUFFING-BOX CASING-HEAD CLAMP. ALBERT D. PURTLE, Marietta, Ohio. Filed May 19, 1922. Serial No. 562,258. 3 Claims. (Cl. 166—14.)

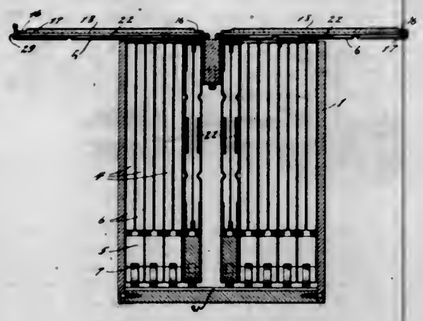


1. A clamp including opposed sections, each of said sections having horizontally disposed tubular members, bolts positioned within the tubular members for adjusting the sections with respect to each other, a U-bolt carried by each section and adapted to embrace a well casing head, and each section having a curved portion adapted to fit over the well casing head.

1,503,555. ELECTRICALLY-OPERATED CARBURETOR. CLIFFORD T. RAULE, Philadelphia, Pa., assignor of one-half to William Steell Jackson, Bala, Pa. Filed July 30, 1915. Serial No. 42,822. 8 Claims. (Cl. 123—124.)

1. In a device for varying the proportion of gas and air in a carburetor inlet, a carburetor having an air inlet, a slidable closure for said inlet, embracing and guided thereupon, an engine-operated electric generator, an electromagnet having its circuit connected with the generator and paramagnetic material connected with the closure and moved by the electromagnet to increase the inlet opening with increase of current in the electromagnet.

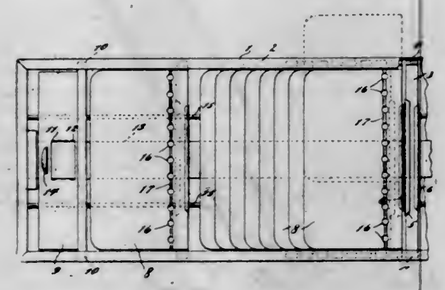
1,503,556. PAVEMENT-MARKING MACHINE. JOHN OTTO RHIEN, Santa Cruz, Calif. Filed Nov. 9, 1922. Serial No. 599,883. 8 Claims. (Cl. 91—39.)



1. A painting device for marking pavements and the like comprising a truck, a paint receptacle supported thereon, a brush associated therewith adapted to sweep the ground surface and means for feeding paint from the receptacle into the brush with a second brush supported behind the first brush adapted to follow the same for smoothing the paint.

6. A pavement marking machine comprising a truck, a casting pivotally supported thereon having an elongated receptacle mounted thereon adapted to be swung into driving relation with the truck, means associated with the receptacle for feeding paint to the pavement surface and a brush extending downwardly from the casting for engagement with the pavement surface when the receptacle is held in a driving position and clearing said surface when the receptacle is turned into a vertical position.

1,503,557. INDEX DEVICE. WILLIAM A. RINGLER, Philadelphia, Pa., assignor to The Globe-Wernicke Company, a Corporation of Ohio. Filed Mar. 9, 1922. Serial No. 542,512. 8 Claims. (Cl. 129—16.)

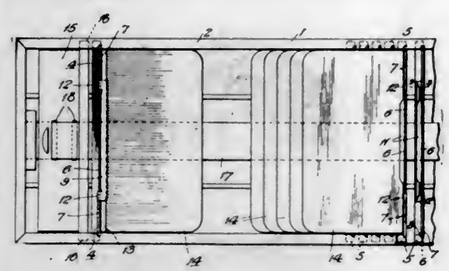


1. In an index device, a supporting frame, a plurality of anchor members slidable in parallel directions in said

frame, and a pair of card index frames hinged to each of said members with the card-mounting faces thereof

abutting when the index frames are brought together about their hinges, said pairs of frames being slidable individually into and out of the supporting frame.

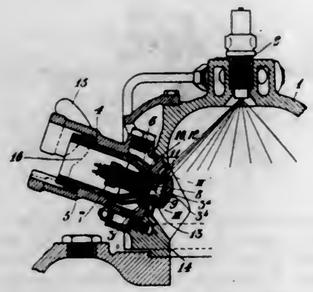
1,503,558. VISIBLE INDEX. WILLIAM A. RINGLER, Philadelphia, Pa., assignor to The Globe-Wernicke Company, a Corporation of Ohio. Filed Mar. 10, 1922. Serial No. 542,573. 14 Claims. (Cl. 129—16.)



1. In a visible index device, a card carrier comprising a strip having card-receiving grooves along opposite edges of a face, the grooves opening toward one another, one of said grooves extending nearer an end of the strip than the other groove to facilitate the insertion of the edge of a card in said grooves.

3. An index card having adjacent to an edge, by which it may be mounted, parallel thereto and interiorly therefrom a row of spaced apertures to facilitate flexure of the body of the card with respect to the said edge.

14. In a visible index device, a follower block of sheet metal having at its forward end lateral extensions for travel in guideways, and having adjacent its rear end an integral deflected portion to form a grasping portion, the body part having therein a plurality of slots for receiving a tape.

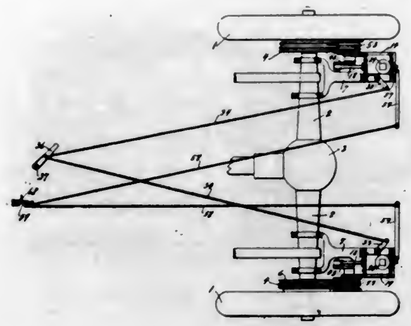


1,503,559. VISIBLE-INDEX-CARD CARRIER. WILLIAM A. RINGLER, Philadelphia, Pa., assignor to The Globe-Wernicke Co., a Corporation of Ohio. Filed Jan. 2, 1923. Serial No. 610,166. 12 Claims. (Cl. 129—16.7.)

1. In a visible index device, a member adapted to extend between and slide in spaced parallel guides, a wire secured to the member, a sheet metal hinge element having a portion thereof bent around the wire to

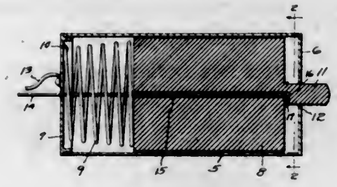
provide a pivotal connection to the member and another portion bent upon itself to engage with and detachably hold an index card.

1,503,560. SPARK-PLUG VALVE FOR PETROLEUM AND CRUDE-OIL ENGINES. CARL AUGUST RUDQVIST, Staket, Sweden, assignor to J. & C. G. Bollinders Mekaniska Verkstads Aktiebolag, Stockholm, Sweden, a Company of Sweden. Filed Sept. 22, 1921. Serial No. 502,538. 10 Claims. (Cl. 123—145.)



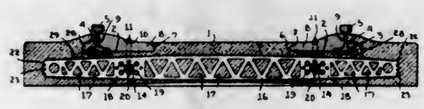
1. In a spark plug valve for petroleum and crude oil engines, the combination of a sleeve having two oppositely arranged valve seat faces, a valve body movable in said sleeve and provided with two oppositely arranged valve faces adapted to cooperate with said valve seat faces on said sleeve, said valve body having an aperture between said valve faces, a spark plug inserted in said valve body and having a spark gap located opposite said aperture in said valve body, and means for guiding said valve body in said sleeve into two positions in each of which one valve face on said valve body bears against one valve seat face on said sleeve, and in one of which positions said aperture in said valve body for said spark gap projects outside said sleeve and in the other position said aperture is retracted within said sleeve, said guiding means being located entirely to one side of both of said valve seat faces removed from said aperture.

1,503,561. BRAKE. CLIFTON P. RUGGLES, McCloud, Calif. Filed May 7, 1923. Serial No. 637,301. 9 Claims. (Cl. 188—99.)



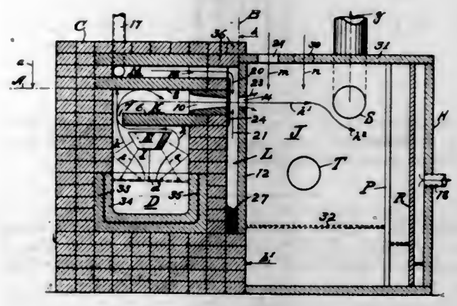
1. A brake for a revolving element, comprising a slidably mounted pump having a piston therein, a rocker

associated therewith having pulleys rotatable in its arms adapted to frictionally engage the revolving ele-



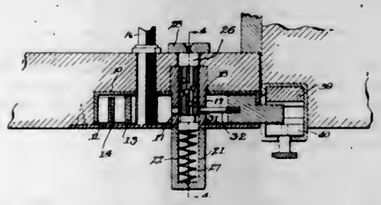
ment when the pump is advanced and an operative connection between the pulleys and the piston causing the latter to reciprocate when the pulleys are rotated.

1,503,562. CIRCUIT CLOSER FOR ALARMS. FREDERICK RYAN, San Antonio, Tex. Filed Feb. 27, 1923. Serial No. 621,500. 2 Claims. (Cl. 200—54.)



1. A device of the character described comprising a casing of conductive material, a non-conductive block therein having a neck extension extending through an end of said shell, means tending to press the block of insulating material toward the end of the shell and a conducting wire extending through the block and terminating in a coil which surrounds the neck extension at its juncture with said block.

1,503,563. RAILROAD TIE. HEZEKIAH L. THOMAS, Baltimore, Md. Filed Jan. 31, 1924. Serial No. 689,771. 10 Claims. (Cl. 238—86.)

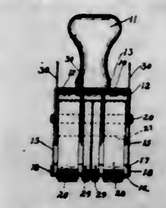


3. A railroad tie comprising a concrete body portion formed in its upper face with rail receiving recesses, said recesses being undercut at one side to form overhanging rail engaging lugs, means for holding the rails in said recesses in engagement with said lugs, and curved and apertured reinforcing plates embedded in the concrete body portion of the tie in the said lugs thereof, as and for the purpose set forth.

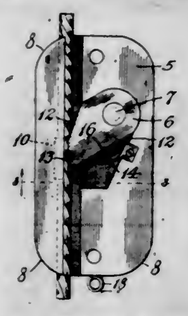
1,503,564. ELECTRIC FURNACE AND PRECIPITATOR FOR PRODUCING OXIDE OF ZINC. JOHN THOMSON, Brooklyn, and FRANCIS A. J. FITZGERALD, Niagara Falls, N. Y. Filed Aug. 21, 1922. Serial No. 583,388. 17 Claims. (Cl. 204—64.)

3. In an electric furnace and a co-ordinating precipitator for producing oxide of zinc from re-distilled zinc, a chamber intermediate of the furnace ports and the precipitator ports which is kept filled with prehcated inert-gas, such as nitrogen, and functions as a conveyor of heat to the contiguous port-surfaces.

1,503,565. LOCK. EDWARD R. VIVES, New York, N. Y., assignor to Vesdal Creations, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 21, 1923. Serial No. 633,633. 13 Claims. (Cl. 70—76.)



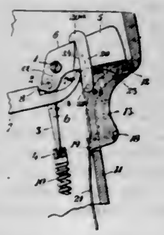
1. In a lock, the combination with the bolt, of controlling mechanism therefor comprising a plurality of plugs mounted to reciprocate longitudinally in paths transverse to said bolt, said bolt having a plurality of pins projecting in lines which intersect said plugs, each of said plugs having a plurality of holes adapted to be brought into alignment with said pins, said holes being longitudinally and circumferentially spaced along said plug, means for fixing each of said plugs in a plurality of rotational positions to bring any selected hole thereof into cooperation with its associated pin, and springs holding said plugs in normal longitudinal positions.



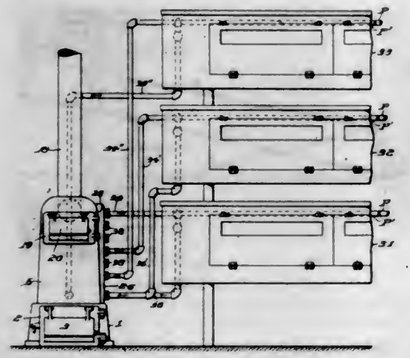
1,503,566. MEANS FOR CONTROLLING DATING STAMPS. LEO WALLENSTEIN, Brooklyn, N. Y. Filed Jan. 4, 1922. Serial No. 526,934. 4 Claims. (Cl. 101—111.)

1. A hand printing stamp comprising a frame; a shaft in the frame; spools rotatable on said shaft; lever arms mounted at their lower ends on said shaft; and means appurtenant to the lever arms engageable with means

appurtenant to the spools for rotating the spools when the lever arms are moved in one direction and for moving the lever arms on said shaft for permitting the spools to be stationary when the lever arms are moved in direction reverse to the first mentioned direction.

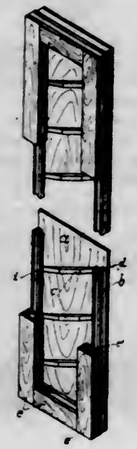


1,503,567. ROPE FASTENER. LEWIS E. WALLIS and LAFAYETTE HIGGINS, Monrovia, Calif. Filed Aug. 6, 1923. Serial No. 656,043. 2 Claims. (Cl. 24—134.)



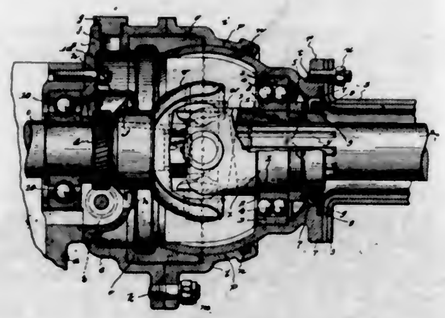
1. A rope fastener comprising a block formed with a longitudinal, laterally, opening groove having an overhanging wall and an intermediate recess, and a yieldable dog movable respectively into and out of the groove and with respect to the recess and coacting therewith to cause a crimp to be formed in a rope when arranged in the groove and engaged by the dog, and said block having a recess therein to accommodate the dog, and the said dog being of a thickness with respect to the depth of the recess so that the outer face of the dog comes flush with the outer face of the block.

1,503,568. AUTOMATIC PISTOL WITH COCK LOCK. GEORG WALTHER, Zella-Mehlis, Germany. Filed Aug. 4, 1923. Serial No. 655,787. 7 Claims. (Cl. 42—3.)



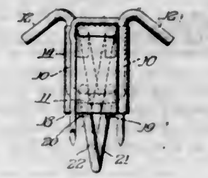
1. A self-loading pistol with hammer-lock comprising in combination a main spring, a breech block adapted to be driven back by the recoil, a hammer adapted to be brought into the ready position by the backward movement of said breech block, a movable grip controlled element for automatically moving said hammer rearwardly upon release of the grip, and means whereby said main spring tends to oscillate said hammer in a direction opposite to the first direction.

1,503,569. HEATING SYSTEM FOR MAMMOTH INCUBATORS. HAROLD L. WATSON, New Brunswick, N. J. Filed Feb. 20, 1922. Serial No. 537,679. 5 Claims. (Cl. 237—15.)



1. A heating system for a mammoth incubator having a plurality of tiers of hatching compartments each tier having heat radiating means, comprising a heating unit for supplying hot water and piping extending from the unit to the radiating means in each tier, said piping being so arranged as to convey the hottest water from the heating unit to the tier which is normally the coolest and relatively cooler water to the tier which is normally the hottest.

1,503,570. DEVICE FOR IMPROVING THE FULLNESS OF SOUND AT THE STRIKING OF TIMEPIECES AND CLOCKS HANGING ON THE WALL. FRIEDRICH WEIHENMEYER, Zuffenhausen, Germany. Filed Jan. 26, 1924. Serial No. 688,833. 1 Claim. (Cl. 58—1.)

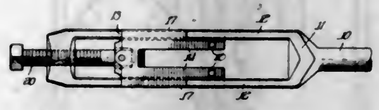


Device for improving the fullness of sound at the striking of time-pieces and clocks hanging on the wall comprising in combination with the clock-case a sounding board, inclined ribs for staying the sounding board, a hollow frame open at the centre forming the back wall of the clock case and wooden supports fluted in longitudinal direction inserted between said sounding board and said hollow frame.

1,503,571. UNIVERSAL JOINT AND HOUSING. D'ORSAY MCCALL WHITE, Detroit, Mich. Filed June 7, 1923. Serial No. 643,863. 5 Claims. (Cl. 64—90.)

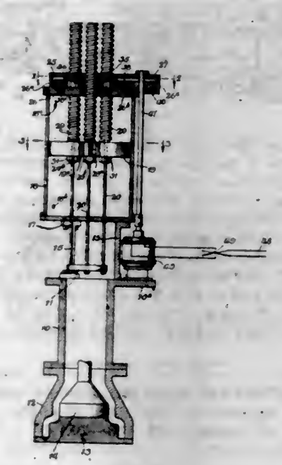
1. In a universal joint and housing, the combination of a stationary housing section, a movable housing section, a torque tube bolted to the movable housing section, a driving yoke, a driven yoke, an anti-friction bearing assembly for rotatably supporting the driven yoke in the movable section, and a propeller shaft contained in the torque tube which may be disengaged by a sliding movement from the driven yoke, when the torque tube is detached from the movable housing member.

1,503,572. CONCRETE HANGER. WILLIAM E. WHITE, Chicago, Ill. Filed May 3, 1922. Serial No. 558,134. 6 Claims. (Cl. 72—105.)



1. In a hanger insert, the combination of an anchor having a loop, a housing within which the loop is accommodated, said housing being of rectangular outline in cross section, and a hanger engaging said anchor loop and consisting of a length of wire doubled on itself and with its ends bent to form oppositely projecting hooks, the lateral dimensions of the hooks being such that the hanger cannot rotate sufficiently within the rectangular casing to permit disengagement of the hooks from the loop.

1,503,573. METHOD OF FORMING FORGED FULCRUMS. LOREN L. WHITNEY, Hammond, Ind., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed May 5, 1920. Serial No. 378,976. 2 Claims. (Cl. 29—164.)

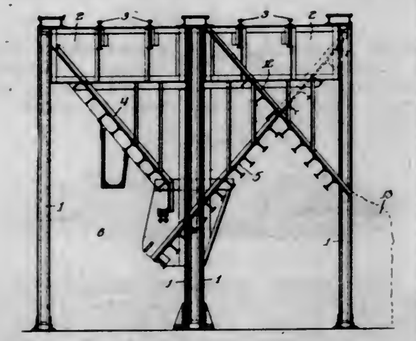


1. The method of forming a fulcrum consisting in providing a blank, heating same, providing the blank with a curved offset loop portion at a point midway of its length, inserting a piece of metal in the closed end of said loop portion to build up the stock at such point, and forming a tension rod seat at such built-up point.

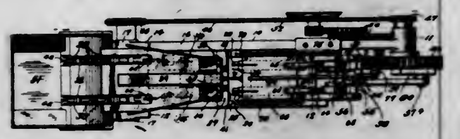
1,503,574. SLACK-ADJUSTER MECHANISM. LOREN L. WHITNEY, Hammond, Ind., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed July 3, 1922. Serial No. 572,397. 3 Claims (Cl. 188—197.)

2. A slack adjuster including, in combination, an adjuster jaw, and an adjuster block having arms with flanges which cooperate with said jaw for maintaining said block in position with respect to said jaw, the flanges on one of said arms being capable of being placed in different relative positions, in one of said positions permitting the passage of said flanges during the application of said block to said jaw and in another position cooperating with said jaw for retaining the block in operative association with said jaw.

1,503,575. MUD PRESS. HERMAN P. WILLIAMS, St. Louis, Mo. Filed Mar. 19, 1923. Serial No. 626,241. 12 Claims. (Cl. 25—30.)



1. In a device of the class described, a press cylinder, a plunger reciprocal therein, an electrically actuated motor, means interposed between said motor and plunger actuatable by said motor to reciprocate said plunger, said means comprising a reciprocable threaded shaft, a pinion in mesh therewith, means to rotate said pinion to axially move said shaft, said last named means comprising a gear rotatable by said motor, and a toothed gear ring meshing with said gear and said pinion.

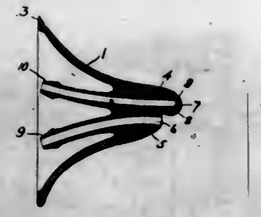


1,503,576. BIN STRUCTURE. FREDERICK H. WILLCOX, Chicago, Ill., assignor to Freyn, Brassert & Company, Chicago, Ill., a Corporation of Maine. Filed May 7, 1923. Serial No. 637,038. 6 Claims. (Cl. 214—10.)

1. Bin structure, comprising a structural support for two pairs of railroad tracks, a sloping bottom beneath one of said pairs of tracks, a pair of sloping bottoms

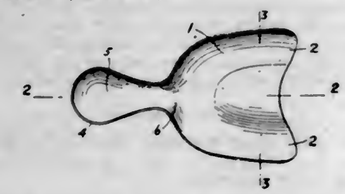
arranged in angular relation with respect to one another beneath the other of said pairs of tracks, said last mentioned sloping bottoms being divided into bays for directing material selectively in two opposite directions transversely of said bin structure.

1,503,577. MACHINE FOR CRACKING NUTS. ROBERT E. WOODSON, Webster Groves, Mo. Filed Feb. 18, 1922 Serial No. 537,434. 13 Claims. (Cl. 146—12.)



1. In a nut cracking machine, a pair of cracking jaws, one of which is movable and the other stationary, ejecting means mounted externally of said movable jaw and having a nut-ejecting projection operating in a groove formed in said stationary jaw, said ejecting means being operable in time relation with said movable jaw, a nut receiving member reciprocally mounted between said jaws, a stationary member extending downwardly to close the open forward end of said nut receiving member when the same is in receiving position, and actuating means for said movable jaw and said ejecting means.

1,503,578. CURTAIN RUNNER. ERNEST LODGE WILSON, London, England. Filed Mar. 7, 1923. Serial No. 623,504. 2 Claims. (Cl. 156—20.)



2. A guard for the roller of a curtain runner having a roller adapted to run on a flat strip race and having a wire frame depending from said roller, said guard having a hollow body adapted to encase said roller without touching it and having clipping members shaped to conform to the adjacent portions of said frame when forced onto said frame, the cooperation of the clipping members and frame serving as the sole support for the guard in its relation to the roller.

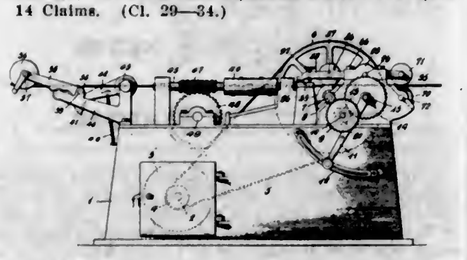
1,503,579. SYRINGE. WALTER E. DEWEY, Glenside, Pa. Filed Apr. 30, 1920. Serial No. 377,785. 2 Claims. (Cl. 128—241.)

1. A unitary or one-piece syringe of the type specified comprising an open-backed air cooled hollow conoidal shell terminating at its apex in inflow and outflow openings provided integrally with inflow and outflow pipes spaced from each other and from the shell-wall and extending towards and terminating short of the base, substantially as described.

1,503,580. DENTAL TRAY. ALBERT M. EPSTEIN, Elmira, N. Y. Filed Apr. 25, 1924. Serial No. 708,841. 1 Claim. (Cl. 32—6.)

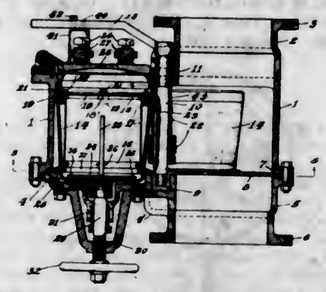
A one-piece died or stamped dental tray consisting of chemically hardened fiber and having an open ended container for plastic material and a handle centrally channeled in the direction of the bottom of the container and the channeled portion communicating with the container to accommodate lip muscles and provide for overflow of plastic material and to give a finger hold and feel, said tray being non-absorbent in respect to plastic material and also a non-conductor of heat and cold.

1,503,581. TRAVELING SCAFFOLD. AUGUST L. N. FLEMING, Lyndhurst, N. J. Filed Aug. 12, 1922. Serial No. 581,383. 16 Claims. (Cl. 304—9.)



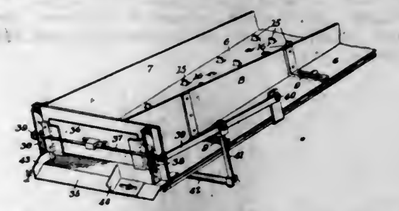
1. In a traveling scaffold, in combination, a ladder composed of extensibly adjustable sections, a platform on the uppermost section, wheels on the lower section for traveling on a surface, wheels on the upper section for traveling on a wall, and mechanism manually operative on the platform for simultaneously revolving all of the wheels to cause the scaffold to travel on the surface.

1,503,582. RAZOR-BLADE SHARPENER. FRANCESCO GASCO, New York, N. Y. Filed Nov. 3, 1922. Serial No. 598,703. 2 Claims. (Cl. 30—25.)



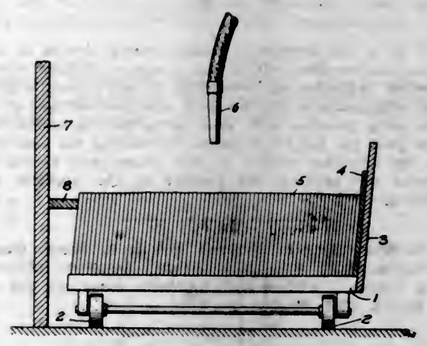
1. A razor blade sharpener comprising a holder having a flat supporting surface and projections therefrom for registering with razor blades; means for retaining blades in service position on said holder; and means for releasing said blade from said retaining means, said means embodying a screw-threaded member adapted for impingement upon and retraction from said holder, and means associated therewith for engaging said blade when on said holder, said means consisting in a resilient finger extensible over said blade.

1,503,583. WIRE STRAIGHTENING AND SWAGING MACHINE. ALEC J. GERRARD and PARVIN WRIGHT, Chicago, Ill. Filed June 14, 1922. Serial No. 568,307. 14 Claims. (Cl. 29—34.)



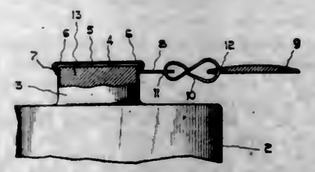
1. In a wire cutting and swaging machine the combination of a wire straightening means; a wire feeding means; means to cut a tangled wire strand before it reaches said straightening means; and a reciprocating wire cutting and swaging means, substantially as described.

1,503,584. STRAINER. ELMER E. HAUER, Springfield, Ohio. Filed Jan. 10, 1923. Serial No. 611,704. 12 Claims. (Cl. 210—168.)



1. In a straining apparatus, a main casing, a shaft extending through said casing and supported at each end thereby, means for rotating said shaft, a plurality of independent conduits each independently connected with and supported by said shaft between the ends thereof so as to be rotated thereby, and a movable straining element in each conduit, said casing having inlet and outlet openings for liquid and a third opening to permit removal of said straining elements.

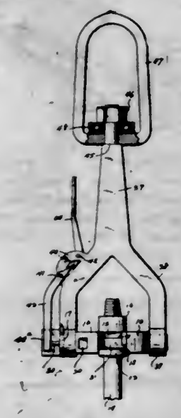
1,503,585. FEEDING DEVICE FOR VIAL MACHINES. BENJAMIN T. HEADLEY, Millville, N. J., and PARKE H. THOMPSON, deceased, late of Millville, N. J., by Rena M. Thompson, executrix, and David Irwin Du Bois, Millville, N. J., assignors to Whitall-Tatum Company, Millville, N. J., a Corporation of New Jersey. Original application filed Nov. 15, 1919, Serial No. 338,179. Divided and this application filed Jan. 26, 1921. Serial No. 440,115. 14 Claims. (Cl. 198—26.)



1. A hopper feed device for vial bottoming machines, comprising an inclined bottom, means for delivering vial blanks thereto, means for retarding the travel of said blanks over said bottom, a discharge chute and means controlling the passage of the vial blanks through said chute, substantially as described.

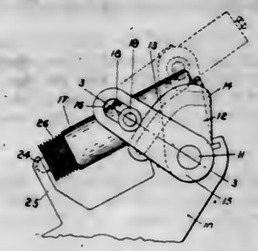
1,503,586. PROCESS OF FINISHING THE EDGES OF GLASS SHEETS. AUSTIN C. HILEMAN, Ford City, Pa., assignor to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed June 5, 1924. Serial No. 718,018. 1 Claim. (Cl. 51—278.)

The process of finishing the edges of glass sheets which consists in placing a series of the plates side by side with their adjacent side surfaces in opposition and close together and wth the edges to be treated in substantial alignment, and then applying a sand blast to the said edges.



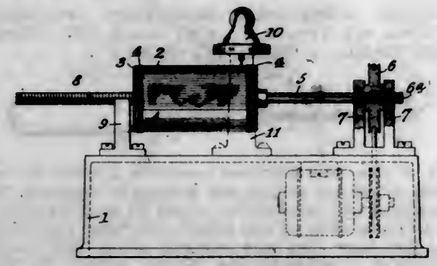
1,503,587. COMBINED TAG AND SEAL. NORMAN HOLLAND, Montreal, Quebec, Canada. Filed Mar. 16, 1922. Serial No. 544,375. 2 Claims. (Cl. 220—24.)

1. In a container the combination with a discharge spout having a flared mouth and a plug positioned within the spout and closing the same, the extreme outer end of the plug being disposed in transverse alignment with the



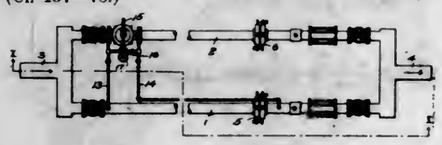
flared mouth of the spout; of a combined closure and seal consisting of a flat thin disc of comparatively soft metal extending completely across the said mouth and completely covering the plug and having its entire periphery spun over the flared edge of the mouth; a radial projection upon said disc having an opening in its free end and a guarantee device connected to said free end.

1,503,588. ELEVATOR. JESSE O. JOHNSON, Orange, Tex. Filed July 18, 1923. Serial No. 652,407. 2 Claims. (Cl. 294—91.)



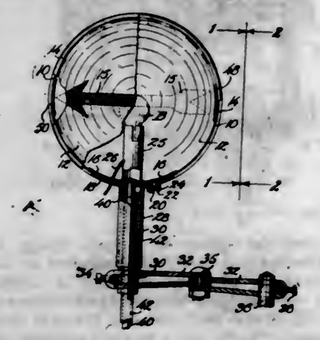
1. In a rod elevator, a frame, a block pivoted in the frame and provided with a slot, a member slidable within the slot and normally obstructing the slot thereof, a push pin reciprocable within the block, said push pin and member being provided with gear teeth, gearing connecting said push pin and block, means for shifting the push pin in one direction carried by said frame, and automatic means for shifting the member in the opposite direction.

1,503,589. COUNTERPOISE. BRYAN P. JOYCE, Washington, D. C. Filed July 7, 1922. Serial No. 573,493. 4 Claims. (Cl. 89—37.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)



1. The combination with a support having a bracket and a bearing and spaced apart cam plates above said bearing of a trunnion journaled in the bearing, arms rigid on the trunnion and embracing the cam plates, said arms slotted, a counterpoise mounted between the cam plates characterized by a cylinder, a plunger working in the cylinder and pivoted in the bracket, a trunnion band rigid on the cylinder, trunnions on the band and extending into the slots of the arms and in position to ride on the cam faces of the cam plates, arms extending from the band and a shaft journaled in the arms with its ends riding in the cam grooves.

1,503,590. METHOD AND SYSTEM FOR TRANSMITTING PICTURES TO A DISTANCE. ELIOT KEEN, New York, N. Y., assignor to Picturadio Corporation, a Corporation of New York. Filed June 13, 1922. Serial No. 567,936. 23 Claims. (Cl. 178—7.)



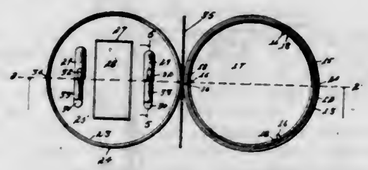
3. The method of picture transmission consisting in producing waves of certain frequency representing predetermined parts of a picture, and waves of certain other frequency representing a margin line of the picture.

1,503,591. FLUID-SUPPLY SYSTEM. THOMAS H. KERR, Columbus, Ohio, and LEVI H. DUNCAN, Ben Avon, Pa. Filed Oct. 7, 1921. Serial No. 506,037. 8 Claims. (Cl. 137—78.)

1. In a fluid-supply system a plurality of fluid conduits arranged in parallel, a cutoff valve arranged in one of said conduits and closing in the direction of flow to cut off flow through that conduit, a fluid-pressure element to which said valve is connected in a union admitting of a limited amount of lost motion, said fluid-pressure element beng subjected to up-stream pressure in valve-opening direction and to down-stream pressure in valve-closing direction, a weight operative upon the fluid-pressure element when the valve is closed and tending to hold the fluid-pressure element against valve-opening movement, and means for relieving the fluid-pressure element of said weight when the fluid-pressure element moves in valve-opening direction.

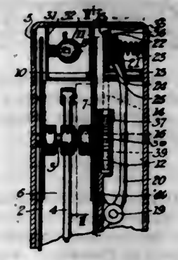
1,503,592. AUTOMOBILE SIGNAL. CHARLES H. LEWIS, Denver, Colo. Filed Apr. 7, 1922. Serial No. 550,430. 5 Claims. (Cl. 116—46.)

1. A signal comprising a casing rotatable on a vertical axis, direction indicating means on opposite sides thereof pointing in the same direction with reference to the



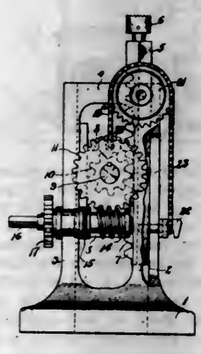
casing, said means normally pointing ahead, and means for rotating said casing through 90° to indicate movement in either transverse direction and through 180° to indicate movement rearward, selectively.

1,503,593. SPRING WHEEL. OERIN J. LINENDOLL, Denver, Colo. Filed July 25, 1921. Serial No. 487,433. 9 Claims. (Cl. 152—29.)



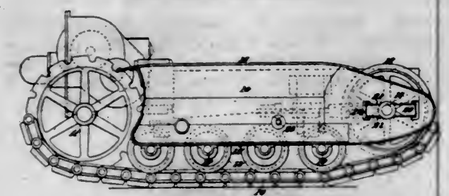
2. A spring wheel comprising a pair of spaced discs, a hub block therebetween, a plurality of spokes carried thereby, a spring about each spoke, and cylindrical housings formed by semi-cylindrical housings in each of said spaced discs receiving said spokes and springs, and rim mechanism at the outer ends thereof, the housings in each disc being semi-cylindrical throughout their lengths.

1,503,594. VANITY CASE. GUY G. MARTIN, Mason City, Iowa. Filed Nov. 7, 1922. Serial No. 599,503. 2 Claims. (Cl. 132—83.)



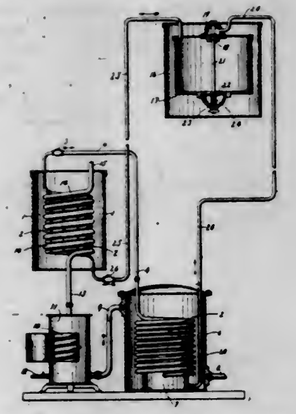
1. A vanity case comprising top and bottom pan members the top pan member having its inner sides provided with an inwardly extending bead, the inner side of said bottom pan being provided with an inwardly extending shoulder, a mirror member slightly smaller than the said pan members, the said pan members and said mirror member being hingedly connected at a common point, the open edges of said pans being provided with notches on opposite sides from their hinged portion, said pans being so constructed that the open edge of one will telescopically receive the open edge of the other when the pans are in a closed position, the said mirror member being provided with a handle portion designed to extend outwardly through the notched portion of said pans when they are in a closed position, a partition member secured between the bead of said top member and the closed end of the same, said partition member being provided with a centrally located rectangular depression, a rouge pan detachably secured in said depression, the said partition being provided at each side of said depression with a receptacle for receiving a cosmetic stick, each of the said receptacles being provided with a flexible tongue for yieldably securing the stick in position.

1,503,595. METHOD OF MAKING PHOTOGRAPHIC RECORDS. CHARLES E. KENNETH MEES, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed June 3, 1921. Serial No. 474,833. 11 Claims. (Cl. 95—5.)



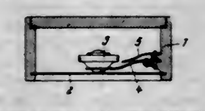
1. The method of making a photographic record which consists in moistening a suitably prepared material with a bath free of substances tending to discolor the material and that wil render the material capable of becoming darker in the presence of light when damp than when dry and submitting the material while still damp from such bath to the projection of a light image thereon.

1,503,596. HOISTING MECHANISM. JOHN A. MORRISON, Mansfield, Ohio. Filed May 31, 1923. Serial No. 642,463. 5 Claims. (Cl. 254—97.)



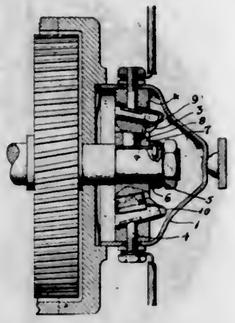
5. A hoisting mechanism including an upright frame, a rack bar vertically slidable therein, a channel shaped block vertically slidable in the frame, the teeth of the rack bar extending into the channel thereof, a pinion within said channel block meshing with the rack bar, a pair of pulleys upon opposite sides of the upper portion of the frame, a flexible member extended over each pulley and connected to the block and rack bar at opposite ends, a pair of worm wheels rotatable with the pinion and located upon opposite sides of the frame, spaced ears upon opposite sides of the block, a pair of worm shafts journaled in said ears, a worm upon each shaft meshing with one of the worm gears, pinions at the outer ends of the worm shafts, an idler upon the frame meshing with said pinions and a flat sided shank upon one of the worm shafts for receiving a tool to rotate the same.

1,503,597. ROLLER-TRUCK FRAME FOR TRACTORS. EMIL F. NORELIUS, Peoria, Ill., assignor to The Holt Manufacturing Company, Stockton, Calif., a Corporation of California. Filed Sept. 16, 1919. Serial No. 324,225. 6 Claims. (Cl. 305—9.)



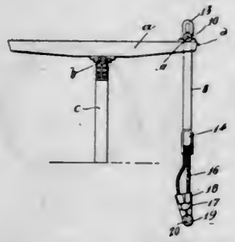
1. A roller truck frame for chain track tractors formed of pressed steel side plates contacting at their upper edges, and spaced apart at their lower edges to receive the truck rollers between them.

1,503,598. REFRIGERATING APPARATUS. THOMAS IRVING POTTER, East Orange, N. J., assignor to Federated Engineers Development Corporation, Jersey City, N. J., a Corporation of Delaware. Filed Sept. 15, 1921. Serial No. 500,757. 2 Claims. (Cl. 62—118.)



1. In a refrigerating apparatus, a generator condenser and expander arranged in a closed refrigerating circuit, means for preventing back flow of refrigerant through said circuit, said generator containing a non-liquid absorbent, said circuit including a refrigerant conducting pipe leading from the expander to the condenser through said generator and having a coiled perforated portion located within the generator, a pipe for conducting temperature regulating fluid in said generator intercoiled with the perforated and coiled portion of said first mentioned conductor.

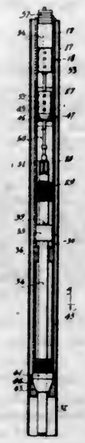
1,503,599. PROTECTIVE DEVICE IN SOUND-SIGNALING APPARATUS. WILHELM RUDOLPH, Kiel, Germany, assignor to the Firm Signal Gesellschaft m. b. H., Kiel, Germany. Filed Feb. 4, 1921. Serial No. 442,581. 9 Claims. (Cl. 177—386.)



1. In sound apparatus, in combination, a vibratory member abutting on the sound propagating medium, a device comprising parts sensitive to shocks; and resilient means adapted to normally support said device in sound transferring relation against said vibratory member, but to permit it to move bodily therefrom without subjecting it as a whole to crushing forces when said vibratory member is subjected to abnormal shocks.

1,503,600. CONE TIMER FOR INTERNAL-COMBUSTION ENGINES. ANDREW J. SAGER, Winchester, Va. Filed Dec. 28, 1922. Serial No. 609,435. 2 Claims. (Cl. 200—24.)

2. A cone timer for internal combustion engines comprising a rotary cone shaped member carrying a conducting point, a casing, an insulating ring fitting into the casing and provided with a plurality of radial recesses, metal plates forming a lining for the said recesses, leaf springs carrying brushes closely fitting the said recesses, headed bolts for securing the leaf springs in position in the said recesses, the said bolts serving to conduct the generated current.



1,503,601. PUMP HANGER. SUMNER B. SARGENT, Huntington Park, Calif. Filed Sept. 19, 1923. Serial No. 663,571. 5 Claims. (Cl. 74—5.)

1. A pump hanger comprising links having bearings, a cross bar supported by the bearings, and a plurality of tie members connected with the links approximately radially of the bearings.

1,503,602. PUMPING APPARATUS AND METHOD OF OPERATING THE VALVED PLUNGER OF A WELL PUMP. SUMNER B. SARGENT and SUMNER B. SARGENT, Jr., Huntington Park, Calif. Filed Nov. 22, 1923. Serial No. 676,286. 4 Claims. (Cl. 103—46.)

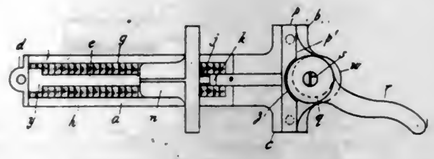
1. A pumping apparatus for wells comprising a working barrel having a port and having a portion of its bore reduced in diameter adjacent to the port, a tubular member surrounding the working barrel and spaced therefrom to form a passage, means to close the lower end of the passage, and a tubular valved plunger in the working barrel having a reduced portion slidably fitting the reduced bore portion, the reduced portion terminating in a

pressure face acted upon by fluid admitted through the port and said pressure face being of less area than the area of the upper end of the plunger.

1,503,603. PROCESS OF PRODUCING CRYSTALLINE ALUMINUM SULPHATE. SHERMAN W. SCOFIELD and JOHN B. LA RUE, Cleveland, Ohio; said La Rue assignor to said Scofield. Original application filed Sept. 2, 1920, Serial No. 407,724. Divided and this application filed May 17, 1922. Serial No. 561,703. 11 Claims. (Cl. 23—13.)

1. In processes of crystallizing aluminum sulphate out of solutions of the latter, the step which consists in subjecting the solution to a partial vacuum, causing it to boil violently, means being superposed above the evaporating pan against which the solution is thrown, said means catching the salt and retaining the same as the solution drops back.

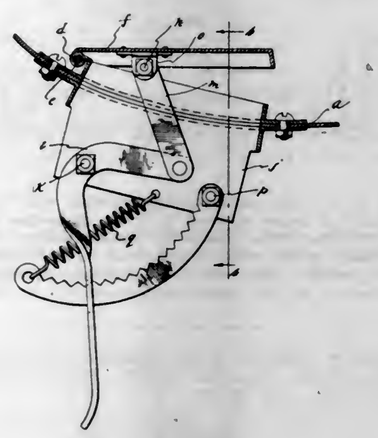
1,503,604. PROCESS OF MAKING CELLULOSE ETHER. PAUL C. SEEL, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Feb. 2, 1922. Serial No. 533,656. 3 Claims. (Cl. 260—152.)



1. The process of making cellulose ether, which comprises the steps of treating cellulose with a dilute solution of a strong mineral acid, removing said acid before harmful molecular breakdown occurs, and reacting upon the treated cellulose with etherifying reagents.

1,503,605. SOUND-DEADENING FIBER BOARD. JOHN K. SHAW, Minneapolis, Minn., assignor to C. F. Dahlberg, St. Paul, Minn. Filed Apr. 29, 1920. Serial No. 377,549. 5 Claims. (Cl. 154—44.)

1. A fiber board composed of different layers of interlaced fibers, one of said layers being fireproofed and one of said layers composed of hair, and all of said fibers being interlaced throughout the body portion of said board, substantially as described.

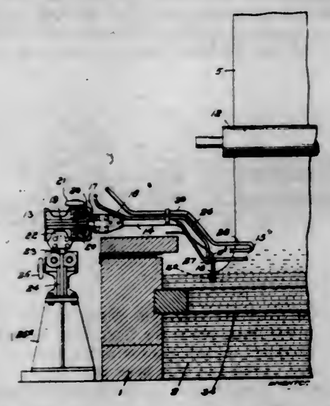


1,503,606. BENCH VISE. HERBERT ELLIOTT SINGLETON, Melbourne, Victoria, Australia. Filed Sept. 19, 1922. Serial No. 589,101. 2 Claims. (Cl. 144—303.)

1. In a bench vise comprising a base plate having side walls, spaced rack bars carried by the said walls and extending inwardly towards each other to form shoulders, an adjustable rear jaw having teeth thereon to engage the racks, and a tongue on the said jaw projecting downwardly between the rack bars and provided with a head to engage the shoulders formed by the rack bars, a lug on the jaw extending between the rack bars to guide the same, a front jaw provided with a recess and having a

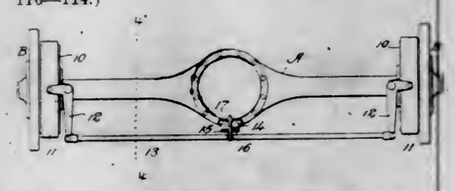
base portion provided with an elongated slot turnably mounted on the base plate for horizontal adjustment, a manually operated eccentric provided with a lip engaging the recess carried by the base portion, and securing means passing through said eccentric and elongated slot to permit clamping action of the said jaw when the eccentric is operated.

1,503,607. VENTILATOR. ROBERT K. SLAYMAKER, GEORGE D. SLAYMAKER, and THOMAS N. BOURKE, Detroit, Mich., assignors to Slaymaker Electric Welding Company, Detroit, Mich., a Corporation of Michigan. Filed Nov. 7, 1921. Serial No. 513,284. 6 Claims. (Cl. 98—22.)



1. A ventilator for installation on a sheet metal structure, having in combination, an upper frame and a lower frame with central openings in which the inside outlines of the frames register whereby the frames can be bolted together on opposite sides of the sheet metal to act as a jig in cutting out the sheet metal, and a lid pivotally supported to act as a closure for the upper frame.

1,503,608. EDGE HOLDING AND FORMING DEVICE FOR SHEET-GLASS MACHINES. HARRY G. SLINGLUFF, Mount Vernon, Ohio, assignor to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed June 5, 1923. Serial No. 645,496. 5 Claims. (Cl. 49—17.)

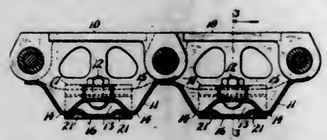


2. In combination in apparatus for drawing a glass sheet from a molten bath, means for anchoring the base

of the sheet in the bath at its edge, a pair of stripping fingers spaced apart above the base of the sheet so that

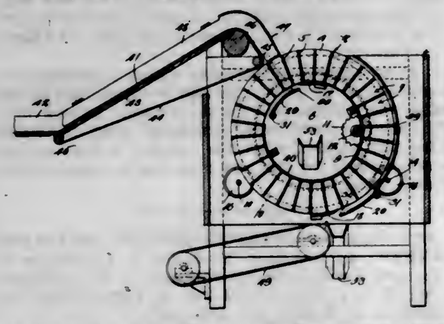
they straddle said edge and thin it, means for chilling the glass adjacent the anchorage of its edge, and means for applying heat to the edge above the fingers.

1,503,609. INDICATOR. GEORGE L. SMITH, Washington, D. C., assignor to United States Ordnance Company, Washington, D. C., a Corporation of Virginia. Filed Feb. 11, 1924. Serial No. 692,092. 8 Claims. (Cl. 116—114.)



6. In a brake system, the combination with duplicate brakes; of means operated by brake application and effective after brake release to visually indicate both inaccuracy in the relative adjustment of the brakes and the particular brake requiring adjustment to reduce the inaccuracy of such relative adjustment.

1,503,610. DENTAL TOOL. ROBERT B. SMITH, Broken Bow, Nebr. Filed Oct. 9, 1923. Serial No. 667,570. 2 Claims. (Cl. 32—10.)

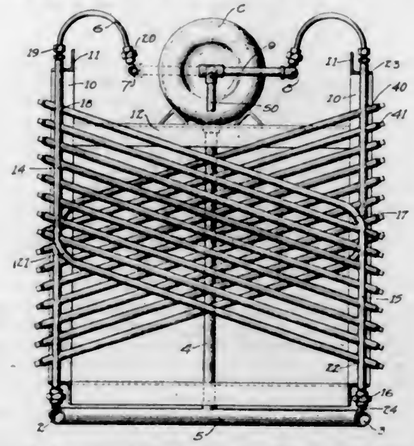


1. A dental tool comprising a handle provided at one end with a shank having a continuously curved approximately hook-shaped outer portion having an inwardly tapered terminal blade forming a continuation of the hook-shaped portion and extending inwardly longitudinally of the handle in parallelism therewith and spaced therefrom, said blade constituting the bill of the hook-shaped portion and having an end cutting edge adapted to scale tartar from the inner sides of the teeth.

1,503,611. DETACHABLE SHOE FOR ENDLESS TRACKS. RUSSELL S. SPRINGER, Stockton, Calif., assignor to The Holt Manufacturing Company, Stockton, Calif., a Corporation of California. Filed May 11, 1921. Serial No. 468,525. 2 Claims. (Cl. 305—10.)

1. An endless chain track having a permanent shoe formed with a corrugation on its tread surface extending from end to end of the shoe transversely of the track, a thin, relatively light detachable shoe having a comparatively flat tread surface to fit between the ridges of the corrugations on the permanent shoe and extending throughout the length thereof and bridging the space between the ridges, a hook at one end of the detachable shoe to fit over the edge of the permanent shoe and quick detachable means carried at opposite end of the detachable shoe for connecting the same to the permanent shoe.

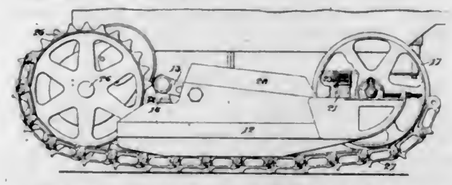
1,503,612. BEAN-SNIPPING MACHINE. KINSEY R. TAYLOR, Patapsco, Md. Filed May 22, 1923. Serial No. 640,703. 7 Claims. (Cl. 146—86.)



3. A device of the class described comprising a conveyor, means for severing the ends of an object projecting from the conveyor, means at opposite sides of the conveyor for determining the length of the object projecting from the conveyor and means for simultaneously adjusting the said determining means with respect to the cutting means.

1,503,613. PAPER MANUFACTURE. WILLIAM L. TAYLOR, Cincinnati, Ohio. Filed Aug. 7, 1922. Serial No. 580,057. 3 Claims. (Cl. 154—50.)

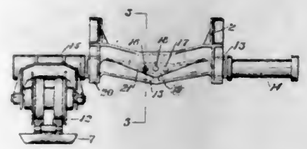
2. A web, comprising plies of paper, foil or fabric united into a web by a binding, interposed layer of tacky bituminous material, such as asphalt, with selected portions of the web, particularly the lines, where same is to be cut substantially free of the bituminous material, and having at such selected portions an interposed layer of other than tacky bitumen, said layer being of a waxy lubricating quality on cutting knives.



1,503,614. STEAM GENERATOR. WILLIAM E. TRAVERS, Oakland, Calif., assignor of one-fourth to Frank E. Reynolds, Piedmont, Calif. Filed May 13, 1922. Serial No. 560,801. 6 Claims. (Cl. 122—255.)

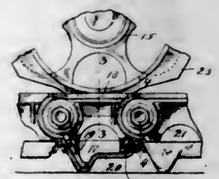
1. In a water tube generator of the character described, a water tube section comprising a pair of header tubes, the lower end of one header being bent, extended and connected with the lower end of the other header and the upper end of the last named header being bent, extended and connected with the upper end of the first named header, said extended header tubes forming the upper and lower tubes of a section, and a plurality of tubes interposed between said tubes and connected at their respective ends to the header tubes.

4. In a generator of the character described a pair of side frames, an upper bar on each side frame, a series of interspaced slots formed therein, and oppositely inclined water tube sections interspaced and guided thereby.



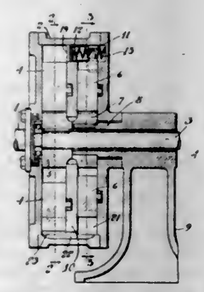
1,503,615. TRACTOR SUSPENSION. WILLIAM TURNBULL, Peoria, Ill., assignor to The Holt Manufacturing Company, Stockton, Calif., a Corporation of California. Filed Jan. 4, 1922. Serial No. 526,962. 6 Claims. (Cl. 305—9.)

1. In a vehicle having a main frame and a rocking truck frame at each side thereof, the latter formed of spaced side bars, a sprocket wheel journaled between the side bars and formed with an outwardly dished member between the hub and rim, an equalizing device connecting the truck frames together and also connected with the main frame, the connection between the equalizing device and each truck frame including a support carried on the inner side bar of the truck frame and projecting into the dished portion of the sprocket wheel.



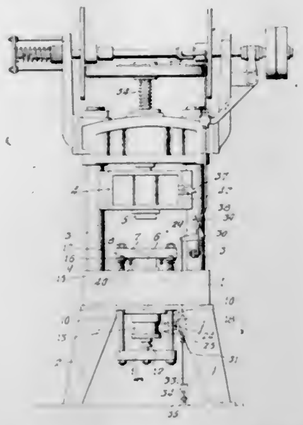
1,503,616. TRACTOR CONSTRUCTION. ELMER E. WICKERSHAM, Stockton, Calif., assignor to The Holt Manufacturing Company, Stockton, Calif., a Corporation of California. Filed May 26, 1920. Serial No. 384,346. 4 Claims. (Cl. 305—9.)

1. A tractor comprising a main frame, a track-laying truck mechanism at each side thereof, said truck mechanism including a truck frame, load-carrying rollers and an idler sprocket wheel mounted on said truck frame, an axle pivotally connected intermediate its ends to the main frame for rocking movement in a vertical plane, means for varying the point of connection



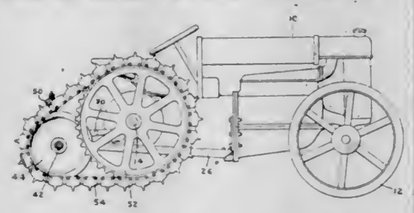
between the axle and the main frame while leaving their relative positions unchanged, and a rotatable connection between each truck frame and the axle constituting the only connection between the truck frame and the main frame.

1,503,617. SELF-LAYING TRACK MECHANISM. ELMER E. WICKERSHAM, Stockton, Calif., assignor to The Holt Manufacturing Company, Stockton, Calif., a Corporation of California. Filed May 26, 1920. Serial No. 384,350. 2 Claims. (Cl. 305—10.)



1. A track link comprising spaced side bars, each formed with a rail at its inner longitudinal edge, a downwardly extending flange at each end of the link connecting opposite side bars together, and a shoe connected to said flanges.

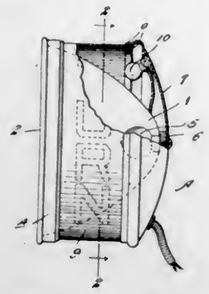
1,503,618. HYDRAULIC COUPLING AND CHANGE-SPEED GEAR. SVEN GUSTAF WINGQUIST, Gottenborg, Sweden. Filed Sept. 16, 1922. Serial No. 588,656. 5 Claims. (Cl. 192—58.)



1. A hydraulic coupling and change speed gear, comprising a delivery pump and at least one receiving pump, a connection between said delivery pump and said receiving pump, said pumps being formed by a driving rotor, a driven rotor and a stator, one of said rotors being common to all said pumps, a valve disposed in the said connection and controlled by the fluid pressure set up in said delivery pump to open said connection.

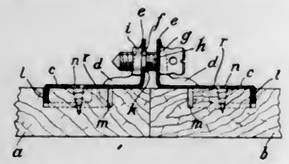
1,503,619. TILE PRESS. EDMUND W. ZEH, Newark, N. J. Filed June 18, 1921. Serial No. 478,509. 12 Claims. (Cl. 25—55.)

1. In a tile press, the combination of relatively movable die members adapted to cooperate to form a die cavity to receive material to be compressed, means cooperating with said die members to compress said material, power mechanism for producing relative movement of said die members in both directions, means actuated by said compressing means for controlling operation of said power means to produce relative movement of said members in one direction, and manually operated means for controlling operation of said power means to produce relative movement of said die members in the other direction.



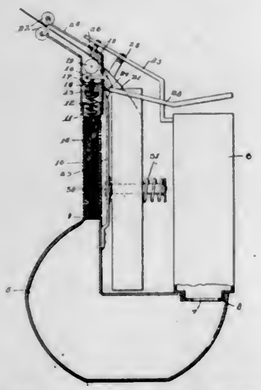
1,503,620. TRACTOR ATTACHMENT. LAWRENCE G. ZESBAUGH, Minneapolis, Minn. Filed Apr. 10, 1922. Serial No. 550,965. 2 Claims. (Cl. 305—3.)

1. In a tractor having front steering wheels and a rear driving axle, the combination of sprocket drive wheels mounted on said axle, rearwardly extending castings hinged to the housings of said axle, a shaft secured to said castings, bars attached to the tractor and extending beneath said castings, downwardly extending members secured to the ends of said shaft, idler wheels mounted on said members, bolts attached to the rear of said bars and extending slidably through the rear of said castings, collars carried by the upper ends of said bolts, springs interposed between said collars and said castings, and chain traction belts passing around said drive wheels and said idler wheels.



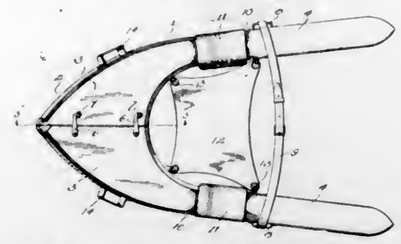
1,503,621. VEHICLE HEADLIGHT CONSTRUCTION. EARL ABBOTT, Fort Thomas, Ky. Filed Oct. 20, 1922. Serial No. 595,745. 1 Claim. (Cl. 240—46.)

A headlight casing comprising a transparent annulus forming the side thereof, a concaved plate closing one end of the annulus, a parabolic reflector located within the annulus and having its axis coincident with the center thereof, the smaller end of the reflector being secured to the concaved plate at the center thereof, a bulb located within the reflector and disposed at the



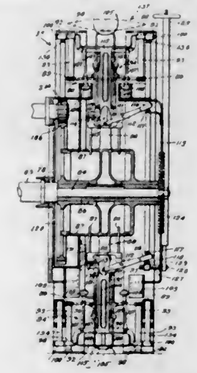
focal point thereof, and a bulb mounted upon the concaved surface of the concaved plate and disposed at the side of the reflector and between the reflector and the edge of the concaved plate, the edge portion of the concaved plate surround the last mentioned bulb.

1,503,622. WOOD AND LIKE FASTENING. WILHELM BACHMANN, Zurich, Switzerland. Filed Dec. 30, 1922. Serial No. 610,010. 3 Claims. (Cl. 20—92.)



1. A device for fastening wood and like elements together, comprising a right-angle bracket having a screw-hole in each of its members, and a segmental flange formed on one member at right angles and concentrically with the screw hole in said member so that it can be accommodated in a circular recess in the wood for strengthening the connection of the bracket to the latter.

1,503,623. STRIP MOISTENER. JOHN BAUER, Detroit, Mich. Filed Jan. 12, 1922. Serial No. 528,854. 5 Claims. (Cl. 91—145.)

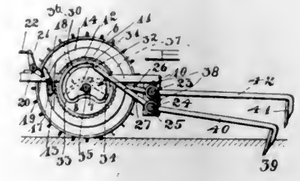


2. In a device of the character described, a main reservoir, a tank for supplying moistening liquid to the main reservoir, a tubular member supported by the main reservoir and communicating therewith, a wick in the tubular member, a moistening roll disposed above the wick and adapted to receive moistening liquid from the tubular member when the device is inverted, and manually controlled means for compressing the wick to cause liquid to pass therefrom.

1,503,624. FLOAT. CHARLES W. BAUMAN and FRANK GRUNER, Columbus, Ohio. Filed Sept. 29, 1923. Serial No. 665,520. 4 Claims. (Cl. 9—21.)

1. A float of the class described comprising a substantially U shaped body hollow throughout, a panel hingedly connected with the body, a latch having one end connected with the body and its other end detachably connected with the panel, as and for the purpose set forth.

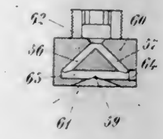
1,503,625. BEET-HARVESTING MACHINE. SAMUEL C. BEALE, Los Angeles, Calif., assignor to Horatio J. Forgy, trustee, Santa Ana, Calif. Filed Nov. 17, 1920. Serial No. 424,761. 9 Claims. (Cl. 55—108.)



1. A beet harvesting machine, comprising a pulling mechanism adapted to grasp a beet proportionate to that part which projects above the ground, means for adjusting the ratio of said proportion, a topping mechanism, and means for presenting the pulling mechanism in uniform relation to said topping mechanism, whereby the same proportionate amount of the beet will always be cut away.

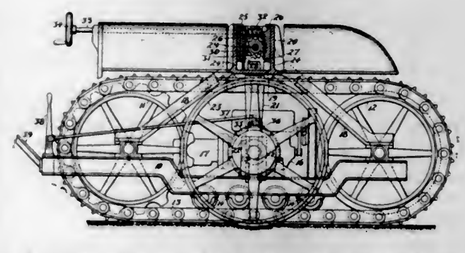
5. A beet harvesting machine provided with a conveyor, a plurality of beet pulling mechanisms mounted to reciprocate on said conveyor, each of said pulling mechanisms comprising a frame, a pair of oppositely disposed gripping members pivoted on said frame, a lever pivoted to said frame, a presser foot attached to said lever, means adjustably supported on said conveyor for moving said frame and lever at different ratios of speeds, and means supported on said conveyor for opening and closing said gripping members.

9. A beet harvesting machine, comprising a mechanism for pulling and severing a beet, means for adjusting said mechanism whereby said beet may be severed at any predetermined place, and means for operating said mechanism.



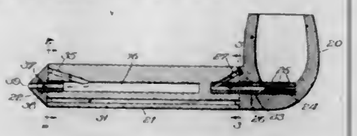
1,503,626. TRACTOR ATTACHMENT FOR FURROWING. MOSES BELSLEY, San Dimas, Calif. Filed Dec. 21, 1920. Serial No. 432,247. 6 Claims. (Cl. 97—55.)

1. In a furrowing device operative by its traction wheels, furrowing-shares for making longitudinal furrows in the direction of travel operative by the traction wheels, and other furrowing-shares for making furows at intervals crosswise between the first-named furrows operative by the traction wheels.



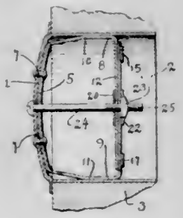
6. In a furrow making and check building machine of the class described, a carriage, a plurality of scrapers and an intermittent checking scraper carried by the carriage, means for automatically operating the scrapers to dig connections between the furrows and build checks across the furrows, and means, for normally retaining the intermittent checking scraper in a raised position while the furrows are being made, associated with said scraper operating means.

1,503,627. MEANS FOR ATOMIZING FUEL. HERMANN BENKERT, Harburg-on-the-Elbe, Germany. Filed Mar. 15, 1921. Serial No. 452,601. 2 Claims. (Cl. 299—143.)



1. A fuel nozzle for internal combustion engines having a straight transverse channel, a supply channel at each end of the transverse channel and a frusto-conical discharge opening in and intermediate the ends of said straight transverse channel, the vertical axis of said opening being substantially at right angles to said transverse channel.

1,503,628. TRACTOR. CLARENCE LEO BEST, San Leandro, Calif., assignor to The Holt Manufacturing Company, Stockton, Calif., a Corporation of California. Filed Jan. 12, 1921. Serial No. 436,642. 6 Claims. (Cl. 180—91.)

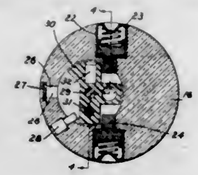


1. A tractor formed of a single centrally arranged endless flexible traction and supporting unit, a yoke extending transversely of the tractor across the top of the traction unit, a wheel at each end of the yoke to engage the ground for steering and stabilizing the tractor and means for raising and lowering the yoke to vary the pressure of its wheels upon the ground.

1,503,629. SMOKING PIPE. ALBERT GEORGE BLOMSTER, San Diego, Calif. Filed Jan. 30, 1920. Serial No. 355,109. 1 Claim. (Cl. 131—12.)

A pipe comprising a bowl and stem portion, both having threaded bores therein, and a nipple connecting said bowl and stem portion together, said nipple extending into said bowl and having a recess in the lower side thereof which is disposed in the bowl, the threads of said nipple being spaced from the threads in the bowl so as to provide smoke passages from the bowl portion into the nipple.

1,503,630. FLUE STOPPER. SIMON BOLLINGER, South Whitley, Ind. Filed Mar. 24, 1923. Serial No. 627,447. 1 Claim. (Cl. 126—319.)



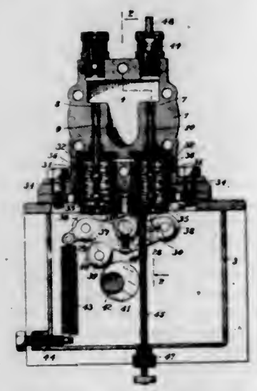
A flue stopper comprising a concavo-convex plate adapted to be arranged over one end of a flue opening, a longitudinal strip of metal having its intermediate part extended substantially the entire diameter of the plate and arranged parallel thereto and in contacting relation therewith, fastenings securing the intermediate part of the strip to the plate, the strip of metal being extended at substantially right angles to the plate to constitute abutments to engage the walls of the flue, and thence bent again at right angles to afford oppositely extending overlapping parts which extend substantially the entire length of each other, clips on one of the last mentioned parts and embracing the other, and a bolt passing through the plate, intermediate part of the strip and the last mentioned overlapping parts, and a nut threaded upon the bolt and adapted to be adjusted against the overlapping parts whereby to force the abutments into frictional contact with the walls of the flue.

1,503,631. PROCESS OF MAKING PUNGENT COMPOUNDS. DONALD B. BRADNER and MARY L. SHERRILL, Baltimore, Md. Filed May 7, 1923. Serial No. 637,369. 10 Claims. (Cl. 260—124.)

1. In a process of making pungent compounds, reacting guaiacol with a compound of the formula $RCONHCH_2X$ wherein R is an alkyl radical containing from 6 to 11 carbon atoms and X represents a simple radical which combines with a hydrogen atom of the aromatic group of guaiacol to form a substance readily separable from the pungent product.

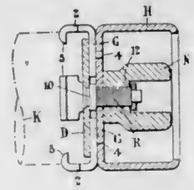
1,503,632. SAFETY PLUNGER FOR ARTILLERY FUSES. HAROLD MORGAN BRAYTON, Dover, N. J. Filed Apr. 29, 1924. Serial No. 709,873. 13 Claims. (Cl. 102—39.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)

1. A safety plunger for fuses including an approximately T-shaped rotor carried by the plunger and rotatably mounted with respect thereto, a firing pin depended from one wing of the rotor through the face of



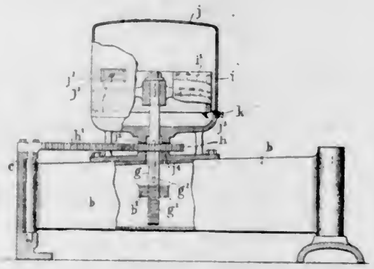
the plunger, a horizontally disposed recess formed in the other wing, and a locking pin slidably carried in the recess.

1,503,633. INDOOR GOLF GAME. VALLY P. BRUN, San Francisco, Calif. Filed Aug. 18, 1923. Serial No. 658,163. 2 Claims. (Cl. 265—20.)



1. A game apparatus including a pendulous member provided with a yielding surface adapted to receive the blow of a missile, a sheet suspended immediately in advance of the pendulous member with its side and bottom edges free and of an area greater than that of the yielding surface to extend beyond the edges thereof, a registering means, a flexible connection between the pendulous member and the registering means for operating the registering means in accordance with the movement in one direction only of the member by the impact of the missile therewith.

1,503,634. PUMP. MAX BUCHERER, Berlin-Reinickendorf-West, Germany. Filed June 23, 1922. Serial No. 570,421. 7 Claims. (Cl. 103—38.)



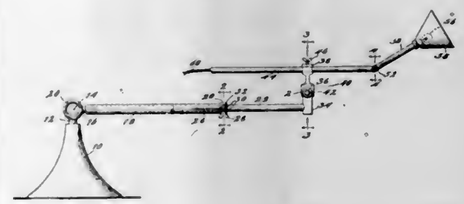
1. A pump comprising in combination, a pump casing, means for holding said casing under constant increased pressure, a piston movable relatively to the interior of said casing and means for causing said piston to convey liquid under pressure only during the latter part of its conveying stroke.

1,503,635. ADJUSTABLE HOLDER FOR GRIPPING THE ENDS OF SHORT RODS. WILLIAM FRANK BUTLER, London, England. Filed Nov. 15, 1922. Serial No. 601,190. 1 Claim. (Cl. 45—28.)

A device to grip and hold the ends of a rod, including adjustable arms, means to cause movement of said arms to and from the rod comprising a knurled cup H engaging the arms and forming a handle for the rod, a threaded stud R secured to a plate D and penetrating the cup H thereby clamping said arms between said cup and plate, and means N entirely within the cup member and threaded to the stud R for retaining the arms in the desired position.

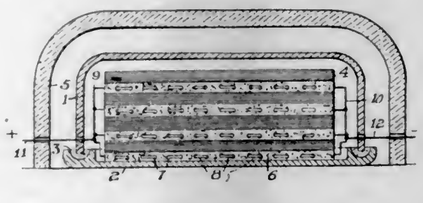
1,503,636. THICKNESS INDICATOR FOR WOODWORKING MACHINES. ALBERT COL, Paris, France, assignor to Societe Marqeol, Moulins (Allier), France, a Corporation of France. Filed Dec. 28, 1921. Serial No. 525,398. 3 Claims. (Cl. 33—172.)

1. A thickness indicating device for a work guide in wood-working machine-tools, comprising, a base fixed to the bed of the machine-tool, parallel arms pivotally connected to the ends of said base, a rule pivotally connected to the ends of said arms and parallel to the base, whereby to form an articulated parallelogram, the said rule being adapted to be engaged by the piece to be worked on, in combination with a nut secured to one of the said arms, screw-threaded spindle engaging said nut, a helically graduated drum secured upon said spindle, a casing carried by said arm and enclosing said drum, an index mark provided upon said casing and before which the graduations on said drum are movable, and means for transmitting the angular movements of the rule relatively to said arms into rotary and longitudinal movements of said spindle, for the purpose described.



1,503,637. COMBS USED IN THE TEXTILE ART. HOWARD D. COLMAN, Rockford, Ill., assignor to Edgar S. Nethercut, Evanston, Ill. Original application filed Sept. 10, 1917, Serial No. 190,501. Divided and this application filed Jan. 8, 1923. Serial No. 611,213. 6 Claims. (Cl. 28—54.)

1. A warping apparatus having, in combination, a warper and a creel, said creel comprising a plurality of columns of yarn mass supports, and the warper having a comb provided with teeth forming spaces which are divided into distinct sections, there being as many sec-

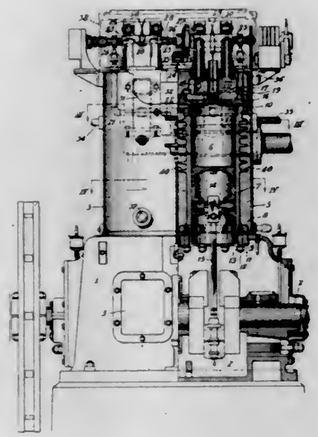


tions as there are columns of yarn mass supports, and each section containing as many spaces as there are yarn mass supports in a column.

1,503,638. ADJUSTABLE AUTOMOBILE LAMP. JOHN H. COOPER, Maywood, Ill. Filed Jan. 13, 1923. Serial No. 612,559. 1 Claim. (Cl. 240—68.)

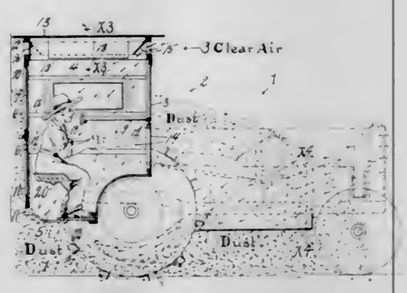
An adjustable automobile lamp comprising a base, a tube pivotally mounted on said base, a tube adapted to telescope said first-named tube, a head on the end of the second tube, a ball and socket joint in said head, a tube slidable in the universally mounted portion of said ball and socket joint, a cooperating tube pivotally mounted with respect to the tube mounted in the ball and socket joint member, and a lamp fixed on the end of said cooperating tube.

1,503,639. METHOD FOR ANNEALING SHEET METAL. OTTO H. CUNNINGHAM, Leechburg, Pa. Filed Sept. 25, 1922. Serial No. 590,298. 2 Claims. (Cl. 148—10.)



1. A process of annealing a pack of iron sheets which consists in heating the sheets in an enclosed space by applying electrical heating means in said space between the sheets of the pack.

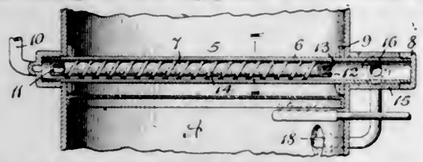
1,503,640. INTERNAL-COMBUSTION ENGINE. CHARLES E. CURTISS, Cleveland Heights, and HARRY L. ALLEN, Cleveland, Ohio, assignors to The Bruce-Macbeth Engine Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 21, 1921. Serial No. 523,840. 12 Claims. (Cl. 123—170.)



8. In an internal combustion engine, the combination of a crank-case provided with an opening at its top; a tank

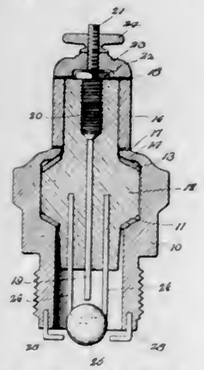
mounted upon said crank-case; an engine cylinder in said tank having a lower open end communicating with the

interior of said crank-case; and bolts accessible from within the latter for removably securing said cylinder in place in said tank.



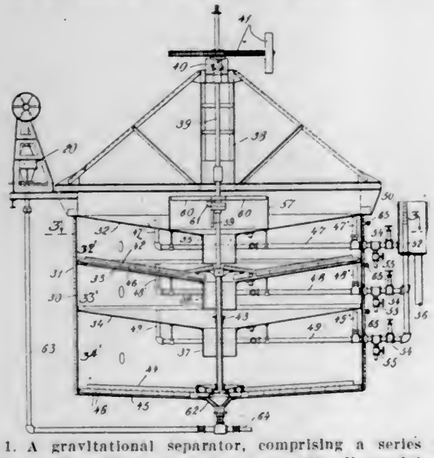
1,503,641. ART OF WORKING DUSTY FIELDS. CHARLES CASSAT DAVIS, Los Angeles, Calif. Filed July 24, 1920. Serial No. 398,737. 1 Claim. (Cl. 98—23.)

The combination of a tractor propelled agricultural appliance which in operation produces a cloud of dust; an enclosure on said appliance that is closed at the top, front, back and sides with the top extended above the dust level; air inlets and flaps at the top of the front, back and sides of the enclosure, said flaps being arranged perpendicularly on the inside of the enclosure and adapted to be operated by the wind to open one or more of the inlets inwardly, and by gravity and air pressure inside the enclosure to close the opposite flaps; and an air discharge outlet at the rear and through the bottom of said enclosure.



1,503,642. VAPORIZER. ALBERT F. DAYTON, Pleasanton, Calif. Filed Aug. 13, 1923. Serial No. 657,257. 4 Claims. (Cl. 158—53.)

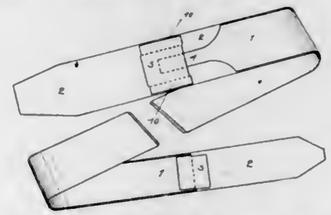
1. A vaporizer comprising an outer tube provided with a removable cap at one end and a liquid fuel intake at its opposite end, burners in communication with said tube and a mixer in said tube, said mixer being freely removable from the tube when said cap is removed, a spiral thread formed on the mixer and arranged with its windings in close engagement with the inner walls



of said tube, the said tube being open at one end and closed at its other end so as to constitute a gas retaining chamber.

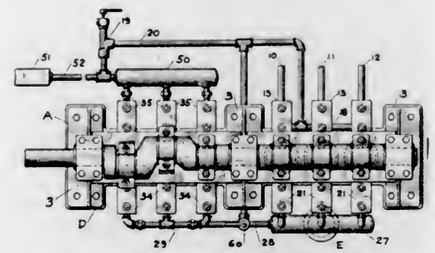
1,503,643. SPARK PLUG. ADOLFO DE CLAIRMONT, Toledo, Ohio. Filed Mar. 5, 1921. Serial No. 449,965. 3 Claims. (Cl. 123—169.)

1. A spark plug including a shell, an insulator carried thereby, a main electrode extending through the insulator, a spherical condenser suspended from the insulator below the lower end of said electrode in alinement therewith to intersect the plane of the lower end of the shell, the equatorial plane of the condenser being disposed above said first mentioned plane, and a ground electrode upon the shell, to cooperate with said condenser.



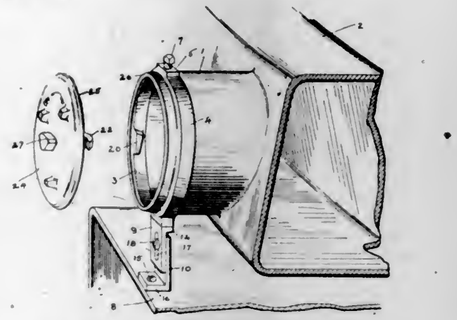
1,503,644. SUGAR MANUFACTURE. JOHN V. N. DORR, New Canaan, Conn., assignor to The Dorr Company, a Corporation of Delaware. Filed Apr. 16, 1920. Serial No. 374,312. 4 Claims. (Cl. 210—55.)

1. A gravitational separator, comprising a series of superposed settling chambers, a centrally disposed boot depending from the upper wall of each chamber but



stopping short of the bottom and communicating with the chamber, said boots forming a solids discharge path common to all of the chambers, means permitting the withdrawal of liquid from a plurality of uniformly spaced points near the top of each chamber, means permitting the discharge from the last chamber of said series of the accumulated solid material from all of said chambers, and a revolving sludge collecting mechanism having a vertically disposed shaft passing through said solids discharge path and provided with a series of radially disposed arms arranged in proximity to the bottoms of the chambers and adapted to move settled solid material across the bottom of each chamber towards said solids discharge path.

1,503,645. PHOTOGRAPHIC ROLL FILM. ARMAND FAES, Mortsel, near Antwerp, Belgium, assignor to Gevaert Photo Producten N. V., Vieux-Dieu, near Antwerp, Belgium. Filed Feb. 4, 1922. Serial No. 534,164. 2 Claims. (Cl. 95—9.)

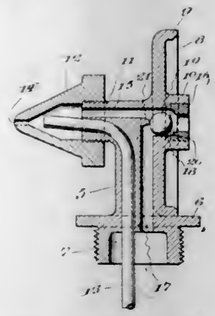


1. A photographic roll film in which the sensitized film is rolled on a spool at the same time as a band of protecting paper, the end of both the sensitized film and the protecting band being connected together in such a way that the protecting band and sensitized film may slide the one over the other, by providing a flap or tongue at the end of the sensitized film and slidably retaining this flap in position by means of a pocket forming element having its side edge portions connected to the side edge portions of the band of protecting paper.

1,503,646. EMULSIFYING APPARATUS. GEORGE L. FISH, Long Beach, Calif. Filed Mar. 1, 1923. Serial No. 622,105. 5 Claims. (Cl. 99—2.)

5. An emulsifying apparatus comprising a pumping unit, said unit embodying a plurality of cylinders of varying areas, means for delivering a plurality of liquids to the cylinders of the pumping unit, one liquid to each unit, means for delivering air to one cylinder, means for combining and mixing the air and the liquids after they are discharged by the respective cylinders of the pumping units to form an emulsion which is impregnated with air, means for subjecting said emulsion to a high pressure, and a spray valve connected with said means through which the impregnated emulsion under high pressure is released and the impregnated emulsion permitted to explosively expand when discharged.

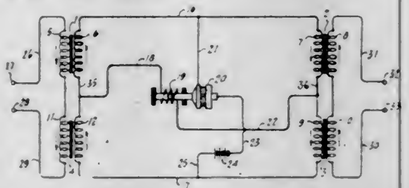
1,503,647. CLEAN-OUT FRAME AND CAP THEREFOR. CHARLES C. FRAUTZ and HAROLD F. PENNEY, Geneva, N. Y., assignors to Phillips & Clark Stove Co. Inc., Geneva, N. Y., a Corporation of New York. Filed Mar. 19, 1923. Serial No. 625,963. 5 Claims. (Cl. 126—99.)



1. In a clean out frame and cap therefor for furnaces, the combination of a furnace shell, a ring adapted to be placed in front of the clean out duct of the radiator of said furnace shell, a pair of brackets, one of said brackets being anchored to the bottom of said ring and the other of said brackets being anchored to said furnace shell, means for adjustably clamping the free ends of said pair of brackets together to hold said ring in place on the end of said clean out duct, a cap for said ring and means for clamping said cap to said ring.

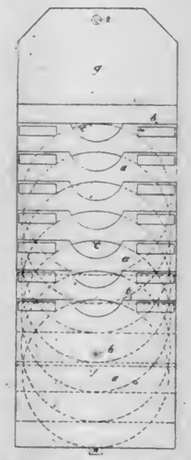
1,503,648. PROCESS FOR PRODUCING ALUMINUM CHLORIDE. FRANK W. HALL, Port Arthur, Tex., assignor to The Texas Company, New York, N. Y., a Corporation of Texas. Filed Mar. 15, 1920. Serial No. 365,861. 15 Claims. (Cl. 23—13.)

14. The process of making aluminum chloride that comprises heating aluminous material in the presence of a reducing agent and chlorin and withdrawing ash formed from the reaction chamber while the reaction is underway.



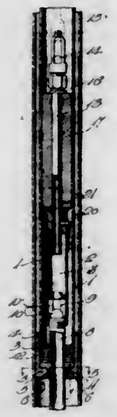
1,503,649. SPRAY NOZZLE. BENJAMIN HELLER, Chicago, Ill. Filed Apr. 5, 1922. Serial No. 549,744. 2 Claims. (Cl. 299—89.)

1. A spray-nozzle comprising a body having means at one end for attachment to a liquid receptacle, and provided at one side with a nipple and on the opposite side with means for attachment of a pump, said body also having an internal transverse air passageway the outlet end of which opens through the nipple and its inlet end opening through the side having the pump-attaching means, and also provided with a second air-passageway leading from the first-mentioned passageway and having its outlet end located at the end of the body having the receptacle-attaching means, a check



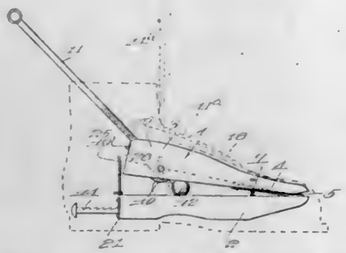
valve at the junction of the passageways, the inlet end of the first-mentioned passageway having a seat to receive said valve, said passageway having an enlargement forming a chamber in which the check valve is located, a rib formed in said enlargement at the junction of said passageways to limit movement of said valve in the direction of said second passageway and the outlet of said first mentioned passageway from said enlargement, to prevent closing of the same, a liquid delivery tube passing through the body and having its inlet end extending from the aforesaid end thereof, and its outlet end projecting from the nipple, and a cap mounted on said nipple over the projecting outlet end of the tube, said cap having a discharge orifice in line with the outlet end of the tube.

1,503,630. DUPLEX REPEATER. WILLIAM J. HERDMAN, Toronto, Ontario, Canada. Filed July 10, 1920, Serial No. 395,251. Renewed Dec. 26, 1923. 9 Claims. (Cl. 179—170.)



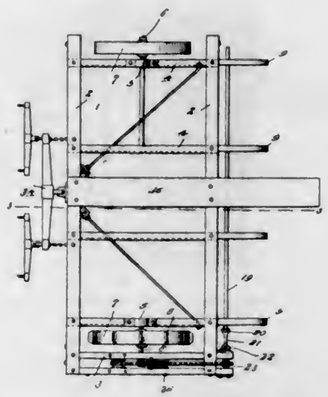
1. In a signal repeater, a line circuit to carry input energy, two local circuits adapted to receive electrical energy in unequal quantities respectively from said line circuit, a conductor common to said two local circuits and in which conductor the electrical energy in one circuit opposes the electrical energy in the other circuit, a detector in said common conductor and responsive to the surplus of electrical energy in one local circuit over the electrical energy in the other local circuit, an output source controlled by said detector, a local circuit for said output source; and a second line circuit associated with said last mentioned local circuit and adapted to carry output energy.

1,503,631. MEANS FOR STORING GRAMOPHONE RECORDS. GEORGE ARTHUR HOLT, Manchester, England. Filed Aug. 21, 1920. Serial No. 404,977. 1 Claim. (Cl. 129—15.)



A storage receptacle, comprising a series of superposed envelopes each having a back and front and being open at one end and closed at the other, and short strips of flexible material normally folded double, said strips being secured in pairs between the adjacent surfaces of the envelopes at points between their open and closed ends, said strips permitting each envelope to be slid longitudinally over the closed end of the envelope next beneath it, commencing with the envelope at the top of the series, so as to expose the front surface of each lower envelope at a point adjacent to its open end.

1,503,652. OIL PUMP. CHARLES W. HOWE and JESSE J. ROBERTSON, Ardmore, Okla. Filed June 21, 1923. Serial No. 646,965. 3 Claims. (Cl. 103—179.)

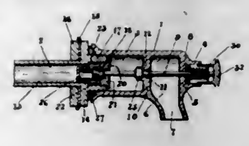


1. An oil pump element comprising a cup-like coupling adapted to be threaded on the lower end of a working barrel, and a standing valve carrying tube rising rigidly from and non-rotatable with respect to the bottom of said coupling, said coupling being adapted to contain packing rings to be clamped thereby against the lower end of the working barrel, rotation of said tube serving to thread said coupling tightly upon the working barrel to compress said packing rings.

1,503,653. SHOE-STRETCHING LAST. GRANVILLE R. HURT, Chanute, Kans. Filed Mar. 9, 1921. Serial No. 450,845. 8 Claims. (Cl. 12—128.5.)

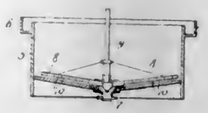
1. A shoe stretcher consisting of a pair of last members, means for forcing the toe ends of said members apart, said means consisting of a ball and screw bolt, means for holding the rear ends of said members together, the upper of said members having a longitudinal slot therein in which said bolt operates, a nut pivotally mounted in said slot through which said bolt is threaded, and a leaf spring connecting said members, one end of said spring being connected to the toe of the bottom of said members and the other end of the spring being connected to the other of said members inwardly of its toe.

1,503,654. WEED EXTERMINATOR. FRANCIS M. KELSO, Lind, Wash. Filed Oct. 21, 1922. Serial No. 595,935. 1 Claim. (Cl. 97—42.)



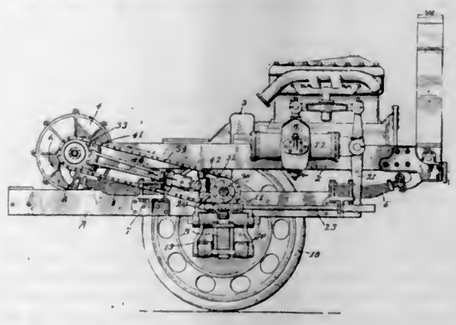
In a weed exterminator, a frame comprising front and rear bars and end bars, transverse channel irons extending across said frame and carried by said front and rear bars and projecting beyond said rear bar, axles journaled in said end bars and the adjacent transverse channel irons, ground wheels on said axles, respectively, curved sections carried by the rear ends of said channel irons, respectively, ground engaging teeth carried by the lower ends of said curved sections, each tooth comprising a body portion formed of a horizontal flange and a vertical flange and a block carried by said flanges, said flanges at the forward end of the tooth and the forward end portion of said block being formed to provide a penetrating prong or point.

1,503,655. FLUSH VALVE. DOMINIC LANDRO, Hazleton, Pa. Filed May 18, 1922. Serial No. 561,942. 3 Claims. (Cl. 4—57.)



1. A flush valve comprising a normally spherical elastic ball, a metallic cap of conical form bearing against and compressing the upper portion of the ball, and means for drawing the upper portion of the ball within the cap to cause it to assume the conical form of the cap, said cap having its lower edge extended slightly below the horizontal diameter of the ball and conforming to the spherical wall thereof to retain the ball within the cap.

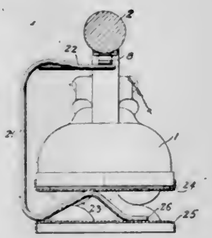
1,503,656. FAUCET. GEORGE R. LONG, Waterbury, Conn., assignor to Cordley & Hayes, New York, N. Y., a Corporation of New York. Filed Feb. 13, 1923. Serial No. 618,833. 2 Claims. (Cl. 251—137.)



1. In a push faucet a valve rod, an inwardly opening main valve carried by the valve rod, a spring acting on the valve rod to hold the valve to its seat, and a second valve carried by said valve rod in rear of the main valve adapted to cut off pressure of liquid from the tank against the main valve said second valve being so arranged that the pressure of the liquid from the tank acts against it at right angles to the direction of movement of the valve rod.

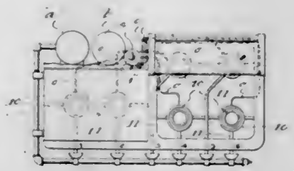
1,503,657. PROCESS OF MANUFACTURING SUGAR. PHILLIP M. MCHUGH, Denver, Colo., assignor to The Dorr Company, a Corporation of Delaware. Filed Apr. 26, 1920. Serial No. 376,477. 4 Claims. (Cl. 127—57.)

2. In a process of manufacturing sugar, the improvement in the separation of sugar juices from solid matter admixed therewith which comprises subjecting a mixture of sugar juice and solid matter in a stratum of substantially uniform depth to sedimentation and decantation in the course of which solid matter settles by gravity towards the bottom of the stratum and sugar juice is continuously decanted from near the top of the stratum, continuously feeding a mixture of sugar juice and solid matter to the stratum, continuously and mechanically moving the settled solid matter in proximity to the bottom of the stratum towards the center thereof, and continuously discharging solid matter from near the bottom of said stratum in the form of a thickened product containing about equal parts of solid matter and liquid.



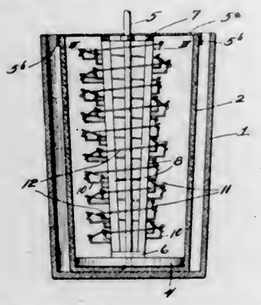
1,503,658. TRACTOR. WILLIAM W. MACDONALD, San Francisco, Calif. Filed June 23, 1920. Serial No. 391,096. 10 Claims. (Cl. 180—12.)

1. In a tractor of the character described a main frame, an axle supporting the same, a steering knuckle on each end of the axle, a traction wheel on each knuckle,



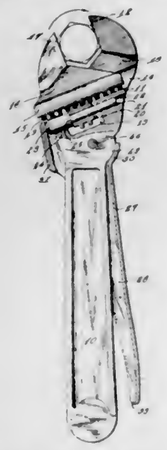
springs parallel with the axle and supporting the frame with relation to the axle, said springs permitting lateral rocking movement of the axle with relation to the main frame, and also permitting a slight turning movement of the axle with relation to the main frame, an internal gear on each wheel, a horizontal bearing on each knuckle, a shaft in each bearing, a pinion on each shaft and intermeshing with the adjacent internal gear, a horizontal bearing adjacent each end of the axle and positioned above the same, a shaft journalled in each of said bearings, means for driving each of said shafts, and a universal driving connection between each of said shafts and the shaft carried by the knuckles.

1,503,659. SADIRON. THOMAS J. MADIGAN, New York, N. Y. Filed Jan. 3, 1922. Serial No. 526,593. 3 Claims. (Cl. 219—23.)



1. In combination with an electrically heated iron having a normally open circuit controlling switch provided with an operating arm disposed below the handle in position to be closed by the fingers of the user when the handle is grasped, a heat insulated stand for the iron having means for engaging the switch when the iron is on the stand to close the switch and released from the switch when the iron is displaced from the stand, said means comprising a standard frictionally engaged with the stand and having a lateral arm extending beneath the handle when the iron is on the stand.

1,503,660. OIL STOVE. ALBERT MEADOWS and ALVIN G. SHERMAN, Detroit, Mich., assignors to Detroit Vapor Stove Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 8, 1923. Serial No. 623,620. 11 Claims. (Cl. 158—81.)

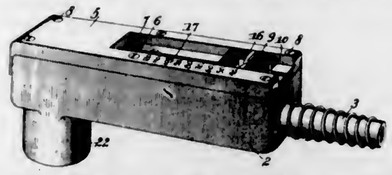


10. In a priming system for oil stoves, the combination of a storage tank, means therein for maintaining the level of the exposed liquid in said storage tank at a constantly low level, a distributing tank in communication with the bottom of the storage tank and in which the level of the fluid is the same as the exposed liquid in the storage tank, a plurality of distributing conduits for connecting the separate burners having communication with the interior of the distributing tank above the constant level line, and means for measuring a quantity of liquid out of the bottom of the distributing tank and lifting and selectively delivering it into any one of the distributing conduits.

1,503,661. SANCTUARY LAMP. BERNARD MÜLLER-THYM, Kansas City, Mo. Filed June 26, 1922. Serial No. 570,992. 8 Claims. (Cl. 67—36.)

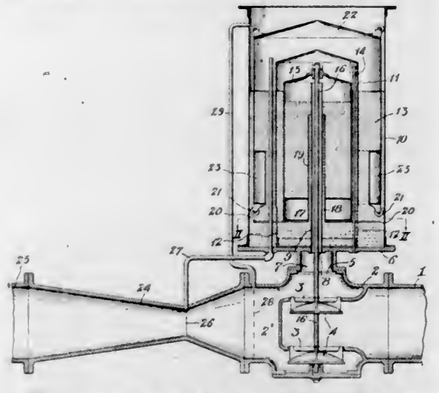
1. In a sanctuary lamp, the combination of a vessel containing oil, a wick support resting on the bottom of said vessel, a second wick support secured in a position above the surface of the oil in said vessel, and a wick connected at its opposite ends to said supports and extending in an inclined position with respect to the surface of the oil.

1,503,662. WRENCH. WILLIAM A. NORTON, Marshalltown, Iowa, assignor of three-fourths to Raymond P. Norton, Algona, Iowa. Filed Dec. 6, 1921. Serial No. 520,337. 2 Claims. (Cl. 81—165.)



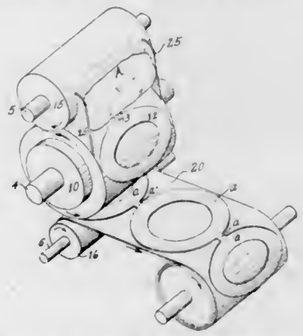
1. A wrench comprising a handle having a head and a fixed jaw, the said head being provided with an opening, one edge of said handle being provided with an outwardly extended curved portion, a movable jaw slidably mounted in said head, a lever pivoted to the said head having a portion designed to engage the said curved portion of said handle, said curved portion being concentric to the pivot of said lever, and means actuated by said lever for moving said slidable jaw member toward or from the said stationary jaw member.

1,503,663. AIR CHUCK. JAMES W. PRICE, Tulsa, Okla., assignor to Tulsa Invention Company, Tulsa, Okla., a Corporation. Filed Nov. 16, 1922. Serial No. 601,377. 4 Claims. (Cl. 137—53.)



2. An air chuck comprising a body having an upstanding wall defining a chamber, a head having a bore communicating with the chamber and having a relief orifice leading from the bore, a piston in the bore covering the orifice, a lever pivoted in the chamber engaging one end of the piston, a lid mounted upon said wall to complete

the chamber, said lid having a pair of slots, a thumb piece slidable in one slot and having a shank extending

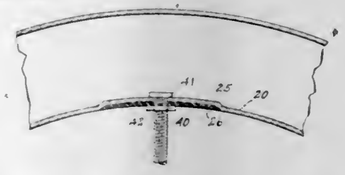


through the other into the chamber, and means carried by the shank slidable along the lever to vary the pressure upon said piston.

1,503,664. GOVERNOR FOR CONTROLLING GAS FLOW. RALPH B. RICHARDSON, Peoria, Ill., assignor to The Gas Machinery Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 16, 1922. Serial No. 594,936. 3 Claims. (Cl. 50—10.)

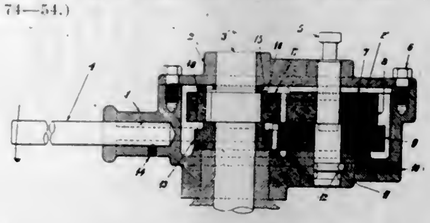
1. The combination of a gas main; a static governor for said main; an auxiliary governor including a movable member having a sealed chamber; and means controlled by the dynamic effect of the gas flowing through said main for producing a differential pressure upon opposite sides of the chamber's walls, whereby said member may be actuated to engage said static governor and oppose its reducing action.

1,503,665. METHOD OF AND APPARATUS FOR MAKING ANNULAR SHEETS OF RUBBER. FRED THOMAS ROBERTS, Cleveland, Ohio. Filed Dec. 29, 1919. Serial No. 348,096. 5 Claims. (Cl. 18—56.)



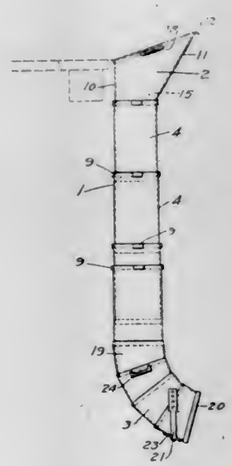
1. The method of producing annular sheets and thickening them, comprising passing raw rubber between calendering rolls, one of which is formed with connected cavities, passing between the forming roll and a coacting roll a strip of canvas carrying a thin sheet of raw rubber, the formed concatenated annui being caused to adhere to such thin sheet, and winding up the resultant produced as a unit.

1,503,666. MOLD FOR MAKING HOLLOW ARTICLES OF PLASTIC MATERIAL. FRED THOMAS ROBERTS, Philadelphia, Pa. Filed July 9, 1921. Serial No. 483,404. 21 Claims. (Cl. 18—42.)



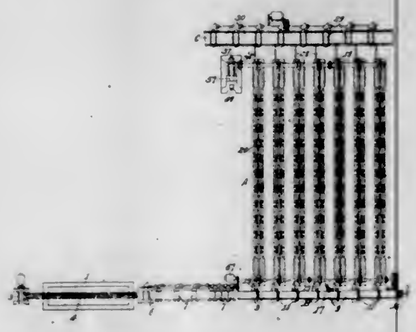
1. A mold of the class described, comprised substantially of a mold holder having a base plate and a series of individual cylindrical mold members having mold cavities in one end thereof and having projecting edges surrounding the cavities, said members being seated in cylindrical openings in the mold holder and having their extreme ends opposite the cavitary ends engaging the base plate, whereby adjustment of the individual members may be made to position said edges at a common height from the base of the mold holder.

1,503,667. METHOD OF MAKING HOLLOW RUBBER ARTICLES. WILLIAM E. ROBERTS, Andover, Mass. Filed Dec. 29, 1919. Serial No. 348,094. 6 Claims. (Cl. 154—14.)



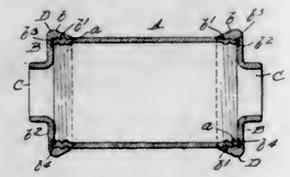
6. The method of making pneumatic tubes for vehicle tires comprising forming a tubular member as a closed body, applying a patch to the exterior thereof while the body is uncured, vulcanizing the tubular member and patch with the patch and adjacent portion of the tubular member forced by internal fluid pressure against a surface adapted to cause the patch to seat in an inwardly depressed portion of the tubular member, and inserting a nipple through the patch and tubular member.

1,503,668. ARBOR PRESS. BERNARD P. SCHILTZ, Cleveland, Ohio, assignor to The P. A. Geier Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 21, 1920. Serial No. 418,458. 6 Claims. (Cl. 74—54.)



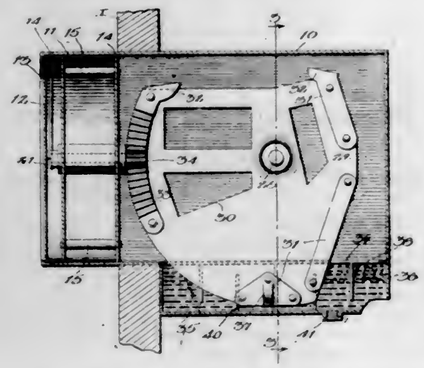
1. In actuating mechanism of the class described, the combination with a driving pinion associated with a plunger, of an actuating gear therefor, a stationary gear, a reduction gear meshing with the latter, connecting means for driving the actuating gear from the reduction gear and means whereby the power to the mechanism may be applied directly without reduction, substantially as set forth.

1,503,669. TELESCOPIC SIDE PORT LOADING CHUTE. LOUIS H. SIMON, Seattle, Wash. Filed Aug. 21, 1923. Serial No. 658,630. 5 Claims. (Cl. 193—30.)



1. In a chute a series of telescoping sections each of said sections being larger than the preceding section; means for stopping the outward movement of the sections; other means for stopping the inward movement of the sections; a hopper at the upper end of the upper section; a curved section at the lower end of the lower section; a bail on the lower section by which it may be held; and a means projecting from the upper section by which it may be supported.

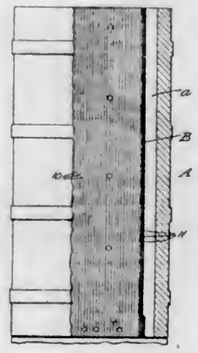
1,503,670. SHEET-BAR-HANDLING MECHANISM. WILLIAM J. SROOP, Wheeling, W. Va. Filed May 13, 1922. Serial No. 560,587. 15 Claims. (Cl. 80—42.)



1. A sheet-bar handling mechanism comprising a transfer table, means for delivering sheet-bars in a lengthwise direction to said table, a cooling bed having one end located adjacent to said table, rotating means for shifting bars laterally from said table to said cooling bed, said bed comprising a plurality of parallel traveling endless conveyors, a carrying-off table located adjacent to the opposite end of said cooling bed and adapted to receive said bars from the latter and to transport said bars to a piling point, and means for advancing the conveyors of said cooling bed intermittently.

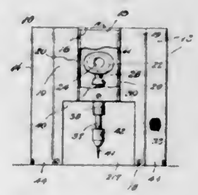
1,503,671. DRUM FOR SPINNING MACHINES. WILLIAM J. TALLMAN and CHARLES J. BACON, Buffalo, N. Y., assignors to Dupont Fibersilk Company, Tonawanda, N. Y. Filed Jan. 17, 1924. Serial No. 686,724. 6 Claims. (Cl. 242—124.)

1. A spinning machine drum for use in the manufacture of artificial silk or the like, including a hollow, open-ended glass cylinder, and protective end pieces made of material which is not readily broken and held on the open ends of said cylinder and having parts extending radially beyond the periphery of said cylinder, and parts extending axially beyond the ends of said cylinder and upon which said drum may be supported in upright positions.



1,503,672. GRADE METER. FRED WM. THOMPSON, Palms, Calif., assignor of one-half to Burt C. Hunnicutt, Los Angeles, Calif. Filed Apr. 15, 1921. Serial No. 461,561. 5 Claims. (Cl. 33—220.)

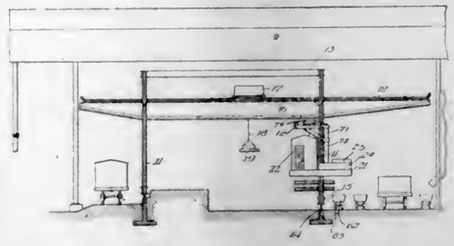
1. In a grade meter, a casing, an indicator including a chart, a pointer coacting with the chart and a rotatable shaft carrying the pointer, gravity control means for governing the indicator including a pivoted control plate, motion transmission means between the plate and the shaft including a segmental gear fixed to the plate and a pinion fixed to the shaft and meshed with the segmental gear, means for retarding or dampening the action of said gravity control plate comprising a reservoir, having fluid therein in which a portion of said control plate is immersed and operates, and stop lugs carried by the control plate and engageable with the casing for limiting the motion of the control plate in either direction.



1,503,673. DRAINAGE PLATE FOR EXPRESSING PRESSES. CHARLES B. UPTON, Piqua, Ohio. Filed Feb. 7, 1922. Serial No. 534,820. 10 Claims. (Cl. 100—50.)

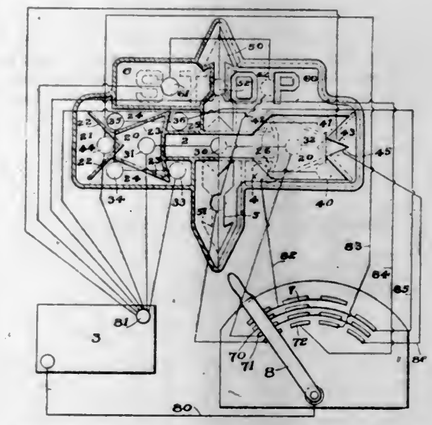
1. A side lining plate for press cages having spaced vertically disposed drainage slits in the side thereof which faces the material being pressed, a plurality of horizontally extending open faced grooves in the opposite side of the plate and each connecting with a plurality of said slits, whereby solid material forced through said slits passes out of the open faces of said grooves transversely of said grooves in the form of thin tapes, and parts at said opposite side of said plate for causing said tapes to break up as they pass out of said grooves.

10. A new article of manufacture for use as a press plate consisting of a unitary body having in its under face a plurality of spaced relatively wide grooves said body having a plurality of relatively narrow spaced slots leading in from the top face of the body and communicating with the grooves, the slots being arranged to extend across the body substantially transversely of the grooves.



1,503,674. PERFORATING MACHINE. EDWARD URDANG and HARRY H. LE VITA, New York, N. Y. Filed Sept. 24, 1923. Serial No. 664,441. 5 Claims. (Cl. 164—89.5.)

1. In a perforating machine, the combination of a motor, a reciprocating tool bar remote from the motor, an actuating member extending between the motor and the bar for reciprocating the latter from the motor, a casing inclosing the motor and also said actuating member and in which the end of the actuating member remote from the motor is operatively supported, said motor casing serving as a hand grasp and as a supporting means for the device in operation, and means formed on the sides of the motor casing serving as guiding means in connection with a straight edge arranged substantially in alignment with the side of the reciprocating tool bar, substantially as set forth.

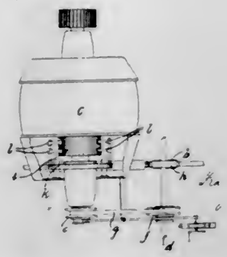


1,503,675. CRANE. FREDERICK K. VIAL, La Grange, Ill., assignor to Griffin Wheel Company, Chicago, Ill., a Corporation of Massachusetts. Filed Dec. 22, 1919, Serial No. 346,533. Renewed June 28, 1924. 19 Claims. (Cl. 214—2.)

1. In an apparatus of the character described, the combination of a gantry crane frame, a crane movable on said frame, a dumping mechanism carried on the frame and adapted to receive material from said crane, a fixed reservoir bin carried on the frame adjacent said dumping mechanism and also adapted to receive material from said crane, and a scale mechanism associated with

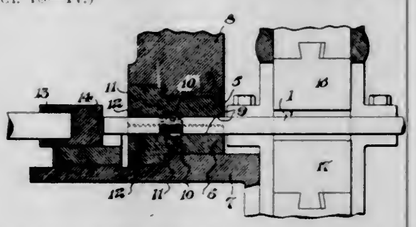
said dumping mechanism and adapted to weigh the material delivered onto said dumping mechanism from said crane or from said bin.

1,503,676. AUTOMOBILE TRAFFIC SIGNAL. CHARLES H. VOLL, Seattle, Wash. Filed Sept. 5, 1922. Serial No. 586,259. 1 Claim. (Cl. 177—329.)



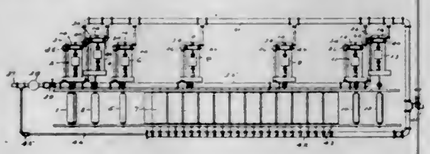
A traffic signal for automobiles comprising a signal box having partitions extending from the face thereof inwardly and dividing it into a central horizontal chamber outlining the shaft of a conventional arrow, right and left chambers one at each end of said central chamber outlining a conventional arrow head having its tip cut off by a re-entrant point which forms the re-entrant of the angle at the wing end of a conventional arrow, two chambers at opposite sides of each arrow head complementally with said arrow head outlining the wings of a conventional arrow, and a chamber at each end having a window outlining the tip of each arrow head, illuminating means in said chambers and means for selectively controlling said illuminating means to illuminate only the central chamber and the right and left chambers or to illuminate the chambers which form an arrow pointing in either direction.

1,503,677. CONTROLLING MEANS FOR CONTROLLING A SERIES OF ELECTRIC MOTORS. FRANK GREAVES WARBURTON, London, England. Filed Mar. 26, 1920. Serial No. 368,923. 2 Claims. (Cl. 172—293.)



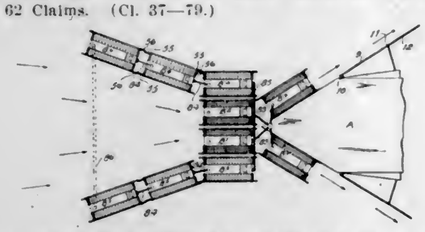
1. In a system of motor control for the drive of the rolls of paper machines and the like, a plurality of alternating current commutator motors with brushes engaging therewith, a master control member comprising a shaft extending lengthwise of the drive and adjacent

each of said motors, a differential train of gearing interposed between said master control member and each of the motors to be controlled, said differential gearing including a worm rotatable with and axially movable on said shaft, a sleeve axially movable on said shaft, a rack



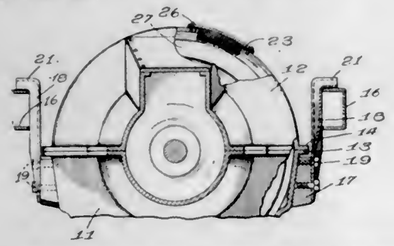
on said sleeve, a pinion supporting the brushes of each motor to be controlled, said pinion meshing with said rack, and a change speed device interposed between one side of the differential train and its driving member, substantially as and for the purpose set forth.

1,502,678. APPARATUS FOR MAKING DRILL STEELS. WADE H. WISEMAN, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Feb. 10, 1917. Serial No. 147,809. 8 Claims. (Cl. 78—17.)



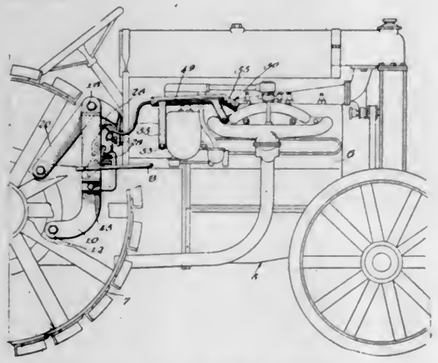
2. In combination, a pair of dies each having a longitudinally extending steel clamping channel therein, a similarly arranged steel receiving passage and a laterally extending pocket connecting the ends of said channels, and means for upsetting into said pocket steels clamped between said dies, said dies being operative to clamp a steel within said clamping channel and hold the same against longitudinal movement during the entire period of upsetting thereof.

1,503,679. PAPER-MACHINE DRIVE. GEORGE S. WITHAM, Jr., Hudson Falls, N. Y. Filed Sept. 19, 1923. Serial No. 663,699. 17 Claims. (Cl. 92—38.)



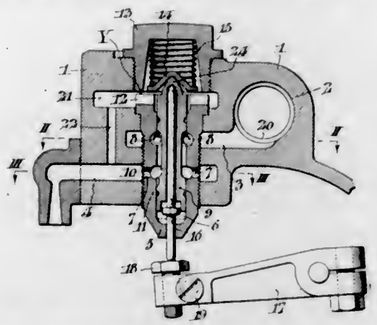
1. The combination with a machine comprised of a plurality of co-operating but independently driven units, of means for supplying a heated fluid under pressure to parts of the machine for heating the same, and a motive unit connected to and adapted to drive each of said machine units, said motive units being actuated by and reducing the pressure of said heating fluid before it is conducted to the machine and used for heating purposes.

1,503,680. DREDGING SYSTEM. CARL J. BAER, St. Louis, Mo. Filed Nov. 29, 1922. Serial No. 603,904. 62 Claims. (Cl. 37—79.)



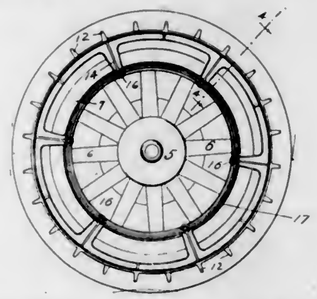
1. The method of forming a channel in a bed of running water, which consists in laterally confining the water to a certain path, and in simultaneously scraping the surface of said bed within the confines of said path.

1,503,681. TRANSMISSION HOUSING AND SUPPORT THEREFOR. THOMAS A. BARKER, Yatesville, Ga. Filed Jan. 2, 1923. Serial No. 610,305. 2 Claims. (Cl. 180—64.)



1. The combination with the longitudinal frame members of an automobile and the transmission housing thereof; of means to support the transmission housing from said longitudinal frame members comprising distance blocks fixedly secured to the sides of the housing and having their outer surfaces substantially vertical, hangers each having a vertical leg bearing at its lower portion against the outer surfaces of the respective distance blocks, and a horizontal leg extending over the top of the longitudinal frame member, and means for detachably securing said hangers to said frame members and distance blocks.

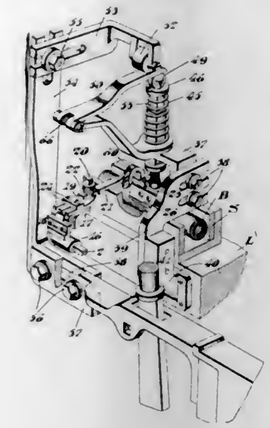
1,503,682. AUTOMATIC CLUTCH-RELEASE DEVICE. FRANK Y. BOYRIE, Hilo, Territory of Hawaii. Filed Sept. 8, 1923. Serial No. 661,686. 5 Claims. (Cl. 180—82.)



1. An automatic clutch release comprising a supporting member having means whereby the same may be secured to a tractor, a latch pivoted to the supporting member and having a notch, and a spring partially received in said notch and adapted to engage the clutch pedal of the tractor to depress the same.

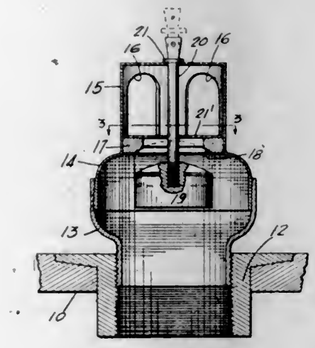
1,503,683. CONTROLLING VALVE FOR ENGINES ACTUATED BY STEAM OR OTHER MOTIVE FLUID. LEWIS A. DARLING, Philadelphia, Pa., assignor to Electric Service Supplies Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 19, 1918. Serial No. 267,464. 21 Claims. (Cl. 251—75.)

1. The combination of a casing having overlapping isolated passages arranged in different planes and an opening intersecting said passages; a valve mounting structure in said opening comprising a sleeve held firmly seated and fixed by screw threaded engagement of said structure with said casing, said sleeve having ports which communicate with the aforesaid passages in the casing; a valve body longitudinally movable in said sleeve and cooperating with said ports to control the passage of fluid therethrough; and yielding means mounted in said valve mounting structure whereby said valve body is normally urged in one direction in said sleeve.



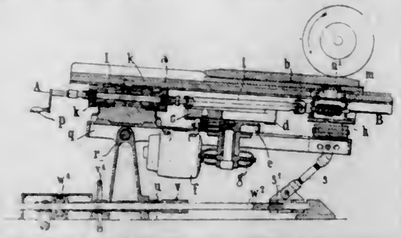
1,503,684. AUXILIARY TRACTION-WHEEL RIM. HUGH B. FOLEY, Minneapolis, Minn. Filed Oct. 13, 1920. Serial No. 416,728. Renewed Jan. 2, 1924. 6 Claims. (Cl. 301—40.)

3. The combination with a vehicle wheel, of inside and outside traction rims having arms projecting radially inward therefrom, said arms having integral laterally offset lugs engageable with the wheel rim, and bolts connecting the arms of said outside and inside rims and clamping said rims to said wheel, the arms of said outside rim being rigidly connected by a tie-ring cast integral therewith.



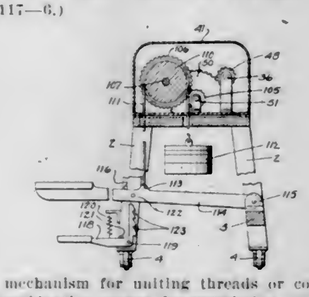
1,503,685. FEELER MECHANISM FOR LOOMS. HENRY H. GOVE, Biddeford, Me.; Charlotte M. Gove administratrix of said Henry H. Gove, deceased. Filed June 26, 1920. Serial No. 391,920. 9 Claims. (Cl. 139—272.)

1. In a loom having power operated means for automatically effecting a predetermined change therein, a caliper feeler mounted for engagement with the bobbin in the running shuttle, mechanism for moving said feeler downwardly into the top of the shuttle box into engagement with said bobbin and out of engagement therewith



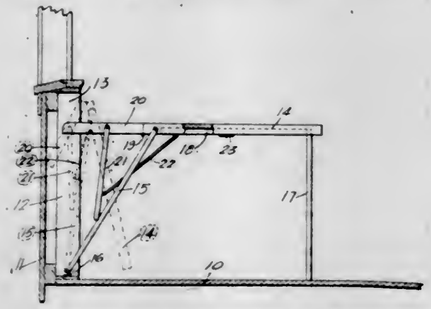
again, and an actuator for said means pivotally connected with said feeler and dependent for its movement into operative position upon a substantial increase in the downward movement of said feeler when the filling on said bobbin reaches a point of critical exhaustion.

1,503,686. FLOAT VALVE. NICHOLAS GRILICH, Los Angeles, Calif., assignor of one-half to Henry E. Fletcher, Gila Bend, Ariz. Filed Aug. 3, 1921. Serial No. 489,422. 1 Claim. (Cl. 137—104.)



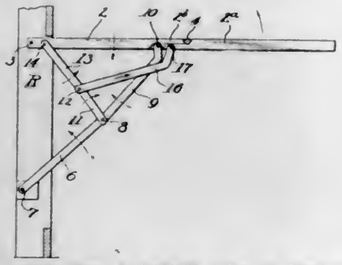
A float valve construction comprising the combination with a watering trough having a central opening, of an internally threaded nipple mounted in the central opening, a supply pipe connected to the nipple, a bowl-shaped member screwed down into the nipple and having an open internally threaded upper end, a bell-shaped cap screwed into the upper end of the bowl-shaped member and having a straight upper portion with side openings, a valve seat mounted in the lower part of the straight portion below the openings, a disk valve adapted to fit the valve seat, a solid stem connected to the disk valve and extending upwardly through a bearing above the valve seat and through a second bearing above the openings, a flexible member connected to the upper end of the stem, a float connected to the upper end of the flexible member, and a flange upon the upper end of the stem above the bearings to limit the downward movement of the valve.

1,503,687. APPARATUS FOR GRINDING, ABRADING, OR POLISHING METAL AND OTHER SURFACES. HENRY JAMES HUNT, London, England. Filed Mar. 21, 1921. Serial No. 454,027. 17 Claims. (Cl. 51—240.)



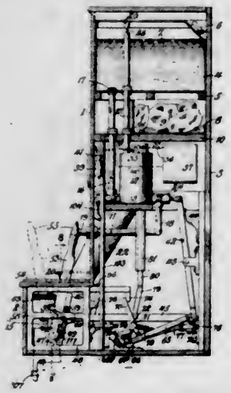
1. Apparatus for grinding or polishing the surface of a work-piece comprising a work-holder, a grinding or polishing element fixed in space in relation to said work-holder, mechanical means for oscillating the work-holder past the grinding element in the plane of the surface to be treated and means actuated by said oscillating means for automatically and simultaneously feeding the work also in the plane of its surface so that successive portions of the surface will be uniformly treated.

1,503,688. MACHINE FOR UNITING THREADS OR CORDS. WILLIAM H. PEARSON and TIMOTHY J. KELLY, Passaic, N. J., assignors to Brighton Mills, a Corporation of New Jersey. Original application filed Apr. 12, 1921, Serial No. 460,725. Divided and this application filed Dec. 1, 1921. Serial No. 519,259. 16 Claims. (Cl. 117—6.)



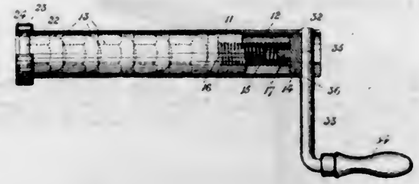
1. A mechanism for uniting threads or cords, including in combination means for untwisting and retwisting the threads, workman operated means for operating said means in one direction for untwisting the threads, and an energy storing device, in which energy is stored by the operation of the said means for the untwisting operation, for operating said means in the other direction for retwisting the threads.

1,503,689. TABLE. AUGUST H. KROSCHEL, Los Angeles, Calif. Filed June 20, 1921. Serial No. 478,964. 4 Claims. (Cl. 45—51.)



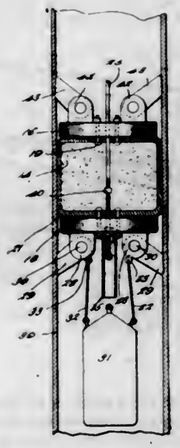
1. In combination, a table composed of inner and outer members hinged to each other, supporting members having their lower ends pivotally mounted and their upper ends pivotally connected to the sides of the outer table member, and spring held braces pivotally connected to the sides of the inner table member and bearing at their lower ends upon the intermediate portions of said supporting members.

1,503,690. SELF-LOCKING HINGE. AUGUST H. KROSCHEL, Los Angeles, Calif. Filed May 18, 1923. Serial No. 639,935. 3 Claims. (Cl. 45—51.)



1. In combination, a foldable table or ironing board structure including a pivotally supported, inner section and an outer board section hinged to the outer end of the inner section, a pair of toggle links at each side of the inner section and attached to the outer end thereof and attached pivotally to primary supports below the pivoted end of the inner section, pairs of brace links connected to the inner end of the inner section and to the intermediate pivots of the toggle links, and actuating links connected to the intermediate pivots of the brace links and to the outer board section so as to be operated thereby to disalign the extended links when the board is folded from the horizontal position.

1,503,691. DISPENSING APPARATUS. WILLIAM R. LOVE, Armour, N. C. Filed Oct. 28, 1919. Serial No. 334,010. 13 Claims. (Cl. 225—21.)

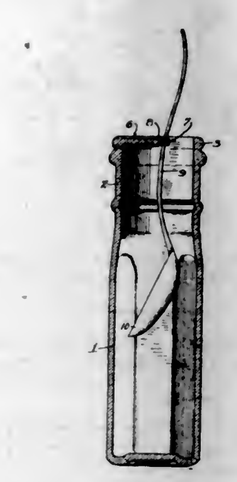


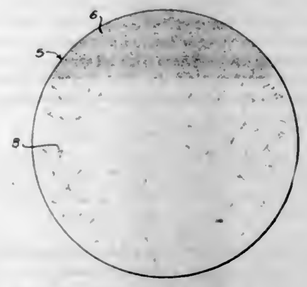
1. In a dispensing apparatus for liquids, a reservoir for the liquids, a measuring receptacle for the liquid, a pipe for the inflow of liquid from the reservoir to the receptacle, a pipe for the discharge of liquid from the receptacle to a point of disposal, mechanically connected spaced valves for and individual to the inlet and outlet of the measuring receptacle, manually operable means accessible to a customer for operating the valves, means between the accessible manually operable means and the valve including a pull rod and lever, full-stroke means having a link member connected to the pull rod, a latch having one member carried by the link, and another member carried by the pull rod, and a fixed throw-off in the path of that member of the latch carried by the link.

1,503,692. MAGAZINE SPANNER. WILFRID JUSTIN MCCARTHY, Kenilworth, England. Filed Aug. 15, 1923. Serial No. 657,548. 4 Claims. (Cl. 81—125.)

1. A magazine spanner comprising in combination a tube having one end thereof formed as the acting end of a spanner, lengths of wire disposed within the walls of the tube and having their central portions projecting within the bore of said tube, an annular spring surrounding said wire lengths and abutting their outer extremities and means for positioning said spring relative to said wire lengths.

1,503,693. WELL STOPPER. GEORGE H. MCLEAN, Tampico, Mexico. Filed May 24, 1923. Serial No. 641,200. 14 Claims. (Cl. 166—13.)



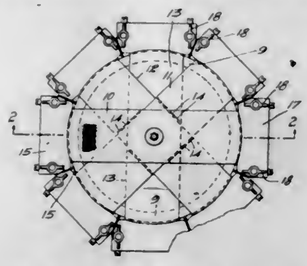


2. A well packer comprising a pair of disks, a yieldable packing element arranged between the disks and connected thereto, pivoted pawls connected to said disks and adapted for engaging the wall of the well whereby to anchor the packing element, and a weight connected to said stem and to the lower pawls for urging the lower pawls outwardly into engagement with the wall of the casing whereby to permit the expansion of the packing element.

1,503,694. BOTTLE. FRANK G. MCPHERSON, Beaver Falls, Pa. Filed Apr. 19, 1923. Serial No. 633,115. 5 Claims. (Cl. 215—1.)

1. A bottle having at its mouth an integral substantially horizontal wall or partition extending partially across the same from one side to restrict the outlet, said partition being arranged transversely of the neck of the bottle and spaced from the other edge of the neck, so as to leave a space for the insertion and support of a spoon in a substantially upright position.

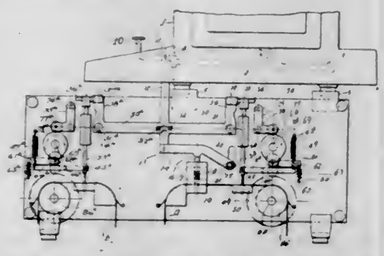
1,503,695. PROCESS OF TREATING GLASS. FRANK G. MCPHERSON, Beaver Falls, Pa. Filed June 28, 1923. Serial No. 648,323. 5 Claims. (Cl. 91—67.9.)



1. The process of treating glass, which consists in coating portions of its surface with a liquid having a high degree of transparency, then treating it by impression or contact before it is dry to remove the gloss, and then allowing the same to dry.

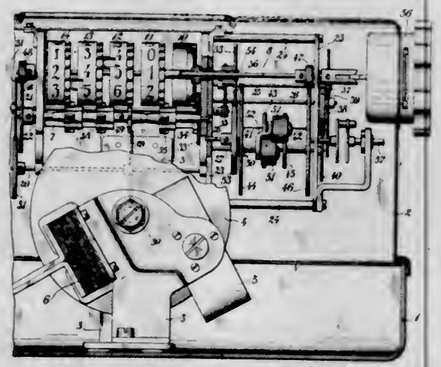
5. The process of treating glass having a frosted surface which consists in applying a coating to its surface, then impressing the same before it is dry with a textile fabric, and then allowing it to dry.

1,503,696. DIAPHRAGM. CHARLES MESSICK, Brentwood, N. Y. Filed Jan. 19, 1918, Serial No. 212,568. Renewed Sept. 13, 1920. Serial No. 410,007. 3 Claims. (Cl. 181—32.)



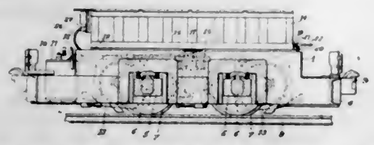
1. A diaphragm structure including a stationary peripheral stretching frame and a vibratory portion mounted

concentrically therein, said vibratory portion being tensioned at the frame along many radii and having sub-



stantially the same cross-sectional area under radial tension at all imaginary concentric sections thereof.

1,503,697. AUTOMATIC TYPEWRITING MACHINE. TASSO D. METROPOLE and TASSOS M. COTTAKIS, New York, N. Y. Filed Mar. 15, 1922. Serial No. 543,875. 14 Claims. (Cl. 197—20.)



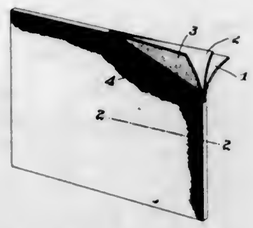
1. An automatic typewriting machine comprising a plurality of typebar levers, a plurality of actuating levers respectively connected to the typebar levers, an actuator for said levers, an interponent movable into and out of position to cause the actuator to move the actuating levers, means for presenting and feeding a controller strip, and means upon which the interponent is mounted for finding a perforation in the controller strip and thereby moving the interponent into actuating position.

1,503,698. PREPAYMENT METER. JOSEF METTLER, Zug, Switzerland, assignor to the Firm Landis & Gyr A.-G., Zug, Switzerland. Filed Apr. 10, 1922. Serial No. 551,398. 7 Claims. (Cl. 235—91.)

1. In a device on prepayment meters for gas, water, electricity, or similar commodity with two cyclometer counting trains turning freely on a common spindle, of which counting trains one indicates the total number of coins inserted and the other indicates the number of coins still unused, a spindle carrying loosely mounted décade wheels, this spindle controlling the first mounting train (actuated by the coin-receiving device) of the prepayment meter, and a spindle carrying a differential gear controlling the second counting train.

1,503,699. ELECTRIC LOCOMOTIVE. LAWRENCE H. MICHAELIS, Columbus, Ohio, assignor to The Jeffrey Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed June 16, 1919. Serial No. 304,587. 15 Claims. (Cl. 105—50.)

1. In an electric locomotive, the combination with a main frame, of wheels to support said frame, a motor within the frame connected with said wheels to drive them, a storage battery to supply electric current for the actuation of said motor, a box for said battery normally supported above said motor upon said main frame and adapted to rotary movement thereon to afford convenient access to said motor and means for guiding the box during such movement.



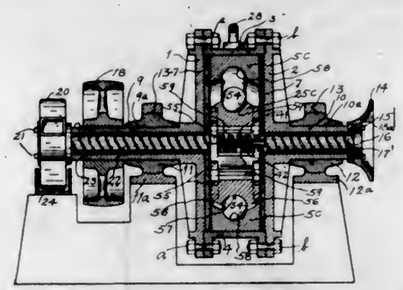
1,503,700. WINDOW SHADE. THOMAS JEFFERSON MOORE, Longview, Tex. Filed Aug. 5, 1921. Serial No. 490,010. 3 Claims. (Cl. 156—27.)

2. In a device of the character described, a frame constructed of a single piece of metal and including a cross bar, outwardly extending arms at the ends of the cross bar, coils at the ends of the arms presenting guide eyes and depending slide rods extending from the coils and having offset ends, and a slide hanger constructed of a single piece of metal and adjustably mounted on the frame and including a cross bar extending between and slightly beyond the slide rods, angular arms at the ends of the last-mentioned cross bar and embracing the slide rod and brackets depending from the angular arms.

1,503,701. PATCH AND METHOD OF MAKING THE SAME. HAROLD A. MORTON and MARION M. HARRISON, Akron, Ohio, assignors to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed May 14, 1921. Serial No. 469,489. 4 Claims. (Cl. 154—2.)

1. The hereindescribed method of forming a sheet of patching material which consists in superimposing on each other a plurality of layers of rubber compound,

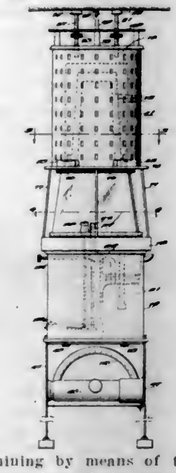
one outer layer containing neither sulphur nor accelerator, the other layers containing respectively an accelerator and sulphur, the proportion of sulphur and accelerator being balanced so as to be just sufficient to effect



vulcanization of said last two layers and their union by vulcanization to the first named layer, leaving said first named layer unvulcanized, and thereafter effecting such vulcanization.

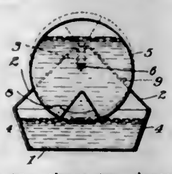
1,503,702. RUBBER VULCANIZATION AND PRODUCT THEREOF. HAROLD A. MORTON, Akron, Ohio. Filed Oct. 12, 1921. Serial No. 507,372. 4 Claims. (Cl. 18—53.)

1. The herein described method of accelerating the vulcanization of natural or artificial rubber or rubber-like substances by vulcanizing the same in the presence of ethylene diamine or any of its derivatives.



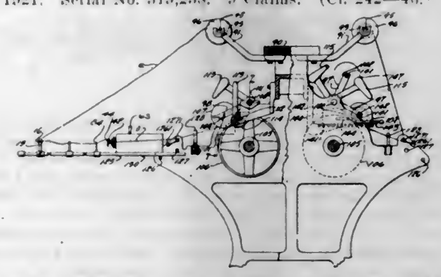
1,503,703. GRINDING MILL FOR ROCKS, ORES, AND LIKE MATERIAL. EDWARD H. MOYLE, Los Angeles, Calif. Filed June ., 1921. Serial No. 474,077. 7 Claims. (Cl. 83—9.)

1. In a grinding mill, a shell with removably fastened heads having hollow bearing extensions, means in one of the hollow bearing extensions for feeding the ore to be pulverized, and means in the other of the hollow bearing extensions arranged for discharging the pulverized material, a removable grinding die fastened within the shell, a freely rotating roll or rotor ring shoe having grinding means around its outer surface, a freely rotating grinding means arranged between the surface of the grinding die and the outer grinding surface of the freely rotating roll or rotor ring shoe, and means for revolving the shell and grinding die and its coacting appurtenances.



1,503,704. SURVEYING INSTRUMENT. CHESTER P. MULLENS and WARDIE C. ARGUST, Taylorville, Ill. Filed Nov. 22, 1923. Serial No. 676,303. 9 Claims. (Cl. 33—46.)

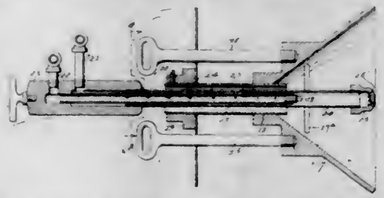
1. An instrument of the character set forth, comprising a support, a lamp rotatably mounted on the support, means for determining the position of the lamp with respect to the support, and means associated with the



lamp for determining by means of the light projected therefrom a location beyond the instrument.

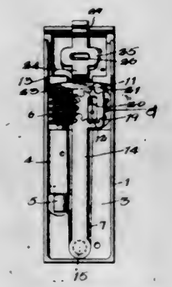
1,503,705. CHICKEN FOUNT. WILLIAM H. PARKER, Broken Bow, Nebr. Filed May 2, 1923. Serial No. 636,230. 4 Claims. (Cl. 119—77.)

2. A device of the character described comprising a trough, brackets rising from the trough and each comprising converging arms and a central depressed portion, a cylindrical water container provided with eccentric trunnions supported in the depressed portions of the brackets, the cylinder having an inwardly bent portion intermediate its ends to permit water to flow from the cylinder around both edges of the inwardly bent portion into the trough, and elements carried by the cylinder for engagement with the brackets to insure positioning the opening of the cylinder substantially over the longitudinal axis of the trough.



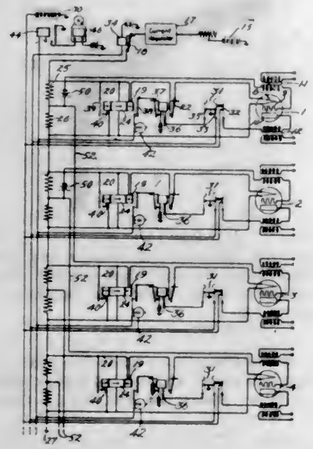
1,503,706. WINDING MECHANISM. WILLIAM H. PEARSON and TIMOTHY J. KELLY, Passaic, N. J., assignors to Brighton Mills, a Corporation of New Jersey. Original application filed Apr. 12, 1921, Serial No. 460,725. Divided and this application filed Dec. 1, 1921. Serial No. 519,258. 9 Claims. (Cl. 242—46.)

1. In combination in a winding mechanism, means for rotating a spool, a pair of pivoted arms for supporting the spool, cam means engageable directly with one



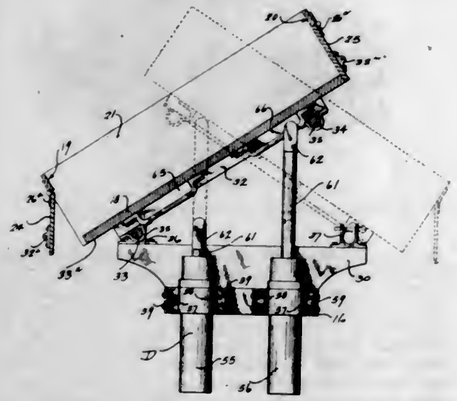
of said arms for raising the spool out of contact with the spool rotating means, a device for manually operating said cam means, and a weight pivoted to move with the pivoted arms for holding the spool in or out of contact with the spool rotating means.

1,503,707. OIL BURNER. IVER M. PETERSEN and DANIEL C. J. HARRIS, Beaumont, Tex. Filed Mar. 27, 1923. Serial No. 628,032. 1 Claim. (Cl. 158—15.)



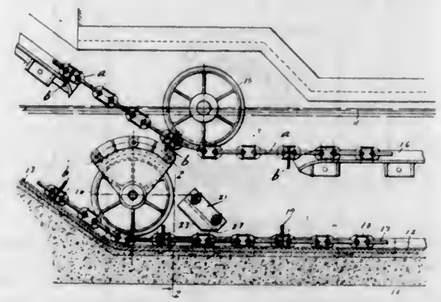
In a burner, a tube mounted to communicate with the interior of a furnace and slidably held in place, a hood on the inner end of the tube, said hood having an inwardly flared wall, a handle secured to the said hood and extending through the door whereby motion is imparted to the hood for sliding the tube in the door, the said hood having a peripheral slot, a tube extending through the first mentioned tube in spaced relation thereto whereby a channel is formed between the two tubes, a jet on the inner end of the second mentioned tube with relation to which the hood is movable for increasing or diminishing the space between the hood and the jet, an apertured tube within the second mentioned tube maintained in spaced relation thereto for forming a passage between the two tubes, a header to which the second and third mentioned tubes are connected, and pipes in communication with the third mentioned tube and with the space between the second and third mentioned tubes respectively, for supplying fuel and air to be commingled and forced to the jet, substantially as described.

1,503,708. HAIR CLIPPER. JAMES W. PRICE, Tulsa, Okla., assignor to Tulsa Invention Company, Tulsa, Okla., a Corporation. Filed Nov. 16, 1922. Serial No. 601,376. 4 Claims. (Cl. 30—1.)



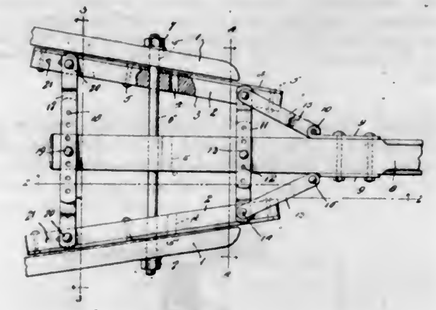
2. A hair clipper comprising a casing provided with an opening at one end, a shaft mounted for rotation in the casing and provided with a worm, an oscillating arm having one end pivotally mounted at one end of the casing and projecting through the opening at the other end of the casing, a plate integrally formed with and projecting laterally from the oscillating arm, said plate being provided with an elongated slot, a gear in mesh with the worm, a pin eccentrically mounted on the gear, a cross head loosely mounted on the pin and movable in the slot whereby the arm is oscillated, and a cutter operated by the oscillating arm.

1,503,709. VACUUM-TUBE CIRCUITS. HAROLD M. PRUDEN, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 3, 1923. Serial No. 629,566. 4 Claims. (Cl. 250—27.)



1. In combination, a plurality of filaments, means for connecting said filaments in series with a source of heating current, and a relay for substituting a resistance for one of said filaments, said relay having a winding effectively in shunt to said filament and an opposed winding effectively in series with said filament.

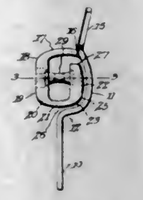
1,503,710. DUMPING VEHICLE. LEO S. RICE, Van Wert, Ohio. Filed Aug. 4, 1921. Serial No. 489,766. 2 Claims. (Cl. 298—22.)



1. A dumping vehicle comprising a chassis, a body, means pivotally mounting the body on the chassis at the longitudinal sides thereof, track supported below said body disposed transversely thereof, cylinders carried by said chassis, pistons reciprocable in said cylinders, piston rods having the upper ends thereof bifurcated, and pulleys disposed within said bifurcated ends of said piston rods for slidable engagement with the tracks of said body, and fluid compression means acting within said cylinder to move said pistons and piston rods so that said pulleys will slide over said tracks for selective lateral dumping of the vehicle body.

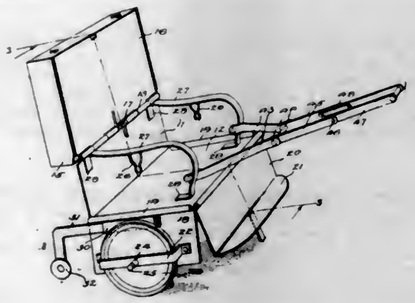
1,503,711. ASH CONVEYER COMPRISING CHAINS GUIDED BY SPROCKET WHEELS. ERNEST WILLIAM ROBEY, London, England. Filed May 11, 1922. Serial No. 560,139. 4 Claims. (Cl. 198—204.)

1. A device of the character described in combination a liquid trough, a conveyer for abrasive material comprising a chain movable in the trough beneath the surface of the liquid, a guide roller for the chain disposed above and in contact with the chain and means adjacent the roller and projecting in proximity to the chain for removing material from the chain whereby the material is prevented from passing between the roller and the chain.



1,503,712. ADJUSTABLE TONGUE HOUND. JOHN SADLER, Rockford, Iowa. Filed Jan. 29, 1923. Serial No. 615,465. 2 Claims. (Cl. 280—139.)

1. In adjustable tongue hounds construction, the combination with the wagon hounds, of side bars arranged against the inner sides of said wagon hounds, respectively, a wagon tongue having its inner end arranged between said bars, a pivot rod extending through said wagon hounds, side bars and tongue, said side bars being each formed with a series of openings through which said pivot rod may be interchangeably passed, whereby the longitudinal positions of said bars with respect to the wagon hound may be varied, adjustable connections between the forward ends of said side bars and tongue and adjustable connections between the rear ends of said bars and tongue, whereby the angular positions of said bars with respect to each other may be changed to correspond to the angular positions of the wagon hounds.

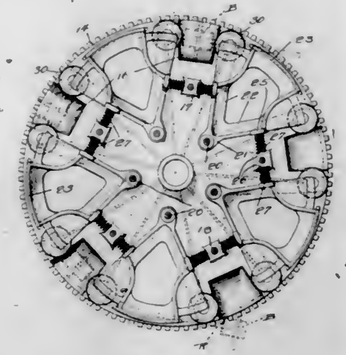


1,503,713. THREAD GUIDE. WILLIAM H. SANDERS, Winnsboro, S. C. Filed July 12, 1923. Serial No. 651,079. 6 Claims. (Cl. 242—157.)

1. A thread guide formed from a single piece of metal and comprising a shank, a body portion bent laterally, then over the blank and inwardly to form a loop, said body portion having openings therein to form bearings

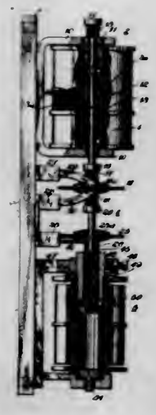
for an anti-friction roller, an anti-friction roller in said loop, and a connecting portion of said blank joining the shank with said body portion.

1,503,714. FOLDING BABY CARRIAGE. NATHAN SCHNIPPER and RUBIE BRODY, New York, N. Y. Filed Sept. 7, 1922. Serial No. 586,735. 4 Claims. (Cl. 280—37.)



4. In a device of the character described, a bottom wall, and a front side wall formed integral with one another, a plurality of arm rests connected at one end to the bottom wall and at one end to the front side wall, end walls pivotally secured to the front side wall and adapted to fold inwardly thereof, a wheel-supporting bracket carried by each of said end walls, a headed stud carried by each of said brackets, and resilient fingers depending from said arm-rests and adapted to receive said headed stud to secure the end walls in folded position.

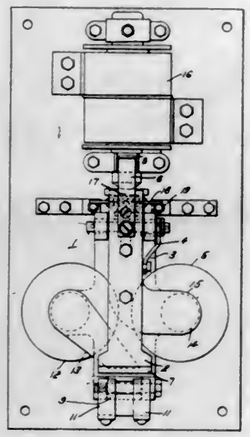
1,503,715. CINCH STRAP. REX G. SCHNITGER, Gillette, Wyo. Filed Nov. 28, 1923. Serial No. 677,479. 2 Claims. (Cl. 54—23.)



2. A girthing means, comprising in combination a flat strap member, a saddle, a latigo depending from each side of said saddle and connecting members between each latigo and opposite ends of said flat strap member comprising flat buckles each having a long side and a short side in parallel relationship, said long sides being connected to opposite ends of said flat strap member, one of said buckles having a curved end provided with a segmental slot having an area smaller than the area bounded by the sides of the buckle, and a hook member carried by the latigo cooperating with said buckle and arranged to be received in the segmental slot for securing said flat strap member to said latigo.

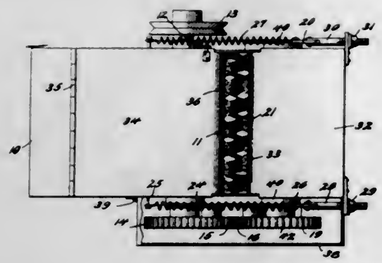
1,503,716. CONVEYER APPARATUS. OTTO A. SEYFERTH, Fairmont, W. Va. Filed Apr. 12, 1923. Serial No. 631,723. 7 Claims. (Cl. 74—31.)

3. In a sprocket wheel for button provided conveyer ropes, a wheel body provided with spaced peripheral button receiving pockets, rope engaging segments pivoted to said body between said pockets for swinging movement between the pockets, and spring means normally holding the segments centrally between said pockets.



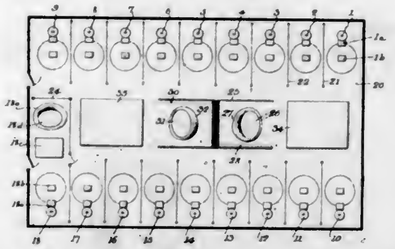
1,503,717. CONTROL APPARATUS AND SYSTEM. WALTER H. SMITH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 3, 1920. Serial No. 386,196. 9 Claims. (Cl. 200—100.)

1. Control apparatus comprising a plurality of separately and relatively movable alined core members, a plurality of coils separately acting at points respectively above and below the magnetic center of one of said core members, another coil for actuating another core member, and a single contact member adapted for independent actuation by said core members.



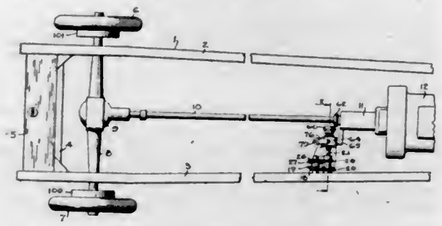
2. Control apparatus comprising a plurality of separately and relatively movable alined core members, a main-circuit coil for actuating one core member, a plurality of auxiliary-circuit coils separately acting at points respectively above and below the magnetic center of another core member, and a single contact member adapted for actuation by said core members.

1,503,718. CONTROL APPARATUS. WALTER HERBERT SMITH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 19, 1921. Serial No. 446,300. 8 Claims. (Cl. 200—98.)



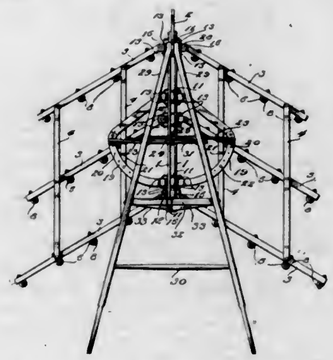
4. The combination with a plurality of pairs of relatively movable contact members, two of said contact members being mechanically connected and one of said pairs of contact members being normally in engagement, of electro-responsive means for effecting the engagement of one of said pairs of contact members, comprising one of said mechanically connected contact members, without effecting the disengagement of said normally-engaged contact members, and electro-responsive means for effecting the disengagement of all the said pairs of contact members.

1,503,719. GLOVE-CLEANING MACHINE. FRANCIS C. W. STELTER, Long Island City, N. Y. Filed May 29, 1922. Serial No. 564,656. 7 Claims. (Cl. 8—8.)



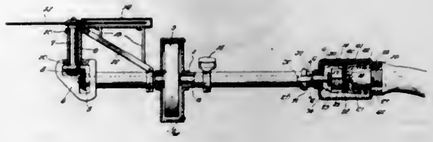
1. A glove cleaning device comprising in combination a receptacle for cleaning fluid, a pair of parallel rotary cylindrical brushes extending across said receptacle making longitudinal contact with each other, their upper surfaces being close to the top of said receptacle and their lower surfaces below the normal liquid level, a cover for said receptacle having a narrow opening in line with and directly above the meeting surfaces of said brushes its facing edges being formed by downwardly curved edge portions of said cover close to the surfaces of said brushes, and means for simultaneously rotating said brushes in opposite directions so that their meeting surfaces below said opening will move downward.

1,503,720. INDOOR GOLF SYSTEM. RICHARD H. STRASSER, Washington, D. C. Filed Nov. 25, 1922. Serial No. 603,271. 17 Claims. (Cl. 46—4.)



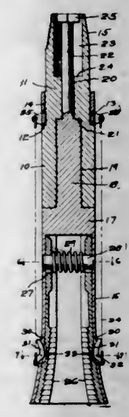
1. A method of playing a game simulating golf which comprises driving a ball associated with a golf meter, comparing the reading of said golf meter with a chart of a golf course indicating the location of the ball on said course relative to traps and hazards as a result of said drive, and completing the drive of the ball over said traps and hazards relative to said chart with a free ball.

1,503,721. AUTOMOBILE. JOSEPH STRAUSS, New York, N. Y., assignor to Abraham Kaplan, New York, N. Y. Filed Mar. 3, 1920, Serial No. 362,984. Renewed Jan. 16, 1924. 21 Claims. (Cl. 280—151.)



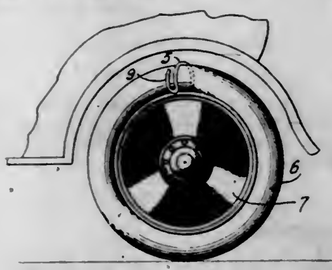
1. An automobile including in combination an engine, a transmission mechanism, a power shaft, a differential mechanism, the rear axle and wheels, and an emergency auxiliary driving mechanism comprising a man-operated power applying lever and gearing between said lever and the power shaft.

1,503,722. HARROW. DEWITT W. STRICKLAND, Tylertown, Miss. Filed Aug. 17, 1922. Serial No. 582,453. 3 Claims. (Cl. 97—176.)



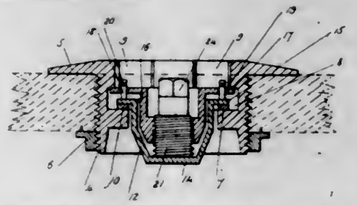
1. In an agricultural implement, the combination of a main beam consisting of parallel bars, a hinge member disposed below said bars and having a post fitting between the same and rigidly secured thereto, a coupling member hinged to the outer end of said hinge member and depending therefrom to swing toward or from the beam, a harrow bar pivoted to said coupling member to swing across the plane of movement of the coupling member, and means for holding the harrow bar in a set position.

1,503,723. CLUTCH MECHANISM FOR POWER-DRIVEN TOOLS. ERNEST E. STROM, Colome, S. Dak. Filed Sept. 2, 1922. Serial No. 585,917. 3 Claims. (Cl. 192—67.)



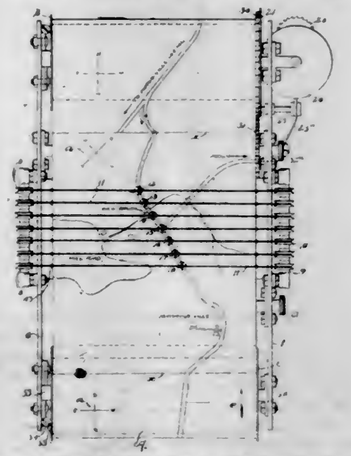
1. In an apparatus for the purpose set forth, the combination of a transmission shaft, a clutch member loosely fitted upon the transmission shaft and secured to a driving shaft, a second clutch member slidably mounted upon the transmission shaft and constrained to rotate therewith, means for shifting the second-mentioned clutch member into or out of engagement with the first-mentioned clutch member, a flange upon the second-mentioned clutch member, latches upon the first-mentioned clutch member adapted to engage said flange, a collar loosely mounted on the second-mentioned clutch member, and means for shifting said collar into engagement with the latches whereby to release the latches from the flange.

1,503,724. FISHING TOOL. PEDER STROM, Chicago, and VICK L. GANIEANY, Bluford, Ill. Filed Nov. 3, 1923. Serial No. 672,644. 5 Claims. (Cl. 294—86.)



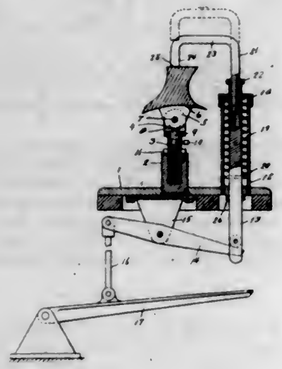
1. A fishing tool comprising an upper body, a lower body having screw threaded engagement with the upper body whereby there is a relative longitudinal movement between said bodies when one is turned with relation to the other, inwardly movable jaws carried by the lower body, means to move the jaws inwardly, and connecting means between the moving means and the upper body whereby the moving means is actuated upon the said relative longitudinal movement of said bodies.

1,503,725. TIRE GRIP. FREDERICK L. TAYLOR, Spokane, Wash. Filed Apr. 21, 1923. Serial No. 633,755. 5 Claims. (Cl. 294—26.)



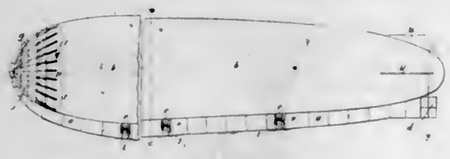
1. A grip for a tired wheel comprising a hand lever with a U shaped socket formed thereon adapted to be placed transversely over the tire of the wheel and to tightly engage opposite sides thereof upon moving the lever in direction of wheel rotation.

1,503,726. LOCKING BUNG. JOHN THOMPSON, Chilton, Wis., assignor of one-half to George C. Hume, Chilton, Wis. Filed Aug. 29, 1923. Serial No. 659,917. 4 Claims. (Cl. 217—106.)



1. In a locking bung, a bung bushing provided with an annular seat and an undercut locking groove, a bung body provided with a flange which overlaps the said seat, a packing washer interposed between the said flange and seat, a follower provided with lateral projections which engage with the undercut groove, and a locking screw engaging with the follower and bearing on the bung body and operating to compress the packing washer between the flange and seat.

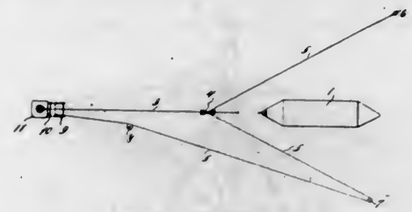
1,503,727. ROUTE INDICATOR FOR VEHICLES. CHRISTOS B. TSAGRIS, Boston, Mass. Filed Aug. 6, 1921. Serial No. 490,196. 30 Claims. (Cl. 40—42.)



10. A route indicator having a chart movable in forward and reverse directions and means independent of the chart for positively indicating in advance in relation to the chart the route to be followed when the chart is moved in either direction.

1,503,728. WOOD-HEEL CLAMP. THADDEUS E. TYLER, Haverhill, Mass. Filed June 14, 1923. Serial No. 645,309. 1 Claim. (Cl. 12—125.)

A heel clamp comprising a fixed member having an upwardly facing heel-supporting face, a vertically disposed casing mounted adjacent said member, a rod extending through said casing and reciprocally mounted therein, a spring engaged with said casing and rod to press the rod downward, a treadle for lifting said rod, and a rigid arm connected to the upper end of said rod and arranged for adjustment longitudinally thereof, said arm being extended horizontally and having a depending end portion provided with a heel top engaging face at its lower end arranged in cooperative relation with said supporting face.

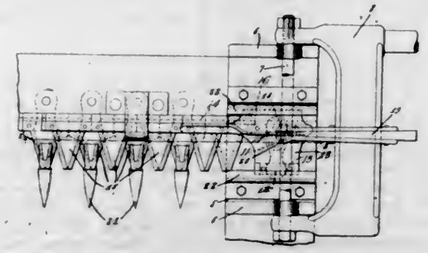


1,503,729. CONSTRUCTION OF SEMIRIGID AIRSHIPS. CELESTINO USUELLI, Milan, Italy. Filed Jan. 14, 1921. Serial No. 437,177. 4 Claims. (Cl. 244—6.)

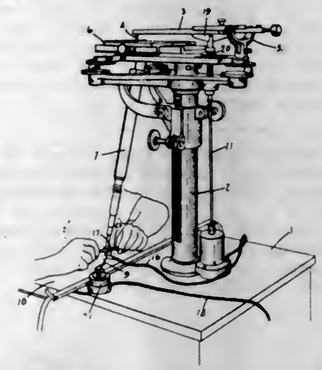
1. In a semirigid airship, in combination with a gas bag, an external tubular metal girder structure extending underneath said bag in close relation thereto, longitudinal cover flaps depending from said bag and enclosing said girder, and a stiffening cage at the lower end of said girder, said cage comprising curved radially directed ribs and a plurality of annular frame members of respectively decreasing diameter interconnecting said ribs.

1,503,730. DIRIGIBLE-BALLOON CONTROL FOR LANDING. CHARLES L. WACHTER, New York, N. Y., assignor to Edgerwood Manufacturing Company, New York, N. Y., a Corporation of New York. Filed Sept. 18, 1922. Serial No. 588,742. 11 Claims. (Cl. 244—2.)

1. A mooring system for air ships, comprising in combination, a moorage, a towing cable connected thereto, means for connecting said cable to the air ship, operating means for said towing cable, a pulley carried by said ship, a back haul cable adapted to ride over said pulley, anchoring means for said back haul cable and means to vary the length of said back haul cable.

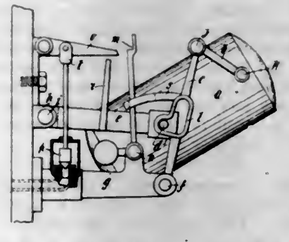


1,503,731. PROCESS FOR PRODUCING MULTIPLY-EXPOSED MOTION-PICTURE FILMS. JOSEPH B. WALKER, Los Angeles, Calif. Filed May 3, 1922. Serial No. 558,123. 9 Claims. (Cl. 95—5.)



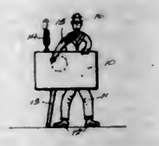
1. In the production of multiply exposed photographic impressions, the process of exposing a portion of the area of a receptive surface, and thereafter typing a dye over said exposed portion to protect same against further exposure during subsequent operations.

1,503,732. HARVESTING MACHINE. SAMUEL E. WALLING, Bellingham, Wash., assignor, by direct and mesne assignments, to Harvesting Machinery Improvement Company, Bellingham, Wash., a Corporation of Washington. Filed Feb. 15, 1921. Serial No. 445,141. 1 Claim. (Cl. 56—207.)



In a device of the character described, a base, a pair of opposed cutting bars, a connecting lever pivotally supported on the base, and having heads at its ends, blocks on the cutter bars, said blocks having cut out portions adapted to accommodate the heads of the connecting lever so that movement of one cutter bar results in a movement of the opposed cutter bar in the opposite direction, a connecting link having a socket, and one of said cutter bars having a head to receive the socket of the connecting link.

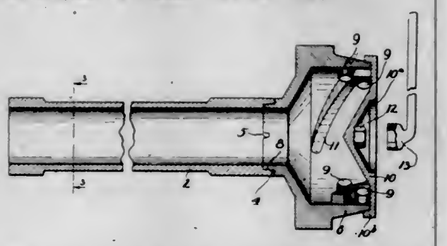
1,503,733. ELECTRICAL CONTROL FOR ENGRAVING MACHINES. UREY M. WARMOTH, Indianapolis, Ind. Filed Apr. 13, 1922. Serial No. 552,434. 2 Claims. (Cl. 33—24.)



1. In a device of the character described, a tracing arm, a socket removably attached to one end of said tracing arm, a tracing point entered in said socket, a plug extending transversely through said socket and tracing point whereby the tracing point is secured within the socket and in electrical contact therewith, substantially as set forth.

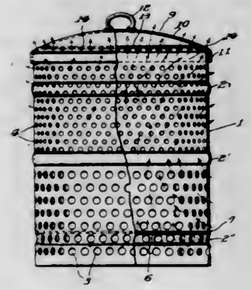
1,503,734. FLOAT-OPERATED VALVE OR COCK. CHARLES HINLEY WILKINSON, Hull, England. Filed Nov. 22, 1923. Serial No. 676,328. 4 Claims. (Cl. 137—103.)

1. An inclined cylindrical float, for actuating valves or cocks, having stub axles fixed at diametrically opposite points and at a desired distance from the longitudinal centre of the float, the said stub axles being pivotally mounted in the free ends of the arms of a forked lever pivoted to a fixed support, a control lever pivoted to a fixed support and furnished with a guide slot into which an extension of one of the stub axles projects and a link pivoted to the free end of the control lever and a projecting pin on the float, for the purposes set forth.



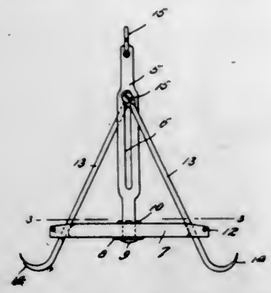
1,503,735. MECHANICAL TOY. PETER K. WILLIAMS, Columbus, Ohio. Filed Mar. 17, 1923. Serial No. 625,754. 4 Claims. (Cl. 46—40.)

1. A self-supporting toy of the character described including a box having internal music producing means and a pendent supporting leg, a figure disposed upright adjacent and attached to the box, having pendent legs



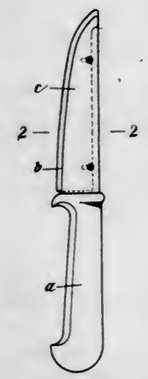
cooperating with the pendent supporting leg of the box and forming therewith a three-point contact to permit the figure to stand in an upright position without additional support, said figure also having movable parts including an arm, a figure movable vertically and rotatable on the box and simulating a monkey, and mechanism within the box for simultaneously actuating the last mentioned figure operating the said music producing means and shifting the movable parts of the supporting figure as described.

1,503,736. WATER DISTRIBUTOR. THOMAS H. WILSON, Brawley, Calif., assignor of one-fourteenth to W. R. Batley, one-fourteenth to Alex McBurney, one-fourteenth to G. A. Dahl, one-fourteenth to E. L. Jack, one-fourteenth to A. N. Jack, one-fourteenth to T. W. Nicholson, and one-fourteenth to Paul C. Smith, all of Brawley, Calif. Filed Mar. 22, 1923. Serial No. 626,792. 4 Claims. (Cl. 251—39.)



3. A distributor comprising a conduit having a socket at its receiving end, a valve shell having an end wall provided with a flange fitting in the socket, the shell being larger than the conduit and circular and having inwardly projecting guide lugs arranged in pairs suitably spaced apart, a valve closure adapted to fit against the end of the shell and having spiral fingers fitting against the inner face of the shell between the pairs of guide lugs and forming a screw connection between the closure and the shell, and means for rotating the closure to regulate the passage of water through the conduit.

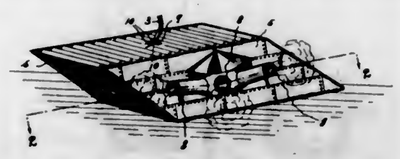
1,503,737. INCINERATOR. HERBERT S. WOODWARD, Carbondale, Pa. Filed Mar. 13, 1924. Serial No. 698,864. 4 Claims. (Cl. 126—224.)



1. A device of the class described, comprising a cylindrical body having a plurality of perforations extending through its wall, the perforations towards the upper part of the body being of less size than those in the lower part thereof, a perforated bottom disposed in the lower part of the body and fixedly secured thereto and a removable cover having a central downwardly curved portion provided with a depending peripheral flange for engagement over the upper end of the body and a stiffening plate fixedly secured to the under side of said central portion along the marginal edge of the plate.

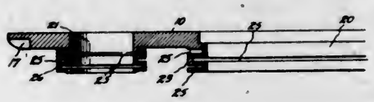
1,503,738. HOG GAMBREL. WILMER L. YOUNG, Heaton, N. Dak. Filed Apr. 3, 1923. Serial No. 629,551. 1 Claim. (Cl. 294—79.)

A gambrel comprising a bar provided with a longitudinally extending slot intermediate the ends, means carried at the upper end of the bar for connecting it to a support, a pin extending transversely through an opening in the bar above the lower end thereof, a plate mounted on the lower end of the bar, a cross bar having an opening for receiving the lower end of the first mentioned bar, said cross bar being disposed between the plate and the pin and provided with slotted end portions, rods slidably mounted in the slots and formed with hooked extremities at the lower outer ends thereof, the upper inner ends of said rods being disposed at the opposite sides of the bar, and a bolt extending transversely through the ends of the rod slidably mounted in the slot.



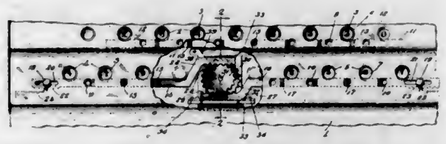
1,503,739. FLAYING KNIFE. GOTTLIEB ZÜRCHER, Zurich, Switzerland. Filed Mar. 10, 1924. Serial No. 698,218. 2 Claims. (Cl. 17—21.)

1. A flaying-knife comprising a handle, a blade holder composed of two superposed metal strips secured to said handle, a loose blade adapted to be held between said strips with the cutting edge projecting uniformly from the edges of the strips, and means for clamping the strips to the blade, the edges of the strips being thickened so as to form shoulders along the cutting edge of the blade for limiting the depth of the cut.



1,503,740. PYROTECHNICAL DEVICE. MILTON M. ADLER, Newark, N. J. Filed Feb. 27, 1923. Serial No. 621,513. 2 Claims. (Cl. 102—21.)

1. A pyrotechnical device, comprising a hollow casing of desired shape, the exterior sides of a desired wall or walls of said casing being provided with graphic simulation of gun-muzzles, said casing wall or walls having smoke escape ports registered with the ends of said graphic simulation of gun-muzzles and communicating with the interior of said casing, a combustible carrier means treated with a pyrotechnical composition adapted to detonate when ignited, said carrier means and its pyrotechnical composition being disposed within

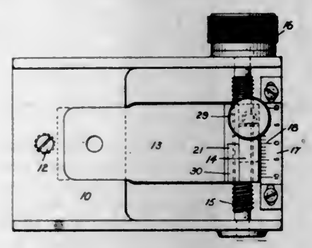


the interior of said casing, a fuse element attached to said carrier means, a desired wall of said casing having an X-shaped slit through which the free end of said fuse element may project exteriorly from said casing, and said X-shaped slit providing projections directed toward the body of the fuse-element to hold the same against accidental longitudinal displacement.

1,503,741. PACKING PLATE FOR INTERNAL-COMBUSTION ENGINES OR THE LIKE. JOHN O. ALMEN, Seattle, Wash., assignor to Almen-Crosby Motors Company, Inc. Filed Aug. 10, 1920. Serial No. 402,566. 5 Claims. (Cl. 123—58.)

5. In an engine of the character described, in combination, a casing body having a valve recess therein, cylinders arranged circularly and in parallel relation within the casing and having ports opening into the said recess, a power shaft revoluble in said casing centrally of said casing and parallel with said cylinders, a valve plate revoluble in the recess to control the flow of gas through said ports, a packing plate interposed between the cylinders and valve plate having ports in registration with the cylinder ports and a central opening through which said power shaft extends, expandable flanges formed about all of said ports engageable with the cylinder wall to prevent leakage and an expandable flange formed about the periphery thereof for preventing leakage of air from about the power shaft into the valve recess.

1,503,742. CALCULATING MACHINE. GEORGE M. BACON, Salt Lake City, Utah, assignor to Bacon Multiplier, Incorporated, Salt Lake City, Utah, a Corporation of Utah. Filed May 18, 1922. Serial No. 561,819. 8 Claims. (Cl. 235—73.)

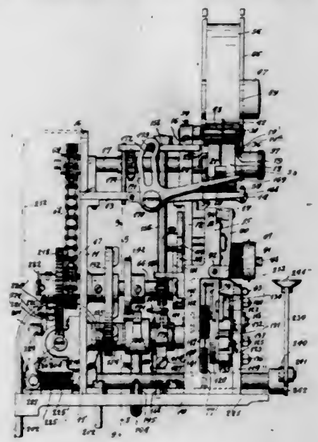


1. In a calculating machine, the combination with multiplicand, multiplier, and product dials, of means for indicating the decimal point position of the multiplicand and multiplier respectively, and simultaneously indicating the decimal point of the product.

1,503,743. METHOD OF REENFORCING REFLECTORS. BLASIUS BART, Newark, N. J. Filed June 10, 1920. Serial No. 387,975. 34 Claims. (Cl. 88—1.)

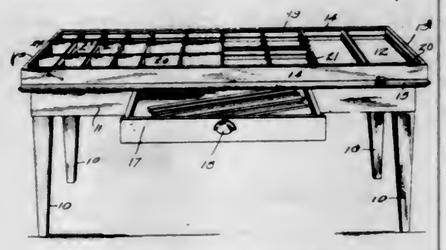
5. A reflector including a film of reflecting metal on the front side thereof and provided with a backing of a stiffening material, a preformed rigid reenforcing frame formed of a material differing from the stiffening material and embedded in said stiffening material.

1,503,744. SIGHT LEAF. MILES C. BENNER, Springfield, Mass. Filed Dec. 13, 1922. Serial No. 606,677. 1 Claim. (Cl. 33—55.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)



A gun sight, embodying a base plate, a windage screw journaled in said base plate, a sight leaf mounted on the windage screw, means for retaining the leaf in elevated or lowered positions, said leaf provided with a slot extending longitudinally thereof and inclined to provide for driftage correction, a slide in the slot, said slide provided with a peep hole and a transverse slot, an elevating nut in the transverse slot of the slide having a central opening adapted to register with the peep hole and an elevating screw engaging the nut for moving the slide.

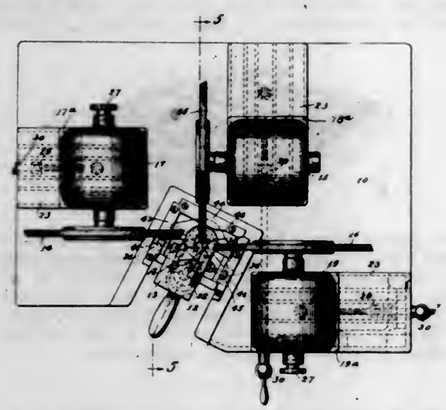
1,503,745. LABEL-ATTACHING MACHINE. MAX O. CLAUSS, New York, N. Y. Filed July 25, 1919, Serial No. 313,415. Renewed Aug. 3, 1922. Serial No. 579,472. 7 Claims. (Cl. 93—88.)



1. In a label attaching machine, paper strip printing and feeding mechanism, including a drum, circumfer-

entially extending feeding members on opposite sides of the drum, tangentially adjustable feeding members ar-

ranged between the said circumferential members and printing means on the drum between said feeding members.

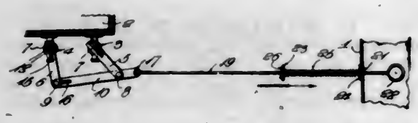


1,503,746. ADJUSTABLE TRAY TABLE TOP AND DISPLAY DEVICE. JACOB PAUL CLAYTOR, Lorimor, Iowa. Filed June 18, 1923. Serial No. 646,121. 4 Claims. (Cl. 211—11.)

1. In a device of the class described a table top, vertical side and end flanges arranged adjacent the edges of the table top, said flanges having spaced grooves on their inner sides for receiving pegs therein, the grooves in the end flanges and in the side flanges being staggered relative to each other, partition members having a pair of grooves in each of their sides, pegs on the ends of said partition members arranged to be received in the grooves in said flanges for dividing the table top into compartments, the pegs in the partition members being staggered relative to the grooves therein, and divider members arranged to be engaged between said partition members pegs in the ends of said divider members arranged to register with and be received in the grooves formed in said partition members for subdividing the compartments.

1,503,747. KNIFE-BLADE-SQUARING MACHINE. EDWARD J. CONKLIN, Bridgeport, Conn. Filed Jan. 19, 1923. Serial No. 613,598. 18 Claims. (Cl. 51—172.)

1. A machine for squaring the tangs of knife-blades, comprising a series of grinding wheels, the operating faces of two of which are arranged in opposite relation to each other, a movable knife blade supporting table adapted to be moved as against the operative face of one of the wheels, and then in an opposite direction against the operative face of the other of said wheels to grind the opposite edges of the tang of a blade with one setting of the blade upon the table, and to be moved angularly to said movement between the wheels to grind a portion of the tang against the side of one of said wheels.



2. A machine for squaring the tangs of knife blades, comprising a series of grinding wheels, the cutting faces of two of which are arranged opposite to each other, and the cutting face of the third of which is positioned at substantially a right angle to the first mentioned faces, means for independently adjusting the position of the wheels with relation to each other, a knife blade supporting table adapted to be moved to and from each of the said wheels for separate independent operations upon the tang, and to be moved angularly to said movement between the wheels to grind a portion of the tang against the side of one of said wheels.

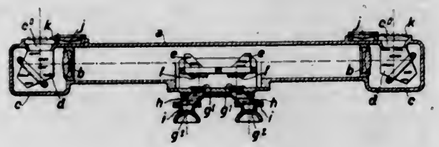
1,503,748. POWDER PUFF. ALDO CURIONI, Larchmont, N. Y., assignor to Maurice Levy, New York, N. Y. Filed July 3, 1923. Serial No. 649,215. 3 Claims. (Cl. 132—78.5.)

1. A powder puff comprising two discs of fabric having nap surfaces and base portions, a portion of the said discs being inwardly turned at the edge of the puff to form an inner rib, having two layers, the said layers being forced together by transverse stitches, the nap portions of said inturned layers being inclined outwardly and toward the periphery of the puff.

1,503,749. CRANK-CASE-OIL TESTER. CHARLES W. DAVIS, McAlester, Okla. Filed July 5, 1923. Serial No. 649,524. 2 Claims. (Cl. 137—139.)

2. In a device of the character described, a cock actuating crank having a slot to receive the crank handle, a jaw conjointly formed by portions of the walls of the slot to engage one side of the cock handle, and a jaw formed by a portion of the metal displaced in forming the slot bendable for engagement with an opposite side of the crank handle.

1,503,750. TUNNEL KILN WITH STEAM-GENERATING COOLING ZONE. CONRAD DRESSLER, New York, N. Y., assignor to American Dressler Tunnel Kilns, Inc., New York, N. Y., a Corporation of New York. Filed Nov. 14, 1919. Serial No. 338,009. 6 Claims. (Cl. 25—14.2.)

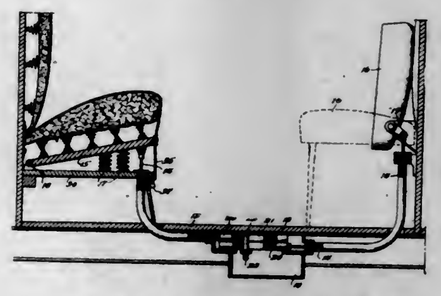


1. In a tunnel kiln in which the kiln chamber comprises a heating zone and a cooling zone successively transversed by the goods passing through the kiln, the improvement which consists in a steam generating unit comprising water heating elements located in the kiln chamber in position to abstract heat from the goods as the latter pass through said cooling zone.

1,503,751. METHOD OF EXTRACTING OIL. CARL DREYMANN, Baltimore, Md. Filed July 9, 1920. Serial No. 395,066. 4 Claims. (Cl. 87—6.)

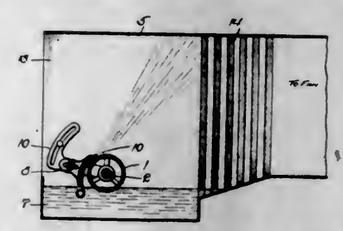
1. The method of extracting oils and fats from materials containing them and also containing water, which comprises subjecting such materials to extraction with a solvent of the oil or fat, withdrawing the resulting fat solution and admixed water, separating the water from the solution of the oil or fat in the solvent, and returning the resulting water-free solution for further extraction.

1,503,752. TELEMETER. OTTO EPPENSTEIN, Jena, Germany, assignor to the Firm Carl Zeiss, Jena, Germany. Filed Aug. 13, 1921. Serial No. 492,103. 2 Claims. (Cl. 88—2.6.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. A telemeter composed of two telescopes, provided each with a collective lens attached in the immediate vicinity of the objective-reflecting system of the respective telescope and being movable in and out of the path of rays.

1,503,753. TYPEWRITER. FRITZ R. FREDERICK, New York, N. Y., assignor to Edward Stevens Beach, Ridgefield, Conn. Filed Dec. 13, 1922. Serial No. 606,750. 28 Claims. (Cl. 197—25.)

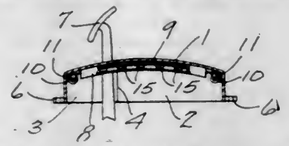


1. In a typewriting machine, the combination of a frame; a detachable cover; and an intermediate assembly bracket; a case shifting mechanism; a spacing mechanism; a series of typing units provided with under type heads; a series of typing units provided with upper type heads; for each of said under type heads, type head guiding means comprised in said assembly bracket; for each of the upper type heads, type head guiding means comprised in the assembly bracket; transversely opposed ink ribbon spool carrying means secured to the cover; ink ribbon spool rotating means; and a paper carriage provided with an endwise movable platen.

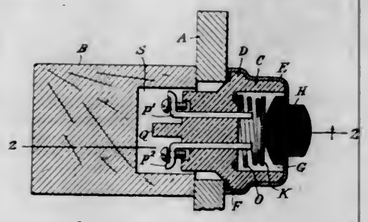
1,503,754. FARE-REGISTER MECHANISM. ROBERT W. HAMILTON, New York, N. Y. Filed May 15, 1922. Serial No. 560,877. 3 Claims. (Cl. 235—99.)

1. In a vehicle, a casing, a bracket in said casing, a register slidably mounted in said bracket, an actuator for said register extending into said casing, continuously operating connection between said actuator and a wheel of the vehicle, spring means in said casing for holding said register normally free of said actuator, a lever journalled in the casing for moving said register into connection with the actuator, and connection between said lever and a seat of the vehicle for moving said lever when weight is applied on the seat.

1,503,755. AIR-CONDITIONING DEVICE. BURT S. HARRISON, Chicago, Ill., assignor to Drying Systems, Inc., Chicago, Ill., a Corporation of Illinois. Filed Feb. 4, 1922. Serial No. 534,273. 3 Claims. (Cl. 261—92.)



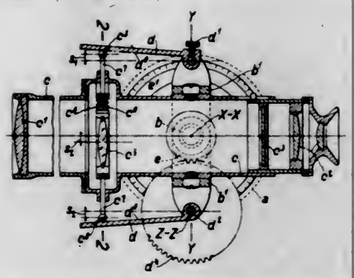
1. In a device of the class described, a receptacle for fluid, and a roller rotatably mounted on a horizontal axis and partly immersed in said fluid, a plate at one side of said roller and adjustable to vary its spaced relation to the roller, the lower edge of said plate extending downwardly below the level of the fluid.



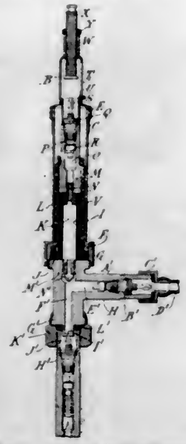
1,503,756. AIR AND DUST GUARD FOR LEVER OPENINGS. JOHN HASSELBERGER, East Hampton, N. Y. Filed Jan. 24, 1924. Serial No. 688,169. 1 Claim. (Cl. 74—81.)

In combination with the levers and lever slots of an automobile, a device of the kind described, comprising a two-piece casing adapted for mounting over the said floor slots and having layer slots to accommodate said levers, the metal along the edges of the said casing

slots having guideways formed therein; curtains mounted on spring set rollers at each end of the slots and slidingly passed along the guideways of the casing slots; means for securing the ends of the curtains to the lever bars; and means for supporting the curtains in place.



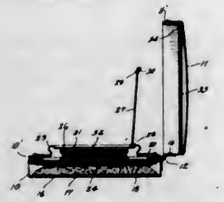
1,503,757. PUSH BUTTON. LEE P. HYNES, Albany, N. Y., assignor to Consolidated Car-Heating Company, Albany, N. Y., a Corporation of West Virginia. Filed Jan. 10, 1919. Serial No. 270,517. 2 Claims. (Cl. 200—159.)



1. An electric push button comprising a shell having an opening therein, an insulating block secured within said shell and having a recess in its outer end registering with said opening, a button working in said opening and having an enlarged portion located within said recess, conductor bars embedded within said block and having ends projecting into said recess, a contact piece within said recess and movable independently of said button, and a spring acting to normally press said contact piece and said button away from the projecting ends of said conducting bars, said spring bearing against the contact piece contiguous to the periphery of the latter.

1,503,758. REDUCING TACHEOMETER. ALBERT KÖNIG, Jena, Germany, assignor to the Firm Carl Zeiss, Jena, Germany. Filed Jan. 26, 1924. Serial No. 688,883. 7 Claims. (Cl. 88—2.2.)

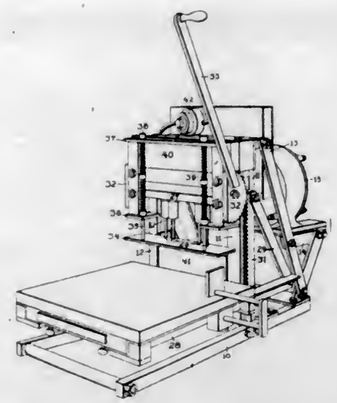
1. In a reducing tacheometer a telescope rotatably disposed about a horizontal axis, which is perpendicular to the optical axis of the telescope, the telescope comprising an objective and an ocular, two semi-lenses inserted in the path of the rays before the ocular and displaceable parallelly to the said horizontal axis, and means for coupling the semi-lenses and the telescope so as to impart to the semi-lenses a relative displacement as the telescope is rotated about the said horizontal axis, these means comprising at least one plane surface coacting with one of the semi-lenses.



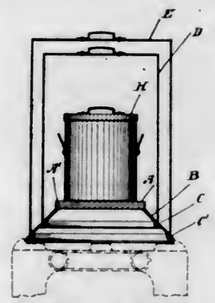
1,503,759. PRESSURE INDICATOR. HENRY P. KRAFT, Ridgewood, N. J., and MAXIMILIAN CHARLES SCHWEINERT, New York, N. Y. Original application filed July 14, 1909, Serial No. 507,565. Patent No. 1,178,707, dated Mar. 27, 1916. Divided and this application filed Feb. 23, 1916, Serial No. 79,880. Renewed Jan. 4, 1923. 5 Claims. (Cl. 152—11.5.)

1. In an indicating device for pneumatic tires or the like, comprising a casing, an expansible tube in said casing, said expansible tube formed as a nipple, an indicating device the lower end of which is connected to said tube by a perforated screw, a valve in said indicating member, and an adjustable gauge-bar in the casing adapted to coact with said valve.

5. A combined pump coupling, pressure gauge, and relief valve having means for connection to a pneumatic tire or the like, means for introducing air to the tire, and a pressure-responsive member having a valve at its upper end, and an adjustable abutment adapted to open said valve at a predetermined movement of said pressure-responsive member, all of said parts being operable during the inflation of the tire.



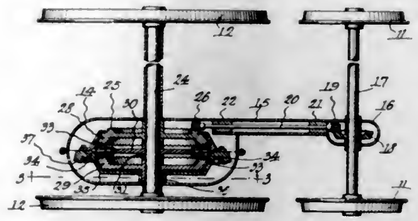
1,503,760. VANITY BOX. ANKER S. LYHNE, Bridgeport, Conn. Filed Nov. 7, 1922. Serial No. 599,493. 4 Claims. (Cl. 132—83.)



1. A vanity box comprising cover and body sections, a receptacle enclosed by said sections forming a powder compartment, a puff in said compartment for use with said powder, said receptacle comprising telescoping sections, a powder puff on the exterior of one of said sections and secured thereto by clamping between the sections, the other section being shaped to form a handle to facilitate use of said puff, and a cover carried by the latter section to allow access to said compartment.

1,503,761. PUNCHING MACHINE. CHARLES F. McBEE, Athens, Ohio, assignor to The McBee Binder Co., a Corporation of Ohio. Filed Feb. 2, 1921. Serial No. 441,804. 2 Claims. (Cl. 164—90.)

1. A punching machine comprising punches and means for rotating same; a yielding plate with orifices therein designed as a guard for the punch ends; a movable base receptacle to receive and retain in position the material to be punched; means to force the receptacle toward the punches and thereby forcing the yielding plate away from the punches and the punches through the material; automatic means to restore the yielding plate to its normal position when the receptacle is moved away from the punches.

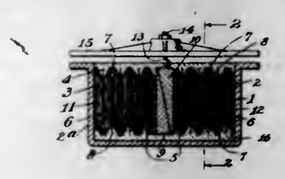


1,503,762. FIRELESS COOKER. HUGO MOCK, New York, N. Y. Filed Nov. 17, 1922. Serial No. 601,465. 7 Claims. (Cl. 220—9.)

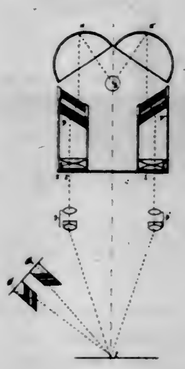
1. In a cooker the combination of a series of insulating hoods and an insulating base on which said hoods rest, said base also serving as a heating stone.

1,503,763. AUTOMATIC CUT-OFF DEVICE FOR LOCOMOTIVES. MAYNARD I. MOSELY, Wise River, Mont. Filed Dec. 5, 1923. Serial No. 678,750. 1 Claim. (Cl. 269—9.)

The combination with the axles of the truck and driver wheels of a locomotive, a gear mounted on the truck axle, a shaft, gears carried by the ends of the shaft, one of said gears engaging the gear on the truck axles, a sun gear rotatably mounted on the driver axle, an annular gear carried by said sun gear and engaging the gear carried by the shaft, a second sun gear rigidly mounted on the driver axle, a drum rotatable about the sun gears and carrying an annular gear, planetary gears connected with the drum and engaging between the sun gears, a normally inactive centrifugal speed responsive device, gearing connecting the speed responsive device and the annular gear carried by the drum, and a normally open valve controlling the admission of steam to the cylinders of the locomotive, said valve being adapted to be closed by the action of the centrifugal speed responsive device.

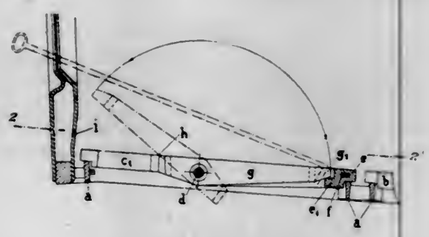


1,503,764. CUSHIONED SHOE. WILLIAM H. NICKERSON, Brookline, Mass. Filed Sept. 14, 1923. Serial No. 662,770. 1 Claim. (Cl. 36—76.)



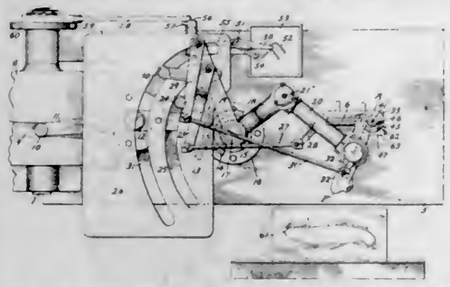
A shoe comprising an outsole having a somewhat abrupt centrally offset bend at the junction of its tread and shank portions, said bend being located under the ball portion of the wearer's foot, extending from edge to edge of the sole, and imparting a salient form to the rear extremity of the tread portion, the shank portion of the outsole being inclined upward and rearward from said bend, an insole the ball-supporting portion of which bridges and is spaced from said bend, the insole and outsole forming the sides of a double wedge-shaped pocket, and a resilient wedge-shaped rubber cushion filling only the forward portion of said pocket, so that a wedge-shaped air space is formed at the rear portion of the pocket which is bridged by a portion of the insole, the arrangement being such that when the shoe is in use the shank portion of the insole is permitted to conform to the corresponding portion of the foot by the endwise bulging of the cushion into said air space and by the downward bulging of the shank portion into the cushion and into the air space.

1,503,765. ELECTRICAL CONDENSER. GREENLEAF WHITTIER PICKARD, Newton Center, Mass., assignor to Wireless Specialty Apparatus Company, Boston, Mass., a Corporation of New York. Original application filed Oct. 8, 1920, Serial No. 415,473. Divided and this application filed Dec. 1, 1923. Serial No. 677,952. 3 Claims. (Cl. 250—41.)



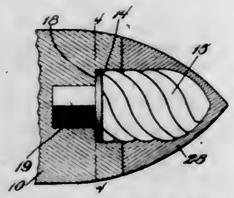
1. In a condenser, a casing, a condenser stack therein arranged transversely of the bottom of the casing, and means comprising a wedge for compressing the stack against the sides of the casing.

1,503,766. DEVICE FOR PROJECTING AND VIEWING STEREOSCOPIC PICTURES. LUCIEN PICTET and MARIO CANTONI, Geneva, Switzerland. Filed Dec. 5, 1923. Serial No. 678,630. 5 Claims. (Cl. 88—24.)



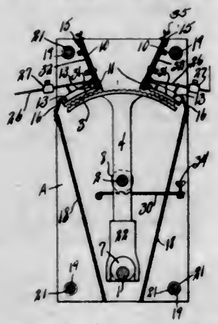
1. Device for projecting and viewing stereoscopic pictures comprising a pair of juxtaposed mirrors arranged to reflect the light of a single source of luminous power of the shape of two light-pencils of which the interaxial spacing is equal to that of the centres of the stereoscopic views to be projected, a pair of polarizing elements placed in the path of said light-pencils as near to the source of light as possible and constituted by two piles of glass at right angles to each other and of which the planes of polarization form an angle of 45° to the horizon, optical means for focusing the two pictures projected by the two polarized light-pencils upon the screen so that they are superposed one on the other thereon; in combination with analyzing binoculars to be interposed before the eyes of the spectator and comprising a pair of polarizing elements of which the planes of polarization form an angle of 45° to the horizon; substantially as described.

1,503,767. FURNACE GRATE. KOLOMAN REZSNY, Budapest, Hungary. Filed Mar. 27, 1920. Serial No. 369,371. 2 Claims. (Cl. 126—162.) (Granted under the provisions of the act of Mar. 3, 1921. 41 Stat. L., 1313.)



1. A grate for locomotive boiler furnaces comprising outer stationary longitudinal grate sections and a central tipping section arranged between the stationary sections, said tipping section being eccentrically pivoted, so as to provide a long arm and a short arm, whereby said section maintains its normal position due to the weight of the long arm, and said section being rotatable on its pivot to swing the long arm upwardly and rearwardly toward the furnace door and away from the forward face of the fire box through an angle exceeding 90°, in which position it remains by gravity.

1,503,768. WRAPPER CARRIER FOR CIGAR MACHINES. RUPERT E. RUNDELL, Brooklyn, N. Y., assignor to International Cigar Machinery Company, a Corporation of New Jersey. Filed Oct. 28, 1921. Serial No. 511,165. 16 Claims. (Cl. 131—39.)



1. In a cigar machine, the combination with a wrapper support, of a blower mounted on said support, and blower controlling means.

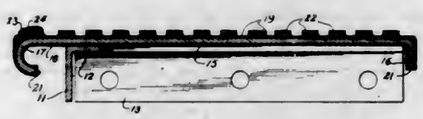
1,503,769. ARMOR-PIERCING PROJECTILE. GEORGE M. RYAN, Emo, Ontario, Canada. Fild Apr. 1, 1924. Serial No. 703,449. 5 Claims. (Cl. 102—39.)

2. In an armor piercing shell, a shell having a body provided upon its periphery at one end with a rifling band and having the opposite end thereof provided with a truncated taper, a penetrator drill axially embedded in the last named end of the shell, and a covering of soft metal in which the projecting end of the penetrator drill is embedded, comprising a continuation of the taper of the body of the shell, said penetrator drill having a shank preventing rotation thereof with relation to the shell.

1,503,770. GRINDING MACHINE. CHARLES ALONZO SMITH, Redfield, S. Dak. Filed Feb. 10, 1923. Serial No. 618,423. 5 Claims. (Cl. 83—14.)

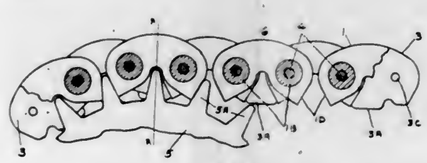
1. A Grinding machine comprising a frame, stationary plates and means for fixedly mounting said plates at different adjustments on said frame, an oscillating grinding plate adapted to move in close proximity to said stationary plates, and means for yieldingly holding said oscillating plate in such position and means for oscillating said grinding plate laterally.

1,503,771. METHOD OF BINDING. HENRY SMITH, Richmond, Va. Filed Mar. 14, 1923. Serial No. 625,045. 1 Claim. (Cl. 11—1.)



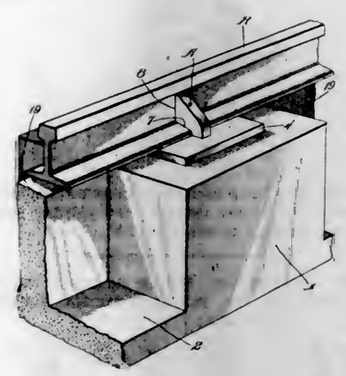
The hereindescribed method of binding which consists in assembling a stack of separate leaves upon a cover, placing a former against one edge of the stack with a portion thereof overlapping the stack, and finally forcing a staple through the leaves and astride the former and clinching the staples to the cover.

1,503,772. ALLOY FOR HIGH-TEMPERATURE USE. WILLIAM H. SMITH, East Cleveland, Ohio, assignor to Electro Metallurgical Company, a Corporation of West Virginia. Filed Nov. 8, 1919. Serial No. 336,696. 6 Claims. (Cl. 75—1.)



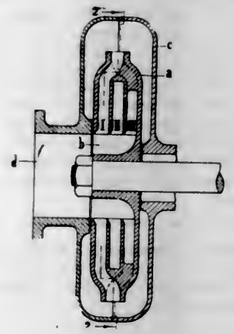
1. An alloy containing 8% to 15% of chromium, at least 2.5% of silicon, and a fraction of one per cent of zirconium, with the balance principally iron.

1,503,773. STEP PLATE. FRANK H. STANWOOD, Wilmette, Ill., assignor to Stanwood Equipment Company, Chicago, Ill., a Corporation of Maine. Filed Feb. 21, 1921. Serial No. 446,786. 5 Claims. (Cl. 20—79.)



1. A step for automobiles, railway cars, and the like, comprising a metal step member having flanged edges, supports for the same, a complete coating of vulcanizable material above and beneath the same and entirely enveloping it, the upper coating being provided with upstanding, isolated ribs.

1,503,774. CHAIN. ANTON PETER STIANSEN, Brooklyn, N. Y. Filed Dec. 12, 1921. Serial No. 521,881. 7 Claims. (Cl. 74—32.)

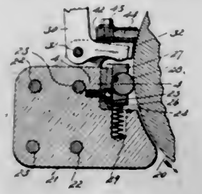


1. A chain composed of links 1 and 2, washer plates 3 and pins 4, said links 1 having pin holes 1^c through which said pins 4 are passed, said links 1 being also provided with cavities 1^a and protrusions 1^b that interlock with similar cavities and protrusions on the adjoining and cooperating links, said links 2 serving as a side link and being provided with apertures 2^c, said apertures serving as bearings for the protrusions 1^b on the adjoining links 1, said links 1 and 2 being also provided in their opposite ends with toothed portions 1^d and 2^d respectively, on which the teeth of the sprocket operate, and said links being held transversely by said washer plates 3 and said pins 4; substantially as specified.

1,503,775. RAIL SEAT. WILLIAM L. WEAVER, Swissvale, Pa. Filed Apr. 5, 1924. Serial No. 704,471. 6 Claims. (Cl. 238—25.)

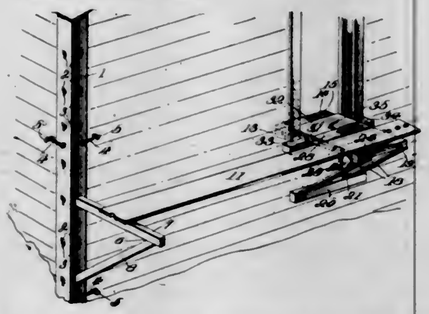
1. A rail seat comprising a housing open at its top, a concrete pot fitting substantially snugly within the housing, an expansible member interposed between the applied pot and the bottom of the housing to normally urge said pot projected above the top of the housing, and fastening elements embedded within the pot, said elements being positioned to engage a rail from opposite sides thereof.

1,503,776. CENTRIFUGAL PUMP OR BLOWER. LUDWIG WEIL, Biebrich-on-the-Rhine, Germany. Filed Apr. 1, 1922. Serial No. 548,682. 3 Claims. (Cl. 103—103.)



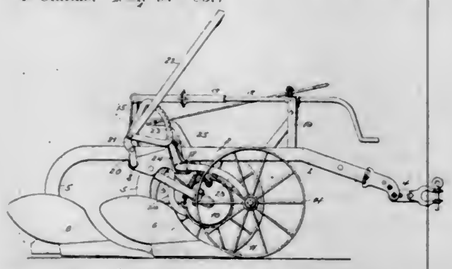
1. In a centrifugal pump or blower, the combination, with a casing having an axial inlet and a circumferential discharge; of a rotary member within said casing formed between said inlet and discharge with sets of passages, the passages of each set being disposed at the inlet end one behind the other in the direction of the axis of the member and at the outlet end one behind the other in the direction of the circumference of the member.

1,503,777. GRIPPING MECHANISM. RICHARD LESTER WILCOX, Waterbury, Conn., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Jan. 15, 1923. Serial No. 612,838. 19 Claims. (Cl. 188—81.)



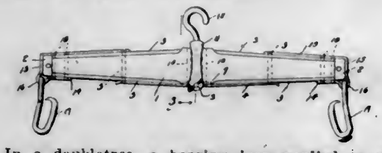
1. In mechanism of the character described; a rotary member; means for preventing the movement of said member in one direction, comprising a gripping device having an independently mounted roll that contacts with

a portion only of an exterior wall of said rotary member, with movably mounted carriage means for said roll where-



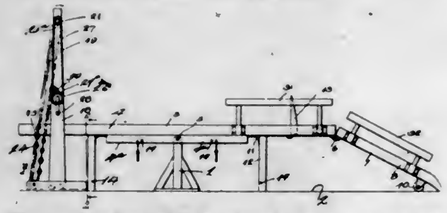
by the roll may have movement in two directions independently of the rotary member; and yielding means for moving the carriage in one direction.

1,503,778. SCAFFOLD. WILLIE R. YOUNG, Bainbridge, Ga. Filed Dec. 18, 1922. Serial No. 607,650. 10 Claims. (Cl. 304—14.)



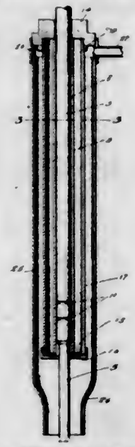
1. Scaffolding apparatus comprising a vertical member arranged to be secured in vertical position on the wall of a building and having a plurality of vertically spaced means for the support of a bracket, a wall bracket arranged to be carried by said member in any one of said positions, a window bracket provided with means for securing it to the sill of a window and provided with collapsible members one of which is capable of being positioned in two different vertical positions, and a board bridging said wall bracket and said window bracket and engageable with said last named member in either of its vertical positions.

1,503,779. PLOW. HERMAN E. ALTGELT, South Bend, Ind., assignor to Oliver Chilled Plow Works, South Bend, Ind. Filed Apr. 25, 1923. Serial No. 634,547. 4 Claims. (Cl. 97—83.)



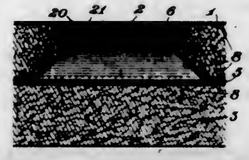
1. In a plow structure, the combination with a frame, furrow and land wheels, and crank axles for the respective wheels, of arms on the respective axles, a lever pivoted to the arm on the land wheel axle, a toothed segment with which said lever is cooperable, said toothed segment pivotally connected with said lever and with the arm on the furrow wheel axle.

1,503,780. DOUBLETREE. CHRISTOPHER C. BAILEY, Clinton, Miss. Filed June 19, 1923. Serial No. 646,415. 2 Claims. (Cl. 278—90.)



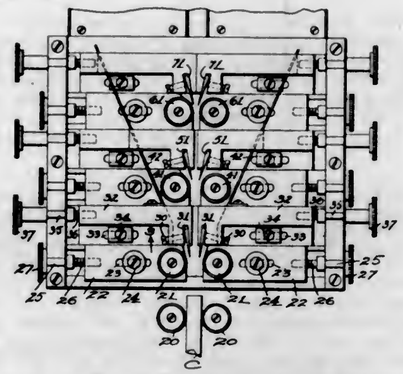
1. In a doubletree, a bearing iron applied to a side thereof, a reinforcing iron overlapping the bearing iron and side portions of the doubletree beyond the bearing iron, a clevis pin received between the bearing and reinforcing iron which are oppositely curved to receive the same, and a clevis pivotally connected to the doubletree by means of the clevis pin and having a hook connected thereto by means of a swivel joint.

1,503,781. TILTABLE VEHICLE PLATFORM. MYRON BAKER, Bridgeport, Conn. Filed Jan. 10, 1923. Serial No. 611,754. 1 Claim. (Cl. 214—1.)



The combination with a pivoted pivotal vehicle platform, of means for tilting said platform, said means comprising a U-shaped frame arching one end of the platform, endless chains at opposite sides of the platform, said chains extending over sprockets adjacent the upper and lower ends of the frame, a bar engaging the underside of one end of the platform and having its ends attached to the chains and means for rotating the sprockets adjacent one end of the U-shaped frame for raising the pivoted platform at its free end.

1,503,782. PACKING BOX FOR OIL WELLS. JOHN BARNES, Burkburnett, Tex. Filed Oct. 1, 1923. Serial No. 665,908. 7 Claims. (Cl. 74—86.)

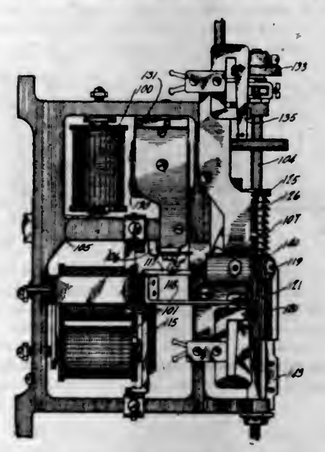


1. The combination with a plunger, of a liner having a ground fit with the plunger, a liner housing and support freely receiving said liner, and a cap threaded on the lower portion of said housing and supporting said liner.

1,503,783. PLASTER BOARD. CARL F. DAHLBERG, New Orleans, La. Filed Oct. 28, 1922. Serial No. 597,677. 3 Claims. (Cl. 72—124.)

1. A heat insulating plaster board comprising a body portion of compressible fibrous bagasse material provided with undercut perforations, the acute edges of said perforations being formed of more greatly compressed fibers than the fibers of said body portion, and a supporting base of compressible fibrous bagasse material to which said body portion is attached, said body portion and said supporting base being coated with a waterproofing material.

1,503,784. MACHINE FOR PRODUCING RATTAN WEAVING STRIPS. JOSEPH DUMONT, Gardner, Mass., assignor to Commonwealth Manufacturing Company, Gardner, Mass., a Corporation of Massachusetts. Filed Apr. 8, 1922. Serial No. 550,930. 1 Claim. (Cl. 144—184.)



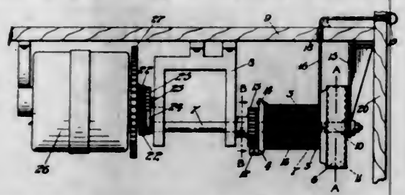
In a machine for splitting rattan, the combination with a frame, of a series of pairs of parallel slides on said frame, those of each pair being adjustable toward and from each other independently, a roller on each slide for engaging the opposite sides of a square reed, a corresponding series of pairs of splitting knives located with their cutting edges between each pair of rollers and spaced but parallel to diverging tangents from said rollers for splitting the reed as it passes through the rollers, means for adjusting each splitting knife independently, and means for adjusting each slide toward and from the other slide of the pair.

1,503,785. SELECTIVE SWITCHING MECHANISM. JOHN ERICKSON, Chicago, Ill., assignor to Automatic Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 28, 1921. Serial No. 456,338. 12 Claims. (Cl. 179—27.5.)

1. In an automatic switch, a rectangular cast metal frame, a shaft supported outside said frame, an operating magnet mounted inside the frame, one side member of the frame being cut away to permit control of the shaft by the armature of said magnet, and a bracket of non-brittle metal secured to said frame so as to bridge the cut away portion thereof and reduce the liability of breakage.

8. In an automatic switch, a s...t, operating magnets for first raising said shaft vertically and for then rotating it, a double dog comprising vertical and rotary

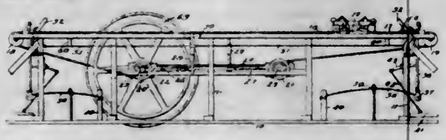
detents, a stationary dog, and three separate sets of ratchet teeth on said shaft engaged by said detents and stationary dog, respectively, to support said shaft during the operation thereof.



1,503,786. AUTOMOBILE LOCK. THOMAS JOHN FOLEY, Minneapolis, Minn. Filed July 22, 1920. Serial No. 398,083. 3 Claims. (Cl. 177—314.)

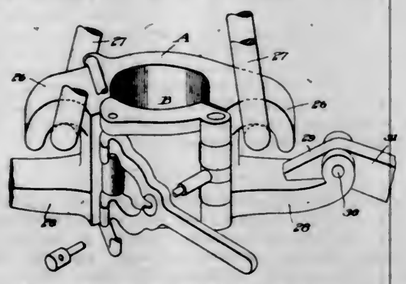
1. In a steering wheel lock, a wheel grip comprising relatively movable parts; a lock comprising means for holding said parts against relative movement; a support; a slide mounted to move in the support and carrying the grip whereby the grip may be disposed adjacent to the wheel to be locked; a signal; a circuit including the signal; a normally open switch in the circuit; means for closing the switch when the slide is moved to dispose the grip adjacent to the wheel to be locked; a second normally open switch in the circuit; and means operable by the lock to close said switch only when the parts of the wheel grip are in closed position and only upon improper manipulation of the lock.

1,503,787. MEANS FOR ENERGIZING OR WINDING THE SPRING MOTORS OF SOUND-REPRODUCING AND OTHER MACHINES. HARRY S. FOLK, Melbourne, Victoria, Australia. Filed Apr. 16, 1923. Serial No. 632,495. 2 Claims. (Cl. 185—39.)



1. A winding device for spring motors, comprising a winding spindle adapted to be connected to the motor shaft; a ratchet fixed to the spindle; a winding drum loosely mounted on said spindle and embodying a central

barrel and flanged end members, one end member being remote from the ratchet and made hollow so as to form a housing; a pawl pivoted to the other end member of the drum to engage said ratchet; a pull-cord adapted to be wound on and unwound from the drum barrel and to rotate the same during its unwinding; a fixed bearing

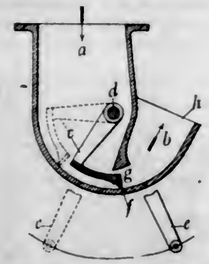


member for the drum projecting loosely into said housing in line with the spindle; and a return spring coiled within said housing and connected thereto at one end and at the other end to said fixed bearing member to automatically rotate the drum in the opposite direction when the pull-cord is released at the conclusion of the unwinding operation.

1,503,788. HEMP-STRIPPING MACHINE. PATRICK HENRY FRANK, Zamboanga, Philippine Islands. Filed June 5, 1920. Serial No. 386,722. 7 Claims. (Cl. 19—17.)

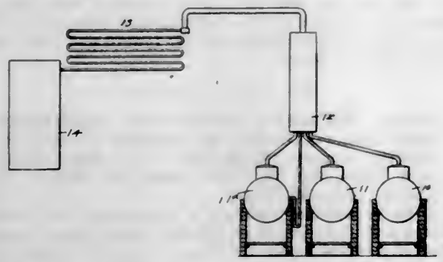
2. A hemp stripping machine comprising a main frame, knife frames adjustable vertically at opposite ends of the frame stripping knives in said latter frames, a carriage movable in the frame between said knives and having leaf holding clamps, actuating means for moving the carriage in relatively opposite directions, manually actuated connections for independently shifting the said carriage moving means into active position, connections actuated by the carriage for shifting said carriage moving means into inactive position, an adjustable controlling spring for each knife frame, and manually actuated means having engagement with the said knife frames for shifting the same against the tension of their springs.

1,503,789. WELL ELEVATOR. JOHN GRANT, Los Angeles, Calif., assignor to Dunn Manufacturing Company, Oxnard, Calif., a Corporation of California. Original application filed Apr. 13, 1922, Serial No. 552,264. Divided and this application filed May 2, 1923. Serial No. 636,101. 4 Claims. (Cl. 294—92.)



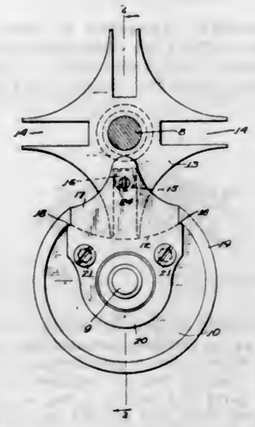
1. In an elevator having a body provided with open hook-like portions for engaging supporting links, a pawl pivotally engaged to the body near each of the hook-like portions of the body and having weighted portions forming balancing means for the pawls disposed so as to form an obstruction to the open hook-like portions of the body when the body is in lifted position and adapted to move to open position when the body is lowered to a resting position.

1,503,790. BUMPER. BENNIE P. HANSON, Cedar Falls, Iowa. Filed Sept. 5, 1923. Serial No. 661,032. 8 Claims. (Cl. 293—55.)



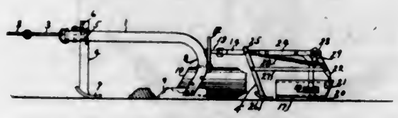
1. A bumper comprising spaced resilient bars, one bar having an end bent back in the form of a hook to extend reversely and contacting frictionally and slidably with another bar.

1,503,791. MEANS FOR DISCHARGING GRANULAR AND LIKE MATERIAL FROM RETORTS AND SIMILAR VESSELS. THOMAS WILLIAM STAINER HUTCHINS, Davenham, England. Filed June 25, 1923. Serial No. 647,731. 2 Claims. (Cl. 214—17.)



1. In apparatus for discharging granular and like materials from retorts and similar vessels, the combination comprising a stationary U-shaped conduit having its legs or branches of unequal length and directed substantially vertically, whereby the lower portion of the conduit will be sealed by material occupying said legs, said conduit having a lower curved wall merging into said legs, and an oscillating impeller arranged in the conduit and having a push-bar movable in a path parallel to said curved wall for forcing material from one leg into the other without breaking the seal formed by said material.

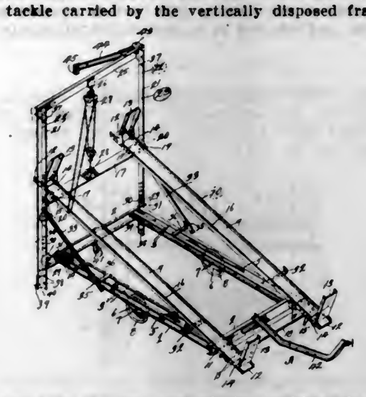
1,503,792. METHOD OF BLENDING GASOLINE. THOMAS L. KERR, Bighenrt, Okla., assignor of one-half to Kork Kelley, Dallas, Tex. Filed May 25, 1921. Serial No. 472,326. 4 Claims. (Cl. 196—37.)



3. The method of making a hydrocarbon oil which includes distilling casing head gasoline, distilling a heavier hydrocarbon oil, commingling their vapors, and condensing the commingled vapors.

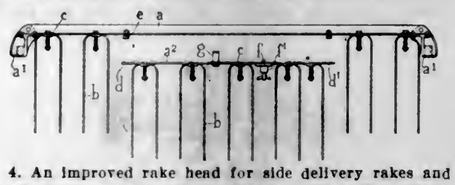
1,503,793. INTERMITTENT MOVEMENT FOR PROJECTORSCOPES. ABRAHAM KERSHAW, Scarborough, England. Filed Nov. 4, 1921. Serial No. 512,773. 3 Claims. (Cl. 74—21.)

1. An apparatus as characterized comprising a Geneva wheel; a constantly rotated driving wheel disposed in a plane coincident with said Geneva wheel; a plurality of bearing members contractibly mounted on said driving wheel; a driving pin mounted in said members; means for clamping said members on said pin; and means whereby said pin may be rotated.



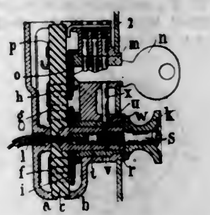
1,503,794. RIDGER AND GAP-FILLING MACHINE. CHARLES H. KRUSE, Coyote, and CHARLES M. GOODWIN, Santa Clara, Calif.; said Goodwin assignor to said Kruse. Filed Aug. 21, 1922. Serial No. 583,255. 5 Claims. (Cl. 97—55.)

1. In a device of the character indicated a gap closing machine comprising a revoluble scoop, a draft bar therefor, means carried by said draft bar for normally locking said scoop in operative relation to the ground, a shoe pivotally mounted on said draft bar, and a connection between said shoe and locking means for disengaging said locking means.



1,503,795. AUTOMOBILE HOIST. THOMAS A. MARTIN, Bridgeport, Conn. Filed Mar. 2, 1922. Serial No. 540,426. 3 Claims. (Cl. 214—1.)

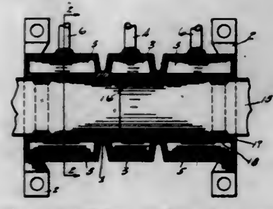
1. An automobile conveying and supporting truck, said truck comprising a horizontally disposed frame, said frame being tiltable, an auxiliary frame disposed on the frame and pivoted thereto at one end, said auxiliary frame being provided with wheel receiving channels for the reception of automobile wheels, detachable brackets extending upwardly from the wheel receiving channels adjacent their outer ends, said brackets being inwardly and outwardly adjustable, the ends of the wheel receiving channels extending beyond the ends of the frame, a vertically disposed frame pivoted to one end of the frame and arching the free end of the auxiliary frame, a block and tackle carried by the vertically disposed frame and



connected to the free end of the auxiliary frame and means for holding the free end of the auxiliary frame in raised position.

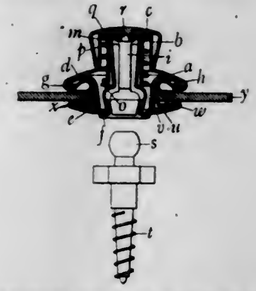
1,503,796. SIDE-DELIVERY RAKE AND SWATH TURNER. WILLIAM EDWARD MARTIN, Scotgate, Stamford, England. Filed June 19, 1923. Serial No. 646,302. 4 Claims. (Cl. 56—365.)

4. An improved rake head for side delivery rakes and swath turners having in combination upwardly extending end castings, a main rake head extending in a straight line horizontally between and located at the upper part of said end castings, tines permanently and directly fixed to each end of the main rake head, a detachable bar carrying tines, an angle iron fixed to said detachable bar having slots in the vertical portion thereof, a spring bolt carried by said detachable bar and entering an aperture in the main rake head and headed projections fixed horizontally in the main rake head over which projections fit the slots in the angle iron fixed to the detachable bar, the angle iron and detachable bar being throughout their lengths in close contact with the main rake head and all the tines extending from the main rake head into close proximity to the ground substantially as set forth.



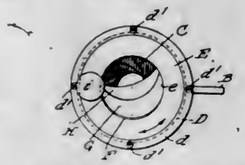
1,503,797. SWITCH OR SWITCHBOARD FOR CONTROLLING ELECTRIC CIRCUITS. ALBERT HENRY MIDGLEY, Uxbridge, England, assignor to Midgley Car Lighting Company, Limited, London, England. Filed Apr. 3, 1922. Serial No. 549,331. 8 Claims. (Cl. 200—44.)

1. A switchboard for controlling the starting, lighting and ignition circuits on motor vehicles, comprising a switch member adapted for both rotary and axial



movements for controlling two of said circuits, and a locking member for locking said switch against both movements, and adapted to control the third circuit.

1,503,798. TUBE-VULCANIZING DEVICE. JOSEPH G. MOOMY, Erie, Pa., assignor to Mary H. Moomy, Erie, Pa. Filed Mar. 17, 1922. Serial No. 544,627. 5 Claims. (Cl. 18—38.)



4. In a tube vulcanizing device, the combination of a mold; and means resisting longitudinal extension of the tube in the mold comprising friction surfaces of greater frictional resistance than the mold, said friction surfaces extending around and projecting slightly into the mold.

1,503,799. FASTENING OF THE BUTTON TYPE. THOMAS MORTON, Birmingham, England. Filed Nov. 8, 1923. Serial No. 673,607. 6 Claims. (Cl. 24—211.)

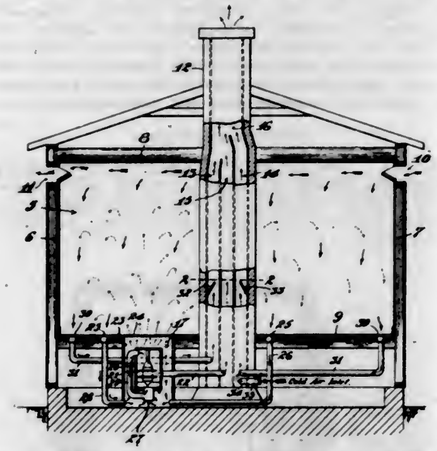
1. In a fastening comprising a pair of detachably connected parts, the combination comprising a pair of components constituting the body of one of the detachably connected parts, one of the components comprising a flanged disk having formed on one side of it a boss with an internal flange at its outer end, the other component comprising a plate also formed with a boss, said last mentioned boss being adapted to provide an annular seating, a contractible and axially movable element arranged within the said components, a spring for pressing said element against said seating, and external means for actuating said element.

1,503,800. OBLIQUE-LIGHT DIAPHRAGM. HARVEY N. OTT, Buffalo, N. Y., assignor to Spencer Lens Co., Buffalo, N. Y. Filed May 25, 1923. Serial No. 641,422. 12 Claims. (Cl. 88—39.)

1. An oblique light diaphragm for use on optical instruments, including a plurality of leaves which are movable into an inoperative position out of the path of light in which said leaves are arranged one directly above another, and which are movable successively toward the center of the path of light, each of said leaves being adapted to be positioned at a different distance from said center.

1,503,801. BUCKLE. LAWRENCE F. OTTEN, Newport, Ky., assignor to The L. F. Otten Manufacturing Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Aug. 8, 1922, Serial No. 580,495. 6 Claims. (Cl. 24—191.)

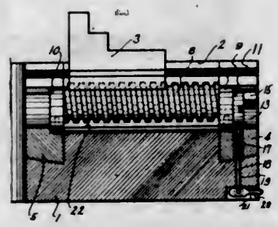
4. In a belt buckle for personal wear, a belt attaching lever adapted to be pivotally mounted and having ears each provided with a slot, a grip having a reduced end adapted to be inserted into its adjacent slot when assembling said parts and having a lug on said reduced end of less width than said reduced end to permit said grip to be detachably mounted.



1,503,802. DRAFT DEVICE FOR LOCOMOTIVES. JOHN E. OSMER, Owosso, Mich., assignor of one-half to William F. Byerly, Owosso, Mich. Filed Feb. 28, 1921. Serial No. 448,445. 20 Claims. (Cl. 162—4.)

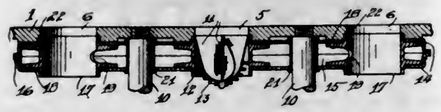
1. In a locomotive, the combination of a cylinder, an exhaust passage, a stack, and pressure fluid discharge means adapted to complement the intermittent blasts into the stack from the locomotive cylinders to effect a substantially constant discharge of pressure fluid into the stack irrespective of the speed of travel of the locomotive.

1,503,803. HEATING AND VENTILATING SYSTEM. ELMER PEMBERTON, Los Angeles, Calif. Filed Oct. 21, 1920. Serial No. 418,475. 3 Claims. (Cl. 98—27.)



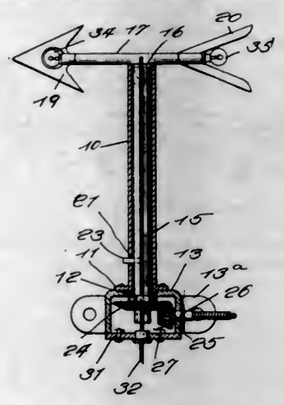
1. In a heating and ventilating system, a room, means for delivering cool air directly to the upper portion of the room, a chimney having a constricted upper end portion and formed with a smoke flue and a pair of vent flues, said smoke and vent flues opening into the constricted portion of the chimney a distance below the

chimney top at different elevations, a communication between each of said vent flues and the lower portion of



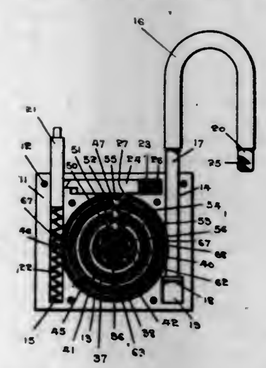
the room, and a heating element arranged to receive air for combustion from the lower portion of said room and to deliver hot products of combustion to the smoke flue.

1,503,804. QUICK-ADJUSTMENT CHUCK. JAMES L. PHILLIPS, Ensley, Ala. Filed June 11, 1923. Serial No. 644,611. 4 Claims. (Cl. 279—112.)



1. In a quick adjustment independent chuck, a face plate with a chuck jaw slot, a chuck jaw movable in said slot and having threads cut in an under portion thereof, a screw adapted to engage said threads and hold the jaw in adjusted positions, a full circular thrust bearing for each end of said screw, and means connecting said bearings for joint rotation, said screw being eccentrically journaled in said bearings whereby rotation of said bearings will quickly interengage and disengage said jaw and screw.

1,503,805. FUEL-MIXER FOR INTERNAL-COMBUSTION ENGINES. CHARLES L. REED, Rochester, N. Y. Filed Mar. 25, 1921. Serial No. 455,560. 6 Claims. (Cl. 123—122.)

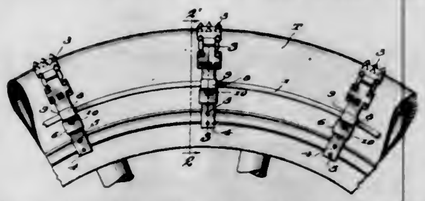


1. A fuel mixer comprising a chamber having an inlet passageway and two exhaust passageways on opposite sides of the inlet passageway, each passageway entering through one wall of the chamber and out through the opposite wall in line with its entrance, the inlet passageway being closed to the chamber and the exhaust passageways, each opening to the chamber.

1,503,806. AUTOMOBILE DIRECTION SIGNAL. FRED L. ROSE, Concord, Calif. Filed Sept. 24, 1923. Serial No. 664,470. 5 Claims. (Cl. 116—46.)

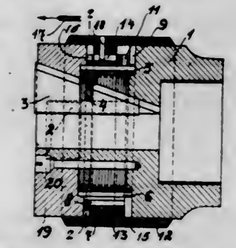
1. In a direction signal, a pivotally mounted unbalanced signal bar adapted to be raised and lowered, a support upon which the bar rests when in lowered position to thereby maintain the bar in horizontal position, and means for rotating the bar including a part elevating the bar upon rotation thereof to a predetermined degree to thereby disengage the bar from the support and permit tilting thereof.

1,503,807. PERMUTATION LOCK. JOHN L. SAUNDERS and JESSE C. SAUNDERS, Sedalia, Mo., assignors of one-fourth to W. W. Barrett and one-fourth to E. R. Barrett, both of Sedalia, Mo. Filed Nov. 24, 1922. Serial No. 603,096. 37 Claims. (Cl. 70—19.)



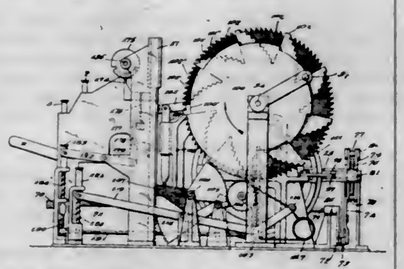
1. In a lock, relatively movable tumblers, means movable with the tumblers and arranged to move relatively to the tumblers when the tumblers are brought to a predetermined relative position, and latching means arranged to be moved with the tumblers by said means when said means are moved relatively to the tumblers.

1,503,808. ATTACHMENT FOR ANTISKID DEVICES. HERMAN F. C. SCHULTZ, Youngstown, Ohio. Filed Dec. 11, 1923. Serial No. 679,923. 2 Claims. (Cl. 152—14.)



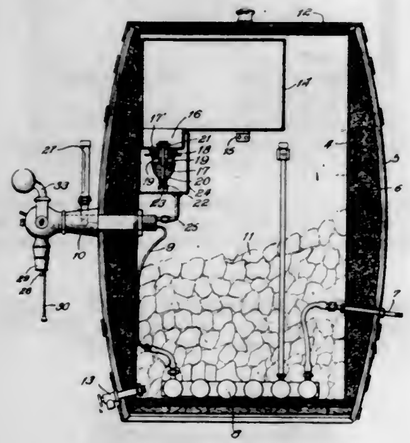
2. In a device of the character described, in combination with a tire, a pair of holding rings, each provided with a plurality of openings and adapted to be disposed upon opposite sides of said tire, a plurality of cross-section members, each of said members being provided at

each end with an extension strap or bar adapted to engage an opening in said ring, and provided with one or more openings, a clamping member slidably engaging



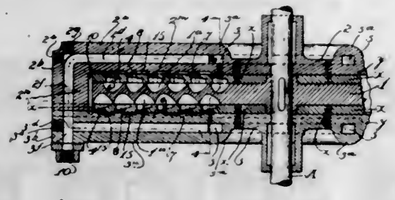
said extension bar, and provided at its inner end with a transverse clip element adapted to engage said holding ring, and means for holding said clamping member at any pre-determined point upon said bar.

1,503,809. CHUCK WITH WEDGE JAWS. PAUL SCHULZ, Bodenbach-on-the-Elbe, and JULIUS JAKOWITSCH, Kemotau, Czechoslovakia. Filed Feb. 28, 1922. Serial No. 539,967. 3 Claims. (Cl. 270—70.)



1. An improved wedge chuck comprising in combination a body, wedge shaped clamping jaws, a disk partly inserted in said clamping jaws and controlling same, a nut surrounding said disk and in threaded engagement therewith for displacing the disk in an axial direction, a pin traversing the body and the disk in axial direction and designed to prevent the disk from rotating, teeth on the outer surface of said nut, a ring eccentrically mounted upon said nut, internal teeth on said ring engaging with the teeth of the nut, an outer sleeve having an eccentric rib in its bore, rotatable on said body and adapted to be displaced upon said body in an axial direction, means on the outer surface of the said ring to be engaged by the eccentric rib of the outer sleeve for longitudinally shifting the ring when the outer sleeve is axially displaced and means for coupling said ring with the body to lock the jaws in closed position.

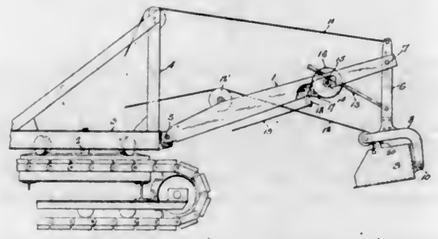
1,503,810. CALCULATING MACHINE. TAYLOR W. ROSS, Madison, Ind. Filed Jan. 19, 1920. Serial No 352,314. 21 Claims. (Cl. 235—61.)



1. In a calculating machine, setting-up mechanism comprising a primary element to be positioned, a plurality of gage elements movably associated with said primary element, a stop member between each adjacent two of said elements, said stop member being relatively adjustable between its members to determine the amount of relative movement, a final stop member arranged in the path of movement of the final of said elements and adjustable to different positions to determine the amount of movement of said final element, finger keys connected to said stop members for setting the same, and means for indicating the positions of said stop members.

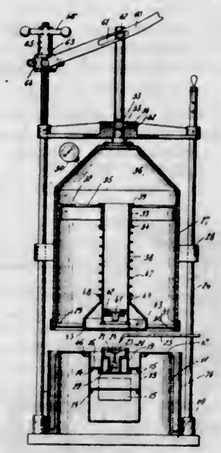
1,503,811. DISPENSING APPARATUS. CHARLES L. BASTIAN, Chicago, Ill., assignor to The Bastian-Blessing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 19, 1921. Serial No. 446,447. 2 Claims. (Cl. 225—23.)

1. A draft for dispensing apparatus comprising a short and comparatively large nozzle for discharging a coarse stream of carbonated water, a pipe smaller than said nozzle arranged in and projecting below the nozzle for discharging syrup, another pipe smaller than the syrup pipe and arranged in the nozzle and projecting below the syrup pipe and adapted to discharge a fine stream of carbonated water at the bottom of a glass being filled from said arm, and a valve common to the nozzle and the two pipes.



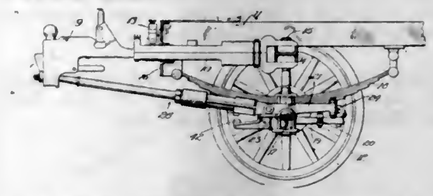
1,503,812. STEAM TURBINE. ERIC BLUCKER, Chicago, Ill. Filed May 12, 1923. Serial No. 638,473. 9 Claims. (Cl. 253—94.)

1. In a steam turbine in combination with a rotor disk having a plurality of concentric series of laterally opening pockets concavely curvilinear in circum-axial section of the disk; a casing in which the rotor is fitted to revolve with its said pocketed face contiguous to a fixed wall of the casing, said wall having a corresponding plurality of concentric series of pockets opening toward the rotor disk pocket series respectively; annular channels situated laterally outward from the pockets of each series



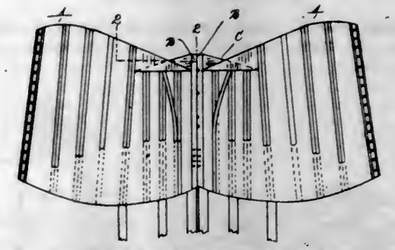
of the casing, and ducts from said channels extending between the pockets of the adjacent series opening at the inner face of the casing for discharge into the rotor pockets of the next outward series; the innermost of said annular channels having steam pipe connections, and ducts from each casing pocket leading into the casing channels lateral to the next outer series of casing pockets, for supplying to said channels steam for discharge as described into the opposed series of rotor pockets.

1,503,813. EXCAVATOR. PAUL BURKE, Green Bay, Wis., assignor to Northwest Engineering Company, Green Bay, Wis., a Corporation of Wisconsin. Filed Nov. 27, 1922. Serial No. 603,535. 10 Claims. (Cl. 214—138.)



1. In a device of the class described, the combination of a boom, a dipper handle pivotally mounted thereon, a dipper pivotally mounted on the dipper handle, a hoisting line operatively connected to the boom, a sheave mounted near the lower end of the dipper handle, a drag line attached to the dipper to swing the same relative to its handle and passing over the sheave, and means for holding the dipper handle from rotating with respect to the boom.

1,503,814. DENTAL CASTING MACHINE. MARTIN F. BURNS, Flushing, N. Y. Filed Nov. 21, 1922. Serial No. 602,448. 37 Claims. (Cl. 22—69.)



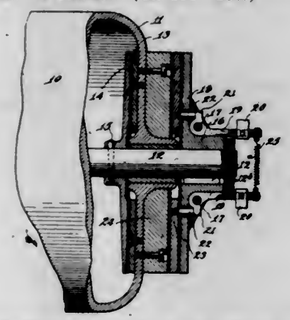
1. A dental casting machine comprising a pair of telescoping members, one of said members having a support for a dental flask and the other member having means for directing the air to said flask as said members are moved into telescoping relation and the air is compressed between the members.

1,503,815. TRAILER TRUCK. ADDI BENJAMIN CADMAN, Beloit, Wis., assignor to Warner Manufacturing Company, Beloit, Wis., a Corporation of Wisconsin. Filed July 10, 1920. Serial No. 395,273. 24 Claims. (Cl. 280—33.55.)

1. A trailer truck having, in combination, a body frame, an axle having swivelled carrying wheels thereon, springs supporting said frame from said axle, a draw bar pivotally mounted on said frame, a tie rod connecting said wheels to maintain them in parallelism, a steering lever pivoted on a vertical axis on said axle and connected with said wheels, an inclined lever having its front end detachably connected to said draw bar and having its rear end connected to said steering lever to rock up and down thereon but to cause rotation of said steering lever about its axis, means for locking said draw bar to the body frame in a central position, and means rigid with said axle with which said inclined lever is arranged to be interengaged when disconnected from the draw bar whereby to hold the wheels at right angles to the axle.

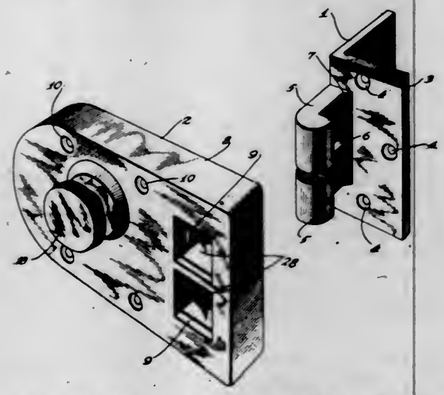
1,503,816. CORSET. HARRY A. COLLEY, Detroit, Mich., assignor to American Lady Corset Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 26, 1921. Serial No. 455,938. 2 Claims. (Cl. 2—30.)

1. A corset formed of two sections, the upper edges of said sections being inclined downwardly and inwardly toward each other, each section having an opening at the top thereof, and inner and outer substantially triangular-shaped elastic members crossing each other and secured to the edges of said openings, the upper edges of the outer members being in alignment with the inclined edges of said sections.



1,503,817. OIL BURNER. THOMAS S. COMPERE, Joplin, Mo. Filed July 14, 1922. Serial No. 575,080. 5 Claims. (Cl. 158—77.)

3. An oil burner comprising a mixing chamber having an opening extending therethrough and tapered from opposite ends to form a restricted opening intermediate the ends of the chamber, an oil supply pipe having an atomizing nozzle arranged within said restricted opening and spaced from the walls thereof, a sleeve surrounding said oil pipe and communicating with the inner end of

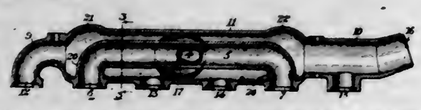


the opening in said mixing chamber, means for supplying a combustion supporting fluid to said sleeve, an agitating chamber connected at the opposite end of the opening in said mixing chamber, a pair of revolving fans mounted in said agitating chamber, said fans being adapted to rotate in opposite directions, and a burner nozzle connected with said agitating chamber.

1,503,818. ELECTRIC-MOTOR GOVERNOR. HERBERT W. CRANE, Chicago, Ill. Filed Apr. 14, 1922. Serial No. 552,722. 6 Claims. (Cl. 188—187.)

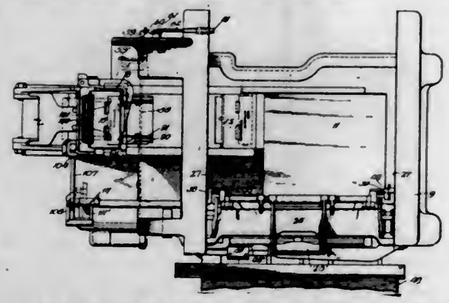
5. In a governor for electric motors, the combination of a fixed wall, an armature shaft, a friction disk rigid with the shaft, governor arms mounted on the shaft, and a fixed surface against which the centrifugal force of the governor may be exerted whereby to effect bodily longitudinal movement of the armature shaft, the governing device and the friction disk into contact with said wall.

1,503,819. LOCK. JOHN DECKER, New York, N. Y. Filed Sept. 20, 1921. Serial No. 502,055. 6 Claims. (Cl. 70—76.)



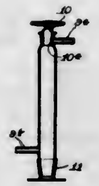
1. A door lock embodying a casing adapted to be mounted on one side of a door so as to project beyond the edge thereof and provided adjacent one end with an opening positioned beyond the edge of the door, a movable member within the casing and also provided with an opening, and means for moving said member to bring the opening of the member into and out of registration with the opening of the casing, in combination with a hook shaped keeper intended to be mounted on one side of the door jamb in the path of the opening of the casing and adapted, when the door is swung shut, with the opening of the movable member in registration with the opening of the casing, to pass through said opening and into the casing, whereupn the movement of said member will shift the same into a position wherein the openings are out of registration to cause the hook shaped keeper to hook over the movable member and preclude separation of the casing and keeper and keep the door closed until the opening of the movable member is returned to registration with the opening of the casing.

1,503,820. SAFETY DOOR LOCK. GEORGE DIETZ, New York, N. Y. Filed Oct. 19, 1923. Serial No. 669,471. 4 Claims. (Cl. 292—293.)



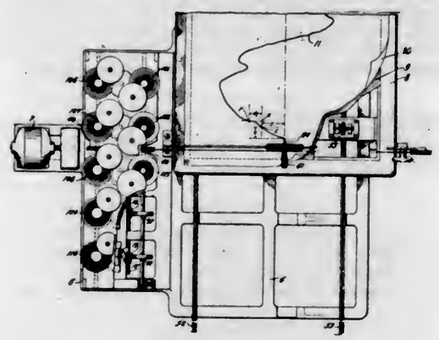
1. A device of the class described comprising a rectangular frame, the sides of said frame having grooves therein, a carriage extending across said frame and engaged in said grooves, a threaded shaft rigid with said carriage, a wing nut engaging said shaft, said wing nut when rotated being adapted to lift or lower the carriage, the frame being insertable between a door and door frame, and means on said carriage for engaging said door frame.

1,503,821. COMBINED EXHAUST AND INTAKE MANIFOLD. CHARLES F. DIKE, Joplin, Mo. Filed Mar. 23, 1918. Serial No. 224,185. 2 Claims. (Cl. 123—122.)



1. An exhaust manifold, an intake manifold having an approximately horizontal portion wholly within and in spaced relation to all the walls of the exhaust manifold and formed with outlet passages opening through the exhaust manifold on the same side and in alignment with the exhaust receiving ports thereof, said intake manifold being arranged opposite to but spaced farther from the exhaust ports than from the wall of the exhaust manifold opposite said exhaust parts, said exhaust manifold being formed with enlargements opposite said outlet portion of said intake manifold for the purpose described.

1,503,822. PRINTING AND ADDRESSING MACHINE. JOSEPH S. DUNCAN and ULYSSES G. LEE, Chicago, Ill., assignors to Addressograph Company, Chicago, Ill., a Corporation of Illinois. Filed May 24, 1920. Serial No. 383,615. 29 Claims. (Cl. 101—56.)

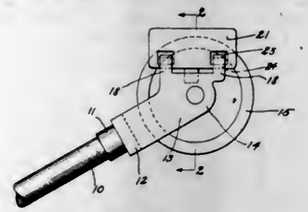


1. In a printing machine, the combination of means for feeding printing devices one at a time to printing position, selector means, and means for imparting a movement to the printing device to be fed preliminary to its feeding movement to operate the selector means.

1,503,823. DRYING TUBE. WILLIAM F. FINKL, Chicago, Ill. Original application filed June 16, 1919, Serial No. 304,466. Divided and this application filed May 20, 1921. Serial No. 471,298. 5 Claims. (Cl. 23—3.)

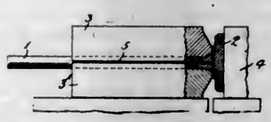
1. A drying tube having a body portion, an upper stopper therefor, a lower removable stopper therefor forming a base for said tube, the lower end of the drying tube projecting into the interior of said lower stopper so that the lower stopper engages the outer face of the drying tube, whereby the material in the drying tube is prevented from getting between the engaging faces of the tube and stopper.

1,503,824. HARMONIC ANALYZER. THORNTON C. FRY, Wyoming, N. J., assignor to Western Electric Company, Incorporated, New York, N Y., a Corporation of New York. Filed Dec. 11, 1920. Serial No. 430,103. 22 Claims. (Cl. 33—1.)



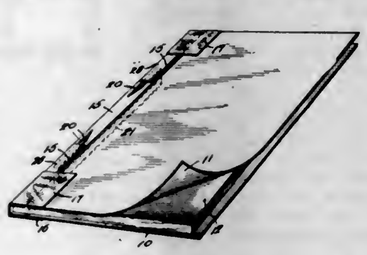
1. A harmonic analyzer comprising a base member, a movable frame and a plurality of integrating mechanisms mounted on said base member, and a source of power connected with said frame and mechanisms for imparting motion thereto.

1,503,825. METHOD OF WELDING METALS. HANS GOLDSCHMIDT and GUSTAV SCHÖNWALD, Berlin, Germany, assignors to Gesellschaft für Aluminothermie, Berlin, Germany. Filed June 8, 1922. Serial No. 566,849. 8 Claims. (Cl. 22—204.)



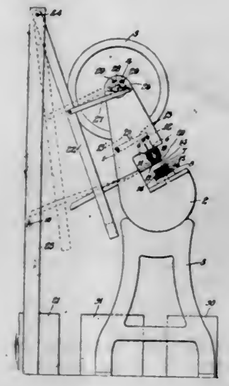
1. The method of uniting metal parts which consists in substantially enclosing the surfaces to be joined, circulating highly heated gas over said enclosed surfaces to preheat them to substantially welding temperature, then placing around said highly heated surfaces a mould of reduced content which engages the sides of said parts and extends in close proximity to the edges of said surfaces to be joined and introducing into said mould molten metal, while said surfaces to be joined are in close proximity therein.

1,503,826. TROLLEY GUIDE. FRANK GROSS, Brooklyn, N. Y. Filed Sept. 24, 1923. Serial No. 664,480. 3 Claims. (Cl. 191—77.)



1. A trolley comprising a grooved pulley, a yoke supporting said pulley, ears projecting from the sides of said yoke, the sides of said yoke having a recess between each set of ears, the ears being provided with vertical slots, guard plates, means in said plates engaging the recesses between the ears, and means for permitting rotation of said plates.

1,503,827. PROCESS OF WELDING CAST IRON TO STEEL. PRESTON M. HALL, Swampscott, Mass., assignor to Thompson Electric Welding Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 20, 1922. Serial No. 530,525. 17 Claims. (Cl. 219—10.)



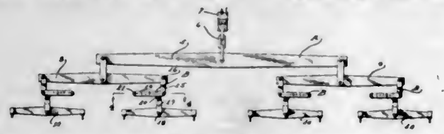
1. Composite metal work consisting of a headed rod the head and stem of which are united on the side of the head from which the rod projects by a heat and pressure weld formed in part of the forged metal of the end portion of the stem shaped and welded by pressure against the surface of the head to produce a weld having in the aggregate a cross-sectional area greater than the cross-sectional area of the stem back of the weld.

1,503,828. PERMANENT DOCUMENT BINDER. FREDERICK H. HARRIS, Chicago, Ill. Filed Oct. 6, 1920. Serial No. 414,993. 7 Claims. (Cl. 281—21.)

1. A document binder comprising two covers separate from each other and having stubs at their rear edges which lie in the respective planes of said covers, flexible lacing elements fixed to the stub of one cover and threaded through apertures in, and lying upon, the stub of the other cover, and flexible strips separate from the covers and stubs to hinge said covers to their respective stubs, one of said strips being extended beyond its associated stub and arranged to be folded over and fastened to the other stub and the adjacent margin of its associated cover and to also overlie the terminals of said lacing elements.

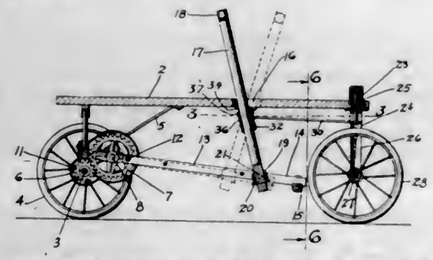
1,503,829. POWER PRESS FOR FORMING MICA WASHERS AND OTHER INSULATING FORMS. ELDON G. HEALD, West New Brighton, N. Y., assignor to Eugene Munsell & Co., New York, N. Y., a Corporation of New Jersey. Filed Mar. 12, 1923. Serial No. 624,343. 7 Claims. (Cl. 164—13.)

1. In a machine for stamping insulating forms from insulating sheets, a pair of relatively movable cooperating die members, one disposed above the other and a reciprocable inclined chute operating in synchronism with the relatively reciprocating die members, said chute having its lower end leading to a depository for receiving the finished forms and adapted to assume positions alternately with its elevated end between the dies when they are separated and out of the path of the moving die when the latter is operated to bring it into engagement with the stationary die.



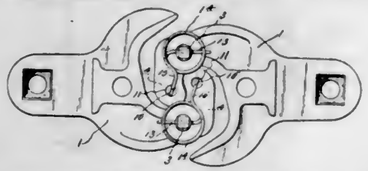
1,503,830. SKY-WRITING DEVICE. GEORGE HINEMAN, Ann Arbor, Mich. Filed Mar. 12, 1924. Serial No. 698,585. 9 Claims. (Cl. 244—1.)

5. In a sky writing device, the combination of means for projecting a plurality of smoke bombs each provided with timing mechanism for exploding the same simultaneously, means carried by the bombs for propelling the same at different initial velocities, whereby the said bombs are exploded at different altitudes, and means for controlling the projecting of said smoke bombs at predetermined time intervals.



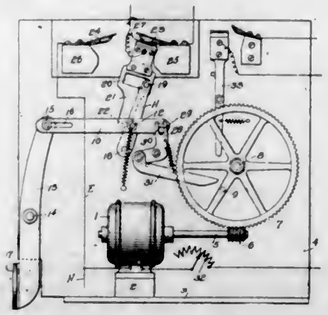
1,503,831. DRAFT DEVICE. OSCAR H. HOVDA, Grand Meadow, Minn. Filed Sept. 14, 1922. Serial No. 588,261. 2 Claims. (Cl. 280—33.16.)

1. In a draft appliance, a means for connecting parts of the appliance together including a pair of levers, means pivotally connecting the levers together at one end, said levers being normally positioned longitudinally of each other with one extending beneath the other and one having its free end portion extending to one side to project beyond the side of the other lever when the levers are in the normal position, means pivotally connected with the free ends of said levers for connecting the levers with the parts of the draft appliance, said levers having openings for registering when the



levers are in a normal position, and a fragile pin adapted to be passed through aligned openings in the levers to releasably retain the levers in the normal position.

1,503,832. TRICYCLE. ARTHUR O. HUBBARD, Minneapolis, Minn. Filed May 7, 1923. Serial No. 637,262. 9 Claims. (Cl. 208—38.)

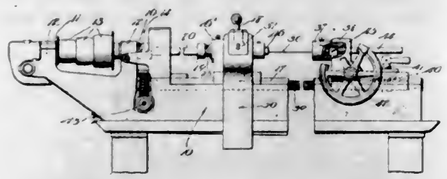


1. A child's vehicle comprising a frame having rear driving wheels and a forward steering wheel, a lever mounted to oscillate on a horizontal axis in said frame and operatively connected through a foot-operated lever pivoted thereon with said rear wheels, said first mentioned lever being also mounted to rotate on its longitudinal axis, and means connecting said lever with said forward wheel for oscillating it to steer the machine.

1,503,833. CAR COUPLER. GEORGE W. JACOBS, Los Angeles, Calif. Filed June 13, 1922. Serial No. 567,955. 1 Claim. (Cl. 213—116.)

In combination, a draw head formed with a vertical pin receiving opening, a jaw member, a pivot pin extending through an opening in the jaw member, and the pin receiving opening of the draw head for pivotally connecting the jaw member thereto, said draw head being formed at one side with a plurality of slots adjacent the pin receiving opening and extending radially therefrom, a cotter pin extending through the transverse opening in the pivot pin and seating in one of said radial slots, a coil spring having one end formed in diametrical relation to the coil thereof, and extending through an opening in the end of the pin opposite the end receiving the cotter pin, said end portion seating against the surface of the draw head, and the other end of said spring extending outwardly from the coil and formed with a laterally extending terminal seating in an opening in the jaw member, whereby the cotter pin secures the pivot pin against axial movement in the draw head, locks the diametrical end portion of the spring in the pin against the upper side of the draw head, and is adapted for adjustment in the radial slots to increase or decrease the tension of the spring for operating the jaw member.

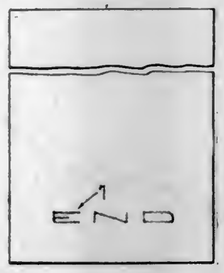
1,503,834. TIMING APPARATUS FOR USE WITH PICTURE-PROJECTING MACHINES. GEORGE A. KERESTES, Pittsburgh, Pa., assignor to Novelty Amusement Co., Pittsburgh, Pa., a Corporation of Delaware. Filed May 20, 1919. Serial No. 298,405. 6 Claims. (Cl. 161—1.)



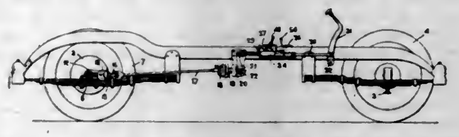
1. In apparatus of the character described, the combination with an interrupted electric circuit, a switch device in said circuit, a timing mechanism including an electric motor, manually controlled means for moving the switch to complete the circuit to the motor, and switch moving means interposed between the timing machine and the switch device and coacting with the timing mechanism for moving the switch to break the circuit to the motor.

1,503,835. SOLIDIFIED LIQUID FUEL AND PROCESS OF MAKING THE SAME. HERBERT KRANICH, Brooklyn, N. Y., assignor to S. Sternau & Company, Inc., Brooklyn, N. Y., a Corporation of New York. Filed June 7, 1919. Serial No. 302,564. 9 Claims. (Cl. 44—7.)

1. A solid infusible fuel, comprising a solution of approximately 5 parts alcohol, 1 part pyroxyline, 1 part acetone, 75 parts of a 5% solution of ammonium nitrate and dissolved in alcohol, and a small proportion of sericose.



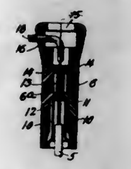
1,503,836. DEEP-DRILLING MACHINE. JOHN J. KUNZER, Chicago, Ill., assignor to Joseph T. Ryerson & Son, Chicago, Ill., a Corporation of Illinois. Filed Apr. 7, 1919. Serial No. 288,169. 16 Claims. (Cl. 77—3.)



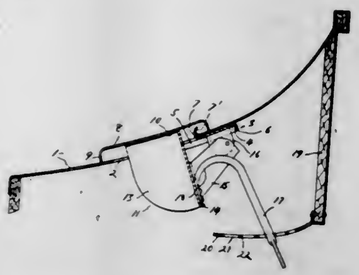
1. In drilling machines, chuck means for holding the work for presentation thereto of a drill, and means having end engagement with the face of the work to automatically frictionally form a metallic seal in the end face of the work around the drilled area.

1,503,837. TYPEWRITER SHEET. JOHN A. LANCASTER, Jersey City, N. J. Filed Oct. 23, 1920. Serial No. 418,950. 4 Claims. (Cl. 283—1.)

2. A sheet for use in a writing machine, having near one end an isolated mark to indicate the approach of the end of the sheet when the sheet is being written upon, said mark being spaced at a definite predetermined position from the end of the sheet, so that the operator may be enabled, when discerning the mark, properly to gage the work and thereby avoid overwriting the sheet.

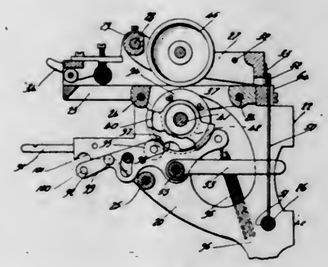


1,503,838. BRAKE-ACTUATING MECHANISM. RALPH M. LOVEJOY, Meredith, N. H. Original application filed Aug. 4, 1919, Serial No. 315,051. Divided and this application filed Feb. 7, 1921. Serial No. 443,000. 8 Claims. (Cl. 188—196.)



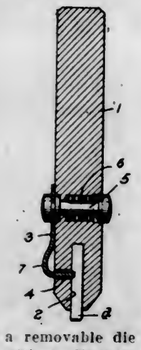
8. Brake mechanism comprising a brake, a brake lever, means connecting said brake lever to said brake including a sectional instrumentality comprising a housing connected to one of the members of said sectional instrumentality and a rack telescopically mounted in said housing connected to the other member of said sectional instrumentality, a lever fulcrumed upon said casing having a pawl on one arm thereof engaging said rack and the other arm thereof movable into engagement with a stationary member during the brake-applying movement of said brake lever and operable upon further movement of said brake lever to shorten the effective length of said sectional instrumentality and a dog mounted upon said casing engaging said rack acting to retain the sectional instrumentalities in said shortened condition.

1,503,839. PLUG FOR SADIRONS. THOMAS J. MADIGAN, New York, N. Y. Filed Jan. 7, 1922. Serial No. 527,584. 3 Claims. (Cl. 173—332.)



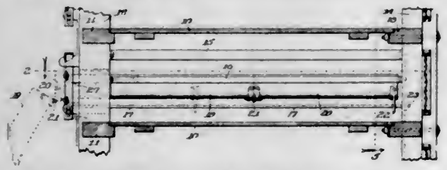
1. A connecting plug for electrically heated sad irons composed of similar insulating sections, each carrying a pair of socket sections symmetrically positioned in the meeting faces of the plug sections so that when the plug sections are secured together the corresponding members of the pairs of socket sections will be electrically connected and disposed in cooperative relation to form a resilient socket, and an integral hook on one section of each pair engaged by the other section when the plug sections are secured together to clamp said hook on the lead wire.

1,503,840. COWL-VENTILATOR. HERMAN C. MAISE, Detroit, Mich., assignor to Briggs Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Dec 27, 1922. Serial No. 609,203. 2 Claims. (Cl. 98—22.)



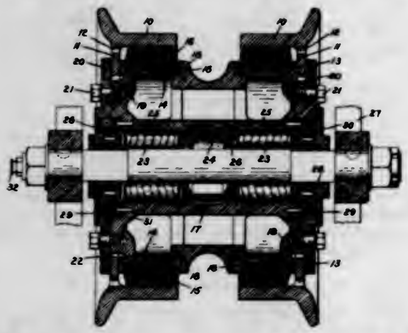
1. The combination with a cowl having an opening therein and a flange extending upwardly from the rear edge of the opening, a bracket plate secured directly to the inner face of said cowl at the rear edge of said opening and having leg portions secured to said cowl at the opposite ends of said opening, said bracket plate also having a flange projecting upwardly from its forward edge, said flange extending through the opening in the cowl and reinforcing the flange of the cowl at the rear edge of the opening, a cover for the opening in the cowl having marginal depending flanges, the flanges of said cover being of sufficient height to embrace the upwardly extending flange aforesaid and still contact with the upper side of the cowl on all sides of the opening therein, a shield projecting inwardly from said cover and pivotally connected to said bracket plate, said shield being formed from one piece of material and comprising a rear wall and forwardly extending side wings, said rear wall and side wings having flanges at one end secured directly to the inner face of said cover, and actuating means for said cover connected to the rear wall of said shield.

1,503,841. TICKET-DELIVERING MACHINE. ALBERT MARSH and HERBERT PHILIP ALAIS, London, England. Filed Aug. 27, 1923. Serial No. 659,606. 27 Claims. (Cl. 101—66.)



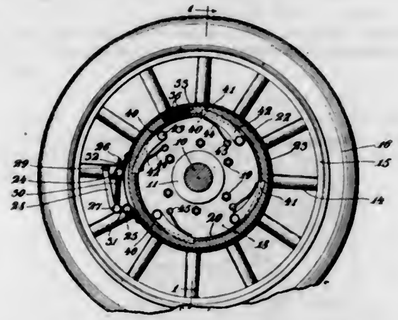
1. In a ticket delivering machine, a rotatable mutilated roller and a freely pivoted roller adapted to grip the ticket strip between them, a main frame and a hinged frame in which these rollers are mounted, means for resiliently pressing the two rollers towards each other, a slidable stop adapted to engage each ticket of the strip in turn so as to positively position it between each movement, a guillotine knife for cutting off each ticket, means for actuating this knife through the rotation of the mutilated roller and means for rotating this roller so as to perform the various operations in succession.

1,503,842. DIE HOLDER. JAMES H MATTHEWS, Pittsburgh, Pa. Filed Feb. 7, 1924. Serial No. 691,091. 2 Claims. (Cl. 101—28)



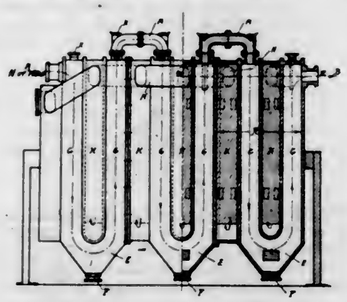
1. A holder for a removable die consisting of a body member provided with a die-seat, a spring-backed bolt extending transversely through and movable within an opening in said body member, and a locking member borne by said bolt alone and movable with said bolt to and from die-engaging position.

1,503,843. TROUGH FOR POULTRY CARS. ARTHUR MILLER, Chicago, Ill., assignor, by mesne assignments, to Equipment Devices Company, a Corporation of Delaware. Filed Aug. 22, 1923. Serial No. 658,821. 3 Claims. (Cl. 119—12.)



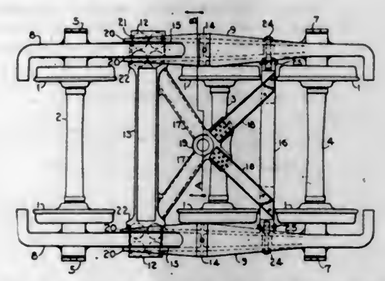
1. In a poultry car, a central aisle, a row of coops at one side of said aisle, adjacent coops having a dividing partition, a trough made up of a plurality of sections hinged together at the bottom and forming part of said partition, whereby said trough sections may be drawn into the aisle and lowered, and means for preventing separation of said sections from the partition.

1,503,844. RESILIENT WHEEL OR TRACK ROLLER. LUCIAN B. MOODY, Beadle County, S. Dak. Filed May 21, 1924. Serial No. 714,920. 8 Claims. (Cl. 295—11.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)



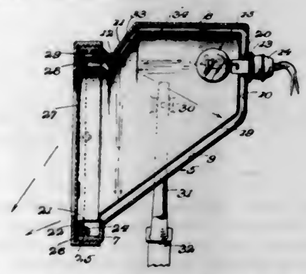
1. A resilient wheel embodying separable rims each formed with an inwardly projecting annular web, base bands spaced from the rims and abutting the webs, resilient elements carried by the base bands and engaging the rims, a hub within the base bands, annular flanges formed on the hub for supporting the bands and spaced from the webs of the rims about their entire peripheries, a centrally disposed annular portion formed on the hub for supporting and spacing the bands, caps secured to the hub and abutting the web of the rims for maintaining the rims and bands in assembly, a gudgeon, and anti-friction elements interposed between the hub and the gudgeon.

1,503,845. VEHICLE HUB CLUTCH. GEORGE OLM, New York, N. Y. Filed Nov. 25, 1921. Serial No. 517,598. 1 Claim. (Cl. 188—81.)



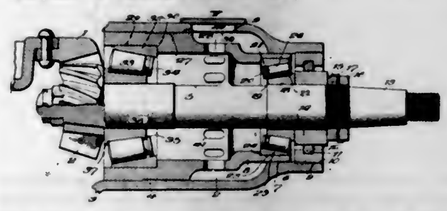
A vehicle wheel hub brake comprising, in combination with a driven axle, a wheel fixed at one end thereof, a disc secured to the inner side of the hub of said wheel, a brake drum formed with said disc, said drum having an outwardly flanged edge, a brake band encircling said drum, and means for tightening said band, of a ring interposed between said drum and band, anti-frictional elements between said drum and ring, means for maintaining said anti-frictional elements in adjustment, pawls pivoted on said disc, said pawls passing through slots in said brake drum and being engageable in recesses in said ring, and means carried by said disc for causing such engagement.

1,503,846. HEAT-EXCHANGE APPARATUS. OLIVIER PIETTE, Brussels, Belgium. Filed Feb. 26, 1921. Serial No. 448,194. 4 Claims. (Cl. 257—223.)



1. An apparatus for heat exchange between two fluids comprising juxtaposed vertical rectangular chambers, a number of which form separated elements, each of which is constructed completely independently of the others and made in the same manner, said chambers being interconnected in pairs, and each of two consecutive chambers being separated by a single thickness of plane sheet iron, the chambers traversed by the heated fluid being interconnected at their upper parts, the chambers traversed by the heating fluid being connected alternately at their upper parts and at their lower parts.

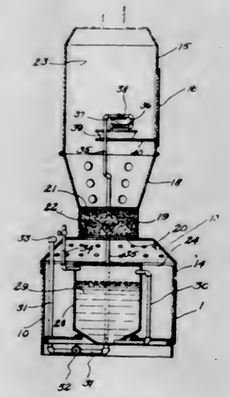
1,503,847. SIX-WHEEL CAR TRUCK. JOHN A. PILCHER, Roanoke, Va. Filed June 21, 1921. Serial No. 479,300. 7 Claims. (Cl. 105—195.)



1. In a six-wheel car truck, a pair of side-frame sections disposed without the lines of the truck wheels, a pair of load-receiving equalizing members disposed without the lines of the truck wheels, the said load-receiving equalizing members being rotatable in a vertical plane about a point between the ends thereof.

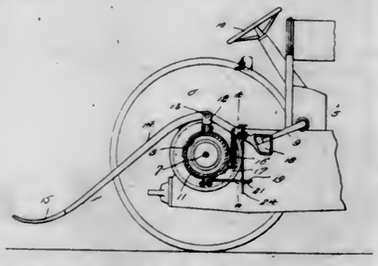
1,503,848. HEADLIGHT. LOUIS P. POWERS, Philadelphia, Pa. Filed May 28, 1923. Serial No. 641,990. 2 Claims. (Cl. 240—41.)

1. In a headlight, the combination of an elongated casing and reflector of substantially oval shape in cross section, each having a front circular opening disposed on a vertical plane and surrounded by an annular flange, a bottom wall inclined upwardly towards the back wall which is disposed above the center of said opening and a top wall disposed on a horizontal plane above the peripheral edge of said opening, said top wall having its forward portion inclined downwardly adjacent said opening connecting the top wall with said flange and forming a shield within said casing to the rear of said opening and an incandescent light mounted in the back and adjacent the top wall of said reflector in alinement with said shield.



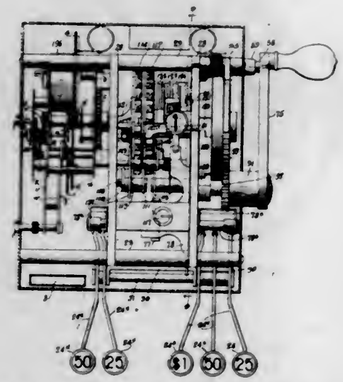
1,503,849. BEARING CARRIER NUT. JAMES M. PROCTOR, Shreveport, La. Filed May 15, 1920. Serial No. 381,732. 3 Claims. (Cl. 64—39.)

1. In combination with a shaft-enclosing housing having an internally threaded portion and a shaft therein, of a carrier nut comprising a sleeve having external



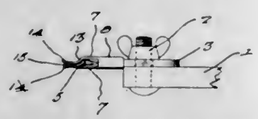
threads engaging the internal threads of the housing, said sleeve provided at each end with means for receiving bearing race rings for bearings, race rings and bearings in said means, means to move the sleeve longitudinally in the housing to tighten or loosen the bearings at one end of the sleeve, and means for adjusting the bearings at the opposite end of the sleeve.

1,503,850. OIL BURNER. WILLIAM ROCKEFELLER and FRANK J. GAYDA, Detroit, Mich. Filed May 15, 1923. Serial No. 639,055. 1 Claim. (Cl. 158—53.)



A heater comprising a body having an upper and lower compartment, the compartments being separated by an asbestos layer, said compartments having openings therein, hinged doors adapted to cover said openings, a fuel tank in the lower compartment, a feed pipe extending vertically from the tank to the upper compartment, the upper end of said feed pipe being formed into a U-shaped fixture, said fixture having a port therein, a diffusing disc mounted above said port adapted to spread the flames of the burning oil, an igniting pan below said port adapted to receive the oil from said port before ignition, the burning oil in said pan being adapted to heat said feed pipe, a platform beneath said port rigidly secured to the door, said platform adapted to be rotated with the door and shift the pan therewith, the platform having a curved edge generated by using the door pivot as a center.

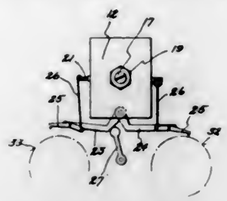
1,503,851. OVERTURNING PREVENTION FOR TRACTORS. ANTHONY RODI, Hammonton, N. J. Filed June 28, 1923. Serial No. 648,197. 3 Claims. (Cl. 180—82.)



1. In combination with a tractor, wherein the driving wheels are disconnected from the engine by a depressible pedal, a lever operatively engaged with the clutch pedal and pivotally mounted for vertical movement, said lever being engageable with the ground upon starting of overturning movement of the tractor for causing its swinging movement to depress said clutch pedal, and means to automatically retain the clutch pedal depressed when actuated by swinging of the lever, said means embodying a laterally swingable latch pivoted to the forward end of the lever, and yieldable means for normally holding the lever positioned with its rear end slightly spaced above the ground.

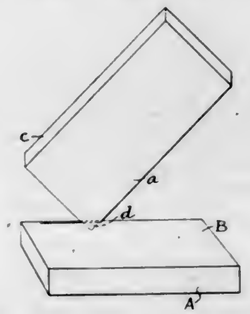
1,503,852. MACHINE FOR RECEIVING FARES, DELIVERING FARE TOKENS OR COINS, AND ISSUING TRANSFERS OR TICKETS. ARTHUR D. ROGERS and WILLIAM F. REYNOLDS, Dayton, Ohio; said Reynolds assignor, by direct and mesne assignments, of two-tenths to said Rogers and one-tenth to George W. Durham, Dayton, Ohio. Filed Sept. 28, 1921. Serial No. 504,001. 20 Claims. (Cl. 101—66.)

1. In a machine of the character described, the combination with locking devices and a conductor's key adapted to be locked and unlocked thereby, of crank mechanism, a locking arm, and a device controlled thereby to permit of or prevent the rotation of the crank, said locking arm adapted to be actuated by the conductor's key to release such device to permit the crank to be rotated.



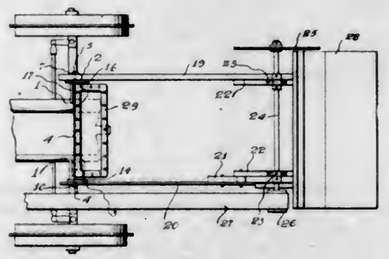
1,503,853. THREAD RETAINER FOR SPOOLING GUIDES. CHARLES F. ROYCE, Watertown, Conn., assignor to Heminway & Bartlett Silk Co., Watertown, Conn. Filed Feb. 29, 1924. Serial No. 696,096. 2 Claims. (Cl. 242—157.)

1. A thread retainer for guides of spooling machines including a member having a pair of retaining plates mounted on the sides of the thread guides and projecting beyond the end of said guide which is formed with a guide groove, said plates being formed to contact beyond the end of the guide and having outwardly directed lips at the free ends thereof for effectively receiving and retaining a thread in the guide groove of said guide.



1,503,854. RECEIVING DEVICE FOR ELECTRIC PHONOGRAPHS AND THE LIKE. FRANK SEELAU, New York, N. Y. Filed Mar. 9, 1923. Serial No. 623,846. 5 Claims. (Cl. 179—100.1.)

1. A device of the class described comprising a body having a top and bottom wall, a side wall on said body, a plate secured to the body opposite the wall, pointed screws projecting from the side wall and plate members, a coil on the top and bottom wall of the body spaced apart from each other, cores in said coils, and means on

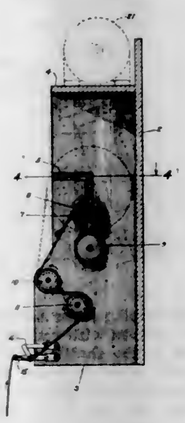


said screws adapted to be vibrated by said cores upon passage thru said coils of a fluctuating transmitting current.

1,503,855. COVER AND OPENING OF HERMETICALLY-SEALED TINS. FREDERICK JOSEPH SNOOK, Salisbury, England. Filed Mar. 8, 1923. Serial No. 623,672. 1 Claim. (Cl. 220—48.)

The combination with a tin hermetically sealed with a tagger top, of a slip-on lid which is cut away to form an aperture in its flange and to leave or form a pointed cutting tongue on and in the plane of the lid itself, so that the lid when held on its edge with the cutting tongue downwards towards the tagger top may be pressed downwards to pierce the said top and then be forced edgeways, guided by the cutter inside the tin and the flange of the lid outside the tin, to cut round the said top.

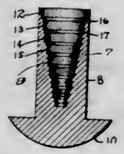
1,503,856. WOOD-SAWING ATTACHMENT FOR TRACTORS. CHARLES L. SOCKWELL, North Wilkesboro, N. C., assignor to New Williams Mill Company, Incorporated, North Wilkesboro, N. C. Filed Mar. 24, 1923. Serial No. 627,364. 2 Claims. (Cl. 143—43.)



1. In a device of the class described, opposed clamps suitably shaped to engage opposite portions of the radiator supporting base, one of said clamps having an exterior cutaway portion, a bolt extending through said clamps, a nut engaging on the threaded end of the bolt and seating in the cutaway portion of the clamp to permanently secure the clamps on the radiator support base, and a wood sawing attachment having extended arms swingably mounted on the clamping bolt, and means for detachably and loosely securing said arms on the opposite ends of the bolt whereby the arms carrying the wood sawing attachment may be swung to elevated position without loosening the clamps which engage opposite portions of the radiator supporting base.

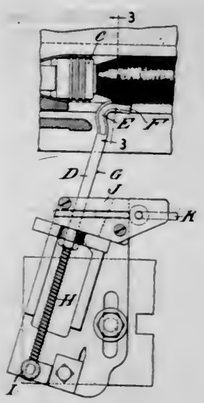
1,503,857. KETTLE-COVER HOLDER. MATHIAS SPRANGERS, Milwaukee, Wis. Filed Apr. 23, 1923. Serial No. 633,996. 4 Claims. (Cl. 53—8.)

4. The combination with a vessel having a removable cover, of an automatically actuated device for locking said cover in place when the vessel is tilted but permitting the free removal of the cover when the vessel is in normal position, said device being connected to the vessel adjacent the cover.



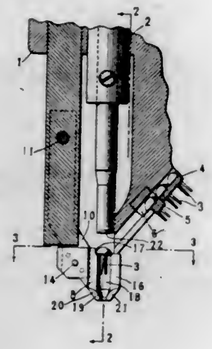
1,503,858. WET-TOWEL WINDER. GEORGE A. STEINER, Salt Lake City, Utah, assignor to Steiner Sales Company, Salt Lake City, Utah, a Corporation of Utah. Filed Feb. 20, 1922. Serial No. 538,105. 2 Claims. (Cl. 242—62.)

1. In a wet towel winder, the combination of a cabinet having back and side walls, the side walls having slots therein, a winding roll with gudgeons guided and supported in the slot, a tube surrounding the winding roller, a feed roller pivted in the side walls for operating the winding roller and rolling up a towel at a uniform speed motion of the towel, straightening rolls also



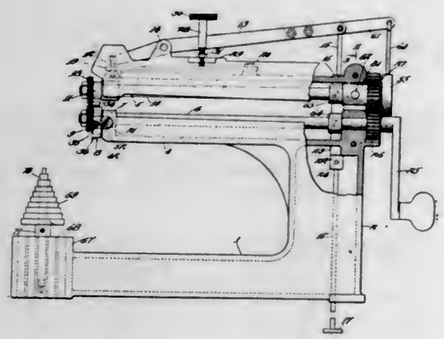
supported by said side walls of the cabinet, said straightening rolls having spirals on their peripheries running from the middle toward the ends thereof for engaging and flattening and straightening the web of towel, tension rods attached to said side walls of the casing and extending outwardly from the casing and having angular middle portions over which the web of toweling passes, a motor supported by the casing and geared directly to both the feed roller and the straightening roller as described.

1,503,859. TUBULAR RIVET AND THE LIKE ARTICLE. EDWIN B. STIMPSON, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed Nov. 1, 1920. Serial No. 420,926. 3 Claims. (Cl. 85—40.)



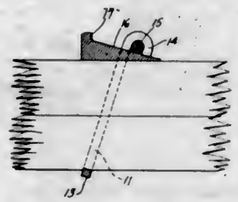
1. An article of the kind described, having a tubular part made up of an integral series of annuli with coaxial inner walls and with outer walls which are in longitudinal extension and continuation of one another, and the annuli being of thickness progressively increasing from one end of the tube to the other.

1,503,860. FEELER FOR LOOMS. EDWARD S. STIMPSON, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Mar. 25, 1921. Serial No. 455,533. 1 Claim. (Cl. 139—281.)



An inclined side slipping feeler having its shank laterally and inwardly inclined with respect to the front wall of the shuttle and to the shuttle box front so that the impact of the weft tends to cause the feeler to slip laterally and inwardly away from the head of the weft carrier and toward the shuttle box mouth, said feeler having an outward bend at its rear where it enters the shuttle box, said bend extending laterally and outwardly from the rear of the shank toward the head of the bobbin and in a direction laterally and outwardly inclined with respect to the front wall of the shuttle, and said feeler having a toothed tip extending laterally and inwardly from the extreme rear of said outward bend toward the shuttle box mouth, whereby the teeth are brought close to the initial weft windings near the head of the bobbin.

1,503,861. RIVET GUIDE. EDWIN B. STIMPSON, Brooklyn, N. Y., assignor to Edwin B. Stimpson Company, Brooklyn, N. Y. Filed June 7, 1922. Serial No. 566,626. 11 Claims. (Cl. 218—3.)

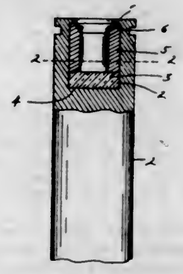


1. In a machine of the character described, cooperating rivet guide members having opposed surfaces, yieldingly held towards each other and providing a rivet-passage between them, the opposed surfaces of the guides being shaped to form a rivet-head-receiving seat at one end of the passage and rivet-shank-guiding means at the other end of the passage, and an outwardly flaring shank-guide communicating with the side of the passage from the exterior thereof.

1,503,862. PATTERN-BINDING MACHINE. JOHN H. SUTHERLAND and HOLTON J. SUTHERLAND, Swampscott, Mass., assignors to J. H. Sutherland & Company, a Partnership composed of John H. Sutherland, Holton J. Sutherland, and Alfred W. Sutherland, Swampscott, Mass. Filed Mar. 30, 1923. Serial No. 628,914. 16 Claims. (Cl. 153—1.)

2. In a machine of the character described, two presser rolls and a stop roll, means whereby both of said presser rolls are positively driven at the same peripheral speed, said stop roll and one of said presser rolls being formed with interengaging teeth whereby the rotation of said last mentioned presser roll gives a positive rotation to the stop roll at the same peripheral speed as the said presser rolls.

1,503,863. CLAMP. CHARLES C. TOMKINSON, Plainfield, N. J., assignor to J. Edward Ogden, Mountainville, N. Y. Filed Oct. 19, 1922. Serial No. 595,508. 3 Claims. (Cl. 304—4.)



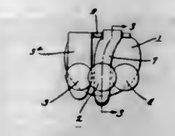
1. A clamp comprising a substantially U-shaped member, having hooked ends, a connecting member adapted to engage said ends and an adjustable member adapted to engage said connecting member and to clamp objects in said U-shaped member.

1,503,864. MEAT PRODUCT AND METHOD OF MAKING THE SAME. CHARLES H. VOGT, Philadelphia, Pa., assignor to F. G. Vogt & Sons, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 11, 1921. Serial No. 483,758. 8 Claims. (Cl. 99—11.)

1. A cooked meat product comprising relatively large pieces of the central portion of a ham, and comminuted hock and pelvic portions of the ham, all united in a solid compact mass.

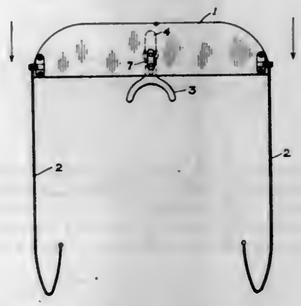
3. The method of making a meat product which consists in separating the hock and pelvic portions of the meat of a ham from the central portion, grinding said hock and pelvic portions into a comminuted mass, cutting the main central portion of the ham into relatively large pieces, then mixing the pieces of the central portion of the ham with a quantity of the comminuted hock and pelvic portions, then cooking the mass in an assembled shape, and thereafter chilling the same to cause it to become thoroughly set and united in a solid compact mass.

1,503,865. SEAT CONSTRUCTION FOR CAM FOLLOWERS. MERRILL M. WILCOX, Saginaw, Mich., assignor to Wilcox Motor Parts & Manufacturing Co., Saginaw, Mich., a Corporation of Michigan. Filed July 24, 1922. Serial No. 577,263. 7 Claims. (Cl. 123—90.)



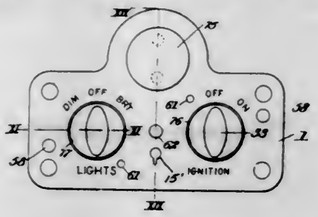
6. The combination with a tappet having a socket, of an insert in said socket having a hardened surface forming a seat for a valve push rod, and a member also within said socket retaining said insert in position.

1,503,866. TOOTHED CUTTER LIP. HOWARD G. WASHBURN, LAFAYETTE G. JOHNSON, and JOSEPH R. THILL, Flat River, Mo., assignors to American Manganese Steel Company, Chicago, Ill., a Corporation of Maine. Filed May 28, 1921. Serial 473,370. 5 Claims. (Cl. 37—141.)



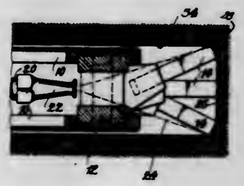
1. A one-piece cutter lip for digging buckets having a plurality of longitudinally extending ribs spaced apart on its under side and terminating in pointed digging teeth at their forward ends.

1,503,867. COLLAR BUTTON. CARTTER WEAVER, Pittsburgh, Pa. Filed Nov. 1, 1922. Serial No. 598,396. 9 Claims. (Cl. 24—101.)



1. A collar button, comprising a body portion provided with a plurality of neckband and collar receiving studs, and means extending around the upper horizontal edge of the shirt neckband for supporting two of said studs.

1,503,868. EYE SCREEN. GUSTAVUS R. WEED, East Orange, N. J. Filed Aug. 14, 1922. Serial No. 581,796. 7 Claims. (Cl. 2—12.)



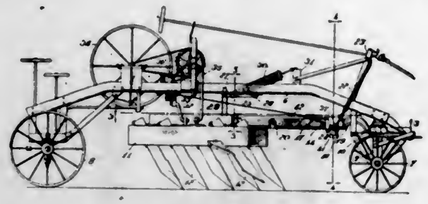
1. In an eye screen, a translucent member, an adjustable nose support therefor and a clamping means attached directly to said translucent member adapted to clamp said nose piece on said translucent member.

1,503,869. SWITCH. EDWARD WESTON, Hillside, N. J. Filed July 21, 1916. Serial No. 110,521. 40 Claims. (Cl. 200—44.)

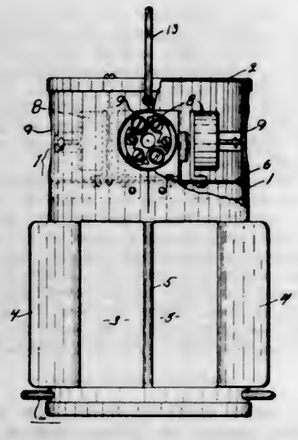
1. In combination, two rotatable switch members having movement in substantially the same plane, a locking bolt pivotally mounted between the switch members for movement in substantially the same plane and means on the bolt and the switch members for affording an interlocking engagement.

1,503,870. COAL-DUST ELIMINATOR. EDWIN BALL and JAMES M. MCHUGH, Birmingham, Ala. Filed Jan. 17, 1923. Serial No. 613,276. 2 Claims. (Cl. 262—29.)

1. The combination with a cutting machine having a power driven cutter chain and a guide bar therefor, of a water discharge nozzle located in a plane between the upper and lower faces of said bar so that its operation will not be interrupted by material falling on the cutter bar.



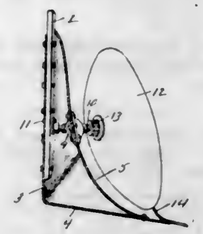
1,503,871. ATTACHMENT FOR LOOMS. ROBERT J. BARTHOLOMEW, Philadelphia, Pa., assignor to Fletcher Works, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 19, 1922. Serial No. 562,047. 3 Claims. (Cl. 139—305.)



1. An attachment for looms for weaving curved woven fabrics comprising a pair of compensating rollers having their adjacent ends staggered to set the rollers at an angle to each other, said rollers being pivoted to automatically compensate for fabrics of different curvatures.

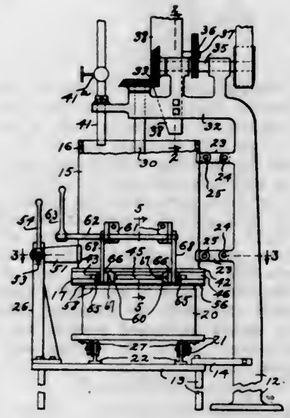
1,503,872. SCARIFYING MACHINE. JAMES D. BENBOW, Aurora, Ill., assignor to Western Wheeled Scraper Company, Aurora, Ill., a Corporation of Illinois. Filed Sept. 19, 1921. Serial No. 501,730. 10 Claims. (Cl. 262—11.)

1. A road machine comprising a main frame, wheels supporting said frame, a scarifier frame under said main frame, means mounted on said main frame for raising or lowering said scarifier frame, a draft frame rigidly connected with said scarifier frame and extending forward therefrom, draft devices pivotally connected on a horizontal axis with said draft frame, and a lifting spring mounted on the main frame and connected with the forward portion of said draft frame.



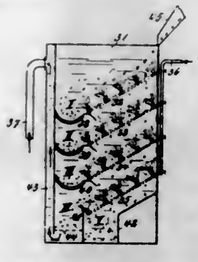
1,503,873. ELECTRIC LANTERN. CARL H. BISSELL, Syracuse, N. Y., assignor to Crouse-Hinds Company, Syracuse, N. Y., a Corporation of New York. Filed Jan. 9, 1923. Serial No. 611,581. 6 Claims. (Cl. 240—11.)

1. A lantern comprising a body open at its lower end and having a closed top and openings in diametrically opposite sides thereof, the body also having a horizontal partition above the upper ends of said openings, a lamp socket mounted on the lower side of the partition in position to carry a lamp in line with said openings, plug receptacles mounted in the box above the partition and the walls of the body being formed with passages in line with the plugs, substantially as and for the purpose described.



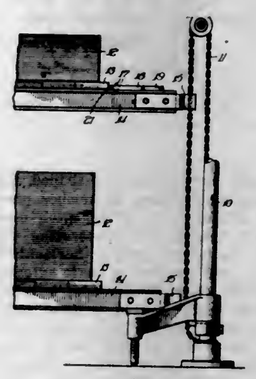
1,503,874. REVOLVING SELF-CLEANING MOLD BOARD PLOW. GEORGE HARRISON BLOCK, Hanna, Alberta, Canada, assignor of thirty-five one-hundredths to Sayle Allen Brown, Hanna, Alberta, Canada. Filed Feb. 19, 1923. Serial No. 620,068. 1 Claim. (Cl. 97—34.)

A revolving mold board plow structure including a casing rigidly mounted on the depending, forwardly curved end of a plow beam, said casing having a vertical wall on the land side of the beam, the upper edge of which inclines downwardly and forwardly, a bottom wall extending laterally and inclining slightly downwardly from the vertical wall, and having the free edge inclined forwardly toward said vertical wall, and terminating in a forward substantially pointed end therewith, and a sloping wall connecting the upper edge of the vertical wall, and the outer edge of the bottom wall, a share mounted on said casing and secured to the sloping and vertical walls thereof, shaft bearings mounted in the sloping and vertical walls respectively, in horizontal alignment, a shaft rotatable in said bearings, a disc member forming a mold board mounted on the outer end of said shaft, adjacent said sloping wall for rotation therewith,



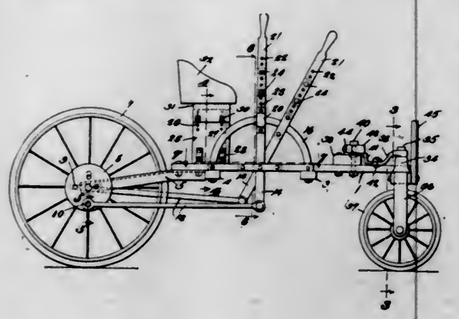
the lower portion of said disc extending in the rear of the upper edge of said shaft, and a sprocket mounted on the shaft for receiving a drive chain for rotating said shaft and disc, the bearings being carried in spaced relation by the sloping and vertical walls of the casing, serving to distribute the torsional strains from the shaft throughout the casing.

1,503,875. APPARATUS FOR MAKING BUILDING BLOCKS AND THE LIKE. OTTO E. BORNHAUSER and JOHN EDWARD HERMAN, Sandusky, Ohio. Filed Jan. 18, 1923. Serial No. 613,363. 11 Claims. (Cl. 25—103.)



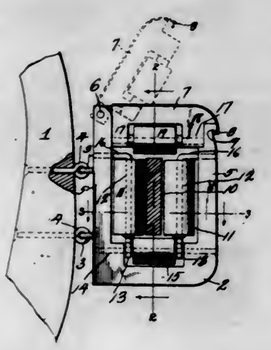
1. In apparatus for making cementitious building blocks and the like, the combination, with a substantially horizontally movable mold having its material-receiving chamber open at its upper end, and a support for said mold, of a hopper adapted to be employed in supplying wet or moist cementitious material to said chamber and arranged over the path of said mold and having a limited movement from and toward said path and also having an outlet arranged to discharge into said chamber when the mold is in its material-receiving position in relation to the hopper, means for supporting the hopper, and a cut-off for controlling communication through said outlet, said hopper resting upon the mold in the lower position of the hopper, and the mold being movable substantially horizontally from under the hopper upon lifting the hopper from the mold after charging the mold from the hopper.

1,503,876. STEP WASHING PLANT FOR ASH, COAL, AND THE LIKE. ERNST BONGARDT, Hersfeld, Germany. Filed May 5, 1923. Serial No. 636,948. 1 Claim. (Cl. 83—82.)



In a separating apparatus, a plurality of groups of jet producing devices, the devices of each group being arranged in an inclined relation and spaced apart vertically to provide successive spaces through which the material to be separated might pass, said groups being arranged in super-imposed relation, the devices forming each group directing their jets in the same direction and approximately normal to the said plane, thus creating a substantially continuous inclined plane of moving fluid whereby when the material to be separated is disposed above the plane of fluid and descends thereon, the particles of greater density will pass through the plane of fluid and the spaces between the devices and form one collection, and the particles of lesser density will be carried down the inclined plane of the fluid and form another collection, said groups being arranged relatively to one another for passing the particles of lesser density successively to one another, the intensity of the fluid in the jets of the successive groups being progressively less whereby the particles will be separated into collections varying according to their density.

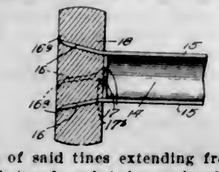
1,503,877. FEEDER-PILE-ADJUSTMENT MEANS. JOSEPH R. BLAINE, Oak Park, Ill., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 24, 1921. Serial No. 509,811. 3 Claims. (Cl. 271—61.)



1. In a feeder pile mechanism, the combination of a supporting member for a pile of sheet material, a member upon which said supporting member is adjustably mounted and having means forming fulcruming points for a lever, and a lever which may be fulcrumed with respect to said fulcruming points and cooperating with said first member for giving said members a relative movement whereby the position of the pile of sheet material may be adjusted.

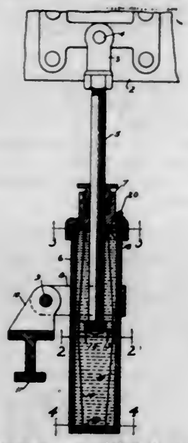
1,503,878. CHILD'S VEHICLE. BYRON BRADY, Dunmore, Pa. Filed Jan. 2, 1924. Serial No. 684,055. 4 Claims. (Cl. 208—33.)

1. A vehicle of the class described including a platform, spaced rearwardly extending side and intermediate strips connected to the platform, an axle mounted for rotation within said strips, a supporting wheel secured to the axle and mounted between the intermediate strips, hand levers pivotally mounted at the sides of the platform, and adjustable drive connections between the levers and the axle.



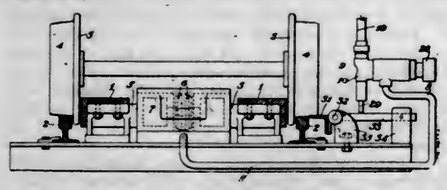
1,503,879. REIN GUIDE. GID H. BREWER, Witts Springs, Ark. Filed Jan. 8, 1924. Serial No. 685,008. 2 Claims. (Cl. 54—63.)

1. A rein guide comprising a U-shaped frame having its arms in parallel relation, a member pivoted to the end of one of said arms, a spring catch carried by the free end of said member and cooperating with a recess in the end of the other arm, a horizontally disposed roller carried by said member, a shaft extending through the arms adjacent their inner ends, a roller rotatably mounted on said shaft, and in parallel relation to the first mentioned roller, shafts in parallel relation to the arms, one of the arms of said shafts being provided with arms through which the first mentioned shaft extends, the ends of the parallel shafts terminating in outwardly extending arms extending angularly into the arms of the U-shaped member.



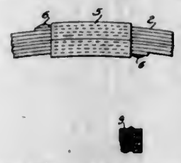
1,503,880. LADDER RUNG. PETER BROMAN, Chicago, Ill. Filed July 21, 1921. Serial No. 486,394. 9 Claims. (Cl. 228—58.)

1. A ladder rung having a tread, a longitudinal flange at an angle to the tread, and a plurality of tines having beveled edges extending longitudinally from the end of the rung, the stile-penetrating edges of all tines being



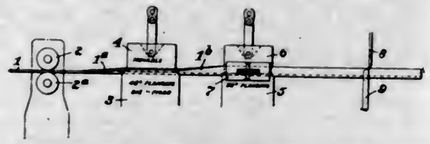
parallel, one of said tines extending from the horizontal part of said tread and being twisted into parallelism with the other tines.

1,503,881. SHOCK ABSORBER. ERNEST T. BROS, Minneapolis, Minn. Filed Apr. 11, 1921. Serial No. 460,307. 4 Claims. (Cl. 188—88.)



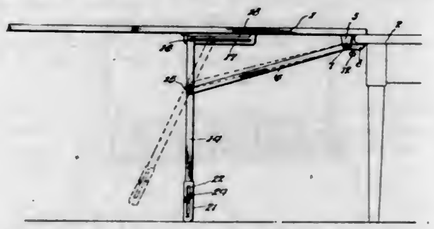
1. A shock absorber comprising a cylinder adapted to contain an inelastic fluid, a piston having radial openings in its periphery upon opposite sides of the center thereof, bars fitting said openings and the inner walls of said cylinder in opposing relation said piston being free to slide on said bars, and said bars increasing gradually in cross-sectional area from the middle portions thereof toward each end, the openings of said piston being substantially closed by said bars when said piston is near the ends of said cylinder, and passages being formed through said openings for the flow of the inelastic fluid when the piston is near the middle of said cylinder opposite the point of minimum diameter of said bars, and means interposed between the ends of said bars and seated therein for holding said bars in opposing relation.

1,503,882. BRAKING APPARATUS. FRANK M. CASTLEMAN, Rotherham, England, assignor, by mesne assignments, to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Mar. 17, 1920. Serial No. 366,712. 9 Claims. (Cl. 188—38.)



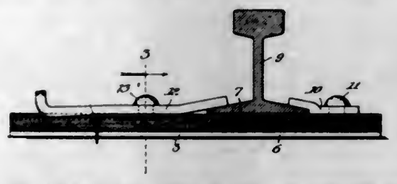
1. Railway braking apparatus comprising a brake bar located in the trackway, power-operated mechanism for moving said bar into engagement with a part of a railway vehicle, and a treadle located in the trackway and arranged to be engaged by a wheel of the vehicle for controlling said mechanism.

1,503,883. RING FOR TIRE BEADS. HENRY Z. COBB, New York, N. Y., assignor to Morgan & Wright, a Corporation of Michigan. Filed Apr. 13, 1922. Serial No. 552,361. 14 Claims. (Cl. 245—1.5.)



1. A reinforcing ring of fixed circumference for a tire bead formed of flat strip metal of uniform cross-section throughout having its width disposed at a right angle to the plane of the ring, said ring being symmetrical on both sides of a medial radial plane.

1,503,884. METHOD OF PRODUCING CHANNEL IRONS. LEWIS E. CURTIS, Warren, Ohio, assignor to The Youngstown Pressed Steel Company, Warren, Ohio, a Corporation of Ohio. Filed May 25, 1921. Serial No. 472,568. 3 Claims. (Cl. 153—13.)

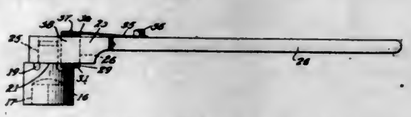


3. The herein described method of producing channel irons from a metal strip, which consists in intermittently feeding said strip and between the feeds holding it at successive points between parallel clamping devices, simultaneously bending successive opposed marginal portions of said strip into inclined position, and simultaneously and successively bending said inclined portions into planes perpendicular to the strip, the clamping, partial bending and final bending being carried out on portions of the strip which are spaced from each other a distance substantially equal to the length of the marginal portions operated on in the bending action.

1,503,885. IRONING TABLE. WILLIAM E. DENNY, Loudonville, Ohio. Filed June 30, 1922. Serial No. 571,879. 3 Claims. (Cl. 68—10.)

1. An ironing table comprising a board, supporting legs slidably connected at their upper ends with the board, braces pivoted at their outer ends upon the board adjacent the butt thereof and at their inner ends to the legs, clamping jaws pivotally mounted at the outer ends of the braces concentric with the pivot of the braces and adapted to co-operate with the under side of the board at the butt end thereof to clamp a projecting support, and means co-operating with the jaws and the braces to adjust the jaws.

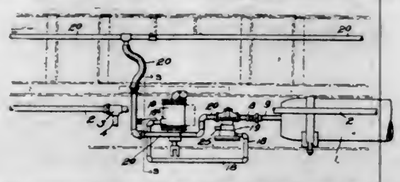
1,503,886. RAILWAY-TRACK CONSTRUCTION. HERMAN H. DIEHL, Huntington, W. Va., assignor to The West Virginia Rail Company, Huntington, W. Va., a Corporation of West Virginia. Filed Mar. 22, 1924. Serial No. 701,101. 3 Claims. (Cl. 238—338.)



1. In railway-track construction, the combination of a metal tie containing an opening, a clip containing an opening, and a rivet extending through said openings, said rivet being non-rotatable in said tie, and said clip being rotatable about said rivet.

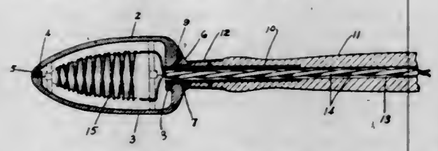
1,503,887. FUSELAGE FITTING. IVAN H. DRIGGS, Dayton, Ohio, assignor to Dayton-Wright Company, Dayton, Ohio, a Corporation of Delaware. Filed Feb. 4, 1922. Serial No. 534,225. 1 Claim. (Cl. 244—31.)

A composite metal fitting adapted for fuselage construction, including, a metal strap bent around a tubular longéron and having its ends secured together to form a wire pull, a small metal casting adapted to be secured to the end of an abutting strut and to said strap, the surface of said casting abutting the strap being substantially arcuate, whereby the same composite fitting may be used for different angular arrangements of said abutting strut and said wire pull.



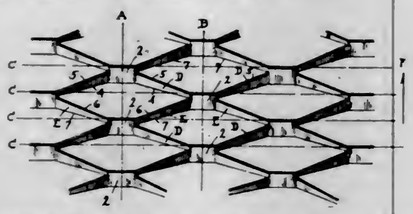
1,503,888. RATCHET WRENCH. JOHN E. ERICKSON, Rockford, Ill. Filed Feb. 26, 1923. Serial No. 621,274. 3 Claims. (Cl. 81—60.)

1. A ratchet wrench comprising a cylindrical wrench-head shaped at one end to fit an object to be turned and at its opposite end to provide a concentric cylindrical spindle and a radial annular shoulder at the juncture of the spindle and wrench-head proper, said shoulder having circumferentially spaced ratchet teeth formed therein reaching radially substantially from the spindle to the periphery of the wrench-head proper, a handle having adjoining parallel bores in one end, one for rotatably receiving said spindle and the other a pawl, a cylindrical pawl supported in the second mentioned bore and having a diametrical tooth at one end adapted to engage ratchet teeth and a diametrical surface at its opposite end adapted by cooperation with a spring-pressed element to hold the pawl from rotative displacement from either of two operative positions, and a spring-pressed element shaped



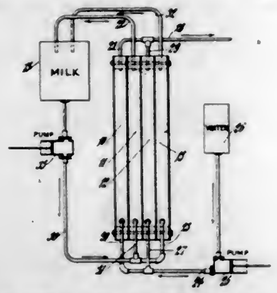
to fit said diametrical surface and bearing thereagainst for yieldingly urging the pawl into engagement with the ratchet teeth and permitting the pawl to be manually moved rotatably in its bore to either of said operative positions.

1,503,889. FLUID-PRESSURE SYSTEM. WILLARD J. FENDNER, Pittsburgh, Pa., assignor to Clark Car Company, a Corporation of Pennsylvania. Filed Sept. 9, 1920. Serial No. 409,192. 5 Claims. (Cl. 105—271.)



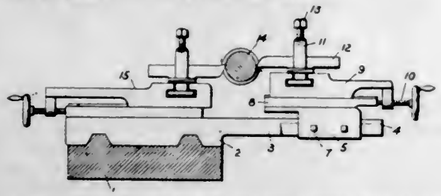
1. In combination with a tilting body dump car having a latch operating mechanism for locking the body in an upright position, a dump cylinder operatively connected to the body, a latch operating cylinder having an inlet port and a piston controlled fluid delivery port, a piston operating therein and operatively coupled to the latch operating mechanism, a source of fluid pressure, an automatic valve for controlling delivery of fluid from said source to said dump cylinder and for exhausting said dump cylinder, a valve operating cylinder connected to the delivery port of said latch operating cylinder, a valve operating piston located in said valve operating cylinder for actuating said automatic valve, and a manually operated valve for controlling the delivery of fluid from said source to said latch operating cylinder and the exhaust of fluid from said latch operating cylinder.

1,503,890. ELECTRIC PRESSING IRON. TERESE C. FLESCH, St. Paul, Minn. Filed Aug. 26, 1922. Serial No. 584,485. 6 Claims. (Cl. 219—21.)



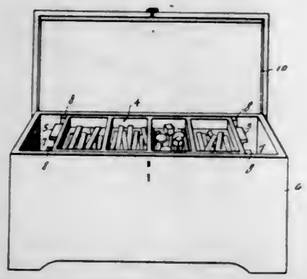
1. A pressing iron composed of hollow sections fitting one upon the other, and having a curved exterior surface and tapered from the rear to the forward end, a handle mounted on the rear end of said iron, and having means therein for holding the iron sections together, a heating coil within the iron and electric conductors therefor.

1,503,891. EXPANDED SHEET METAL. HARVEY M. GERSMAN, Buffalo, N. Y. Filed Feb. 12, 1921. Serial No. 444,534. 4 Claims. (Cl. 72—117.)



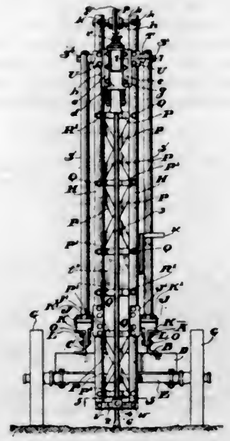
2. Expanded sheet metal having strands and connecting portions between the strands, the strands and connecting portions delimiting hexagonal voids and the strands increasing in depth in the same mean longitudinal direction of the sheet.

1,503,892. PROCESS OF TREATING MILK AND MILK PRODUCTS. GEORGE GRINDROD, Oconomowoc, Wis., assignor to Carnation Milk Products Company, Chicago, Ill., a Corporation of Delaware. Filed Oct. 16, 1918. Serial No. 258,468. 3 Claims. (Cl. 99—15.)



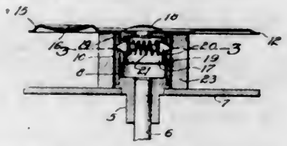
2. The process of making evaporated milk, which consists in subjecting milk to partial dialysis, said dialysis employing membranes of pores of a size slightly less than the lactose molecules of the milk, evaporating the water contents of the milk either before or after the dialyzing of the milk, and sterilizing the evaporated dialyzed milk.

1,503,893. BACK-TOOL HOLDER. GEORGE GRONNER, Davenport, Iowa. Filed July 26, 1922. Serial No. 577,757. 2 Claims. (Cl. 82—25.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)



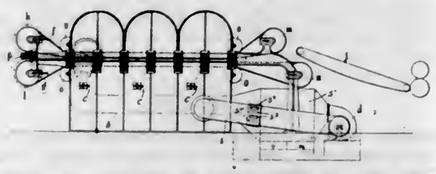
1. The combination with a carriage formed with a dove tail rear extension, said extension being in the plane of the carriage, of a tool holder having a dove tail groove to receive said extension, a slide adjustable on said holder, a post secured on said slide and means carried by the post for clamping a tool in place thereon.

1,503,894. CHEST OF TRAYS. FRANCIS F. HAMILTON, Indianapolis, Ind. Filed Jan. 28, 1924. Serial No. 688,910. 2 Claims. (Cl. 206—1.)



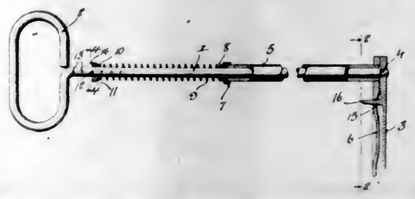
1. The combination, with a chest of rectangular shape, of a plurality of like-shaped trays stacked in the chest and making close sliding fit with the sides of the chest, said trays being enough shorter than the chest to provide a finger space between the trays and the end of the chest, and vertical cleats fastened to the chest to keep the vertical alinement of the stack.

1,503,895. WAGON DRILL. CHARLES C. HANSEN, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Sept. 10, 1923. Serial No. 661,950. 4 Claims. (Cl. 255—19.)



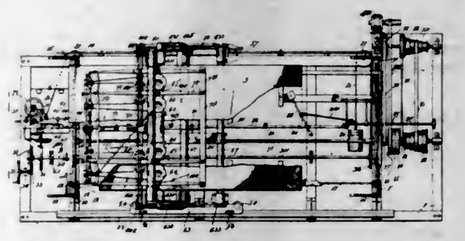
1. The combination with a frame, blocks carried by the frame, trunnions pivoted on said blocks, brackets carried by said trunnions, tubular up-right supports secured to said brackets, diagonal brace members, cross brace members, means for securing said cross brace members and diagonal brace members to the supports at one point, a cradle to receive a rock drill, curved end portions on said cradle adapted to slide on said tubular supports, means for hoisting said cradle and a centralizer adapted to be removably connected to the frame for guiding a drill steel.

1,503,896. TYPEWRITER-RIBBON SPOOL. DE WITT C. HARRIS, Pineland, Fla. Filed Mar. 22, 1922. Serial No. 545,645. 9 Claims. (Cl. 242—70.)



4. A typewriter ribbon spool comprising upper and lower separable sections having tubular parts arranged to telescope with each other, said tubular parts having apertures arranged to register, and yielding means carried by one of said tubular parts and arranged to project through its aperture into the aperture in the other part for locking the two spool sections together.

1,503,897. DRYING MACHINE FOR WOOL AND OTHER MATERIALS. THOMAS WHITEHEAD HAWKINS, Ruabon, Wales. Filed Aug. 4, 1923. Serial No. 655,725. 6 Claims. (Cl. 34—12.)

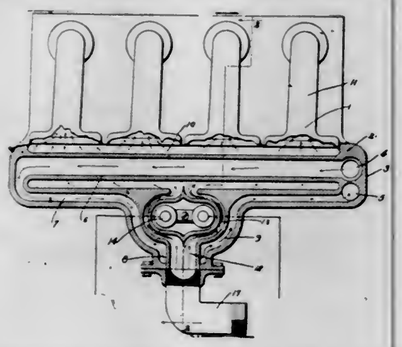


1. In a drying apparatus for wool and the like, a series of drying chambers, traveling open-work carriers passing through said chambers to carry the material to be treated therethrough, a fan, an inlet duct for the drying chambers communicating with said fan and having a plurality of outlets, each outlet terminating in proximity to a portion of the carrier located in one drying chamber, and air outlet means communicating with the portion of the drying chamber lying on the same side of the carriers with the air duct outlets.

1,503,898. CLEAN-OUT TOOL FOR FURNACES. PETER HOTT, Milwaukee, Wis. Filed Feb. 9, 1923. Serial No. 617,971. 2 Claims. (Cl. 294—11.)

1. A clean-out tool for furnaces comprising a rod having a handle at one end, a jaw rigidly attached to the other end of said rod and extending laterally therefrom and having a rearwardly projecting tapered lug, a tube slidably mounted upon said rod, a spring for forcing said tube outwardly with reference to said rod, a second jaw mounted inwardly of said first mentioned jaw and rigidly attached to said tube and having an aperture for slidably receiving said tapered lugs, said jaws being curved, and one of said jaws having marginal flanges whereby said jaws will remain in approximate parallelism at all times and are adapted to readily grip and retain clinkers.

1,503,899. WOOD-CARVING MACHINE. JOSEPH JANES, Somerville, Mass., assignor, by mesne assignments, to Irving & Casson-A. H. Davenport Co., Boston, Mass., a Corporation of Massachusetts. Filed Apr. 2, 1921. Serial No. 457,900. 13 Claims. (Cl. 90—13.5.)

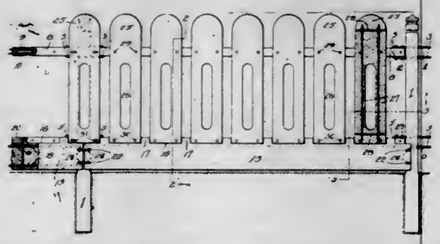


1. In a machine of the kind described, a work support having a vertical movement, and a tool frame having a horizontal reciprocating movement, and connections whereby the movement of said tool frame will control the movement of said work support.

1,503,900. FUEL HEATER FOR INTAKE MANIFOLDS. BILLIE JOHNSON, Temple, Tex. Filed Jan. 7, 1922. Serial No. 527,737. 5 Claims. (Cl. 123—122.)

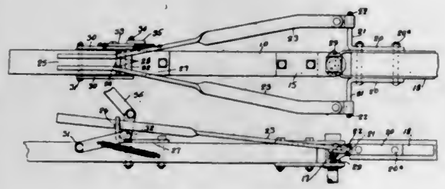
1. In an intake manifold the combination with a block having a longitudinal flue therein, and a fuel conducting passage extending around the flue and within the block, of a feed passage opening into said space around the flue and having an enlarged portion, an electric heater within

the enlarged portion, a passage extending from one end of the longitudinal flue and along the block and around the fuel passage to the other end of the block, and ports



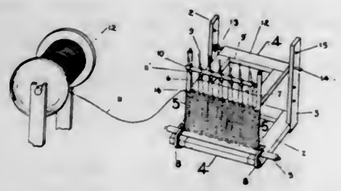
for conducting exhaust gases into one end of the longitudinal flue and from one end of the passage along the block.

1,503,901. LIVE-BAIT SPINNER. EDWARD D. JONES, Jr., Rochester, N. Y. Filed May 19, 1923. Serial No. 640,071. 1 Claim. (Cl. 43—45.)



A live bait spinner including a main rod provided with eyes at each end, a swivel secured to one eye for connecting said rod to a line, an abutment mounted on the rod near the end receiving the swivel, an elongated head having a central opening receiving the rod between the swivel connection and the abutment, a pair of oppositely rotated spinners mounted on the rod between the head and the end mounting said swivel, the portion of the rod on the other side of the abutment forming a live bait receiving portion, and a hook assembly provided for removable connection with the eye at the end of the bait receiving portion.

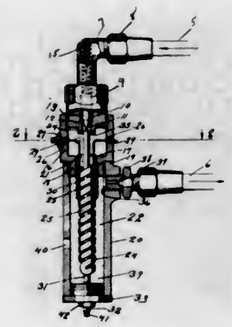
1,503,902. CONCRETE FENCE. WILLIAM F. JONES, St. Louis, Mo. Filed Nov. 13, 1920. Serial No. 423,950. 2 Claims. (Cl. 256—19.)



1. In a fence structure, in combination with a supporting post having spaced laterally extending metallic supporting members which pass through the post and are arranged in pairs one above the other and provided with aligned slotted openings, concrete rails carried by said metallic supporting members and secured at their end therebetween by means of bolts, the lower rail of the two being right angular in crosh section and having its front upright wall extending beyond the ends of the upper horizontally disposed section of the lower rail for engagement with the front face of the post and provided with slotted openings for receiving fastening devices anchored in the post, seats formed along the outer corner edge of the lower rail and spaced apart by ribs, concrete fence board members removably secured to the upper and lower rails and the board member applied to the rails opposite the post having slotted openings therein to receive fastening devices anchored in the rails.

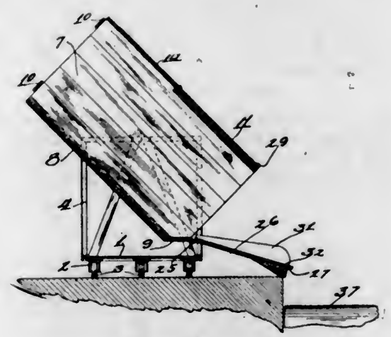
1,503,903. DRAFT APPLIANCE. LUTHER D. LEIBOLD, Williamsburg, Ind. Filed Mar. 27, 1922. Serial No. 547,003. 10 Claims. (Cl. 97—135.)

1. In an implement, the combination of a movably mounted implement carrying beam, a stationary pole, a swinging pole pivotally connected with the forward end of the stationary pole for substantially horizontal swinging movement, rearwardly extending bars connected with said swinging pole, a guide means for the rear ends of said bar equipped with holding means for normally maintaining the same against longitudinal movement, means for moving said beam into inoperative position, and means connected with said first named means for lifting the rear ends of said bars out of engagement with the holding means whereby to permit movement of the swinging pole.



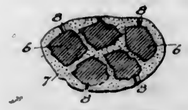
1,503,904. MEANS FOR PRODUCING WOVEN REED ARTICLES. MARSHALL B. LLOYD, Menominee, Mich., assignor, by mesne assignments, to Heywood-Wakefield Company, Boston, Mass., a Corporation of Massachusetts. Filed Aug. 20, 1920. Serial No. 404,800. 4 Claims. (Cl. 139—17.)

1. An apparatus for use in producing reed articles embodying therein, means for detachably securing an article frame member thereto, and a member swingably attached to the apparatus and having filler strand packing portions thereon.



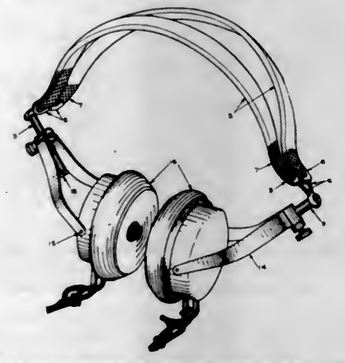
1,503,905. ATTACHMENT FOR INTERNAL-COMBUSTION ENGINES. MITCHELL MACKIE, Waukesha, Wis. Filed Aug. 26, 1922. Serial No. 584,398. 11 Claims. (Cl. 123—180.)

1. A device of the character described, comprising a chamber, a fluid supply connectable with the chamber, means normally disconnecting the fluid supply and the chamber, means for heating the chamber, and thermo-



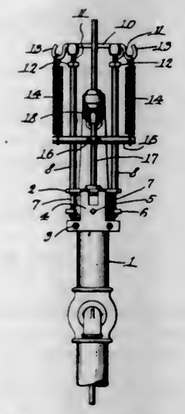
static means operable by the heating means to connect the fluid supply with the chamber and regulate the flow of fluid into the chamber.

1,503,906. TILTING-BOX TRUCK. PATRICK J. MADIGAN, Chicago, Ill. Filed Aug. 22, 1921. Serial No. 494,242. 7 Claims. (Cl. 298—17.)



1. In a distributing system, a vehicle, a box pivotally mounted in said vehicle, the height of the pivot above the bottom of the box being such that more than half of the bottom of the box will be brought beyond the side of the vehicle by a motion about said pivot of less than forty-five degrees from the vertical, the portion of the bottom of the box toward the side protruded by said motion being pivotally connected to the box, the pivot being adjacent the non-protruding side of the bottom, and a stop preventing the motion about the pivot of the box in the direction opposite to the first-named motion beyond the vertical.

1,503,907. HEATING DEVICE. PROSPER JEAN AUGUSTE MAIGNEN, Philadelphia, Pa. Filed Sept. 20, 1919, Serial No. 325,049. Renewed May 2, 1924. 1 Claim. (Cl. 44—1.)

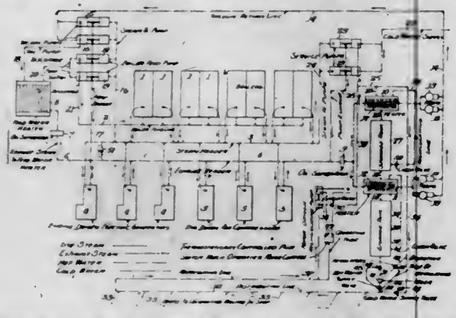


A fuel briquet including peat mixed with combustible oil and having a distinct thick coating of cementitious material which is fire resistant.

1,503,908. TELEPHONE HEAD SET. RAY H. MANSON, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Mar. 20, 1922. Serial No. 544,997. 3 Claims. (Cl. 179—156.)

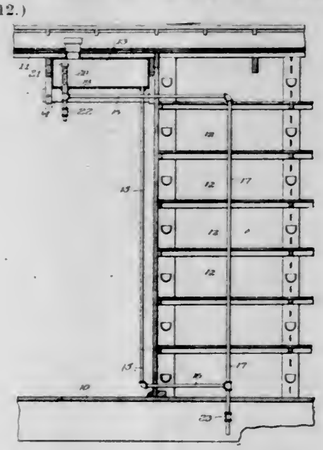
1. In a telephone head-set, a head band, a rod secured to one end of said head band, a post having a kerf therein, a cross bore in said post, an apertured stirrup fitted to enter said kerf with its aperture in alignment with said cross bore, said rod being inserted through said cross bore and aperture, means tending to force said stirrup so that its aperture is out of alignment with said cross bore, and a telephone receiver supported by said stirrup.

1,503,909. ATTACHMENT FOR PUMPS. HENRY MASBRUCH, Platteville, Wis. Filed Dec. 31, 1923. Serial No. 683,778. 5 Claims. (Cl. 74—71.)



5. In an attachment for pumps, the combination of a bracket, means for rigidly securing the bracket to the pump head, substantially hollow standards on the bracket, screws adjustably mounted in the upper ends of said standards, nuts resting on the ends of the standards and adapted to adjust the height of the screws, a cross bar carried by the screws, a lower cross bar affixed to the pump rod in spaced relation to the upper cross bar, and springs operatively connecting the two cross bars.

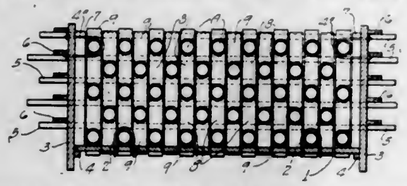
1,503,910. HOT-WATER-SUPPLY SYSTEM. WILLIAM A. MCGEE, Cleveland, Ohio. Filed Mar. 27, 1922. Serial No. 546,980. 9 Claims. (Cl. 126—366.)



8. A system comprising steam emitting devices, heating means connected to utilize the steam emitted from said devices, water storage means connected to said heat-

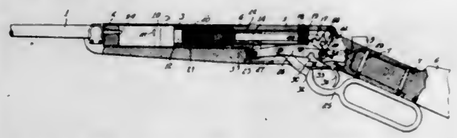
ing means, cold water inlet means for said heating means, outlet means for said heating means and storage means, said cold water inlet means being also connected to said outlet means, and automatic regulating means for governing the relative supplies of water from said storage

means on the one hand and said cold water inlet means on the other hand to said outlet means, a recirculating line for said heating and storage means, said recirculating line being provided with pump means and thermostatic means for controlling said pump means.



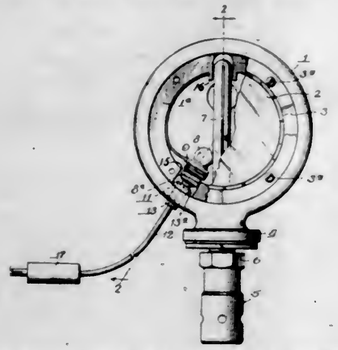
1,503,911. TANK HEATER FOR POULTRY CARS. JOHN J. MURPHY and ARTHUR T. CANN, Chicago, Ill., assignors, by mesne assignments, to Equipment Devices Company, a Corporation of Delaware. Filed Aug. 22, 1923. Serial No. 658,795. 2 Claims. (Cl. 119—12.)

1. In a poultry car, tiers of coops arranged one above the other, a water tank near the top of the car, a descending piece of pipe leading from said tank on the outside of said coops, an ascending piece of pipe passing up through said coops and into said tank, and a piece of pipe connecting the bottom ends of said pieces of pipe, whereby the heat from the bodies of chickens in the coops will heat the water in said ascending piece of pipe and cause the water in said ascending piece of pipe to flow toward the tank.



1,503,912. FORM FOR MOLDING OR CASTING BOILER BAFFLES. FREDERICK O. PAHMEYER, St. Louis, Mo., assignor to Heine Boiler Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 31, 1924. Serial No. 703,151. 19 Claims. (Cl. 25—118.)

1. A form for molding or casting boiler baffles, consisting of a frame that comprises a plurality of pairs of parallel members arranged in the tube bank of the boiler in spaced relation, and two retaining walls arranged transversely of the tube bank and formed from said wall

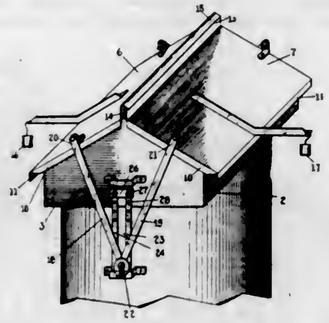


members that are arranged between the boiler tubes in engagement with the inner edges of said pairs of parallel members.

1,503,913. AIR GUN. EUGENE E. MILES, Akron, Ohio. Filed Apr. 1, 1922. Serial No. 548,559. 17 Claims. (Cl. 124—10.)

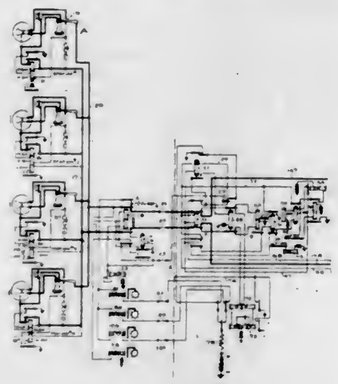
1. In a gun of the character set forth, the combination with a gun barrel, of an air compression cylinder operatively connected with said barrel, a piston in said cylinder, a pair of independent springs for operating said piston, said springs being disposed one within the other, and means for placing each of said springs successively under compression.

1,503,914. ILLUMINATING ATTACHMENT FOR TEMPERATURE INDICATORS. JAY C. PARSONS and LOUIE W. SILVIS, Chicago, Ill. Filed Dec. 10, 1920. Serial No. 429,662. 6 Claims. (Cl. 240—2.)



1. The combination with a temperature indicator comprising an annular casing provided with transparent faces on opposite sides, of an illuminating attachment mounted in said casing and comprising a lamp, a lamp socket a recess for engaging the lamp socket, and a yieldable metallic strip fixed to said socket, and adapted to be yieldably held against the annular wall of said casing, and prevented from slipping by the engagement of the socket in the recess.

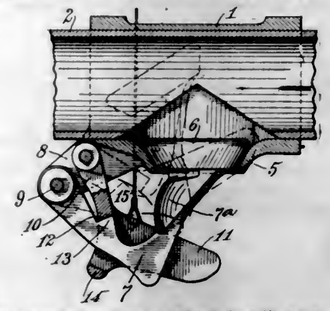
1,503,915. DUST-COLLECTOR OUTLET. AUGUST CHARLS POSNER, New Orleans, La. Filed Feb. 28, 1923. Serial No. 621,959. 3 Claims. (Cl. 98—5.)



2. A dust collector outlet comprising a cap mounted upon the outlet, the upper edges of the end walls of which are inclined, a pair of doors hinged to said cap adjacent the lower part of the inclined edges, flanges

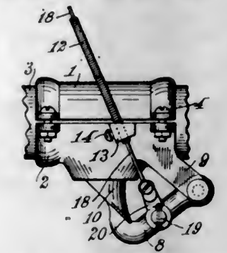
on said doors adapted to extend over the edges on which they rest, upwardly extending mating flanges at the top edge of said doors one of which flanges extends over the

other, counter balance weights secured to said doors, pivoted bars attached to said doors, a pivot which secures said bars together at their lower ends, and a guide in which said pivot slides.



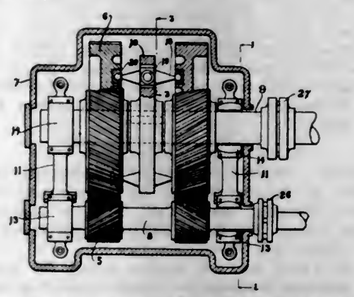
1,503,916. METERING ARRANGEMENT FOR AUTOMATIC TELEPHONE SYSTEMS. WINFRED T. POWELL, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 28, 1920. Serial No. 433,678. 13 Claims. (Cl. 179—9.)

1. In a telephone system, a telephone exchange, a plurality of telephone lines terminating thereat, a plurality of substations on each telephone line, a meter at the exchange for the individual use of each substation, a plurality of relays for operating the meter of a calling substation, means operated on the completion of a call to a wanted substation, and other means co-operating with said last mentioned means and responsive to the concluding of a call for variably operating said relays.



1,503,917. CUT-OUT. HARRY W. RUBY, Springfield, Ohio. Filed Oct. 30, 1920. Serial No. 420,609. 14 Claims. (Cl. 251—126.)

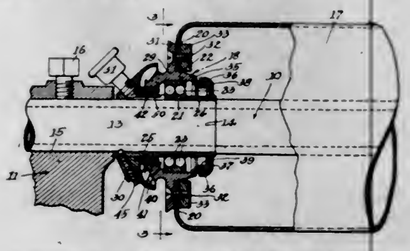
1. In a device of the character described, a body adapted to be connected in the exhaust line of an internal combostion engine and having a supplemental outlet provided with a valve seat, a weighted valve arranged within said body and held in firm contact with said seat by gravity, a stem secured to said valve, extending through said supplemental outlet and pivotally mounted exteriorly of said body and out of line with said supplemental outlet, and means acting on said stem to move said valve into its open position, said stem being arranged to move



said valve into a position in which it will extend transversely to said body and will direct a part of the exhaust gases toward said supplemental outlet.

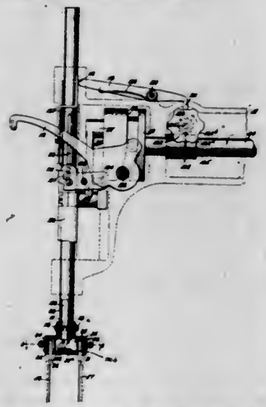
1,503,918. CUT-OUT OPERATOR. HARRY W. RUBY, Springfield, Ohio. Filed Jan. 14, 1921. Serial No. 437,275. 2 Claims. (Cl. 137—139.)

1. In a cut-out of the character described, the combination with a body portion adapted to be supported by the exhaust pipe of an internal combustion engine and having a cut-out opening to communicate with the interior of said exhaust pipe, said opening being provided with a valve seat, and a valve movable into and out of engagement with said valve seat to control the communication of said opening with said exhaust pipe, of an operating device comprising a fixed guideway, a flexible rod slidably mounted in said gudieway, and an arm connected with one end of said rod and pivotally connected with said valve, said arm and ita axis being arranged substantially in line with said rod to cause said rod to exert a direct thrust on said valve in any position of the latter.



1,503,919. GEARING. HENRY F. SCHMIDT, Swarthmore, Pa., assignor to Westinghouse Gear and Dynamometer Company, a Corporation of Pennsylvania. Filed Apr. 14, 1921. Serial No. 461,207. 18 Claims. (Cl. 74—7.)

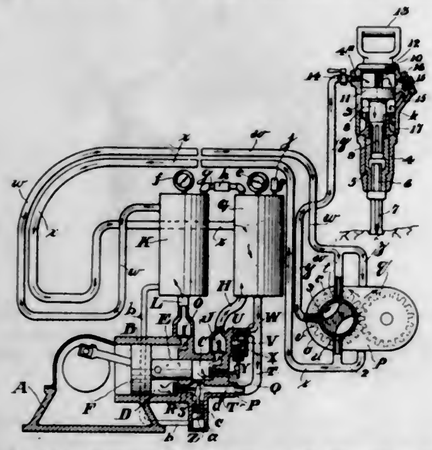
1. In a gear set, the combination of cooperating gear members, shafts on which said members are mounted,



floating frames extending from one shaft to the other and in which the shafts are mounted, and means for controlling the movement of the floating frames.

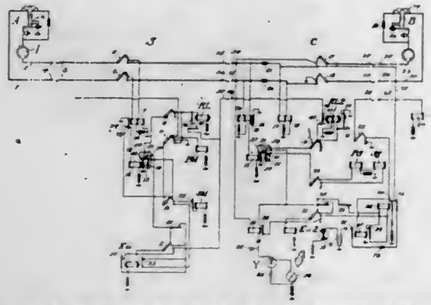
1,503,920. ROLLER MOUNTING. EMIL SCHNEEBELI, Los Angeles, Calif. Filed June 13, 1922. Serial No. 568,057. 2 Claims. (Cl. 64—36.)

1. A mounting for a roller having an inwardly extending flange including a stationary arbor, a bearing comprising an inner ring, an outer ring and a plurality of members rotatably supporting the outer ring on the inner ring, two collars on the arbor holding the inner ring between them, a carrier holding the outer ring, and a flange extending from the carrier and attached to the flange of the roller.



1,503,921. VARIABLE-WIDTH TWO-NEEDLE SEWING MACHINE. RALPH M. SHARAF, New York, N. Y., assignor to R. M. Sharaf Machine Co., Boston, Mass., a Corporation of Massachusetts. Filed Apr. 19, 1916, Serial No. 92,140. Renewed July 13, 1921. Serial No. 484,506. 40 Claims. (Cl. 112—158.)

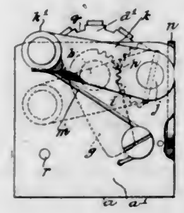
16. The combination with a sewing machine bed plate having a plurality of binding screws tapped therein, a pair of bearing blocks having slots through which said screws project and along which the blocks are adjustable toward and from each other, means to tighten or loosen all of said screws simultaneously, and pairs of independent loopers, feed dogs, and thread catchers mounted upon said blocks and adjustable therewith toward and from each other.



1,503,922. FLUID-PRESSURE IMPULSE SYSTEM. FRED M. SLATER, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed July 20, 1921. Serial No. 486,227. 7 Claims. (Cl. 60—62.)

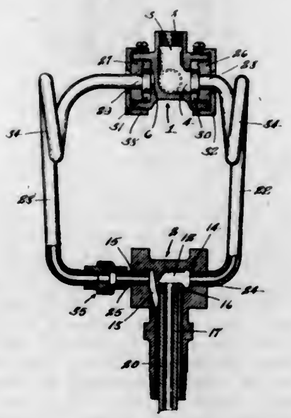
1. In a fluid pressure impulse system for operating a fluid actuated machine, the combination of a high pressure source of supply of motive fluid pressure and a low pressure receiver, a fluid actuated machine adapted to be actuated by motive fluid from the high pressure source, an interrupter having separate supply and return connections with said high pressure source of supply and the low pressure receiver respectively, a single connection from said interrupter to the said machine, through which

high pressure motive fluid passes to the machine in one direction, and automatic means for causing the motive fluid under reduced pressure from said machine to pass in the opposite direction through said single connection back to the interrupter and thence back to the said low pressure receiver.



1,503,923. TELEPHONE SWITCHING SYSTEM. FRANK M. SLOUGH, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed May 6, 1918. Serial No. 232,963. 20 Claims. (Cl. 179—18.)

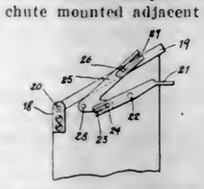
1. In a telephone system, a line, an automatic switch accessible to said line, and means for controlling the said switch by impulses delivered over the two sides of the said line in series, said means comprising a two-armature relay, one of the said armatures being responsive to all of the impulses of a series, a second armature for the said relay responsive only to the final impulse of the series, and steering means for the said switch controlled jointly by the said first and second armatures.



1,503,924. NUMBERING HEAD. AMOS H. SMITH, Brooklyn, N. Y., assignor to American Bank Note Company, New York, N. Y., a Corporation of New York. Filed Oct. 28, 1922. Serial No. 597,442. 10 Claims. (Cl. 101—88.)

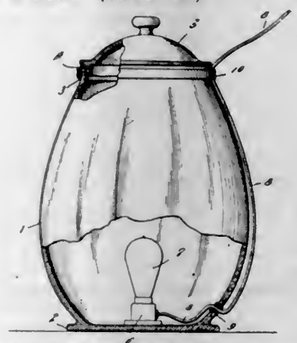
1. A numbering head embodying therein a main frame, a fixed shaft therein, a sequence of independently rotatable digit wheels mounted upon said shaft, a ratchet wheel carried by each of said digit wheels, the ratchet wheels of the digit wheels of lower denomination having a recess therein, a swing frame mounted in said main frame, a comb pawl carried by said swing frame, the teeth of which are of graduated decreasing heights from the units digit wheel toward the wheels of successively higher denomination, actuating means operative upon said swing frame including therein an oscillatory member

positioned in its entirety below the printing plane of the characters upon said digit wheels, operative connections between same and said swing frame, and a spring acting thereon, the teeth upon said ratchet wheel co-operating with a pawl being so set as to cause movement of the wheel co-operating therewith with movement of said member against the tension of said spring and to cause the pawl to ride upon said teeth with the actuation of said member by said spring.



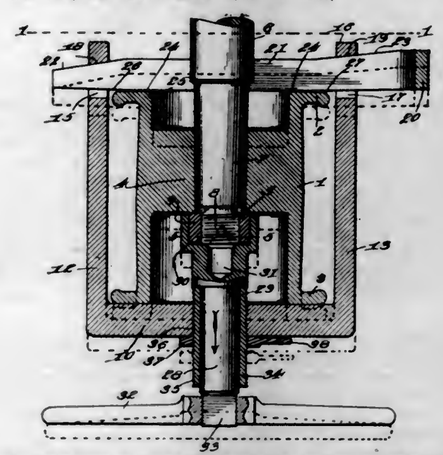
1,503,925. FLEXIBLE COUPLING FOR PRESSING MACHINES. ALEXANDER JAMES SOCIA, Syracuse, N. Y., assignor to The Prosperity Co. Inc., Syracuse, N. Y., a Corporation of New York. Filed July 23, 1920. Serial No. 398,498. 3 Claims. (Cl. 285—7.)

1. A coupling of the class described comprising a pair of unions arranged with their axes parallel and having passages therethrough, extending in the direction of their axes, and a resilient conduit connecting the passages and connected by a swivel joint to one union and being rigidly connected to the other union, the conduit being arranged at an angle to the axes of the unions and the swivel joint being arranged coaxially with the axis of one of the unions.



1,503,926. REFUSE RECEPTACLE. JOHN STÄUBLI, Syracuse, N. Y. Filed Sept. 19, 1922. Serial No. 589,072. 3 Claims. (Cl. 220—36.)

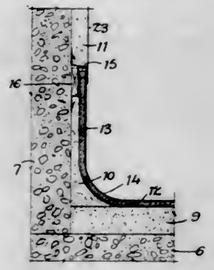
1. A refuse tank having cover and bottom members and adapted to be buried in the soil, a door slidably mounted under the cover and adapted to close an opening in the same, a chute mounted adjacent the tank wall, a



trap pivotally secured to the upper end of the chute, the chute having inclined side edges, and means for opening said trap, by a downward movement of the foot.

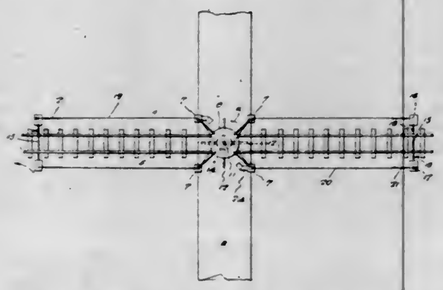
1,503,927. PEANUT WARMER. PERCY L. TALLY, Williamston, S. C. Filed Nov. 15, 1922. Serial No. 601,003. 1 Claim. (Cl. 34—21.)

A nut warmer comprising an ovate hollow body of transparent material provided at its larger end with a base and provided at its smaller end with an opening, a cover of transparent material adapted to close said opening, the body being provided at its side and in the vicinity of its base with a relatively small opening, an electric bulb located centrally within the body and positioned upon the base thereof, an electric wire connected with the bulb and threaded through the opening in the side of the body and guided along the exterior surface of the body and means binding the wire to the body in the vicinity of the opening at the smaller end thereof.



1,503,928. PULLEY MANIPULATOR. DANIEL R. TANNER, La Grande, Oreg. Filed Dec. 28, 1921. Serial No. 525,354. 14 Claims. (Cl. 29—85.)

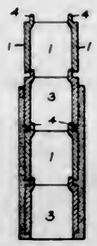
1. As a means of withdrawing a pulley endwise off from its shaft with a nut on said shaft for normally retaining the pulley on said shaft, a yoke frame for



engaging the pulley, and means for turning off said nut and engaging said frame whereby as the nut is turned off said frame will withdraw said pulley.

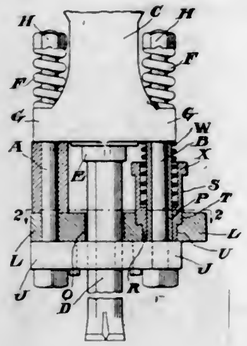
1,503,929. COMBINED FLOOR COVERING AND BASE STRIP. JOHN M. TRACY and FRANCIS R. SCHERER, Rochester, N. Y. Filed Feb. 10, 1923. Serial No. 618,320. 3 Claims. (Cl. 20—74.)

1. A device adapted to be secured against the ground piece of a wall for concealing and securing the marginal edge of the floor covering and wall base strip to the wall, said device having oppositely extending flanges, a ground-piece engaging portion connecting said flanges, and a downwardly opening pocket overlying said ground-piece engaging portion to receive and house the edge of a floor covering, substantially as set forth.



1,503,930. RAILWAY-CROSSING SIGNAL. JAMES A. WEST, Winter Haven, Fla. Filed Nov. 21, 1923. Serial No. 676,097. 3 Claims. (Cl. 246—293.)

1. In a railway crossing signal, a vertical signal plate, means mounting said signal plate above the crossing for rotation upon a vertical axis, means for facilitating rotation of said signal plate by actuation of the same from a train approaching the crossing at a point remote from the latter, said signal plate normally occupying a position parallel with the cross roads of the crossing and being movable to a position parallel with the railway track to indicate the approach of a train, and means to automatically illuminate said signal plate upon movement of the same to its train approach indicating position.

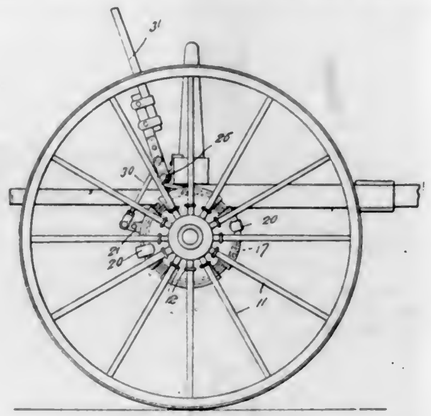


1,503,931. WALL AND BRICK THEREFOR. SHERBURNE H. WIGHTMAN, Birmingham, Mich., assignor, by mesne assignments, to International Concrete Corporation, Wilmington, Del., a Corporation of Delaware. Filed June 9, 1920. Serial No. 387,698. 3 Claims. (Cl. 72—41.)

1. A wall consisting of a plurality of rows of blocks, each row consisting of a plurality of blocks arranged end to end, said blocks being so spaced as to provide grooves between adjacent blocks having depths equal to the desired widths of the mortar beds and a layer

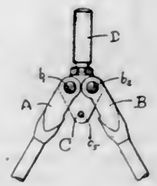
of mortar extending over such wall and having portions projecting into said grooves to form the mortar beds and providing the sole bond between the blocks.

1,503,932. STEEL RETAINER. RUSSELL H. WILHELM, Easton, Pa., and FREDERICK W. RUDLIN, Phillipsburg, N. J., assignors to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed June 13, 1921. Serial No. 477,316. 3 Claims. (Cl. 121—32.)



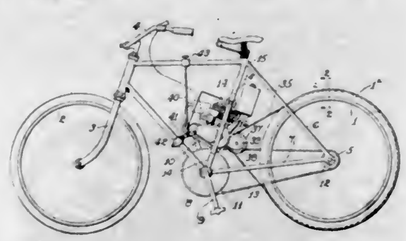
1. A steel retainer comprising bolts adapted to be secured to the front head of a percussive tool, a guide member connecting the ends of said bolts and supported in spaced relation to the front head, said guide having a central aperture for guiding the steel, a yoke for holding the steel pivoted to one bolt and adapted to be swung entirely free from the opposite bolt, said yoke being provided with a central recess for the steel and an end recess having two internal diameters adapted to pass over the opposite bolt, and a manually adjusted longitudinally movable sleeve on said opposite bolt having two external diameters adapted to cooperate with the said end recess for locking the yoke in closed position.

1,503,933. WAGON BRAKE. JOHN R. WOODALL, Chavies, Ala. Filed Apr. 1, 1924. Serial No. 703,425. 2 Claims. (Cl. 188—77.)



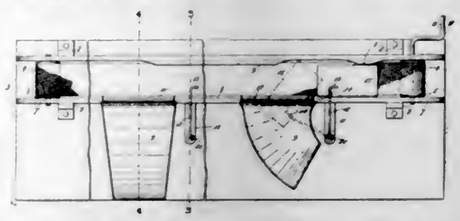
1. In a wagon brake of the character described, a pair of brake units adapted for association with a pair of the wagon wheels, each unit including a wheel attachment member, a band carried by said attachment member, a brake band including a pair of pivotally connected sections disposed upon said attachment carrying band, arms connected to the adjacent free ends of the band sections, a sectional horizontal shaft journalled in bearings carried by the wagon frame and at their

outer ends within certain of the band section arms, means for adjustably connecting said shaft sections together, lateral arms connected to the outer ends of the



shaft sections, connections between said arms and the before mentioned arms of the other brake sections, and a hand lever connected to one of the arms of the shaft sections.

1,503,934. DRAWING COMPASSES. KAZUE AKASHI, Tokyo, Japan. Filed Sept. 2, 1921. Serial No. 498,064. 4 Claims. (Cl. 33—157.)

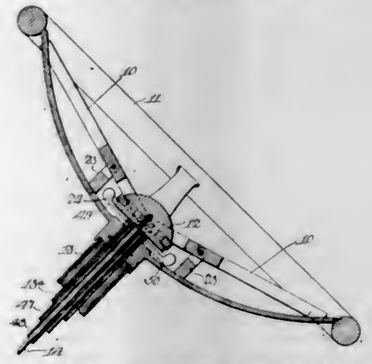


1. In a compass, a yoke member, movable legs, and spherical fulcrum members pivotally mounting each leg in the yoke member independently of the other leg.

1,503,935. BICYCLE AND MOTOR DRIVE THEREFOR. ERLE K. BAKER, Chicago, Ill. Filed Sept. 2, 1919. Serial No. 321,180. 4 Claims. (Cl. 180—33.)

1. A motor bicycle comprising, in combination, a bicycle having a frame including a mast, a motor positioned in an upright manner and substantially in the central vertical plane of the mast, said mast being formed to accommodate said motor, and means arranged in the upper end for yieldingly suspending the motor in said mast.

1,503,936. CONVEYER. WILFRED J. BENOIT, Dracut, Mass. Filed July 19, 1921. Serial No. 485,897. 3 Claims. (Cl. 186—1.)

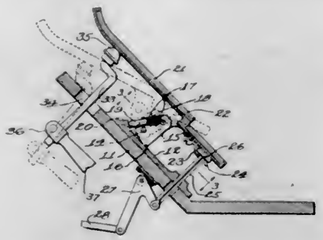


1. A machine of the kind described comprising a conveyer belt, means for moving it, and yielding means located normally to engage packages resting on said belt and draw them therefrom.

1,503,937. PROCESS FOR THE MANUFACTURE OF AROMATIC SULPHONIC ACIDS. FRANK A. CANON, Crafton, Pa., assignor to The Barrett Company, a Corporation of New Jersey. Filed Dec. 13, 1921. Serial No. 521,987. 6 Claims. (Cl. 260—159.)

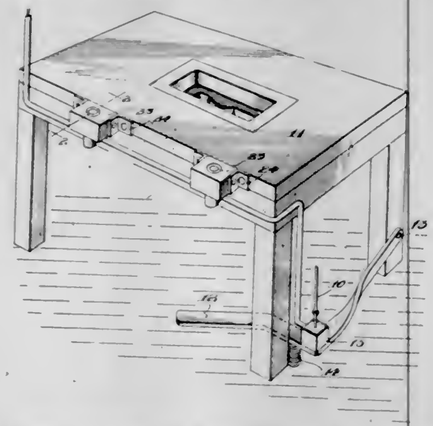
2. The process of producing sulphonic acids, which comprises passing vapors of an aromatic hydrocarbon and an inert gas unsaturated with water vapor into contact with sulfuric acid.

1,503,938. COMBINED VEHICLE STEERING AND ELECTRIC MOTOR CONTROLLING MECHANISM. WILLIAM DAVIS, Chicago, Ill. Filed Nov. 6, 1922. Serial No. 599,250. 1 Claim. (Cl. 74—39.)



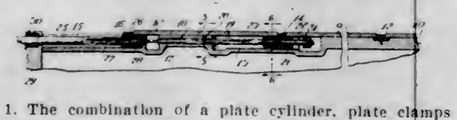
The combination with a hollow post and a wheel secured to one end thereof; of a rod mounted for reciprocation within said post and protruding at one end beyond the same, a thread on said protruding end, a head having an internally threaded socket engaged upon the said threaded end of the rod, the said head having an annular channel in its side, a ring in said channel, a pair of levers pivoted inwardly of their ends upon the outer face of said wheel and disposed in opposite directions from said head, yokes at the inner ends of said levers connected to said ring, and the outer ends of said levers disposed adjacent to the rim of the wheel.

1,503,939. BRAKE AND ACCELERATOR OPERATING MECHANISM. WILLIAM DAVIS, Chicago, Ill. Filed Oct. 1, 1923. Serial No. 665,753. 5 Claims. (Cl. 74—81.)



1. In a device of the class described, the combination with a link pivotally mounted at one of its ends to a support, of a member tiltably mounted on the other end

thereof, controlling rods mounted for reciprocation near the opposite ends of said member and adapted to be moved each in one but opposite directions by said tiltable mem-

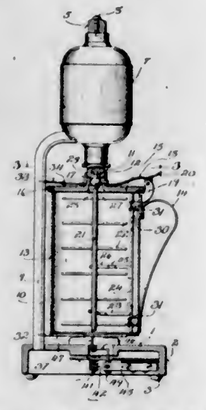


ber, coacting detachably engaging means on one of said rods and on the adjacent end of said member, and means operatively connecting each of said rods to a part to be operated thereby.

1,503,940. ELECTRIC CONTROL MECHANISM. EARL DENNIS, Detroit, Mich. Filed Apr. 8, 1922. Serial No. 550,621. 2 Claims. (Cl. 192—131.)

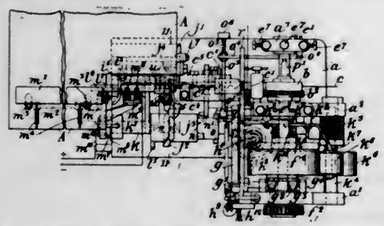
2. The combination, in a power-operated machine having a tripping member and an operating pedal to actuate the tripping member, of means for magnetically locking said tripping member to operate with said pedal, which means comprises in part an electric circuit having a pair of normally open, manually-operable switches disposed therein and adapted to make the circuit when both switches are closed and to break the circuit when either switch is released which switches are relatively spaced apart such a distance as to require employment of two hands to operate them.

1,503,941. PLATE-CLAMPING MECHANISM FOR PRINTING PRESSES. WILLIAM EVENSEN, Chicago, Ill., assignor to The Goss Printing Press Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 28, 1923. Serial No. 677,427. 11 Claims. (Cl. 101—378.)



1. The combination of a plate cylinder, plate clamps carried thereby and movable longitudinally thereof, and means for adjusting said clamps to different relative positions simultaneously but at different speeds.

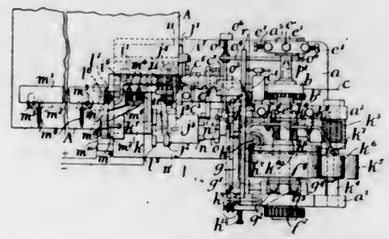
1,503,942. ELASTIC AND EXPANSIBLE PAVING JOINT. ALBERT C. FISCHER, Chicago, Ill. Filed July 3, 1920. Serial No. 393,801. 9 Claims. (Cl. 94—18.)



1. An expansion joint composed of compressible mineral fibrous matter having cells or pores, and having the upper portion thereof composed of a substantially solid mass of asphaltic or bituminous substance penetrated into the fibrous structure and forming thereon a solid non-fluid head.

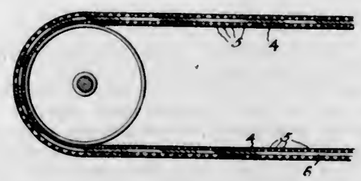
1,503,943. MIXER. HARRISON D. FLEGEL, Racine, Wis. Filed Dec. 26, 1923. Serial No. 682,752. 4 Claims. (Cl. 259—135.)

1. A mixer comprising a container, a mixing element carried thereby and provided with a spindle, a cover for said container through which the upper end of said spindle projects, a frame for receiving said container and for applying spring pressure upon said cover, a motor carried by said frame and having a shaft adapted to lock with the upper end of said spindle, and means for raising said spindle into engagement with the motor shaft, and switch mechanism, operated by said means, for controlling said motor.



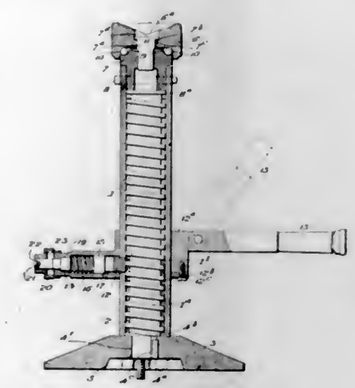
1,503,944. MACHINE FOR MANUFACTURING COILED-WIRE FABRIC. HENRY ARTHUR FRASER and PETER FREDERICK CRIGHTON, London, England. Original application filed Aug. 27, 1921, Serial No. 495,986. Patent No. 1,431,645, dated Oct. 10, 1922. Divided and this application filed July 1, 1922. Serial No. 572,346. 5 Claims. (Cl. 140—8.)

1. A machine for manufacturing coiled wire fabric including wire coiling means, means for actuating the coiling means intermittently, whereby the coiling means



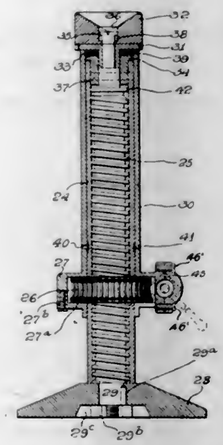
coils a length of wire and then halts its operation, means for severing each coil, intermittently operating means for actuating the severing means, positioning mechanism designed to grip the fabric and hold the same in a position to permit the coiling means to intertwist a coil into the fabric, and controlling means for said mechanism adapted to cause said mechanism to hold one edge of the fabric adjacent to the outlet end of the coiling means to permit a coil to be run into the fabric; to then shift the fabric toward the coiling means slightly to permit a second coil to be intertwisted with the last mentioned coil and with the fabric; and to then move the positioning means laterally and away from the coiling means to permit the latter to insert a coil into the previously intertwisted coils.

1,503,945. MACHINE FOR MANUFACTURING COILED-WIRE FABRIC. HENRY ARTHUR FRASER and PETER FREDERICK CRIGHTON, London, England. Original application filed Aug. 27, 1921, Serial No. 495,986. Patent No. 1,431,645, dated Oct. 10, 1922. Divided and this application filed July 1, 1922. Serial No. 572,347. 7 Claims. (Cl. 140—8.)



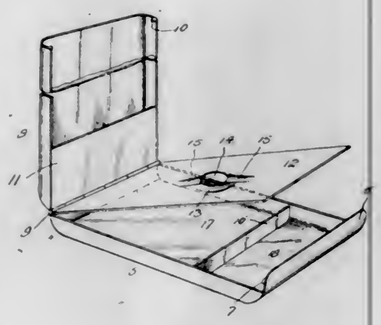
1. In a machine for manufacturing diagonal weave coiled wire fabrics of rectangular form, a coiling mechanism adapted to twist wire into a substantially helical strand, feeding members for gripping and positioning the fabric, said members cooperating with the coiling mechanism to retain the fabric in a definite position while a strand produced by the coiling mechanism is being intertwisted into a plurality of the strands of the fabric, means for cutting the wire after a predetermined length of the same has been coiled by the coiling mechanism, and controlling mechanism functioning to intermittently actuate the coiling mechanism, feeding members and cutting means successively in the order named, and to move the feeding members intermittently and progressively toward the cutting means until more than one strand has been severed by the cutting means.

1,503,946. COMBINED PIGSKIN AND OTHER MATERIAL TRANSMISSION BELT. HAROLD M. GUSDORF, Indianapolis, Ind. Filed Aug. 28, 1922. Serial No. 584,647. 4 Claims. (Cl. 74—63.)



3. A laminated belt made of pigskin leather, in combination with some other fibrous material, the pulley contacting side of the belt being the pigskin leather with the flesh side contacting the pulley.

1,503,947. LIFTING JACK. NORMAN E. HARRIS, Murray, and WILL D. SWIGGART, Fulton, Ky.; said Swiggart assignor to said Harris. Filed Mar. 10, 1921. Serial No. 451,137. 5 Claims. (Cl. 254—98.)



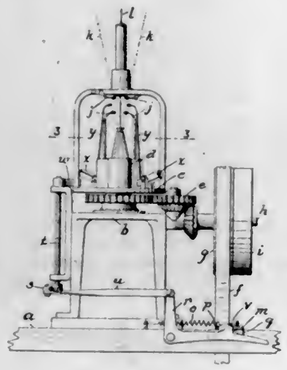
1. A jack or device of the type described comprising an interiorly screw threaded barrel having an annular concaved bearing portion at its upper end, antifriction members in said concaved bearing portion, a jack head swiveled on said bearing portion and rotatably supported on said antifriction members, a screw within said barrel, and means for actuating said barrel with respect to said screw.

1,503,948. LIFTING JACK. NORMAN E. HARRIS, Murray, and WILL D. SWIGGART, Fulton, Ky.; said Swiggart assignor to said Harris. Original application filed Mar. 10, 1921, Serial No. 451,137. Divided and this application filed Aug. 4, 1922. Serial No. 579,630. 4 Claims. (Cl. 254—103.)

1. A jack of the type described, including a threaded barrel-member, a screw-engaging the threads of said barrel-member, a miter and worm-gear mechanism, the worm having a journal provided with a bore, said bore having a seat therein and a slidable handle received within said journal-bore, said handle having spherical terminals, one spherical terminal adapted to be received by and pivoted in said seat.

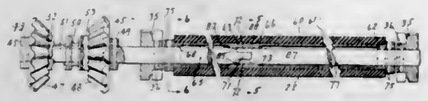
1,503,949. COMBINATION ASH TRAY AND CIGARETTE CASE. JOHN J. HELM, Quantico, Va. Filed Feb. 2, 1924. Serial No. 690,252. 4 Claims. (Cl. 206—38.)

1. A combination ash tray and cigarette case comprising cover and tray members hingedly connected at one end of the device, a division plate disposed between and hingedly connected to the cover and tray member at their point of hinge connection, said division plate forming a cover for the tray and having a central opening through which ashes may be deposited into the tray, means cooperating with and carried by the cover for facilitating retention of cigarettes within said cover against the top wall thereof, and means for releasably maintaining the cover and tray members in closed relation.



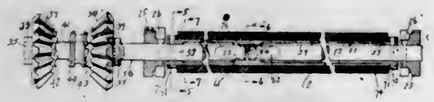
1,503,950. AEROPLANE. VINCENT E. HEYWOOD, Worcester, Mass. Filed June 1, 1920. Serial No. 385,614. 2 Claims. (Cl. 244—14.)

1. In an aeroplane, a pair of wings revolvable about a vertical axis, means for revolving said wings in opposite directions, means for disconnecting said wings from said revolving means and means for locking said wings in flying position.



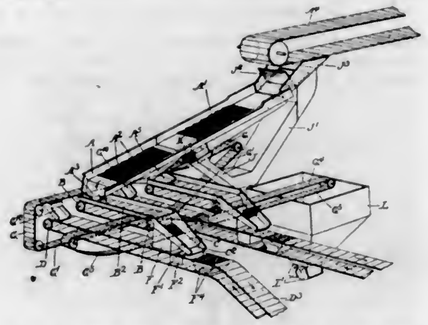
1,503,951. AUTOMATIC STOP MECHANISM FOR CORD KNITTERS. EMIL J. HUGO, Philadelphia, Pa., assignor to Largman, Oppenheim & Co., Philadelphia, Pa., a Copartnership composed of Harry Largman, Joseph Largman, Max M. Oppenheim, and Emil J. Hugo. Filed Aug. 22, 1923. Serial No. 658,761. 5 Claims. (Cl. 66—7.)

1. In a cord knitting machine, the combination with a rotatable base, knitting mechanism mounted thereon and driving means therefor, of means actuatable to interrupt the drive, a member mounted adjacent said base and connected to said drive interrupting means, a stop mounted on said base tending to contact with and displace said member to cause said drive interrupting means to be actuated, means engaged by a thread passing to said machine adapted normally to prevent said stop from contacting with said member and upon the breaking of the thread to permit said stop to contact with and displace said member, and means carried by said drive



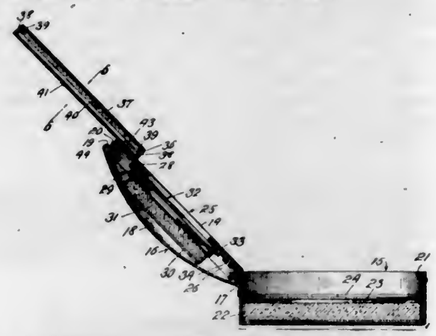
interrupting means adapted when said means is actuated to effect a retraction of said member out of the path of said stop.

1,503,952. WRINGER ROLL FOR CLOTHES WRINGERS. GUSTAVE H. JANTZ, Wyoming, Ohio. Filed May 12, 1920. Serial No. 380,777. 8 Claims. (Cl. 68—33.)



1. In a wringer roll for a clothes wringer, the combination of a shell, and shaft-sections having inner ends received in said shell, said inner ends having means to lock them against relative rotation by axial movements between said inner ends, said shell provided with inner end collars for the respective outer ends of said shaft-sections and with an inner collar for the inner ends of said shaft-sections.

1,503,953. WRINGER ROLL FOR CLOTHES WRINGERS. GUSTAVE H. JANTZ, Wyoming, Ohio. Filed Dec. 8, 1919. Serial No. 343,322. 7 Claims. (Cl. 68—33.)



1. In a wringer roll for a clothes wringer, the combination of a pluri-part shell, parted lengthwise of the axis of said shell to form a plurality of shell sectors, the respective parts of said pluri-part shell provided with complemental bearing-parts forming bearings at the ends of said shell, and with complemental bearing-parts intermediate of the ends of said shell, said complemental bearing-parts parted lengthwise of the axis of said shell to form a plurality of bearing-sectors, and a pluri-part shaft the respective parts whereof have bearing in said first-named bearings, and the inner ends of said respective parts forming releasable drive-connections with said last-named bearing-parts.

1,503,954. COAL-SCREENING APPARATUS. GEORGE S. JAXON, Huntington, W. Va., assignor to Link Belt Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 16, 1922. Serial No. 588,520. 20 Claims. (Cl. 83—56.)

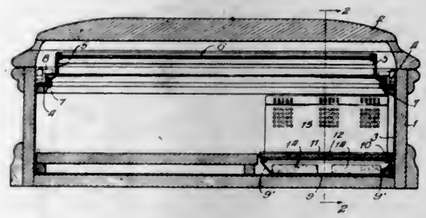
1. In a material handling assembly, a plurality of substantially horizontal conveyors placed directly above one another, the lower being an endless conveyor, a chute adapted to deliver material from the upper to the lower conveyor, a rescreening section for the upper strand of the lower conveyor positioned beyond the point of discharge of said chute.

1,503,955. VANITY BOX. NATHAN KASDAN, New York, and DANIEL POLLACK, Brooklyn, N. Y., assignors to Majestic Machine & Tool Co., Inc., New York, N. Y., a Corporation of New York. Filed Feb. 26, 1924. Serial No. 695,178. 14 Claims. (Cl. 132—83.)

1. A vanity-box comprising a body portion to hold a powder compact and puff therefor, a cover hinged to said body portion at one edge thereof and adapted at its rim to close down into said body and an attachment applied to said cover comprising a circular insert member closely fitting within the rim of the cover and adapted to admit a rouge compact and its puff and a circular mirror frame holding a mirror and mounted on and connected with said insert member and adapted to cover the same and also to be moved outwardly from over the same when the box is open, the means connecting the mirror frame with said insert member being rigid with the insert member and maintaining said frame and member parallel.

1,503,956. EXPLOSIVE AND PROCESS OF MAKING SAME. HARRY W. KLINGER, Kenvil, N. J., assignor to Hercules Powder Company, Wilmington, Del., a Corporation of Delaware. Filed May 19, 1922. Serial No. 562,141. 13 Claims. (Cl. 52—20.)

1. The process comprising treating a mixture of starch and glycerine to convert the starch into a derivative soluble in the glycerine, and nitrating the solution formed.



11. An explosive containing nitrated glycerine and a nitrated product in solution in the glycerine, said product being formed before nitrating by treating starch in admixture with glycerine to form a solution, the whole being stabilized.

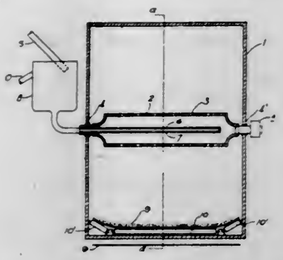
1,503,957. COMPOSITE MOISTUREPROOF BOARD. OTTO KRESS, Appleton, Wis., assignor to American Lakes Paper Company, a Corporation of Delaware. Filed Nov. 12, 1923. Serial No. 674,254. 5 Claims. (Cl. 154—45.9.)

4. A composite moisture-proof paper board comprising at least one ply of relatively heavy stiffening material, and at least three adjacent plies of relatively light paper that are united by thin films of asphalt and are united by a suitable adhesive to the stiffening material, an abrasive in the form of a gritty filler being embodied in said paper or stiffening material.

1,503,958. BURIAL CASKET. ROY F. MCCAMPBELL, Chicago, Ill. Filed Mar. 26, 1921. Serial No. 455,775. 8 Claims. (Cl. 27—11.)

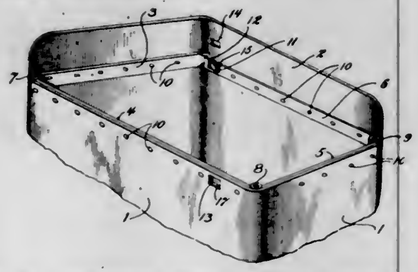
1. A burial casket comprising a body portion, relatively small chambers positioned within said body portion adjacent the sides thereof and adapted to contain desiccating material, and a liquid receptacle below said chambers adapted to receive liquid from said desiccating material.

1,503,959. METHOD OF MAKING SCREW-CUTTING TAPS. JOHN MCFARLANE and DUNCAN CLELLAND, Glasgow, Scotland. Filed Apr. 1, 1922. Serial No. 548,727. 4 Claims. (Cl. 76—101.)



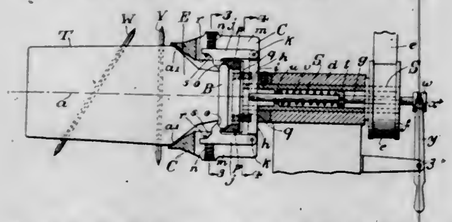
1. A step in the method of manufacturing a screw cutting tap having reverse hand spiral flutes which consists in determining the diameter of the datum circle by the formula

$$d = \frac{\pi D}{10} + D\left(1 - \frac{\pi}{10}\right)\left(\frac{N-2}{N+4}\right);$$



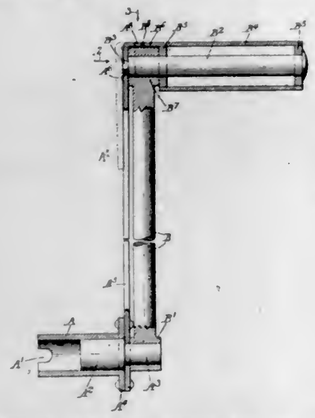
where d=diameter of datum circle, D=diameter of tap and N=number of flutes in the tap.

1,503,960. CENTRIFUGAL MACHINE AND PROCESS. RICHARD MACKAY, Jr., Riverside, Ill., assignor to The Barrett Company, a Corporation of New Jersey. Filed Jan. 14, 1919. Serial No. 271,414. 6 Claims. (Cl. 83—91.)



1. The herein described process which comprises comminuting fusible material by projecting it in fluid form through a series of rows of rotating apertures, each row being in a single vertical plane and the apertures in any particular row being substantially equally spaced from a central point so that the material from the respective rows will be projected into a series of vertical planes, cooling the comminuted material in air, collecting the comminuted material and moving it substantially parallel with said vertical planes.

1,503,961. MAIL BAG. JAMES L. MARSHALL, Ercildoun, Pa. Filed Oct. 21, 1922. Serial No. 595,928. 2 Claims. (Cl. 150—18.)



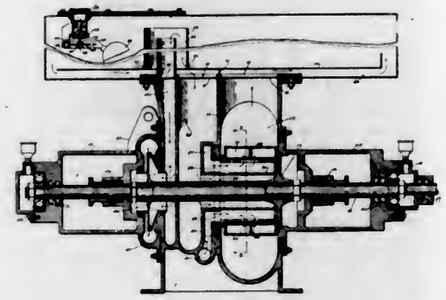
1. The combination with a bag, of a frame secured within the open end of the bag and comprising a set of bars hinged together, two adjacent bars of said set having free ends, the free end of one bar having a perforated lug thereon, the free end of another bar having a slot therein to receive the lug, said lug also adapted to be projected through a slot in a third bar and thence through the bag.

1,503,962. METHOD OF PRODUCING GLASSWARE. JOHN A. MILLIKEN, Bayonne, N. J., assignor to John E. Marsden, Egg Harbor City, N. J. Filed Apr. 8, 1921. Serial No. 459,651. 7 Claims. (Cl. 49—1.)

7. The method of producing an article of glass, which consists in forming said article with an integral extension provided with a shoulder portion, exerting tension on said extension in a direction longitudinally thereof for holding said shoulder portion against an abutment, decorating said article by grinding while so held, and thereafter while rotating severing said article from said extension.

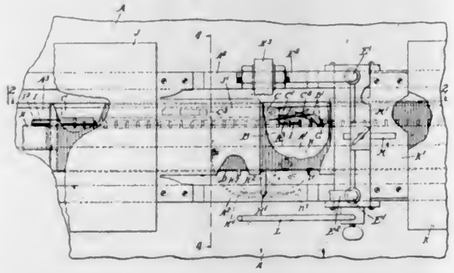
1,503,963. SAFETY AUTOMOBILE CRANK. BERNHARD NILSSON, Chicago, Ill. Filed Oct. 23, 1922. Serial No. 596,212. 13 Claims. (Cl. 123—185.)

12. A starting crank for engines and the like comprising two crank members one rigid one flexible, a pin on one adapted to engage a perforation in the other, a handle on the rigid member and means operative when the handle rotates with respect to it for deflecting the flexible member to throw the pin out of engagement with the perforation and permit rotation of the two members with respect to one another, the handle having an extension overlying the crank adapted to engage the crank and to limit its rotary excursion, a notch in such extension and a lug on the flexible crank adapted to engage such notch.



1,503,964. PROPEL PENCIL. WILLIAM M. SAUNDERS, Waterbury, Conn., assignor to The Hoge Manufacturing Company, New York, N. Y., a Corporation of New York. Filed May 12, 1921. Serial No. 468,806. 9 Claims. (Cl. 120—18.)

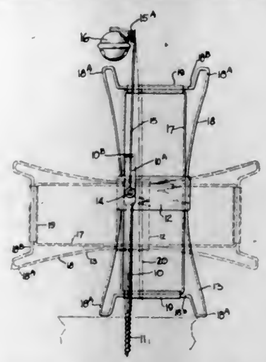
8. In a propel pencil, the combination of a casing having a tapered point provided with an internal conical seat, a tubular clutch having gripping jaws adapted to engage a lead therein and normally tending to move toward gripping position irrespective of said seat, a bushing within said casing for guiding the upper end of said clutch, and a spring acting to hold said clutch normally in engagement with said seat so as to center the lower end of said clutch, said tapered point having a screw-thread engagement with said bushing and holding said spring and clutch in place.



1,503,965. RETURN-LINE VACUUM PUMP FOR STEAM-HEATING SYSTEMS. BENJAMIN SKIDMORE, Jr., Chicago, Ill. Filed Dec. 10, 1921. Serial No. 521,334. 13 Claims. (Cl. 230—14.)

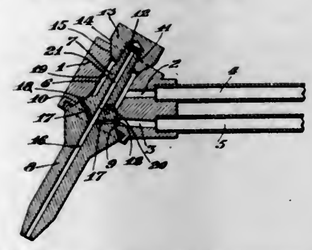
1. In combination, a closed tank for receiving air and water and having an air outlet, a rotor casing having an outlet discharging into the tank and an inlet leading from the tank, a rotor in the casing, means for actuating the rotor, said rotor operating to circulate liquid from the tank through the casing and back into the tank, there being a conduit for air and water and having an outlet adjacent the path of movement of the rotor and in which conduit a suction is created by the relative movement of the rotor and liquid, there

being a liquid discharge outlet leading from the tank, and means operating automatically to control the air outlet, the said rotor also operating to build up pressure in the tank whereby the liquid will be delivered from the tank through the said discharge outlet under pressure.



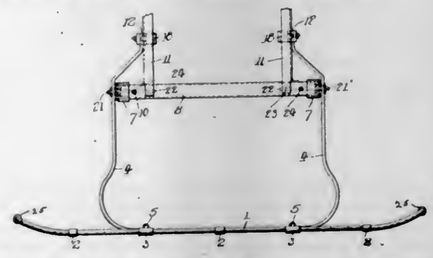
1,503,966. ADDRESSING MACHINE. RUPERT B. SMART, Chicago, Ill. Filed May 6, 1921. Serial No. 467,352. 9 Claims. (Cl. 101—64.)

1. In an addressing machine the combination of a frame, a galley carrier slidable in said frame, a rack bar adapted to carry said carrier, means for progressively advancing said rack bar and carrier, said means comprising a reciprocating block, a pawl on said block adapted in the forward movement of said reciprocating member to engage a pin on said rack bar, and in its rearward movement to pass over the pins of said rack bar, and a locking member adapted to lock said pawl out of contact with said pins.



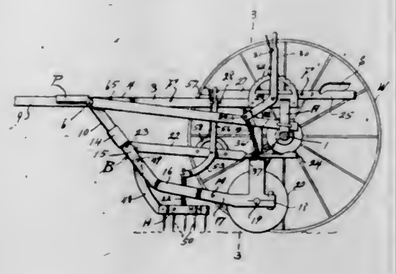
1,503,967. FISHING DEVICE. JOSEPH SUBERT, Oak Park, and ANTON JEDLICKA, Berwyn, Ill. Filed Apr. 28, 1922. Serial No. 557,189. 1 Claim. (Cl. 242—96.)

A fish line holder comprising a wire frame having an inner substantially rectangular section, an outer section, a band embracing both sections midway their ends, said outer section having the corners thereof extending beyond its ends and the adjacent ends of said inner



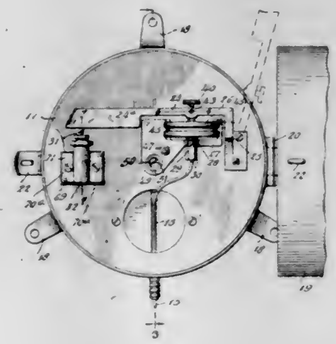
rectangular section, and securing bands extending between said extending corners and embracing the adjacent ends of said inner and outer sections.

1,503,968. GAS BURNER OR TORCH. PRIOR F. WILLIS, St. Louis, Mo. Filed June 23, 1919. Serial No. 306,139. 4 Claims. (Cl. 158—27.4.)



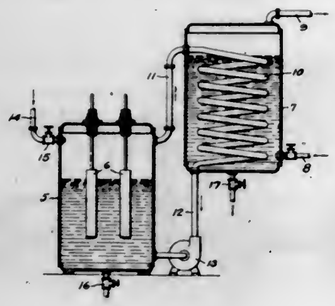
1. In a gas burner or torch of the character described, means for supplying the combustible and the supporter of combustion in the proper proportions and pressures to produce a neutral flame from an orifice of a given capacity, and means for creating a vacuous relief for the supporter of combustion by the operation of the latter flowing into the mixing chamber under normal conditions whereby to maintain the neutral flame under such conditions and whereby, also, the neutral flame continues for a limited period, but of proportionate lesser capacity, upon the occurrence of an abnormal restriction of the orifice.

1,503,969. BUMPER FOR AUTOMOBILES. WILLIAM ERASTUS WILLIAMS, Wilmette, Ill. Filed Oct. 17, 1923. Serial No. 669,080. 6 Claims. (Cl. 293—55.)



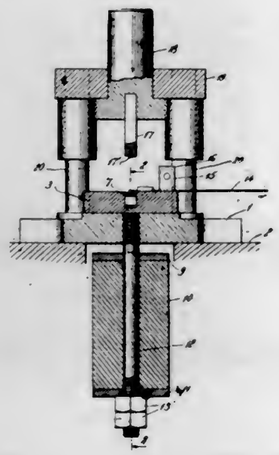
6. In a device of the class described, a clip for connecting the device to the frame of a car composed of a thin flat sheet of metal slit in portions and bent up to form a three sided box clip adapted to register over the end of a channel member of the frame.

1,503,970. AGRICULTURAL DEVICE. GEORGE W. WILSON, Hopkinsville, Ky. Filed May 13, 1922. Serial No. 560,583. 2 Claims. (Cl. 97—7.)



1. A device of the class described comprising an upwardly directed beam comprising members arranged side by side, the lower portion of said members being separated, an upstanding arched member connecting the rear extremities of the separated portions of the beam, a roller supported between said separated portions of the beam, a member connecting the arched member and the upper portion of the beam, a harrow supported by the beam for swinging movement in a vertical direction, and means carried by the member and operatively engaged with the harrow for raising and lowering the same.

1,503,971. AUTOMATIC CONTROLLER. FRANK J. BAST, Brooklyn, N. Y., assignor to Charles J. Tagliabue Mfg. Co., Brooklyn, N. Y., a Corporation of New York. Filed Jan. 3, 1923. Serial No. 610,532. 18 Claims. (Cl. 236—86.)

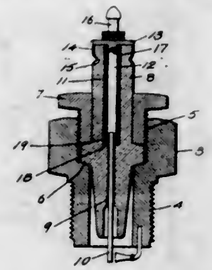


1. In an automatic controller, the combination of a controlling device, a governing device, a gravity-controlled member arranged to be operated by said controlling device to control the operation of said governing device, means for changing the adjustment of the controller, said means being operatively movable in directions transverse to the plane of movement of said member and a dial located in a plane parallel with said plane of movement of said member for indicating the adjustment.

1,503,972. ELECTRIC BOILER. ESKIL BERG, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 13, 1922. Serial No. 588,071. 4 Claims. (Cl. 219—40.)

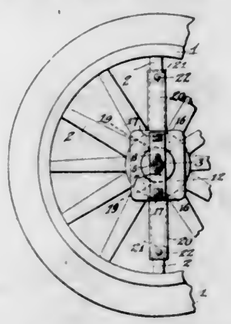
1. In combination, an electric boiler, a second boiler, and a pipe structure in the second boiler connected to the electric boiler.

1,503,973. TERMINAL-SETTING TOOL. EDWARD BERGMAN, New York, N. Y., assignor to C. Brandes, Inc., a Corporation of New York. Filed July 11, 1922. Serial No. 574,253. 5 Claims. (Cl. 78—60.)



1. In a terminal setting tool, a blank supporting member comprising means for properly positioning a blank thereon, means for guiding a metal strip so that the end thereof may be readily inserted into a recess provided in the blank, and a punch for deforming the portion of said metal strip within said recess to secure said strip therein and cutting off said metal strip to form a terminal.

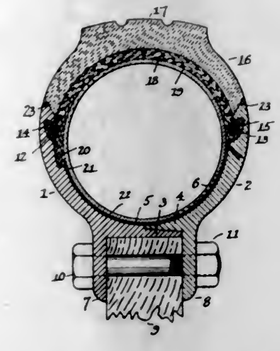
1,503,974. SPARK PLUG. JASPER BLACKBURN, St. Louis, Mo. Filed Dec. 27, 1920. Serial No. 433,161. 1 Claim. (Cl. 123—169.)



In a spark plug, a casing having a one piece insulator secured therein, said insulator being provided with an upper and a lower concentric bore, the lower bore being of less diameter than the upper bore so as to form a shoul-

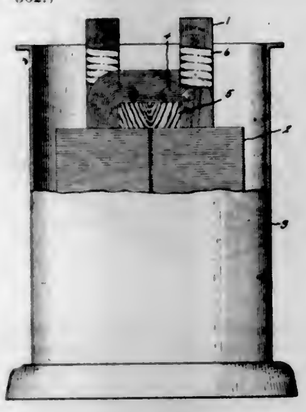
der approximately midway the length of the insulator, a tubular upper electrode secured in the upper bore and of approximately the same length as said bore and having indentations formed adjacent its lower end, a lower electrode secured in the lower bore, said electrode extending beyond the lower end of the insulator and into the

tubular electrode and spaced apart therefrom so as to form a spark gap, a metallic cap secured to the upper end of the insulator, said cap being provided with a central projection adapted to fit snugly within the tubular electrode so as to form an electrical connection therewith, and means for securing an electric conductor to said cap.



1,503,975. RETAINING DEVICE. JOSEPH A. BROWN and JOSEPH R. WATSON, Jewett, Tex. Filed Dec. 29, 1922. Serial No. 609,661. 4 Claims. (Cl. 301—111.)

2. A retaining device comprising a pair of parallel holding plates each having an opening to provide for the seating thereof on a hub, a coupling plate having an opening to provide for the seating thereof on an axle and against the hub, a pair of oppositely extending retaining arms seating on the hub and interposed between the holding plates, means for connecting the holding and coupling plates and the arms together, and means for connecting each of the arms to a spoke of the wheel, each of said retaining arms including a head having a segment-shaped edge bearing on the hub.

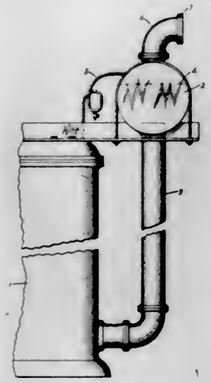


1,503,976. WHEEL RIM AND PNEUMATIC-TIRE COVER. JOHN WALTERS BRYANT, Shepparton, Victoria, Australia, assignor of one-twelfth to Charles William Bryant, one-twelfth to Charles James Bryant, one-sixth to Margaret Eliza Bryant, and one-sixth to William Shell, all of Shepparton, Victoria, Australia. Filed Sept. 22, 1920. Serial No. 412,045. 1 Claim. (Cl. 152—21.)

A vehicle wheel rim comprising two circular cheeks, each of arcuate form in cross-section and adapted to be mounted upon a wheel felloe and when so mounted to provide a channel of arcuate form in cross-section to receive a pneumatic tube, said cheeks having flanges 7 and 8 respectively to seat against the sides of the felloe and also having cooperating tongues 3 and 4 respectively, the tongue 3 extending entirely around the periphery of the felloe and seated thereupon, and said cheeks being

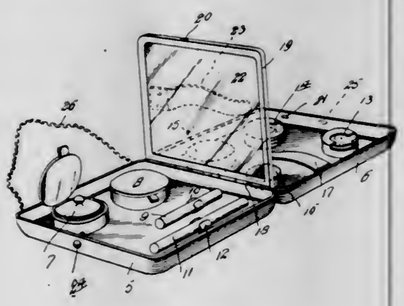
each provided with a circular recess with which one edge of a tire casing is adapted to engage, one of said cheeks being also provided at intervals upon its inner curved wall with recesses adapted to receive projections on the tire casing.

1,503,977. WINDING FOR ELECTRICAL APPARATUS. LOCKE H. BURNHAM, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Sept. 26, 1921. Serial No. 503,247. 2 Claims. (Cl. 175—362.)



1. A transformer including a core having a winding leg, a winding surrounding said winding leg and having a straight section extending along one face thereof, the straight section of the winding being deformed to provide a projection at an angle to the direction of said straight winding section, and means engaging said projection to prevent displacement of said straight winding section.

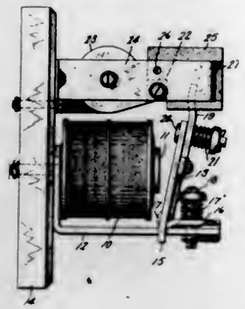
1,503,978. CASING FOR ELECTRICAL APPARATUS. LOCKE H. BURNHAM, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed June 8, 1922. Serial No. 566,918. 2 Claims. (Cl. 220—85.)



1. The combination with a casing for immersed electric induction apparatus, of an expansion chamber, a pipe connecting the expansion chamber to the lower part of said casing, and an insulating liquid within said casing

and extending through the pipe into the expansion chamber, said pipe having a cross sectional area at least as great as one half of one per cent of that of said casing,

whereby the pipe may carry a rapid flow of liquid to prevent dangerous pressure within the casing upon the occurrence of a fault in the apparatus.



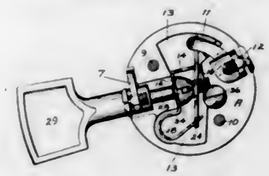
1,503,979. COMBINATION VANITY CASE AND PURSE. ANNIE CALLAHAN, Pulaski, Tenn. Filed July 24, 1923. Serial No. 653,440. 2 Claims. (Cl. 206—38.)

1. A combined vanity case and purse comprising a pair of symmetrical half-sections hingedly connected together to permit them to be swung in the same plane when the case is opened, a flat breakable glass mirror including a frame pivoted to the aforesaid hinge, said mirror being of a size to telescope into one of said sections, and a longitudinally bowed resilient metal strip rigidly secured at one end to the ineffective side of said mirror, said strip forming in one instance a holding clip and having the additional function of a shock absorber for the glass mirror.

1,503,980. ELECTROMAGNETICALLY-OPERATED DEVICE. EUGENE R. CARICHOFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 18, 1920. Serial No. 411,189. 14 Claims. (Cl. 175—336.)

2. An electromagnetically operated device comprising a magnet frame member, an electromagnet supported within the magnet frame, an armature member cooperating with the magnet frame member to complete the magnetic circuit of the magnet, one of said members having two integral angularly disposed projections on one end thereof which cooperate with slots in the other member to form a hinge connection between the members, and the said member having also an integral central projection disposed at an angle to the main body of the member between the said projections which form the hinge

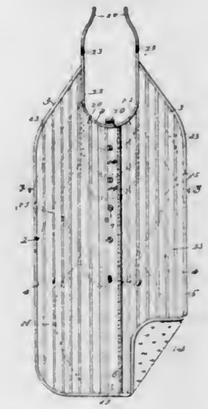
connection, the said central projection disposed at an angle serving as a stop for limiting the movement of the armature member and providing an edge at the angle thereof about which the armature rocks.



1,503,981. ELECTROMAGNETICALLY-OPERATED DEVICE. EUGENE R. CARICHOFF, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Original application filed Sept. 18, 1920, Serial No. 411,189. Divided and this application filed July 27, 1923. Serial No. 654,277. 5 Claims. (Cl. 200—104.)

1. An electromagnetically operated device comprising a magnet frame member, an electromagnet within the frame, an armature member biased away from the electromagnet cooperating with the magnet frame to complete the magnetic circuit of the magnet, an integral projection on the end of the first of said members cooperating with an aperture in the second member forming a hinge connection between the said members, the remaining portion of the said end of the first member disposed at an angle to the main body of the first member providing an edge at the apex of the angle between the said remaining portion and the main body of the first member on which the armature member rocks.

1,503,982. SNAP SWITCH. ARTHUR W. CLAUDER, Bridgeport, Conn., assignor to General Electric Company, a Corporation of New York. Filed Aug. 19, 1920. Serial No. 404,629. 9 Claims. (Cl. 173—346.)

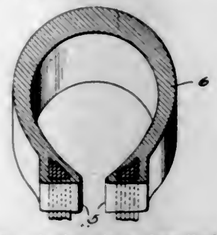


1. A snap switch comprising a rotary shaft, a double wedge cam rotatable about its axis by said shaft, stationary switch contacts, a switch blade to cooperate

therewith, and yieldable means arranged to longitudinally force said blade against said cam transversely

thereof whereby it is caused to move into or out of engagement with said contacts upon each quarter turn of said shaft.

1,503,983. METHOD OF MAKING AUXILIARY SHIRT BOSOMS AND THE ARTICLE FORMED THEREBY. WELLINGTON I. CLEMENTS, Portsmouth, Va. Filed Nov. 8, 1921. Serial No. 513,784. 1 Claim. (Cl. 2—120.)

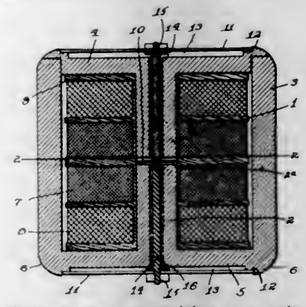


A textile fabric apron adapted to be worn over a shirt bosom and provided at one end with a U-shaped recess, a soft narrow, binding tape binding the edge of said recess and provided near its ends with button holes adapted to engage the rear collar button of a shirt, a tab connected to said apron at substantially the central portion of said recess and having a button hole to engage the front collar button of a shirt, said button holes and binding tape being constructed to lie near the lower edge of a neck band of a shirt, without covering said neck band, the central portion of said apron being provided with a button hole to engage one of the front buttons of an ordinary shirt, a plait extending longitudinally of the central portion of the apron on each side thereof and having the appearance of the plait on the ordinary soft shirt front, and spaced buttons sewed on said plaits to simulate the buttons on an ordinary shirt front.

1,503,984. MANUFACTURE OF 2.3-HYDROXYNAPHTHOIC ACID. LEE H. CONE, Mountain Lakes, N. J., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Feb. 15, 1922. Serial No. 536,804. 21 Claims. (Cl. 260—110.)

9. The method of producing 2.3-hydroxynaphthoic acid which comprises forming a mixture of melted paraffin and a water solution of sodium beta-naphtholate and heating the solution under reduced pressure to dry the naphtholate, and subjecting the naphtholate while still in admixture with the paraffin to the action of carbon dioxide gas under pressure and heating to effect the carbonation and conversion of the naphtholate and finally dissolving out the product and separating the paraffin from the solution.

1,503,985. GROMMET. WILLIAM G. CORSON, Akron, Ohio. Filed Mar. 19, 1923. Serial No. 626,211. 12 Claims. (Cl. 245—1.5.)

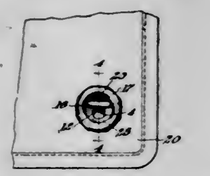


1. A grommet of the class described comprising a plurality of layers of flat metal arranged in side by side contiguous relation and characterized by lateral flexibility and diametric rigidity, said grommet layers comprising a single spiral strip of sheet metal and being of gradually reduced widths, whereby the grommet has a substantially triangular cross-sectional form.

1,503,986. HAIR CLIPPER. JOHN DEAN, Racine, Wis. Filed Oct. 30, 1923. Serial No. 671,718. 5 Claims. (Cl. 30—1.)

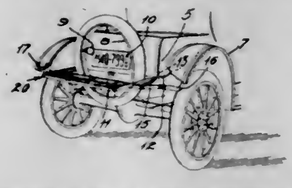
1. A sanitary guard for the comb blade of a hair clipper, struck up from thin spring sheet metal providing a body plate convexed from its front to its rear edge, to cover the bottom face of the comb blade rearwardly from the front edge bevel thereof and having an upstanding flange 11 to fit the end and rear edges of the blade.

1,503,987. ELECTROMAGNET. RUDOLF DEMELE, Rochester, N. Y. Filed June 21, 1921. Serial No. 479,402. 5 Claims. (Cl. 179—116.)



1. An electro-magnet comprising two pole pieces extending one toward the other and having a gap between them, each pole piece being provided with a longitudinally extending bore, an armature disk arranged in the gap between the pole pieces and having its edges free, a casing formed of magnetic material enclosing the pole pieces, gap and armature and forming a magnetic connection between the pole pieces, a stem extending in opposite directions from the pole pieces through the longitudinal bores of the latter, and means for supporting the stem on opposite sides of the armature.

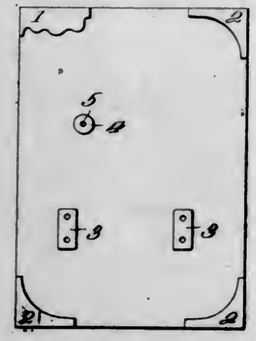
1,503,988. HOSE SUPPORTER. WILLIAM D. FURBY, Baltimore, Md. Filed May 31, 1923. Serial No. 642,593. 5 Claims. (Cl. 24—245.1.)



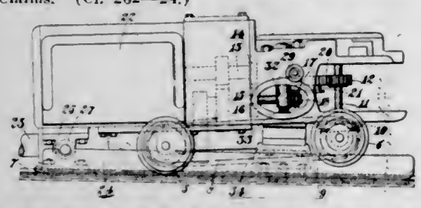
1. A clasp for hose supporters including a button receiving loop, a button to enter and coact with said loop, a button supporting web, and a button attaching plate within the outer portion of the web, having spaced upstanding spurs between which the button is endwise seated, said spurs having upper deflected ends projecting into and embedded within the ends of the button.

1,503,989. CURTAIN FASTENER. EDWARD MCCANN, Chicago, Ill., assignor to Scovill Manufacturing Company, Waterbury, Conn., a Corporation of Connecticut. Filed Dec. 9, 1921. Serial No. 521,098. 4 Claims. (Cl. 24—211.)

2. A socket member of a curtain fastener, comprising a back plate provided with a hole for the reception of a complemental stud member, a locking plate slidably mounted on the back plate and having a hole adapted to register with the hole in the back plate, a spring carried by the back plate and engaging the locking plate so as to cause its hole to normally block the hole in the back plate, an oblong handle extending outwardly from the locking plate and arranged transversely thereon, and a frame connecting the back plate and locking plate, the handle being circumscribed by the frame.



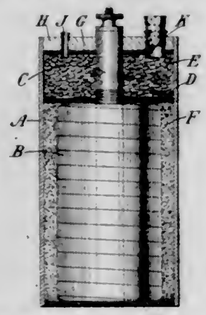
1,503,990. COMBINED BUMPER AND FENDER BRACE AND LUGGAGE CARRIER. LEWIS MILLBERG and VICTOR MILLBERG, Dassel, Minn. Filed Apr. 2, 1923. Serial No. 629,310. 5 Claims. (Cl. 293—55.)



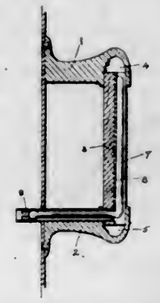
3. The combination with a vehicle bumper and a pair of flanged arms for attaching the same to a vehicle, of a luggage carrier supported on the bumper, and hook-like bolts having sliding interlocking engagement with the flanged arms for holding the luggage carrier on the bumper.

1,503,991. ENAMELING PROCESS. HENRY MOECKER, Jr., Homewood, Ill., assignor to American Stove Company, St. Louis, Mo., a Corporation of New Jersey. Filed Aug. 6, 1923. Serial No. 656,061. 4 Claims. (Cl. 91—73.)

1. In an enameling process, the steps of applying to the article prior to the application of the enamel, wet patterns, then applying the enamel to the article and allowing it to dry, and then removing the dry patterns to effect a removal of the enamel from the article in the desired places prior to the fusing of the enamel.

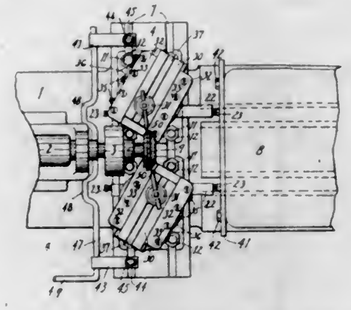


1,503,992. COAL-CUTTING MACHINE. MATTHEW SMITH MOORE, London, England, assignor to Cowlishaw, Walker & Company, Limited, London, England, a British Company. Filed Jan. 24, 1923. Serial No. 614,571. 7 Claims. (Cl. 262—24.)



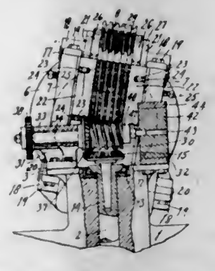
1. The combination of a coal-cutting machine, a skid hinged at one end to said machine to swing in a vertical plane, means for swinging the machine about said hinge relatively to the skid and running-wheels so mounted on the machine relatively to the hinge that when the machine is in its raised position the running-wheels are free from engagement with the track on which they normally run.

1,503,993. INERT ELECTRIC BATTERY. CHARLES SAMUEL MUMMERY, London, England, assignor to The Ever Ready Company (Great Britain) Limited, London England, a British Company. Filed Nov. 16, 1921. Serial No. 515,519. 6 Claims. (Cl. 204—38.)



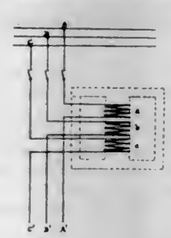
1. An electric battery of the inert type provided with an auxiliary chamber for all of the dry component for the electrolyte, said chamber being adapted to have liquid filled thereinto and having one wall which completely partitions off the chamber from the main interior of the battery and is formed of material that permits water filled into the auxiliary chamber to percolate through it into the main interior of the battery, said main interior being free from electrolyte before the battery is brought into use.

1,503,994. COMBINATION THERMOMETER AND OVEN-DOOR HANDLE. HAROLD F. PENNEY, Geneva, N. Y., assignor to Phillips & Clark Stove Co. Inc., Geneva, N. Y., a Corporation of New York. Filed June 26, 1923. Serial No. 647,910. 4 Claims. (Cl. 73—119.)



1. A combination handle and thermometer mounting, comprising a pair of supporting brackets, a handle section supported by said supporting brackets there being a channel formed in said handle section and a thermometer having its reading stem mounted in the channel of said handle section and its bulb portion projecting rearwardly through the door adjacent to one of the brackets on which the combination handle is mounted.

1,503,995. UNIVERSAL TURNING FIXTURE. JULIAN L. PERKINS, West Springfield, and LOUIS E. DELOGHIA, Agawam, Mass., assignors to Perkins Appliance Company, Springfield, Mass., a Corporation of Massachusetts. Filed May 23, 1922. Serial No. 562,975. 5 Claims. (Cl. 82—25.)

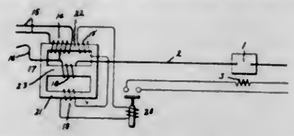


1. The combination, in a turning fixture, with supporting means adapted to be mounted on a turning machine provided with a moving member, and a rack slidingly arranged in said means, said rack being provided at one extreme end with a lengthening and shortening member which is in the direct path of said moving member, and at the other extreme end with a lengthening and shortening member, and retracting means adapted by a lever action to act on said last-named lengthening and shortening member, of a tool-carrying slide adapted to be reciprocated in said supporting means, and provided with a rack, and a spindle journaled in said supporting means, and provided with teeth to intermesh with the teeth of said racks.

1,503,996. WORM-CUTTING ATTACHMENT FOR GEAR-BROACHING MACHINES. JULIAN L. PERKINS, West Springfield, and FRANK W. SICKLES and HIRAM D. CROFT, Springfield, Mass., assignors to Perkins Appliance Company, Springfield, Mass., a Corporation of Massachusetts. Original application filed June 29, 1921, Serial No. 481,261. Divided and this application filed Feb. 1, 1923. Serial No. 616,257. 9 Claims. (Cl. 90—1.)

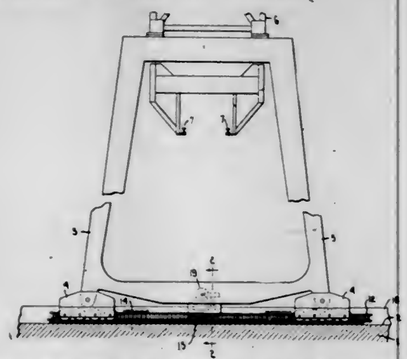
1. The combination in a flexible cutting element capable of passing an uninterrupted succession of teeth through the cutting field of a gear-broaching machine, of means to support and continuously rotate work on an axis which is in angular relationship to that portion of said cutting element which passes through the cutting field, and in operative position relative to said element, the width of the latter being approximately equal to the length of said work.

1,503,997. PROTECTIVE DEVICE FOR ALTERNATING-CURRENT SYSTEMS. JOSEPH PERRET, Paris, France, assignor, by mesne assignments, to Societe Anonyme Forges & Ateliers de Constructions Electriques de Jeumont, Paris, France. Filed Aug. 2, 1921. Serial No. 489,247. 2 Claims. (Cl. 175—294.)



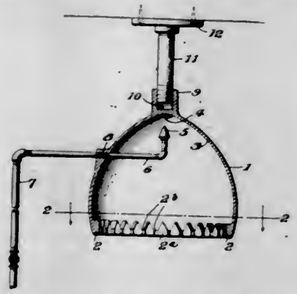
1. A protective device for polyphase alternating currents comprising an inductance connected in series with each phase, the inductances being so coupled as to limit automatically the capacity current upon the earthing of one of the phases and said inductances being ineffective during normal balanced working.

1,503,998. PROTECTIVE SYSTEM. WILHELM PFANNKUCH, Berlin-Niederschoneweide, Germany, assignor to General Electric Company, a Corporation of New York. Filed Aug. 29, 1921. Serial No. 496,489. 7 Claims. (Cl. 175—294.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



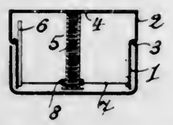
1. A protective system of the class described, wherein a line conductor is composed of a plurality of conductor elements connected in parallel and lightly insulated from each other and wherein an electroresponsive device is to be affected upon the occurrence of a fault on said conductor characterized by the fact that a single transformer is provided at one end of said line conductor for creating a difference of potential between the elements thereof and for effecting the operation of said electroresponsive de-

vice, said transformer comprising a primary winding carrying all of the current to said conductor, an auxiliary winding arranged to produce a difference of potential between the elements of said conductor, and a secondary winding connected to said electroresponsive device and



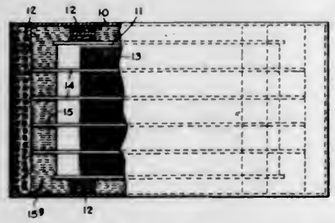
inductively coupled with said primary and auxiliary windings so that during normal operation substantially no current flows through said electroresponsive device and so that upon the occurrence of a fault a current is produced in said secondary winding to effect the operation of said electroresponsive device.

1,503,999. CONVEYING MACHINERY. ROBERT E. SHEAL, Cleveland, Ohio. Filed Oct. 2, 1922. Serial No. 591,821. 11 Claims. (Cl. 105—29.)



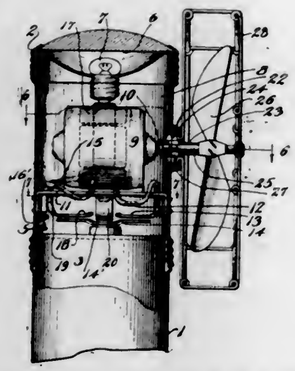
1. In a device of the character described, the combination with a runway and a structure movable therealong, of a toothed driving device carried by said structure and rotatable in a plane disposed at a substantial angle to the vertical, and a rack carried by said runway and meshing with said device, said rack being supported above the surface of said runway and having one of its sides higher than the other and its lower side below any part of said device.

1,504,000. SPRAY HEAD FOR SHOWER BATHS. LEE SIMMONS, Washington, D. C. Filed Nov. 11, 1922. Serial No. 600,313. 9 Claims. (Cl. 299—121.)



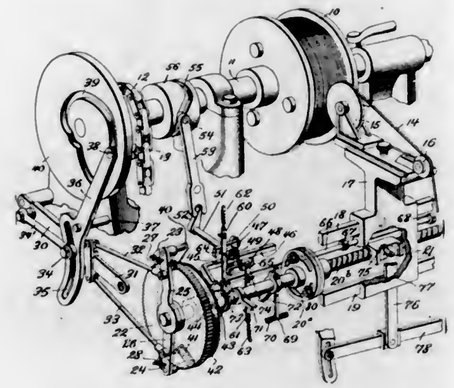
9. A hollow head having an open discharge end formed to provide a water curtain breaking-up rim, and means to discharge water into the opposite end of the head to form a water curtain therein moving toward said rim.

1,504,001. POWDER BOX. EMILE SOYEZ, Paris, France. Filed Dec. 8, 1923. Serial No. 679,399. 4 Claims. (Cl. 221—61.)



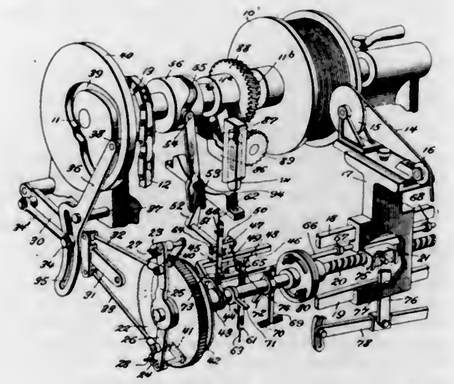
1. A toilet article of the class described comprising a powder compartment or container, a perforate closure member therefor movable relative to said container, and means for compressing the powder in said container and holding it constantly against the perforate closure, whereby to normally prevent escape of the powder through the closure by the compacting action until relative movement between the closure and container is effected.

1,504,002. ELECTROSTATIC CONDENSER. ELIHU THOMSON, Swampscott, Mass., assignor to General Electric Company, a Corporation of New York. Filed Nov. 13, 1920. Serial No. 423,963. 5 Claims. (Cl. 250—41.)



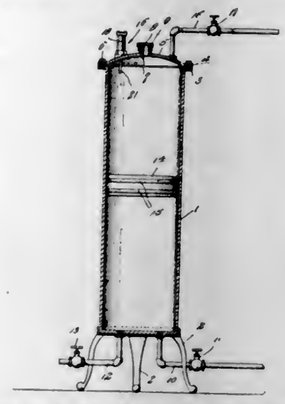
1. In a condenser, a series of electrically active sheets and a plurality of electrically inactive sheets of high heat conducting capacity interleaved with said active sheets and arranged to conduct the heat from the interior of the condenser.

1,504,003. FAN ATTACHMENT FOR FLASHLIGHTS. AUSTIN FAIRCHILD TRUMBULL, Portland, Oreg. Filed May 28, 1923. Serial No. 642,080. 3 Claims. (Cl. 230—1.)



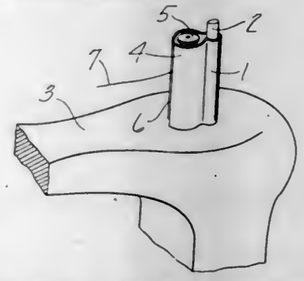
1. In a fan attachment for flashlights, a battery section provided with circuit contacts, a detachable motor section forming a continuation of the battery section and having circuit contacts disposed at its abutting end to cooperate with those upon the battery section when the sections are assembled, a switch member arranged to engage said contacts, and a fan and guard removably mounted upon one side of the motor section for interlocking connection with the motor shaft.

1,504,004. COIL-WINDING MACHINE. JACOB J. VIENNEAU, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed June 1, 1922. Serial No. 565,203. 5 Claims. (Cl. 242—9.)



1. A coil winding machine for electrical conductors and the like comprising in combination with a spool, means for turning said spool and for feeding said conductor along a predetermined circumference of said spool, means for shifting said feeding means from one turn to the next, means for reversing said shifting means at the end of each layer, and means for delaying the action of said shifting means in the reverse direction so as to wind the first and last turns of successive layers in a different axial relation then adjacent turns of the same layer.

1,504,005. COIL-WINDING MACHINE. JACOB J. VIENNEAU, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed June 1, 1922. Serial No. 565,204. 8 Claims. (Cl. 242—9.)

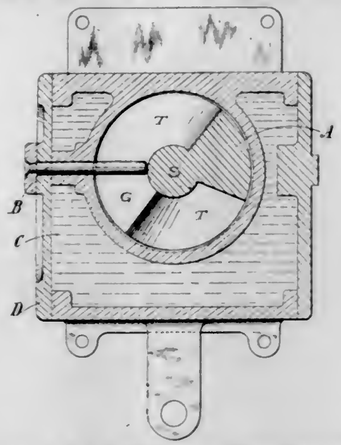


1. A coil winding machine for electrical conductors and the like comprising in combination with a spool, means for rotating said spool and feeding said conductor along a circumference of said spool, means for shifting said feeding means from one turn to the next forming a cross-over, and auxiliary means for controlling the rotation of said spool so as to cause said cross-overs to be distributed uniformly around said coil.

1,504,006. LIQUID-FUEL DISTRIBUTING TANK. DUNHAM A. WEAVER, Elmira, N. Y. Filed Nov. 11, 1922. Serial No. 600,243. 1 Claim. (Cl. 116—118.)

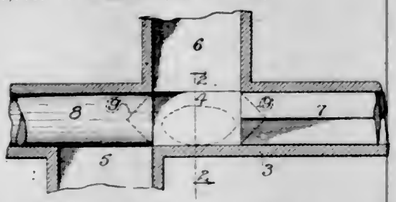
An indicator device adapted to be used upon a fuel distributing tank having a piston movable therein comprising a plug adapted to be screwed into the tank provided with a central bore and with a recess leading in from its outer face and provided at its bottom wall with a socket, the recess and the socket being concentric with the bore, a transparent cylinder having its lower end received within the recess, a head mounted upon the upper end of the cylinder and closing the same, rods disposed exteriorly of the cylinder and connecting the head with the plug, a rod fitting snugly within the bore of the plug and slidably mounted therein, said rod having a diametrically enlarged head adapted to fit snugly in the socket, the internal diameter of the cylinder being greater than the diameter of the head of the rod, the sum of the length of the rod and the enlarged head thereof being greater than the length of the cylinder whereby the piston in the fuel tank is adapted to contact with the end of said last mentioned rod for moving the head thereon in the cylinder to indicate the position of the piston.

1,504,007. BOBBIN HOLDER. EMMA WILLIAMS, Greencastle, Ind. Filed Dec. 11, 1922. Serial No. 606,150. 1 Claim. (Cl. 242—140.)



A bobbin holder for sewing machines, the same being formed of a single piece of sheet metal and embodying a sleeve for engaging the spool spindle of the machine; and a split bobbin tube integrally connected to the spindle sleeve, the parting of the bobbin tube being open to allow of the passage of the thread.

1,504,008. BREAD AND BUTTER MACHINE. CHARLES WICKSTEED, Kettering, England. Filed Jan. 26, 1923. Serial No. 615,017. 2 Claims. (Cl. 91—49.)



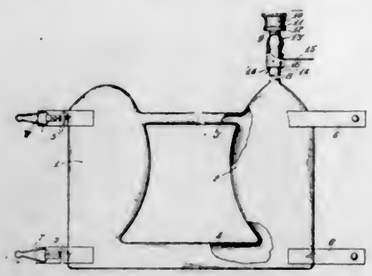
1. The combination with a butter container for a bread and butter cutting and spreading machine, and means

for churning the butter in and feeding the same through the container, of a water jacket around the container to

receive water at a predetermined temperature in order that butter of the desired consistency may be supplied from the container.

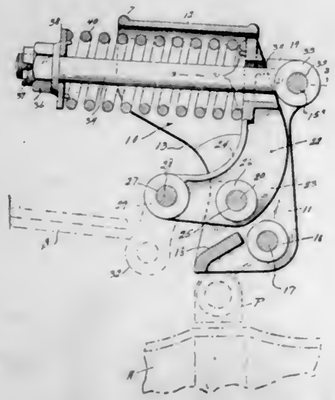
1,504,009. NUT-CRACKING MACHINE. HERMANN WILMS, St. Louis, Mo., assignor, by mesne assignments, to R. E. Funsten Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 23, 1923. Serial No. 627,075. 6 Claims. (Cl. 146—8.)

1. A nut cracking machine having a nut receiving pocket, and a reciprocating hammer-plunger working through said pocket, said hammer-plunger having along its upper portion flat surfuces that are inclined downwardly on opposite sides of its middle to form a ridge.



1,504,010. SAUSAGE-LINK-FORMING MACHINE. CARL S. ZDECHLIK, Minneapolis, Minn. Filed Aug. 17, 1923. Serial No. 657,883. 13 Claims. (Cl. 17—34.)

1. The combination with a carrier, of squeezers operative on a filled sausage casing to form links, said squeezers being operative to progressively increase the squeezing action on the sausage casing.

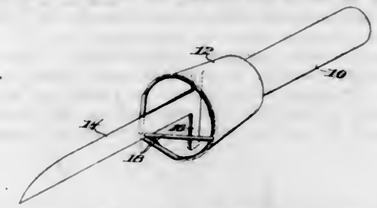


1,504,011. SWIMMING BAG. ARVID ANDERSON, AXEL ANDERSON, and OSCAR ANDERSON, Chicago, Ill. Filed Feb. 23, 1922. Serial No. 538,779. 3 Claims. (Cl. 9—17.)

1. In a swimming bag, the combination of two relatively large longitudinal inflatable members, a transverse conduit connecting said inflatable members at their lower ends, another conduit connecting said members near their upper ends, said second conduit being of smaller cross-section than said first named conduit, straps secured each at one of their ends to said inflatable members, said straps being arranged in pairs, the members of each pair

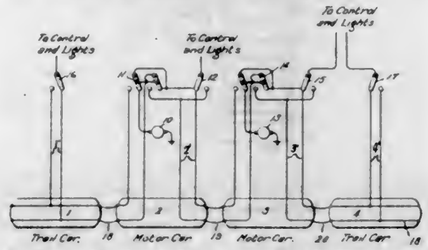
being secured near the lower and upper end of said inflatable members, fastening means at the free ends of the straps, and a hose extension projecting from the upper end of one of said inflatable members.

1,504,012. SHOCK ABSORBER. FRANKLIN E. ARNDT, Galion, Ohio. Filed Feb. 8, 1922. Serial No. 534,957. 4 Claims. (Cl. 267—17.)



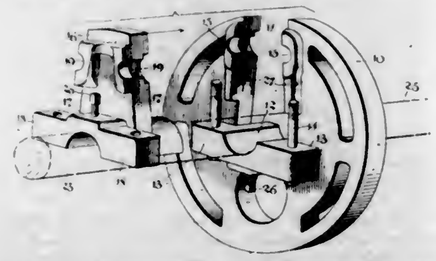
1. A shock absorber of the character described comprising a member adapted to be mounted at its lower end upon the spring perch of a vehicle, a bolt oscillatably connected to the upper end of said member and carrying a stop at its outer end, a lever pivoted intermediate its length to said member and at its upper end having an aperture through which the bolts passes, a spring surrounding the bolt and bearing at one end against said stop and at its other end against the upper end of said lever, the lower end of the lever being adapted to be operatively connected to the free end of the spring, and stop lugs projecting inwardly from the sides of said member and engaged by the upper end of the lever for limiting movement thereof in one direction.

1,504,013. INSTRUMENT FOR WITHDRAWING BLOOD FROM ANIMALS. FRANCIS CLARKE ATWOOD, Newton, Mass., assignor to American Protein Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Dec. 5, 1922. Serial No. 605,091. 12 Claims. (Cl. 17—1.)



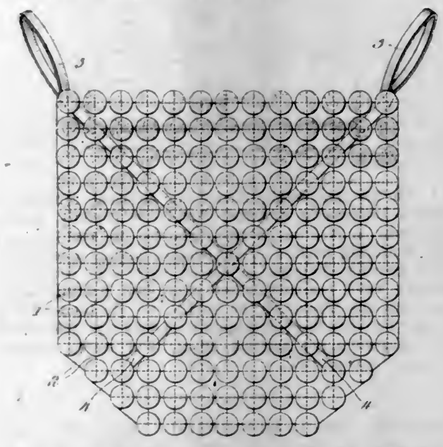
1. An instrument for withdrawing blood in such condition as to permit its use as a basis of food products

from a food animal during its slaughter, comprising a hollow handle having an enlargement at one end thereof



for directing the blood stream from the usual wound into and through the handle and having means attached to the enlargement for spreading the wound.

1,504,014. SYSTEM OF CONNECTIONS FOR PREVENTION OF PARALLELING OF GENERATORS ON TRAIN UNITS. CLINTON J. AXTELL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 28, 1922. Serial No. 532,424. 9 Claims. (Cl. 171—313.)

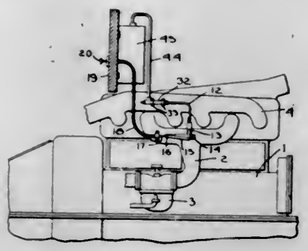


5. The combination with a plurality of generators and a plurality of translating circuits, each generator and each circuit having one terminal connected to a common conductor, of a plurality of two position switch mechanisms, and electrical connections controlled by said mechanisms for connecting the other terminal of any selected generator to the other terminal or terminals of any selected circuit or circuits and preventing paralleling the generators irrespective of the operation of said switch mechanisms.

1,504,015. DETACHABLE CAM OR PULLEY. GORDON B. BABER, Greenville, S. C. Filed June 29, 1923. Serial No. 648,515. 2 Claims. (Cl. 64—18.)

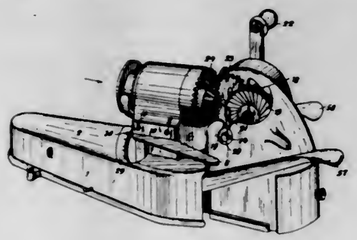
1. A pulley comprising a body having a radial cavity with the sides thereof converging throughout towards the outer edge of said body, said body further having means to provide an integral half bearing at the inner end of the cavity, said half bearing including integral lateral attaching lugs extending over the adjacent face of the body at one side thereof, a filler member seated in said cavity and having the sides thereof converging to conform to the converging sides of the cavity to arrest centrifugal thrust of said member on the operation of the pulley, said member having an integral half bearing at its inner end opposing the other half bearing and including integral lateral attaching lugs extending over the adjacent faces of the pulley body and seating upon the attaching lugs of the half bearing of the body, fastening means connecting the attaching lugs of the half bearings together, and fastening means for connecting the filler member to the body.

1,504,016. GARMENT PROTECTOR. JOHN J. BAEHR, New Orleans, La. Filed July 10, 1922. Serial No. 573,878. 1 Claim. (Cl. 2—48.)



In a device for the purpose set forth, the combination of a series of cork discs secured adjacent each other, in substantially a horizontal plane to produce a garment slightly wider at its upper end than at its lower end, tapes secured to discs running from the upper corners substantially diagonally of said garment, and having loops at their upper end whereby the device may be adjusted to the back of the wearer.

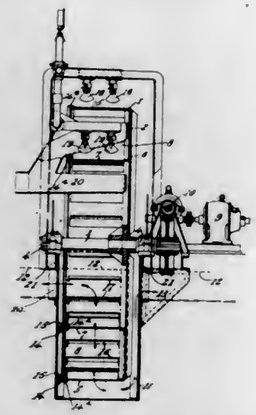
1,504,017. REFLECTOR. PERCY S. BAILEY, Lynn, Mass., assignor to General Electric Company, a Corporation of New York. Filed Feb. 2, 1921. Serial No. 441,941. 9 Claims. (Cl. 240—41.)



1. A reflector having a reflecting surface comprising a series of alternate sections cut from one paraboloid on lines parallel to the major axis of the paraboloid and arranged side by side polygonally about a predetermined curvature.

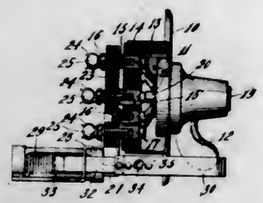
1,504,018. AIR-MOISTENING DEVICE FOR INTERNAL-COMBUSTION ENGINES. REMI J. BERARD, Woonsocket, R. I., assignor to Remy Auto Miser Company, Woonsocket, R. I., a Corporation of Rhode Island. Filed Mar. 25, 1921. Serial No. 455,426. 10 Claims. (Cl. 123—25.)

1. An air moistening device for internal combustion engines comprising a water supply, a conduit leading therefrom, a heating device, adapted to rest upon a heat radiating portion of the engine having a relatively large heating chamber connected with said conduit, a delivery head communicating with said heating device and with the intake of the engine, an air inlet leading to said delivery head and simultaneously operable means for regulating the amount of air and water supplied to said delivery head.



1,504,019. PENCIL-SHARPENING MACHINE. MARTIN BERNDT, Eutritzsch, near Leipzig, Germany, assignor to the Firm of Industrie-Dienst-Ein- und Ausfuhr Gesellschaft mit beschränkter Haftung, Leipzig, Saxony, Germany. Filed Aug. 9, 1923. Serial No. 656,474. 3 Claims. (Cl. 120—95.)

1. A pencil sharpening machine of the type set forth, comprising, in combination with a casing a lengthwise movable rotatable shaft, two bearings in said casing for the shaft, the one bearing consisting of a removable bushing or sleeve in a slotted opening, a cutter-disk rigidly connected with said shaft, means for imparting rotary motion to said shaft and cutter-disk, a means for moving the shaft with the cutter-disk lengthwise, and a movable abutment or stop having a projecting shank with a curved or cam-shaped operative edge, substantially as set forth.

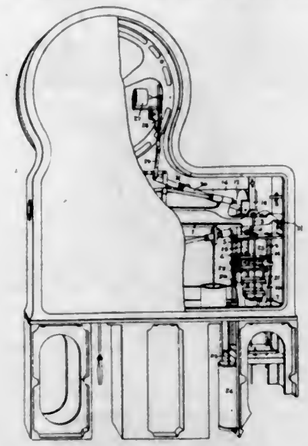


1,504,020. ROTARY FILTER OR STRAINER. FRANCIS WHITWELL BRACKETT, Colchester, England. Filed Sept. 6, 1923. Serial No. 661,261. 3 Claims. (Cl. 210—201.)

1. In a rotary liquid filter or strainer of the class described, a tank having on one side an inlet opening whereby unstrained liquid enters the tank and in a second side an outlet for the liquid after straining, a horizontal rotatably-mounted power shaft spanning the tank, a series of horizontally disposed cylindrical screens forming drums having open ends adjacent to the inlet side of the tank and closed ends adjacent to the outlet side of the tank, said screens being secured to the said shaft and disposed in concentric relation one within another and each with a portion dipping into the tank, each screen being composed of foraminous material, the size of the openings in successive screens being respectively diminished in a manner to render the screens successively finer from the innermost to the outermost screen of the series, and means, consisting of annular

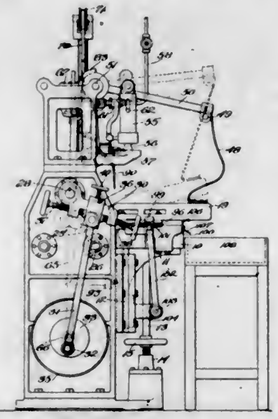
sealing strips interposed between the walls of the tank and the outer peripheral surfaces of the screens, to prevent unstrained liquid which enters the tank through its inlet from passing from the inlet side of the tank to the outlet side thereof between the side walls and the circumferential marginal edges of the screens, the liquid entering the innermost cylindrical screen being caused to pass in succession through the concentric cylindrical screens to the outlet side of the tank, substantially as described.

1,504,021. VARIABLE-RESISTANCE SWITCH. STEPHEN F. BRIGGS and EDWARD N. JACOBI, Milwaukee, Wis., assignors to Briggs & Stratton Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 9, 1917. Serial No. 167,477. 7 Claims. (Cl. 219—48.)



1. An automobile lighting switch comprising a front plate, a switch member mounted to turn therein for controlling the head lights, and a slide passing longitudinally through the front plate for varying the resistance of the head light circuit.

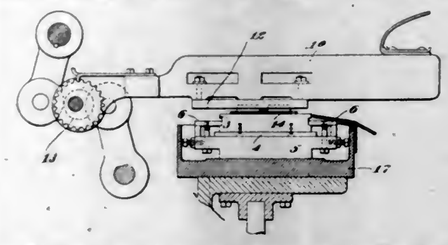
1,504,022. WEIGHING SCALE. GEORGE W. BRITTON, Hamilton, Ontario, Canada. Filed June 25, 1921. Serial No. 480,458. 4 Claims. (Cl. 265—48.)



1. In a weighing scale, the combination with the rigid scale frame and scale beam, of rigid vertical guides arranged in the frame, a cradle member slidable on

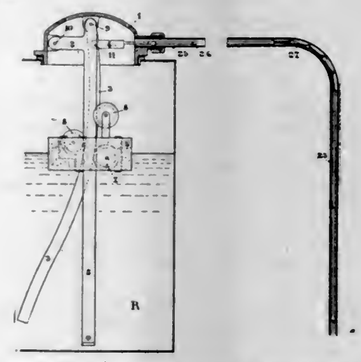
said vertical guides and having stepped supports, a plurality of counterpoise weights of graduated lengths adapted to rest separately on said stepped supports, and

a member suspended from the beam between said stepped supports and adapted to receive said counterpoise weights upon the lowering of the cradle member.



1,504,023. STRAIGHTENING MACHINE. GEORGE T. CLARK, Old Orchard, Me., assignor to Saco-Lowell Shops, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 13, 1921. Serial No. 460,863. 23 Claims. (Cl. 153—48.)

1. A straightening machine comprising, in combination, a lower die having a rigid work supporting face, an upper die comprising a plurality of independent bars arranged to bear on the article to be straightened to press it against said lower die, and means for relatively reciprocating said dies in a direction substantially parallel to said bars to rotate the article to be straightened between the dies.

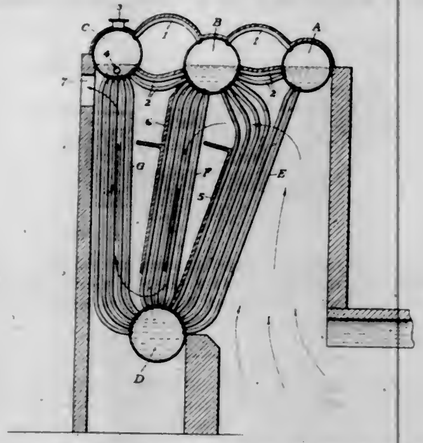


1,504,024. PROCESS OF STRAIGHTENING SPINDLES, AND THE LIKE. GEORGE T. CLARK, Old Orchard, Me., assignor to Saco-Lowell Shops, Boston, Mass., a Corporation of Massachusetts. Filed Oct. 3, 1921. Serial No. 505,014. 6 Claims. (Cl. 153—32.)

1. That improvement in the art of straightening spindles and the like, which consists in rotating a spindle alternately in opposite directions between suitable dies while pressing said spindle between the dies, and stopping the rotation of the spindle at the end of each period of rotation, and while its direction of rotation is being reversed, in an angular position which

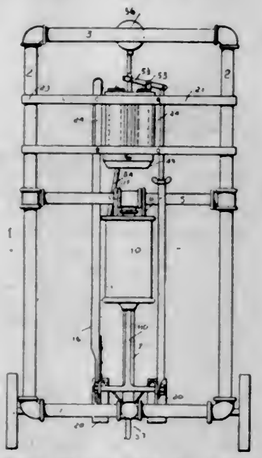
causes the pressure exerted thereon by the dies to be transmitted therethrough in a different plane from that in which it was transmitted through the spindle at the end of the previous period of rotation.

1,504,025. LIQUID-LEVEL GAUGE. LUCIEN ALFRED MAURICE CORSET, Paris, France. Filed June 25, 1921, Serial No. 480,493. Renewed Dec. 20, 1923. 3 Claims. (Cl. 73—82.)



1. A liquid level gauge comprising in combination with a tank and a float operable therein, of a chambered support on said tank, rods fixed in said support to extend perpendicularly into the tank, a curved lever pivoted to said support intermediate said rods, said float having an opening through which the rods and lever freely pass, one or more rollers mounted on said float to impinge on one side of said rods, another roller mounted on the float to impinge on the opposite side of the rods and also on the curved lever, an indicating device, and means for transmitting movement of the curved lever to the indicating device.

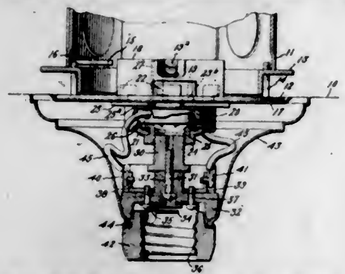
1,504,026. WATER-TUBE BOILER. ALFRED COTTON, St. Louis, Mo., assignor to Heine Boiler Company, St. Louis, Mo., a Corporation of Missouri. Filed Dec. 8, 1921. Serial No. 520,871. 4 Claims. (Cl. 122—302.)



1. A water tube boiler, comprising at least two elevated transverse steam-and-water drums arranged one in front of the other, a transverse mud drum, a front bank of water tubes combined with said mud drum and said elevated drums in such a manner that the tubes that are subjected mainly to convected heat and which are directly connected at their upper ends to the second elevated drum offer the major cross-sectional area of path to the water which circulates upwardly through said bank and the remainder of the tubes at the front side of said bank which are exposed to radiant heat and which have their upper ends connected to the front drum

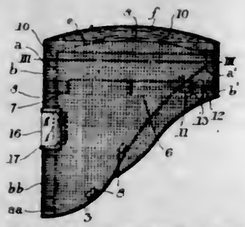
offer the minor cross-sectional area of path to said upwardly circulating water, water circulators that connect the front drum with the second drum, downcomer tubes

that lead from said second drum to the mud drum, and means for causing the fire gases to flow upwardly over said front bank and downwardly over said downcomer tubes.



1,504,027. HAND MILKING MACHINE. WALTER H. DELAHAYE and EDOUARD VANDECAN, Ottawa, Ontario, Canada, assignors to The National Manufacturing Company, Limited, Brockville, Ontario, Canada, an Incorporated Company. Filed July 3, 1922. Serial No. 572,652. 5 Claims. (Cl. 31—73.)

1. In a milking machine and in combination with a support, a milk receiving chamber and a hand pump mounted on said support inlet passages for said receiver and a discharge valve therefor, a hand lever operating said pump and means for mechanically operating said discharge valve therefrom.



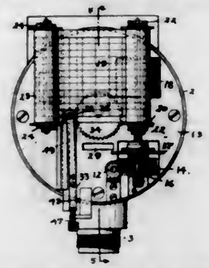
1,504,028. LIGHTING FIXTURE. FRANK C. DE REAMER, Bridgeport, Conn., assignor to General Electric Company, a Corporation of New York. Filed May 29, 1923. Serial No. 642,340. 2 Claims. (Cl. 240—78.)

1. In a lighting fixture of the type comprising a completely wired unit for electrical and mechanical connection to a wall fixture, the combination of a supporting means, an attachment plug carried thereby, a two-part

lamp socket attached to said supporting means, and a canopy held between the two parts of said lamp socket.

1,504,029. FACE MASK. DAVID DE ROSIER, Braddock, Pa. Filed Mar. 29, 1921. Serial No. 456,539. 4 Claims. (Cl. 2—8.)

1. A protecting mask of suitable perforate material having an inner mask member composed of a continuously annular upper portion and a continuous coping at its top, an outer mask member composed of a continuously annular upper portion and a continuous coping at its top, both of said members sloping downwardly from the back along the sides to front bottom portions with continuous intervening air circulation spaces, and an inner spaced attaching band.

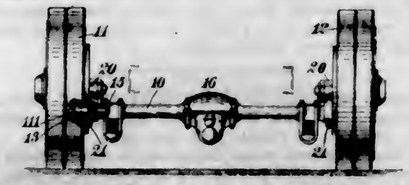


1,504,030. BELT. WILLIAM F. DETTWEILER, Upland, Calif. Filed Aug. 31, 1923. Serial No. 660,383. 12 Claims. (Cl. 227—8.)

1. A belt for the purpose set forth comprising a supporting element, a coupling element including a main and an auxiliary section, said auxiliary section positioned against the outer face of and extending inwardly through the ends of the main section, said supporting element and

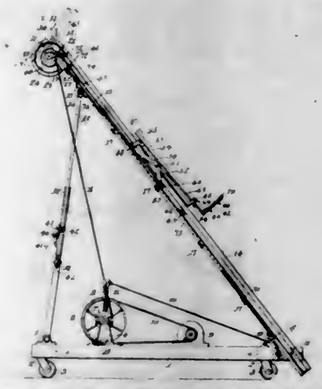
main section having cooperating means for detachably connecting the former to the latter, and said auxiliary section having means for securing said main section against the waist of a lineman.

1,504,031. AUTOMOBILE RECORDING INSTRUMENT. JOHN F. DEES, Cleveland, Ohio. Filed Aug. 17, 1921. Serial No. 493,065. 3 Claims. (Cl. 234—31.)



1. An instrument adapted to record the speed and distance of travel of an automobile, comprising a casing having a revoluble shaft therein and a centrifugal governor mounted upon said shaft, a pair of spools mounted axially parallel with the governor shaft and a recording strip removably mounted at the front side of said casing, a feed roller axially parallel with said spool shaft engaged with said strip and one of said spools having a speed-reducing gear connection with said governor shaft, a stylus movable vertically across the line of travel of said strip having rack and gear and oscillatory operating connections with said governor, and a cover for said casing having a window and a mileage scale opposite said strip.

1,504,032. RAILWAY SIGNAL TORPEDO. JOHN WILEY EDMANDS, Newton Highlands, Mass., assignor to Central Railway Signal Company, Boston, Mass., a Corporation of New Jersey. Filed Oct. 22, 1923. Serial No. 670,054. 6 Claims. (Cl. 246—487.)



1. An improved torpedo comprising a case having extended ends, a clip below the case having openings passing through it, the extended ends of the case passing through the said openings, and a part of the extended ends resting between the case and the said clip.

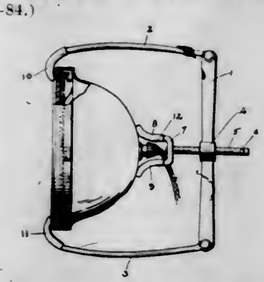
1,504,033. GEARING TRANSMITTING DRIVE TO VEHICLE WHEELS. CHARLES KEARNS EDWARDS, London, England, assignor to The Associated Equipment Company Limited, London, England, a British Company. Filed Apr. 9, 1923. Serial No. 630,733. 1 Claim. (Cl. 74—7.)

In a vehicle, the combination of a hollow fixed axle having at one end a crank arm, a road wheel having a toothed ring so mounted on said arm as to be eccentric with said axle, a driving shaft in said hollow axle, a gear wheel mounted on one end of said driving shaft and meshing with said toothed ring, a sleeve in which said shaft is journaled eccentrically, which sleeve is mounted to rotate in said axle at the cranked end thereof, said axle having a circumferential slot and a plurality of recesses in a line parallel with said slot, a stud carried by said sleeve and extending through said slot, and a detent carried by said stud and arranged to engage said recesses and thereby lock said sleeve against rotation, substantially as described.

1,504,034. ELEVATOR. SAMUEL P. ERWIN, Santa Rosa, Calif. Filed Sept. 19, 1922. Serial No. 589,228. 12 Claims. (Cl. 214—103.)

1. An apparatus for the purpose set forth comprising an upwardly traveling carriage, a carrier arranged thereon and extending lengthwise thereof, a supporting element for the carrier, said element having one end pivoted with the upper end of the carriage and its other end pivoted with the lower end of the carrier.

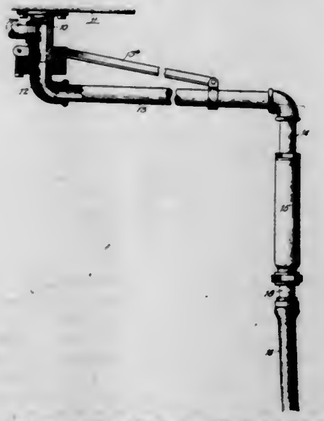
1,504,035. WRENCH. JULIAN H. FAW, New York, N. Y. Filed Jan. 11, 1923. Serial No. 612,058. 4 Claims. (Cl. 81—177.)



1. A wrench comprising a socket member having a continuous axial passage extending therethrough, the lower end portion of said passage constituting the nut-engaging recess, the upper end portion of said passage being concentric with said nut-engaging recess and also of angular cross-sectional contour, and a handle bar of similar angular cross-sectional contour to fit said recess in the upper end of said socket member, whereby said socket member may be spun for quickly turning the nut to or from tightening position by rolling said handle bar between the palms of the hands, said socket member

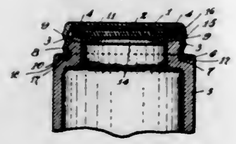
also having a transverse passage extending across the axial passage therein to receive said handle bar for tightening or loosening a nut.

1,504,036. METHOD OF PREPARING OXIDES OF TUNGSTEN AND SIMILAR MATERIALS. BEN B. FOGLER, Cleveland, Ohio, assignor to General Electric Company, a Corporation of New York. Filed Dec. 16, 1920. Serial No. 431,092. 2 Claims. (Cl. 23—13.)



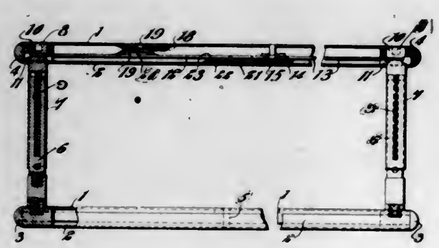
1. The method of preparing finely divided oxide of tungsten and similar material which consists in making a paste of the said material, continuously feeding said paste to a heated surface and continuously removing the dried powder thus formed from said surface.

1,504,037. TOOL FOR REMOVING HEADLIGHT RIMS. CLAUDE V. FURMAN and CARL V. YOUNGS, Rochester, N. Y. Filed Apr. 6, 1923. Serial No. 630,278. 1 Claim. (Cl. 29—84.)



In a tool for removing rims of headlights, the combination of a cross member, a pair of arms pivoted at the outer ends of said cross member, an adjustable clamping screw threaded into the middle of said cross member, a handle formed on one end of said clamping screw, a yoke swiveled on the other end of said clamping screw, said yoke having outwardly flaring sides, resilient cushions mounted on said outwardly flaring sides, said yoke being adapted to straddle the light socket of the headlight and form a base on the back of the headlight adapted to have the adjusting screw to brace itself against it, hooks formed on the ends of said arms, said hooks being adapted to project over the top of the rim of the headlight and down in front of it.

1,504,038. VEHICLE WASHER. RICHARD L. GEASLEN, Chicago, Ill. Filed May 11, 1923. Serial No. 638,190. 4 Claims. (Cl. 299—81.)



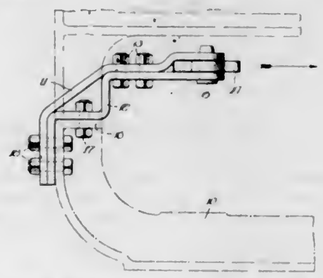
1. In a washer of the class described, a swinging fluid pipe supported above the floor and provided with means for connecting with a source of supply, a flexible hose, a plunger valve, mounted between the source of supply and flexible hose, a plunger in the valve so designed that the fluid is turned on or off with certainty by moving the plunger in the same direction.

1,504,039. JAR CLOSURE. CHARLES GASTGEB, Bridgeville, Pa., assignor of one-half to George J. Picard, Jr., Carnegie, Pa. Filed Oct. 29, 1920. Serial No. 420,548. 2 Claims. (Cl. 215—38.)

1. In a jar closure, a jar having a threaded neck, and a plurality of inwardly standing bosses formed on said neck, an annular resilient washer on the top edge of the jar neck, a jar lid having a number of complementary recesses adapted to engage the said jar neck bosses, superimposed on said washer, an annular non-friction washer on top of said jar lid rim, and a cover having a single downwardly projecting rim engaging the threaded jar neck and compressing the rubber washer between the jar lid rim and the top edge of the jar.

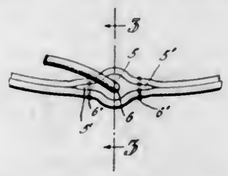
1,504,040. LEDGER BOOK. CORBON L. HARVEY, Detroit, Mich. Filed Aug. 15, 1922. Serial No. 582,011. 2 Claims. (Cl. 129—13.)

1. In a loose leaf binder, a frame including a hollow bar perforated to receive the grooved ends of spaced binder posts, a member pivoted in said bar intermediate the ends thereof, post engaging strips slidable in said bar longitudinally thereof in opposite directions to engage the binder posts and connected at their respective inner ends to said member on opposite sides of its pivot, the top of said bar being formed with a depression and the adjacent face of one of said strips being formed with a boss in frictional contact with said depression, a transverse ridge on the opposite face of said strip, and a spring element fixed to the bottom of said bar and having a transverse ridge, said ridges being adapted to yieldingly resist longitudinal movement of said strip.



1,504,041. ELASTIC HOSIERY SUPPORTER. EDWARD HAUSER, New York, N. Y. Filed Mar. 6, 1922. Serial No. 541,379. 1 Claim. (Cl. 24—252.)

A hose supporter clamp comprising a substantially U-shaped body portion having one arm slotted, a strip of spring metal having one end secured to the opposite arm and being bent to position the opposite end of said strip adjacent the terminals of the body portion, a lever pivotally secured to the slotted arm, a curved off set portion formed on the lever and extending through the slot to engage

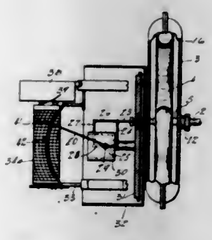


the strip for the actuation thereof, and a covering provided for a portion of the strip as and for the purpose specified.

1,504,042. BRAKE MECHANISM. WILLIAM C. HEDGCOCK, Chicago, Ill., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed Feb. 12, 1920. Serial No. 358,201. 4 Claims. (Cl. 188—209.)

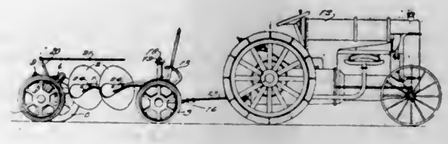
3. In brake mechanism, the combination of a truck frame, a lever bracket including tension and compression members secured to said truck frame, said tension and compression members being directly secured to each other at spaced points, intermediate portions of said tension and compression members being spaced from each other and cooperating to form a truss to resist operative forces transmitted thereto.

1,504,043. SHOE-LACE HOLDER FOR SHOES. FRANK V. HIDOCK, Plains Parsons, Pa. Filed Jan. 2, 1924. Serial No. 684,049. 1 Claim. (Cl. 24—121.)



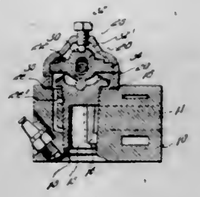
A fastening device including a tubular body portion formed of flexible material, said tubular body portion having laterally disposed longitudinal ribs, said body portion adapted to be positioned between the body portion of the shoe and the lining thereof, and said ribs providing means to receive threads to secure the body portion, and said tubular body portion adapted to receive a shoe lace tip.

1,504,044. PRODUCTION OF O-NITRO-O-AMINOPHENOL-P-SULPHONIC ACID AND ITS DERIVATIVES. HOMER W. HILLYER, Farmington, Conn., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 12, 1920. Serial No. 365,345. 5 Claims. (Cl. 260—129.)



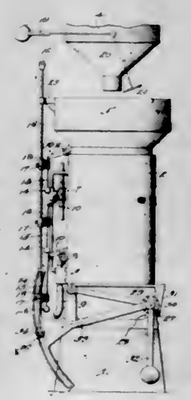
1. The method of producing ortho-nitro-ortho-amidophenol-para-sulphonic acid, which comprises dissolving about 100 parts of substantially pure ortho-amidophenol-para-sulphonic acid in about 300 parts of concentrated sulfuric acid, and subjecting the same to nitration with approximately the theoretical amount of mixed acid required for the nitration, the temperature being maintained at about 0° C., or below, during the nitration.

1,504,045. PRESSURE-MEASURING INSTRUMENT. OLIVE D. HORTON, Erie, Pa., assignor to Equitable Meter Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Feb. 10, 1922. Serial No. 535,509. 3 Claims. (Cl. 234—20.)



3. In a pressure measuring instrument, the combination of a pressure case; a scrollshaped U-tube swingingly mounted in the case having one end open to the case; a shaft on which the U-tube is mounted, said shaft having a passage communicating with the U-tube; a pressure connection leading to the passage in the shaft; a recording device; and a connection between the shaft and the recording device recording the movements of the U-tube.

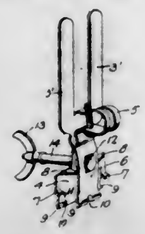
1,504,046. DISK PLOW. OTIS W. HOWARD, Moline, Ill., assignor to Moline Plow Company, Incorporated, Moline, Ill., a Corporation of Virginia. Filed Sept. 16, 1922. Serial No. 588,701. 2 Claims. (Cl. 97—72.)



1. A frameless disk plow having a diagonally located beam, a front furrow wheel connected directly to the front end of the beam, crank axles carrying respectively a rear furrow wheel and a rear land wheel for supporting the rear end of the beam, power-lift mechanism for swinging the crank axles to raise and lower the beam, and plowing disks mounted directly on the beam with their axes substantially coincident with the axis of the beam.

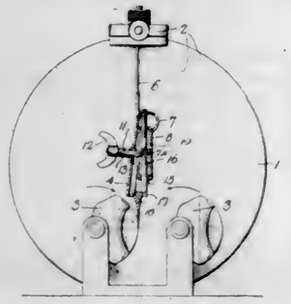
1,504,047. VALVE. LAWRENCE E. JOHNSTON, St. Louis, Mo. Filed Dec. 8, 1922. Serial No. 605,686. 2 Claims (Cl. 123—190.)

1. In an internal combustion engine, a head having inlet and exhaust ports, and a communicating bore arranged at a right angle thereto, a hollow valve arranged in said bore and having an opening adapted to alternately communicate with said ports, an annular flange on the upper end of said bore and reposing upon said head, said flange being formed with a central depression, a housing including spaced dome shaped portions arranged above said valve, a shaft journalled in the housing, means for rotating said valve incident to the rotation of said shaft, an adjustable yoke arranged within each portion of the housing and receiving said shaft, each yoke including a spherical portion seated in the recess of said valve, and means for adjusting said yoke whereby the latter holds the valve effectively seated.



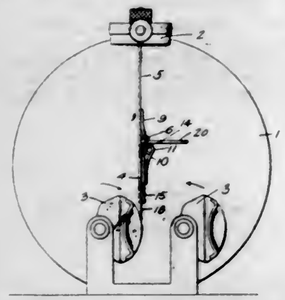
1,504,048. SAND-BLAST MACHINE. WESLEY JORGENSEN, Hagerstown, Md. Filed July 14, 1923. Serial No. 651,682. 5 Claims. (Cl. 51—12.)

1. A sand blast apparatus comprising a tank, having a sand supply valve and an air blast valve a movable part actuated by the weight of the sand in the tank and means actuated by said part for closing the sand supply valve and opening the air blast valve when the weight of the sand reaches a certain degree and for opening the supply valve and closing the air blast when the tank is almost empty.



1,504,049. UNIVERSAL BLADE HOLDER FOR SHARPENING DEVICES. FREDERICK J. KALTEYER, Philadelphia, Pa., assignor to Electostrop Manufacturing Company, a Corporation of Pennsylvania. Filed June 24, 1920. Serial No. 391,481. 5 Claims. (Cl. 51—218.)

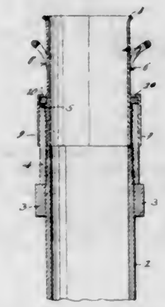
1. A blade-holder for sharpening devices, said holder comprising oppositely disposed gripping jaws formed at their lower edges with inwardly projecting studs to form gripping contact points against opposite sides of a blade,



a stud on one jaw being disposed to project intermediate of studs on the opposite jaw.

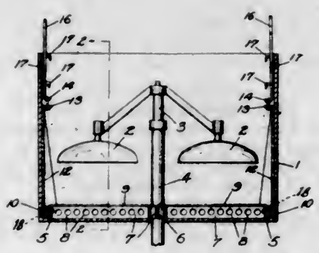
1,504,050. HOLDER FOR RAZOR BLADES FOR SHARPENING DEVICES. FREDERICK J. KALTEYER, Philadelphia, Pa., assignor to Electostrop Manufacturing Company, a Corporation of Pennsylvania. Filed June 24, 1920. Serial No. 391,482. 5 Claims. (Cl. 51—218.)

1. A blade holder for sharpening devices comprising oppositely disposed jaws, one of the jaws having bearing contacts for one side of a blade, and a stem associated with one jaw to constitute a bearing contact for the other side of the blade and adjustable lengthwise of the jaw for adjustment of a blade.



1,504,051. BLADE HOLDER FOR SAFETY-RAZOR BLADES. FREDERICK J. KALTEYER, Philadelphia, Pa., assignor to Electostrop Manufacturing Company, a Corporation of Pennsylvania. Filed June 24, 1920. Serial No. 391,483. 5 Claims. (Cl. 51—218.)

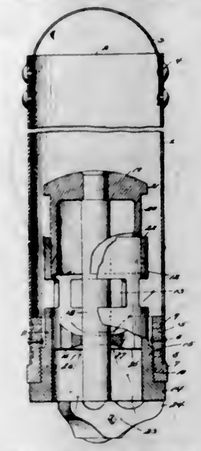
1. A blade holder for sharpening devices comprising oppositely disposed jaws, one jaw having a tongue formed with an opening having elongated extensions and with



projected fulcrum bearings, and the other jaw formed with openings to receive said bearings for fulcruming one jaw on the other, and a spring connecting the two jaws, one part of said spring bearing against one jaw and having prongs bearing in the elongated slot extensions of the tongue of the companion jaw.

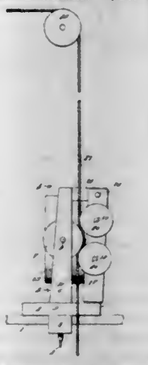
1,504,052. NIPPLE FOR WELL DRILLING. WILSON KAY, Breckenridge, Tex. Filed Aug. 11, 1923. Serial No. 656,894. 3 Claims. (Cl. 137—91.)

1. A device for the purpose indicated comprising a thimble and an associated exterior concentric collar spaced from the thimble, and means for effecting clamping engagement of the thimble and its collar exteriorly and interiorly of a pipe coupling or collar.



1,504,053. WASHING MACHINE. JOHN JEFFERSON KENYON, Detroit, Mich. Filed Dec. 8, 1922. Serial No. 605,657. 2 Claims. (Cl. 68—30.)

1. In a washing machine, the combination with a tub, of a false bottom comprising an inner peripheral rim, a central hollow boss and radial arms extending from the hollow boss to the inner rim, an open work top for the false bottom having the outer edge turned down over the inner rim, and an outer rim applied over the inner rim and secured thereto for holding the edge of the open work top in position.

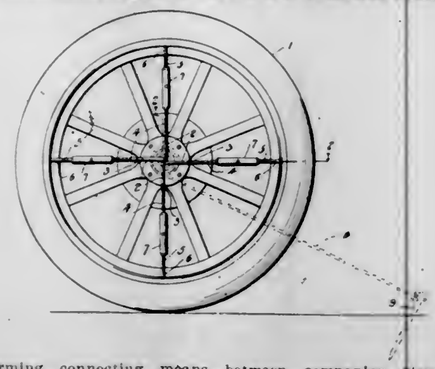


1,504,054. OIL BAILER. FRED M. KIDDER, Warren, Pa. Filed Mar. 16, 1922. Serial No. 544,221. 6 Claims. (Cl. 294—72.)

1. A gravity-operated bailer comprising a hollow body, a valve cage detachably secured in the lower end of said hollow body, having a port communicating with space outside said body and a valve mounted in said valve cage

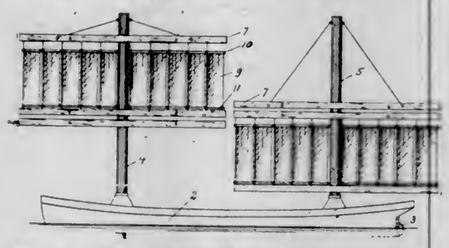
for controlling said port and having an actuating stem projecting beyond the lower end of said body.

1,504,055. MEASURING REGISTER. BENJAMIN FRANCIS KIFF, Hurricane, W. Va. Filed Feb. 15, 1922. Serial No. 536,780. 1 Claim. (Cl. 33—138.)



A well measuring device of the character described comprising a base designed to be clamped to the drilling stool of the well sinking apparatus, a centrally slotted upright rising from the base adjacent one side thereof, a peripherally grooved wheel received in the slot of the upright for rotation, an angle extension secured to the upper end of the upright, an arm pivotally secured to the opposite end of the extension and depending therefrom, a coil spring having its end convolutions secured to the upright and arm respectively whereby the arm will be influenced on its pivot toward the upright, a pair of peripherally grooved wheels carried by the arm and being disposed for operative association with the first mentioned wheel, a bracket rising from the opposite side of the base, a number registering device supported by the bracket, a shaft fixed to the first mentioned wheel and to the registering device respectively and the said line of the sinking apparatus being trained over all the wheels as and for the purpose specified.

1,504,056. MOTOR-VEHICLE DRAFT APPLIANCE. ROLLIN G. KILKENNY, Clearmont, Wyo. Filed May 31, 1923. Serial No. 645,588. 1 Claim. (Cl. 242—95.)

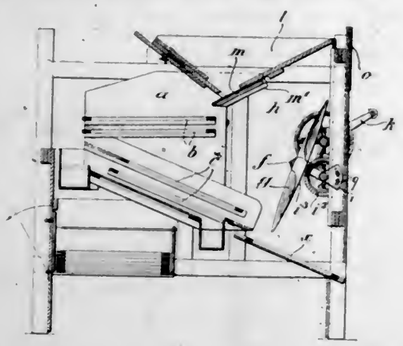


A motor vehicle draft appliance comprising U-shaped members adapted to form a drum and provided with shanks to engage the hub of a wheel between adjacent spokes, stems projecting outwardly from said shanks,

complemental stems having forks at their outer ends to embrace opposite sides of the rim of a wheel, and a sleeve

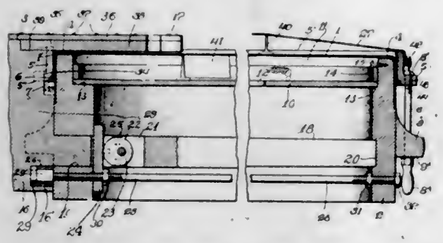
forming connecting means between companion stems and having a right thread engagement with one and a left thread engagement with the other.

1,504,057. SAILING VESSEL. CARL W. A. KOELKEBECK, Pittsburgh, Pa. Filed Aug. 1, 1922. Serial No. 578,944. 14 Claims. (Cl. 114—103.)



2. In a sailing vessel, a hull, a mast secured thereto for rotation about its longitudinal axis, yards carried by said mast, luff lines connecting said yards, and sails each having its luff edge secured to one of said luff lines.

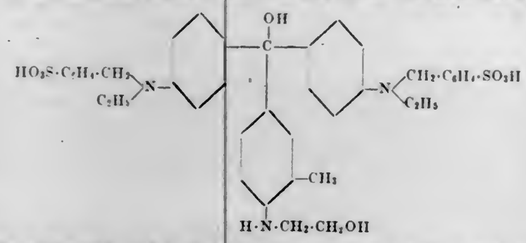
3. In a sailing vessel, a hull, a mast carried thereby, yards operatively secured to said mast, and a fore-and-aft sail operatively secured between said yards.



8. In a sailing vessel, a hull, a mast, a pole mast carried thereby, three yards operatively carried by said pole mast in superimposed relationship, and means for causing the upper and lower yard to move in unison.

1,504,058. CLEANING AND SORTING MACHINE FOR GRAIN AND THE LIKE. JULIUS KOLIN, Vienna, Austria. Filed Jan. 27, 1921. Serial No. 440,455. 4 Claims. (Cl. 130—15.)

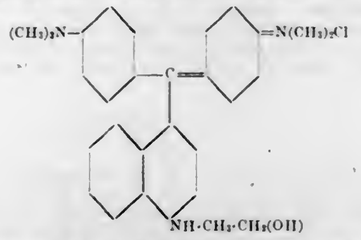
1. A cleaning and sorting machine, comprising shaking sieve shoes, a stationary fan compartment adjacent said shaking sieve shoes open toward the latter and also open in the opposite direction and closed in all other directions, and a fan in said compartment having its axis adjustable relatively to said shaking sieve shoes.



1,504,059. BANJO. VICTOR KRASKE, Kalamazoo, Mich. Filed Oct. 8, 1921. Serial No. 506,394. 5 Claims. (Cl. 84—269.)

1. In an instrument of the character described, a drumhead and rim, in combination with a resonator board disposed in said rim adjacent to but spaced somewhat from its front edge, said rim having an annular shoulder against which said board is seated at its edge, a resilient expansion ring disposed against the outer face of said board opposite said shoulder to lock said board in place demountably and means to secure said ring in place.

1,504,060. TRIPHENYLMETHANE DYES. LUCAS P. KYRIDES, Buffalo, N. Y., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 10, 1922. Serial No. 542,748. 4 Claims. (Cl. 260—67.)



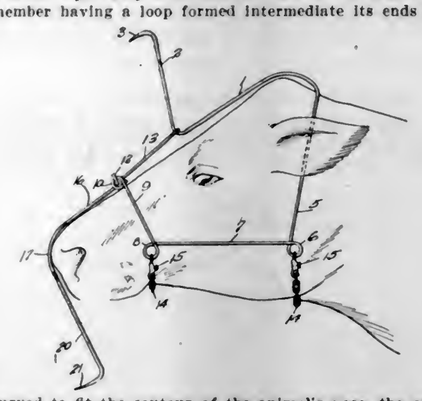
2. As a new product, the herein described new dyestuff having in the free state the following probable formula:

said dye, in the form of its sodium salt and in the dry and powdered state, being a bronze colored powder with a violet tinge, easily soluble in water to give a reddish violet colored solution which is not changed by dilute alkalis but changes to a blue color by the addition of dilute hydrochloric acid, less soluble in alcohol, soluble in concentrated sulfuric acid with an orange-yellow color which upon the addition of water changes to a green color and, finally, to a blue color, the dye remaining in solution; and dyeing wool and other animal fibres, or mixtures of the same, reddish violet shades.

1,504,061. DIPHENYLNAPHTHYLMETHANE DYES. LUCAS P. KYRIDES, Buffalo, N. Y., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Oct. 21, 1922. Serial No. 596,150. 5 Claims. (Cl. 260—67.)

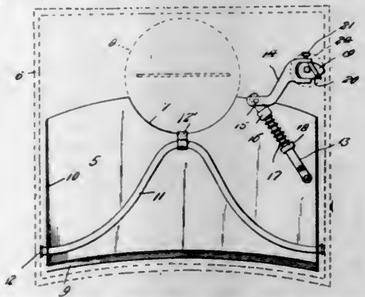
3. As a new product, the herein described new dyestuff having the following probable formula:

said dye, in the dry and powdered state, being of a greenish color with a bronze-like lustre, sparingly soluble in water to give a blue solution which upon the addition of caustic soda gives a brownish colored precipitate, soluble in alcohol and in acetic acid to give blue solutions, soluble in concentrated sulfuric acid (66° Bé.) to give a reddish-brown solution which upon gradual dilution with water changes first to a yellow, then to a green, and finally to a blue color; and dyeing silk, wool, and cotton mordanted with tannic acid and tartar emetic, blue shades.



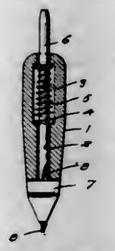
1,504,062. HUMIDIFIER. ALLSTON C. LADD, El Paso, Tex. Filed Mar. 30, 1923. Serial No. 628,876. 3 Claims. (Cl. 131—30.)

1. As a new article of manufacture, a humidifier for containers having a lid provided with a flange engageable over the container body, said humidifier constructed from a sheet of material bent upon itself to provide an embracing portion for an absorbent material and formed with a lid flange engaging portion, and perforations formed in the absorbent material embracing portion.



1,504,063. COW POKE. WILLIAM H. LENHART, Lockridge, Okla. Filed June 13, 1923. Serial No. 645,019. 1 Claim. (Cl. 119—142.)

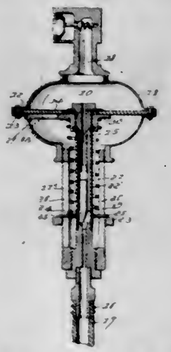
A device of the class described comprising a head engaging member formed with a longitudinally extending head engaging portion, an upward extension from said longitudinal portion at the forward end thereof terminating in a forwardly extending pointed end, the rear end of said longitudinally extending portion being formed with laterally and oppositely extended divided portions curved downwardly and terminating in loops at the lower end, forwardly extending cheek portions being formed with the loops at the lower end of the last named portion, and upwardly extending portions at the forward ends of said cheek portion having a loop connection therewith at one end and formed in terminal loops at the opposite ends, a hinged member extending transversely of the head engaging member, and formed with eyes to receive said terminal loops, a link connecting said hinged member with the forward end of said longitudinally extending portion, a pair of flexible members adapted for removable connection with the respective loops at the opposite ends of the cheek engaging portions for removably connecting the head engaging member on the head of an animal, and a member pivotally connected at one end with said hinge member having a loop formed intermediate its ends and



curved to fit the contour of the animal's nose, the other end of said member being formed in a downwardly extending portion terminating in a forwardly extending pointed end.

1,504,064. STOVE-DOOR ATTACHMENT. DOLLY ELSIE LEVERETT, Kalamazoo, Mich. Filed Aug. 7, 1923. Serial No. 656,184. 5 Claims. (Cl. 126—190.)

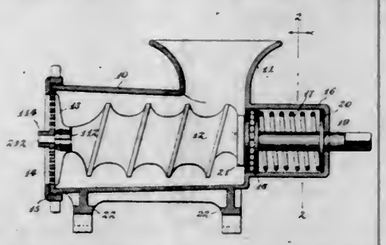
1. A stove door attachment of the class described comprising a guard plate adapted to be positioned on the lower part of a stove door behind the latter, means carried by said guard plate and engageable with the inner surfaces of the sides of the stove door for mounting said guard plate for a vertical swinging movement and means operatively connected to the guard plate and adapted for connection with the usual door latch for causing swinging movement of the guard plate inwardly upon releasing of said latch.



1,504,065. FISHING-LINE FLOAT. ALFRED P. LOWER, Bradford, Ohio. Filed May 29, 1923. Serial No. 642,248. 2 Claims. (Cl. 43—49.)

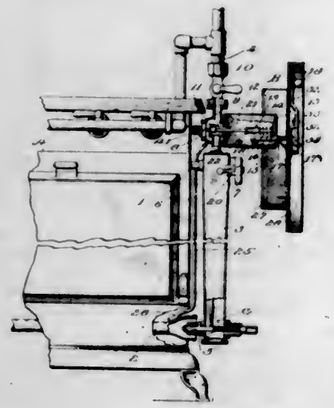
2. A fishing line float comprising an elongated body having an axial opening which is enlarged at one end, a stem movable freely in the axial opening and having

an enlargement at one end and a line receiving slot adjacent the enlargement, and a helical spring disposed within the enlarged portion of said axial opening and mounted upon the stem and engaging the latter at its outer end and engaging the shoulder at the inner end of the enlarged portion of said axial opening.



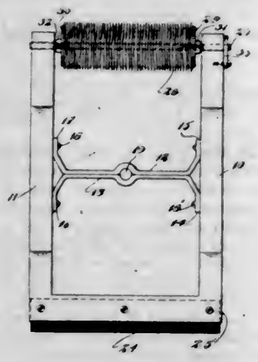
1,504,066. AUTOMATIC AIR-PRESSURE GAUGE. WILLIAM LUTES, San Antonio, Tex. Filed Aug. 25, 1922. Serial No. 584,369. 2 Claims. (Cl. 50—23.)

1. A pressure gauge for tire inflating apparatus having a casing provided with a pressure chamber, a pressure tube in communication with the pressure chamber and having a valve chuck for engagement with the valve of a tire to be inflated, a diaphragm forming one wall of and exposed to pressure within the pressure chamber, a cut-off valve carried by and actuable by said diaphragm, the casing having an air inlet and a valve seat for engagement with said cut-off valve, and a flexible tubular connection housed within the casing and enclosing said cut-off valve and constituting a means of communication between said valve seat and the pressure chamber when the cut-off valve is open.



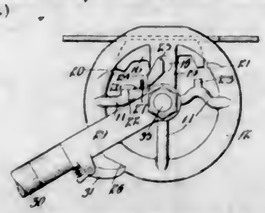
2. A pressure gauge for tire inflation apparatus having a casing provided with a pressure chamber, a pressure supply tube having a valve chuck for engagement with the valve of the tire to be inflated, a diaphragm forming one wall of and exposed to pressure within the pressure chamber, a cut-off valve actuable by the diaphragm, the casing having a supply tube provided with a seat with which the cut-off valve is engageable, and a pointer rigidly mounted with respect to the diaphragm and protruding through a slot in the casing for traversing an indicator exposed thereon.

1,504,067. MEAT-CHOPPING MACHINE. JOHN FRIEDERIK MATTHIES, New York, N. Y. Filed May 27, 1924. Serial No. 716,201. 5 Claims. (Cl. 146—189.)



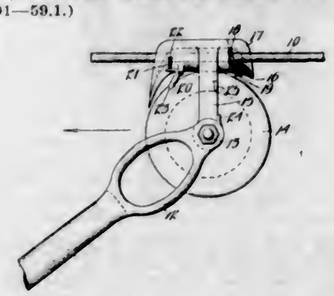
2. In a meat chopping machine, a casing having a feed opening and having a housing extension in the rear of the said opening, a feed screw in said casing, the shaft of the feed screw extending through said housing, a spring coiled about said shaft and exerting forward pressure on the feed screw, a knife turning with the feed screw at the front end, and a perforated disk adjacent to which said knife turns.

1,504,068. AUTOMATIC FUEL CONTROLLER FOR BURNERS. BENJAMIN EDWIN MEACHAM, Lorain, Ohio, assignor to American Stove Company, St. Louis, Mo., a Corporation of New Jersey. Filed Jan. 31, 1921. Serial No. 441,237. 18 Claims. (Cl. 236—46.)



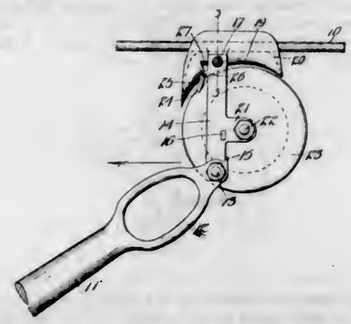
1. In a device of the character described, comprising an oven, a burner therefor, a thermostatically controlled valve for said burner, a normally closed fuel valve controlling the flow of fuel to said thermostatic valve, a member holding the said fuel valve normally closed, and a clock mechanism adapted to open the said valve at a predetermined time, for the purpose described.

1,504,069. WINDOW-CLEANING DEVICE. FRANK MILLER, West Hoboken, N. J. Filed Mar. 28, 1923. Serial No. 628,240. 1 Claim. (Cl. 15—117.)



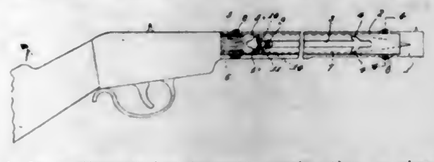
In a window cleaning device, a frame comprising side bars connected at one end by a cross bar and free of connection at the opposite end, the cross bar being formed with a longitudinal slot for the reception of a wiping element, a wiper held therein and a brace strip connecting the side bars intermediate their ends and centrally formed for the reception of a handle.

1,504,070. TROLLEY WHEEL. OTTO MOORE, Indianapolis, Ind., assignor to Trolley Shoe-Wheel Company, Indianapolis, Ind., a Corporation of Indiana. Filed Apr. 27, 1923. Serial No. 635,067. 15 Claims. (Cl. 191—59.1.)



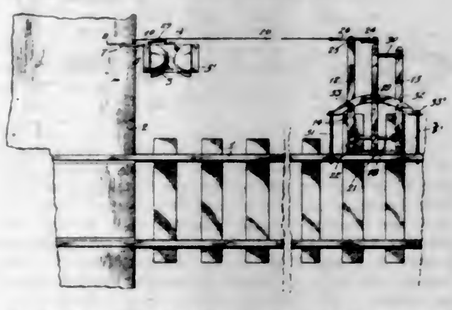
1. A trolley wheel having a pivoted shoe forming a part of the rim of said wheel said shoe being arranged for sliding engagement with the trolley wire, substantially as set forth.

1,504,071. TROLLEY WHEEL. GILES S. MOORE, Indianapolis, Ind., assignor to Trolley Shoe-Wheel Company, Indianapolis, Ind., a Corporation of Indiana. Filed May 31, 1923. Serial No. 642,571. 7 Claims. (Cl. 191—59.1.)



1. In a trolley, a harp, a bolt connecting the forks of the harp, a trolley wheel rotatable on the bolt, a bracket pivoted on the bolt and straddling said wheel, a shoe at the free end of the bracket, and means whereby the shoe is slidingly engaged with the wire on forward movement of the trolley, and the wheel is similarly engaged on backward movement of the trolley, substantially as set forth.

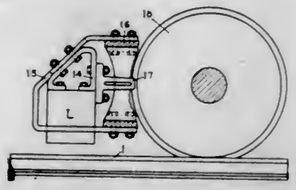
1,504,072. TROLLEY WHEEL. GILES S. MOORE, Indianapolis, Ind., assignor to Trolley Shoe-Wheel Company, Indianapolis, Ind., a Corporation of Indiana. Filed May 31, 1923. Serial No. 642,572. 6 Claims. (Cl. 191—59.1.)



1. In a trolley, a harp, a bracket pivoted thereon and movable into horizontal and vertical positions, a sliding shoe on the bracket engaging the trolley wire in one of said positions, a wheel on the bracket engaging the wire in the other position, and a pawl on the bracket adapted to engage a tooth on the wheel to raise the shoe and the bracket on forward movement of the trolley, substantially as set forth.

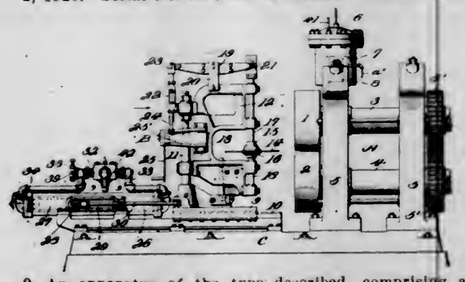
1,504,073. DISAPPEARING BAYONET. SIMMIE L. MOORE, St. Louis, Mo., assignor of one-half to Edward Montgomery, St. Louis, Mo. Filed Mar. 26, 1924. Serial No. 702,087. 2 Claims. (Cl. 42—86.)

1. In a disappearing bayonet construction, a sheath adapted to be fixed alongside a rifle barrel and closed at its rear end and having an exposed longitudinal slot extending throughout a considerable portion of its length, said slot provided near its rear end with lateral arms and near its forward end with lateral rearwardly divergent arms, a bayonet movable rectilinearly in said sheath and adapted in one position to be fully housed therein and in another position to project beyond the sheath, a coiled spring housed in the sheath and interposed between the heel ends of the sheath and bayonet, and a sectional spring actuated lever carried on the bayonet and adapted to cooperate with the said lateral arms of the slot.



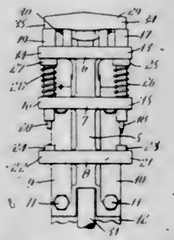
1,504,074. RAILWAY-CROSSING SIGNAL. ROBERT L. MUNDELL, Oskaloosa, Iowa. Filed May 10, 1924. Serial No. 712,400. 1 Claim. (Cl. 246—294.)

A railway crossing signal comprising a supporting frame arranged at a point adjacent from the point of intersection of the railway tracks with the roadway, opposed bells immovably supported upon said frame, a figure immovably supported laterally of said frame, a visual signal arm pivotally mounted on said figure, a bell striking hammer pivotally mounted upon the frame and adapted to alternately engage said opposed bells, means for connecting the bell striking hammer to one end of said visual signal arm, supporting arms secured to certain of the sleepers of the railway tracks, bearings on said supporting arms, a trip arm pivotally mounted between said bearings having one end thereof disposed in proximity to the tread portion of one of the railway tracks and formed with a right angularly disposed trip finger normally extended above the tread portion of said railway tracks, the opposite portion of said trip arm being curved upwardly and formed with a lateral extension, an upright supported upon one of said arms, a bell crank lever mounted upon the upright having one end thereof connected to the lateral extension of said trip arm, a motion transmitting rod connected to the remaining end of said bell crank lever and to one end of the pivotally mounted bell striking hammer, a curved bracing bar arranged transversely



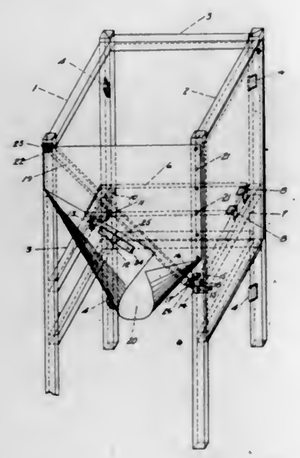
of said supporting arms and secured to adjacent portion of the same, and rods having hooked ends engaged in the opposite extremities of said curved bracing bar and connected to the basal portions of said adjacent railway track.

1,504,075. AUTOMATIC TRAIN-CONTROL SYSTEM. JOSEPH N. PAUL, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y., a Corporation of New York. Filed Nov. 20, 1919, Serial No. 339,399. Renewed Jan. 2, 1923. 20 Claims. (Cl. 246—63.)



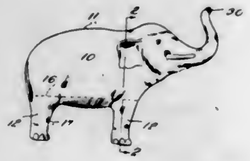
1. In an automatic train control system, the combination with a vehicle, of an adjustable impulse device thereon, and means for determining the position of said device with respect to the track rails.

1,504,076. MANUFACTURE OF TAPERING METAL DISKS. ISAAC H. PRICE, Warren, Ohio. Filed Feb. 2, 1920. Serial No. 355,788. 9 Claims. (Cl. 80—16.)



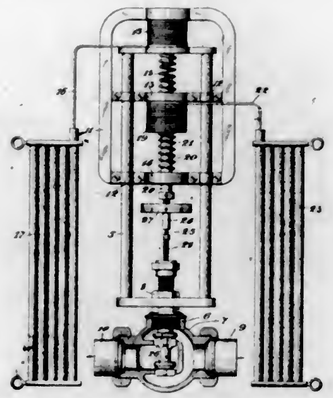
9. An apparatus of the type described, comprising a pair or rollers, a revolvable disk support mounted on a slidable base, two cylinders arranged in tandem and having their adjacent ends connected with the base, means for supplying pressure to the opposite ends of the said cylinders, said means including a valve for controlling the passage of pressure out of the inner cylinder for controlling the speed at which the base is moved toward the rollers.

1,504,077. PUNCHING AND RIVETING MACHINE. WILLIAM EDWARD REES, Gananoque, Ontario, Canada, assignor to Judson L. Thomson Manufacturing Co., Waltham, Mass., a Corporation of Massachusetts. Filed Nov. 22, 1923. Serial No. 676,309. 4 Claims. (Cl. 218—1.)



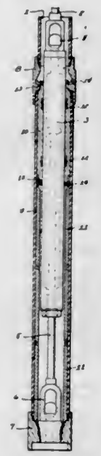
1. A punching and riveting machine having, in combination, a frame, a horizontal work support terminating at its front end in a pair of arms, a die on one of said arms, an anvil on the other, a vertical reciprocatory punch plunger in alignment with said die, a vertical reciprocatory rivet plunger in alignment with said anvil, and a lever pivoted to said frame and adapted to simultaneously engage the upper ends of said punch and rivet plungers, whereby a downward movement may be imparted thereto.

1,504,078. FOLDING VOTING BOOTH. JOHN J. REINHOLD, Marietta, Pa. Filed Sept. 10, 1921. Serial No. 499,710. 1 Claim. (Cl. 20—3.)



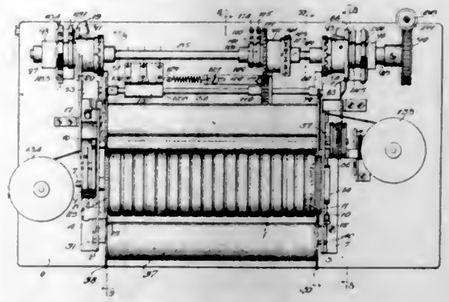
In a folding booth comprising a back section, two side sections hinged to said back section, a curtain, one vertical edge thereof being fixed to one of said side sections, a curtain supporting member positioned diagonally across the front of the booth, the upper end thereof contacting with the front edge of the side section opposite to the side section to which said curtain is fixed, a hinge fixed to the side section to which said curtain is fixed and the lower end of said curtain supporting member, said hinge being adapted to permit swinging movement of said curtain supporting member in a horizontal plane and a vertical plane, a stop carried by the side section to which said curtain is fixed and adapted to limit upward movement of said curtain supporting member, and means for fixing the free end of said curtain to the upper end of said curtain supporting member.

1,504,079. INFLATABLE SHEET-RUBBER TOY. FRED THOMAS ROBERTS, Yonkers, N. Y., assignor to Paramount Rubber Consolidated, Inc., Tuckahoe, N. Y., a Corporation of Delaware. Filed May 17, 1924. Serial No. 713,892. 6 Claims. (Cl. 46—40.)



1. An inflatable rubber toy comprising sheets of rubber joined to each other in one region, and a doubled sheet of rubber between the other sheets having each leaf of materially less area than the adjacent sheet and having its folds joined respectively to them in another region of the toy.

1,504,080. AUTOMATIC CONTROLLER. ALFRED ROESCH, Brooklyn, N. Y., assignor to Charles J. Tagliabue Manufacturing Co., Brooklyn, N. Y., a Corporation of New York. Filed Feb. 26, 1921. Serial No. 448,284. 3 Claims. (Cl. 236—44.)

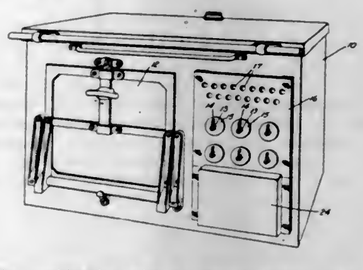


1. An automatic controller comprising a stationary support, operating means including a member movably mounted upon said support, a thermo-sensitive member carried by said stationary support for actuating said movable member in one direction, and a second thermo-sensitive member mounted upon said movable-member, said second thermo-sensitive member being movable bodily with said movable member, relatively to said first thermo-sensitive member which is mounted upon said stationary support, said second thermo-sensitive member having an operative movement opposite to that of the first thermo-sensitive member and actuating said operating means in said opposite direction.

1,504,081. OIL-WELL PUMP. CHARLES C. SCHARPENBERG, Bakersfield, and LEROY G. GATES, Whittier, Calif. Filed Nov. 2, 1923. Serial No. 672,407. 8 Claims. (Cl. 103—179.)

1. An oil well pump comprising a shell; a working barrel secured within said shell and extending for a portion of the length thereof, said shell having an annular interior groove of curved cross sectional contour adjacent each end of said barrel; and a plunger fitting closely within and operating through said barrel, said plunger having a length greater than that of said barrel.

1,504,082. METER. RUDOLPH F. SCHUCHARDT, Chicago, Ill., assignor to General Electric Company, a Corporation of New York. Filed May 20, 1921. Serial No. 471,201. 39 Claims. (Cl. 234—5.5.)

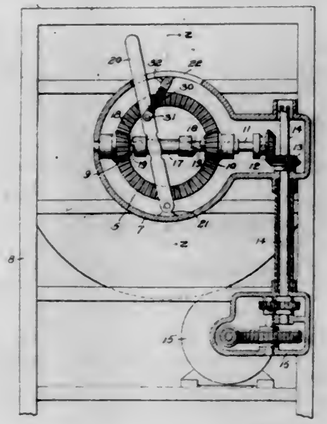


1. In combination, a meter for measuring unitary values of a variable, a constantly driven shaft, a type wheel adapted to be advanced progressively in steps corresponding to the registration of units on such meter, advancing means for said type wheel, and means controlled by said meter for clutching said shaft to said advancing means.

7. In combination, a meter for measuring unitary values of a variable, a printing wheel, an electrical circuit controlled by said meter for advancing said printing wheel in steps corresponding to the unitary values registered by the meter, time controlled means for periodically opening said circuit independently of the advancing of said printing wheel, and for printing an indication on said printing wheel.

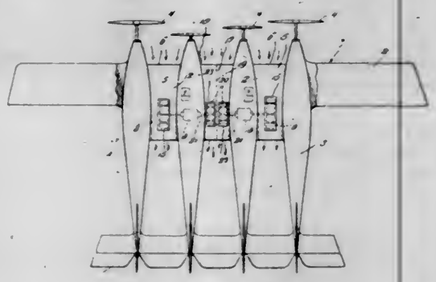
17. In combination, a rotatable drum having printing characters, a shaft journaled parallel to said drum, means co-operating with the parallel shaft for printing a record from said drum, a power shaft parallel to said first shaft, and time controlled means governing the connection of said parallel to said power shaft for operating said printing means.

1,504,083. ELECTRIC HEATER. JACOB L. SHROYER, Chicago, Ill., assignor to Edison Electric Appliance Company, Inc., a Corporation of New York. Filed June 14, 1922. Serial No. 568,233. 4 Claims. (Cl. 219—35.)



1. The combination with an electric heater, of a chamber exposed to the heat thereof, and circuit control means for said heater mounted in said chamber, said chamber being provided with apertures to permit the circulation of cooling air therethrough.

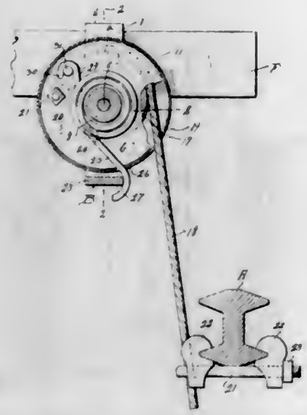
1,504,084. REVERSING MECHANISM FOR WASHING-MACHINE DRIVES. JOHN R. SPENCER, Erie, Pa. Filed June 26, 1920. Serial No. 391,882. 10 Claims. (Cl. 74—50.)



1. In combination with the rotatable element of a washing machine, a driving shaft, means between said shaft and said element for imparting rotation to the

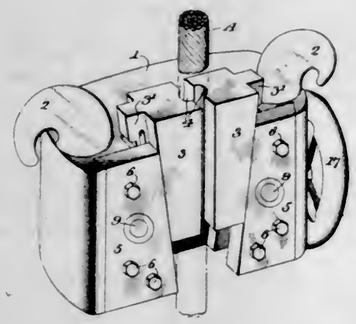
element first in one and then in the other direction, a stationary member, a rotatable member revoluble with

said element and continually meshing with said stationary member, and a device actuated by said rotatable member for controlling the operation of said means.



1,504,085. POWER-GENERATING ATTACHMENT FOR AIRPLANES. GAVIN ROY BIBRELL, Salt Lake City, Utah. Filed Feb. 29, 1924. Serial No. 695,956. 2 Claims. (Cl. 244—1.)

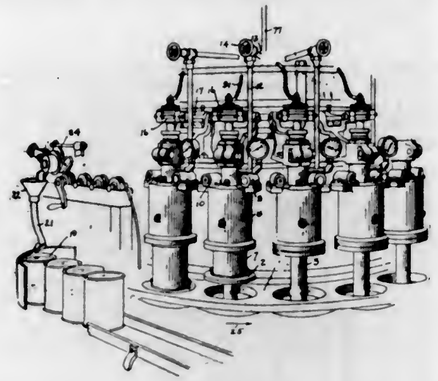
1. A power generating attachment for aeroplanes whereby the aeroplane comprises a plurality of spaced bodies including air conducting members mounted between the bodies, electric generators mounted in the bodies and having shaft extensions projecting and having bearing in said air conducting members, and rotatable elements mounted in said air conducting members adapted to be operated by the air passing therethrough, said air conducting members having means for concentrating the air received therein against the rotatable element for operating the same.



1,504,086. SNUBBER. GLEN C. BRADFORD, Tulsa, Okla. Filed May 8, 1922. Serial No. 559,380. 5 Claims. (Cl. 267—10.)

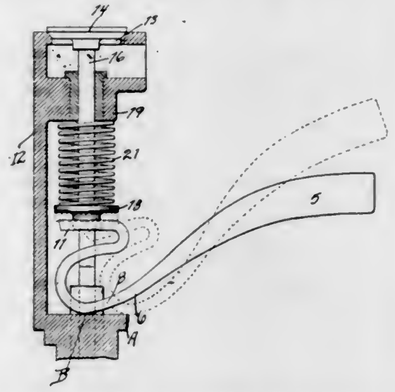
1. In combination with two members of a vehicle, one of said members constituting the frame of a vehicle and the other an axle, a snubber comprising a circular disk rotatably supported by one of the members and provided on one side inwardly of its peripheral edge with a spiral cam having a groove in its peripheral surface, the high point of the cam being normally above the axis of the disk and the lower point being normally below said axis, a spring at the other side of the disk placed under tension by rotation of the disk in one direction to rotate the disk in the opposite direction, and a flexible member

secured to the disk and to the second member, said flexible member engaging in the groove in the peripheral surface of the cam.



1,504,087. WIRE-LINE CLAMP. JUDSON ROY BRADY, Arkansas City, Kans. Filed Jan. 5, 1924. Serial No. 684,521. 8 Claims. (Cl. 24—136.)

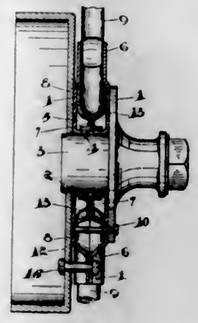
1. A wire clamp comprising a body, slidably mounted clamping jaws carried thereby, a rack on each of said jaws, shafts carrying pinions meshing with said racks, worm gears on said shafts, and an operating shaft having worms meshing with said worm gears.



1,504,088. PROCESS FOR SEALING CONTAINERS IN VACUUM. MANFRED BRANSTEN, San Francisco, Calif.; H. V. Brandenstein administrator of the said Manfred Bransten, deceased. Filed May 31, 1923. Serial No. 642,466. 2 Claims. (Cl. 113—82.)

1. The process of sealing in vacuum double seamed cans having a puncture in one end, which consists of the following series of automatic steps first placing a portion of solder adjacent said puncture, then and while traveling in a cylindrical path, removing the can to a platform, then advancing the can within a chamber and closing the chamber with the platform, then exhausting the chamber and therefore the can, then heating the

solder and causing it to flow to close the puncture, then allowing the solder to cool and then admitting air to the chamber.

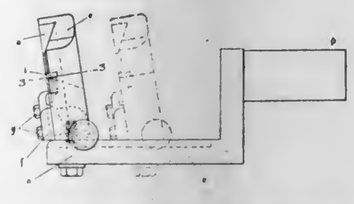


1,504,089. VALVE-LIFTING TOOL. LEWIS HASTINGS BRISBIN, Berkeley, Calif., assignor of one-third to Anthony Jorski, Livermore, Calif., and one-third to T. Fred M. Cade, Oakland, Calif. Filed Feb. 28, 1923. Serial No. 621,926. 1 Claim. (Cl. 29—86.3.)

In a valve spring lifter, a handle, a flattened portion integral with said handle, said flattened portion being twice reversely bent upon itself so that the ends of said flattened portion lie in a plane parallel to the point of juncture of said flattened portion and said handle, said flattened portion being bifurcated, substantially as and for the purpose specified.

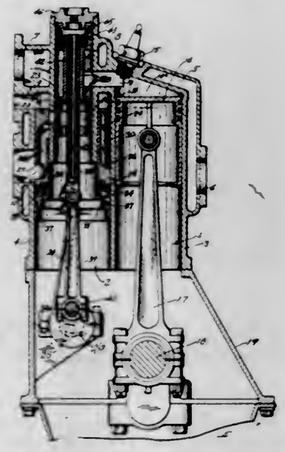
1,504,090. HUB AND SPOKE CONNECTION. ARTHUR M. BRODIE, Toronto, Ontario, Canada, assignor to The Kemp Metal Auto Wheel Co., Limited, Toronto, Canada. Filed Mar. 16, 1922. Serial No. 544,195. 3 Claims. (Cl. 301—84.)

3. In a vehicle wheel, the combination of a pair of hub sections; spoke supporting means provided with sockets located between and positioned by the hub sections, the portions of the hub sections adjacent their peripheries also being shaped to form between them continuations of said sockets, said continuations having their greatest width substantially in the plane of the



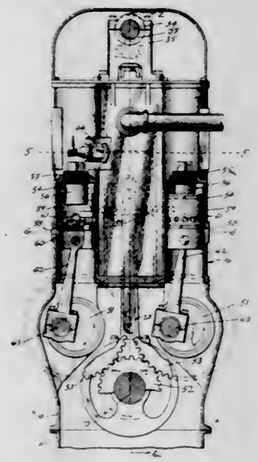
contacting surfaces of the hub sections; a plurality of spokes having their inner ends received in said sockets; and means for securing the hub sections together.

1,504,091. LOCOMOTIVE DRIVEN BY STEAM AND INTERNAL-COMBUSTION ENGINES. JACOB BUCHLI, Baden, Switzerland. Filed Apr. 11, 1923. Serial No. 631,311. 4 Claims. (Cl. 105—37.)



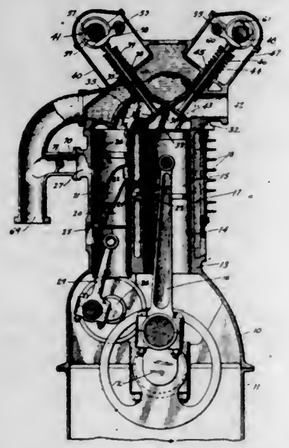
4. A combined internal combustion and steam locomotive comprising in combination a group of at least two internal-combustion cylinders mounted substantially horizontally in a common frame, and fluid cylinders, said cylinders driving a drive axle through cranks similarly set at uniform mutual angles about said axle, whereby the distribution of the centrifugal forces due to said cranks about the radius of gyration of said axle results in a good running balance of said axle.

1,504,092. TURNING TOOL FOR TURRET AND AUTOMATIC LATHES AND THE LIKE. ETTORE BUGATTI, Molsheim, France. Filed Aug. 25, 1921. Serial No. 495,298. 3 Claims. (Cl. 82—35.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



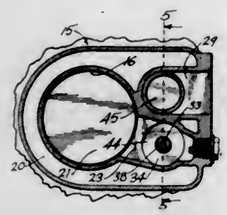
1. A cutting tool consisting of a ring whose interior diameter is considerably larger than the diameter of the work and having a gap therein and bounded by two planes, one of which forms at the interior of the tool a longitudinal cutting edge parallel to the axis and a transverse cutting edge perpendicular to the longitudinal cutting edge, said ring also being narrower at its inner periphery than at its outer periphery.

1,504,093. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor, by direct and mesne assignments, to The Automotive Valves Co., Los Angeles, Calif., a Voluntary Trust. Filed Oct. 14, 1920. Serial No. 416,963. 14 Claims. (Cl. 123—75.)



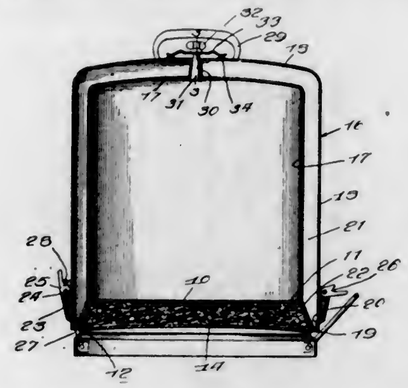
2. The combination in an internal combustion engine, of a working cylinder having a main port and an auxiliary port, and a valve mechanism having a passage cooperating with said main port to form both a fuel inlet and spent gas discharge, said valve mechanism also cooperating with said auxiliary port to form an auxiliary fuel inlet and spent gas discharge.

1,504,094. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor of one-half to Homer A. Brunell, Los Angeles, Calif. Filed Jan. 21, 1922. Serial No. 530,832. 3 Claims. (Cl. 123—79.)



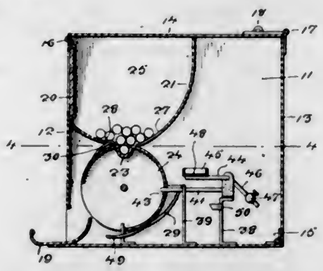
1. In an internal combustion engine, a cylinder block having a combustion chamber, a pair of manifold selector cylinders arranged to the sides of said combustion chamber, precompression cylinders arranged adjacent to said manifold selector cylinders, there being ducts formed in a head for establishing communication between the chambers in the manifold selector cylinders and the combustion chamber, there being inlet and exhaust ducts formed in the walls of the manifold selector cylinders, and there being ports that establish communication between the chambers within the precompression cylinders and the lower portion of the combustion chamber.

1,504,095. SUPERCHARGING AUXILIARY-EXHAUST POPPET-VALVE MOTOR. EVERETT R. BURTNETT, Los Angeles, Calif., assignor of one-half to Homer A. Brunell, Los Angeles, Calif. Filed Feb. 9, 1922. Serial No. 535,201. 9 Claims. (Cl. 123—75.)



3. In an internal combustion engine, a combustion chamber having a pair of valve controlled fuel inlet openings, a valve controlled compressed fuel inlet opening, a valve controlled exhaust opening, there being an exhaust opening leading from the lower portion of said combustion chamber, and a piston valve controlling said last mentioned exhaust opening and which piston valve is utilized for compressing gaseous fuel and forcing the same through the compressed fuel inlet opening that leads into the combustion chamber.

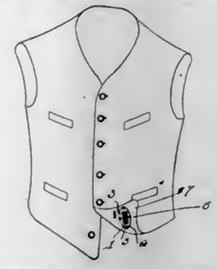
1,504,096. INTERNAL-COMBUSTION ENGINE. EVERETT R. BURTNETT, Los Angeles, Calif., assignor of one-half to Homer A. Brunell, Los Angeles, Calif. Filed Feb. 23, 1922. Serial No. 538,754. 18 Claims. (Cl. 123—79.)



4. An internal combustion engine having a combined inlet and exhaust port and a piston valve and selector both arranged for reciprocatory operation adjacent to each other for controlling the admission of gaseous fuel through said port into the combustion chamber and the discharge of burnt gases and products of combustion from said combustion chamber.

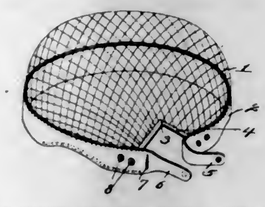
1,504,097. FIRELESS COOKER. EUGENE ROY CARPENTER, Ansonville, N. C. Filed Mar. 31, 1923. Serial No. 629,204. 8 Claims. (Cl. 220—9.)

1. A fireless cooker having a base formed with a downwardly and outwardly inclined peripheral face, and a cover having a side wall, the inner face of the side wall at its lower margin being downwardly and outwardly inclined to fit the peripheral face of the base, and means for detachably engaging the cover with the base, said means being resilient to permit the cover to raise from the base.



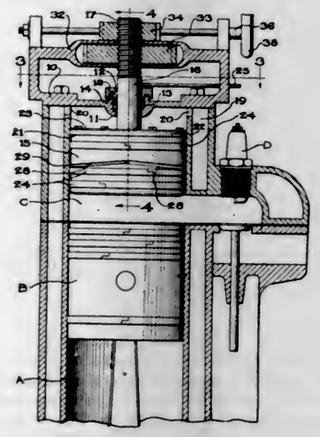
1,504,098. PENCIL-DISPENSING MACHINE. HARDY L. CATHEY, Clinton, Okla. Filed Nov. 27, 1922. Serial No. 603,606. Renewed June 24, 1924. 4 Claims. (Cl. 194—48.)

1. In a vending machine, the combination with a casing having a supply compartment, and a delivery drum mounted for rotation beneath the compartment, of means for normally holding the drum stationary, a coin chute arranged within the casing, coin actuated means for releasing said drum, and including a coin receiving tray normally disposed beneath said chute and adapted to be depressed by the weight of a coin to a predetermined position, means for further depressing said tray incident to the rotation of the drum, means for removing the coin from the tray as it reaches its final position, and means for automatically returning said tray to its normal position.



1,504,099. MATCH SCRATCHER. NIELS CHRISTENSEN, Astoria, Oreg. Filed Oct. 14, 1922. Serial No. 594,632. 1 Claim. (Cl. 44—48.)

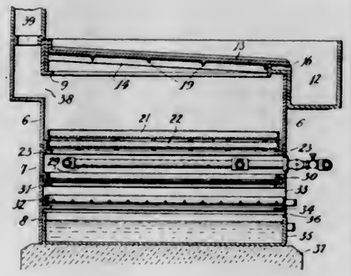
As a new article of manufacture, a match scratcher in the form of a plate characterized by an exterior longitudinal central depression having for its bottom a scratching surface and also characterized by smooth deflections at the opposite sides and the opposite ends of the depression and scratching surface whereby the device as a whole is given a concavo-convex form in length



and width; the said deflections each being provided with a transverse aperture, and the concave rear side of the scratcher being adapted to snugly receive the cloth of a vest or other garment.

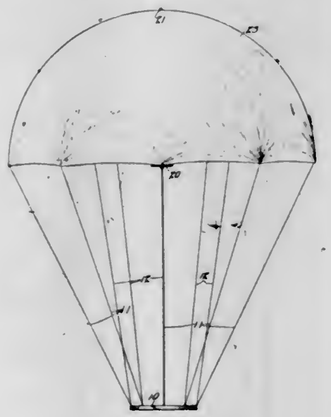
1,504,100. HAIR PROTECTOR AND CONFORMER. JOSEPH DANUBIO, East Weymouth, Mass. Filed Dec. 14, 1922. Serial No. 606,899. 3 Claims. (Cl. 132—49.)

1. A hair protector and conformer comprising a head encircling band inelastic adjacent the upper edge and having a lower elastic portion, and a hair protecting member secured to said upper edge.



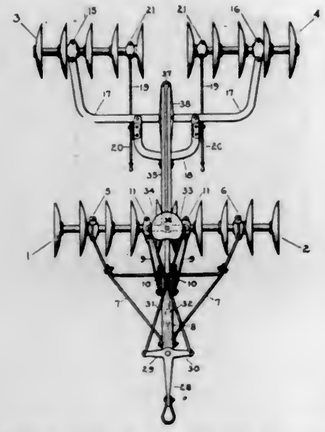
1,504,101. ENGINE. ALF H. DAVIDSON, Chippewa Falls, Wis. Filed July 26, 1922. Serial No. 577,624. 2 Claims. (Cl. 123—48.)

1. The combination with an internal combustion engine cylinder, a vertically adjustable abutment arranged therein, of a pair of brackets supported on the cylinder, a shaft journaled therein, a threaded stem movable through the cylinder and connected with the abutment, a worm wheel carried thereby, a worm on the shaft en-



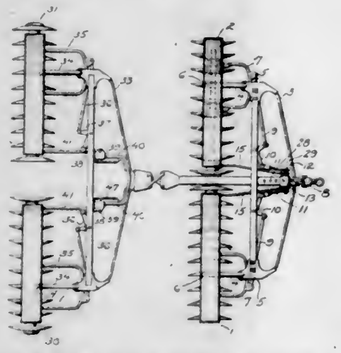
gaging the worm wheel, a second worm wheel on the threaded stem, a worm formed on the other shaft and engaging said secondary worm wheel, whereby to lock the stem in adjusted position, and a horizontally arranged elongated yoke supported by the bracket and said yoke receiving one of said worm wheels to hold it in place.

1,504,102. APPLIANCE FOR BROILING, COOKING, AND TOASTING FOODSTUFFS. WILLIAM C. DAVIS, Prabran, near Melbourne, Victoria, Australia. Filed Aug. 7, 1923. Serial No. 656,226. 10 Claims. (Cl. 126—41.)



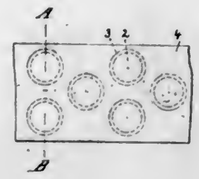
3. A food cooking appliance comprising, a casing having fuel burners arranged therein, two superimposed corrugated and reversible plates mounted in said casing above said burners, slots being formed in said plates for the passage of heated air and gases and a broiler grid mounted above said corrugated plates.

1,504,103. PARACHUTE. JOHN J. DAVIN and FRANK J. JICHA, Chicago, Ill. Filed Feb. 12, 1924. Serial No. 692,384. 10 Claims. (Cl. 244—21.)



1. A parachute comprising a post, a cloth covering centrally secured to the top of the post, a hub secured to the post at a distance from the top, a series of main arms pivoted to the hub, auxiliary arms pivoted to the outer ends of the main arms, and means for holding the outer ends of the auxiliary arms in spaced relation to the main arms when the parachute is closed, and means for securing the outer edge of the cloth to the auxiliary arms adjacent to their outer ends, substantially as set forth.

1,504,104. DRAFT CONTROL FOR DOUBLE-CUT DISK HARROWS. HARRY S. DICKINSON, Moline, Ill., assignor, by mesne assignments, to Moline Plow Company, Incorporated, Moline, Ill., a Corporation of Virginia. Filed Oct. 25, 1920. Serial No. 419,236. 8 Claims. (Cl. 55—83.)

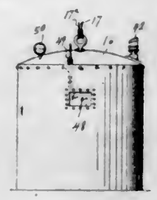


1. A tandem disk harrow having a front pair of gangs, a rear pair of gangs, means flexibly connecting the pairs of gangs, a draft member movable in response to the direction of the application of the draft force for pulling the harrow so that the member is guided by the draft force, and means associated with said member for positively and rigidly maintaining the rear pair of gangs in operating alignment with the front pair of gangs.

1,504,105. DISK HARROW. HARRY S. DICKINSON, Moline, Ill., assignor, by mesne assignments, to Moline Plow Company, Incorporated, Moline, Ill., a Corporation of Virginia. Filed Oct. 27, 1920. Serial No. 419,840. 5 Claims. (Cl. 55—83.)

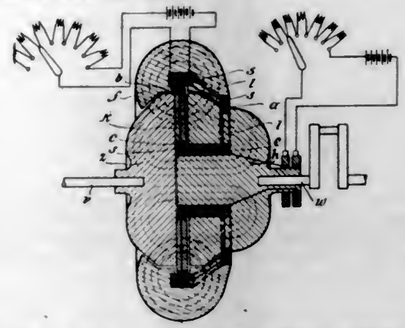
1. A disk harrow having a frame, disk gangs connected to the frame by means of links, pivoted to the frame and to the respective gangs so that the gangs may swing on their pivot with the links, or the links may swing on their pivot with the frame when the gangs are moved bodily, a U-shaped member carried by each gang, the base of the U being arcuate and being movable along a bearing surface on the frame, links connected to the inner ends of the gangs, linkage mechanism connected directly with said U-shaped member, and means for operating said links and linkage mechanism in unison to angle the gangs and move them bodily at the same time.

1,504,106. AIRCRAFT CONSTRUCTION. CLAUDIUS DORNIER, Friedrichshafen-on-the-Bodensee, Germany, assignor of one-half to the Firm: Dornier Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed Feb. 7, 1924. Serial No. 691,193. 2 Claims. (Cl. 244—31.)



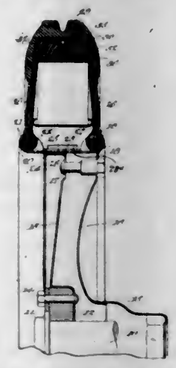
1. As a new article of manufacture, a compound material for use in the construction of hollow bodies for aviation purposes, comprising the combination of a comparatively thick metal sheet or strip with comparatively large perforations, the edges of which are turned up to project all above one surface of such sheet or strip, with a piece of very thin sheet metal fixed to the other surface of said thick sheet or strip and closing the perforations, one surface of the compound sheet or strip being perfectly smooth.

1,504,107. FLYING-MACHINE CONSTRUCTION. CLAUDIUS DORNIER, Friedrichshafen-on-the-Bodensee, Germany, assignor to the Firm: Dornier Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Filed Feb. 7, 1924. Serial No. 691,194. 6 Claims. (Cl. 244—31.)



1. The combination, with the hull and the bearing or guide plane of a flying machine, of a single strut fixed to said plane and extending into and being fastened in a cavity provided and extending in the plane of symmetry of said hull.

1,504,108. BLEACHING AND SWEATING APPARATUS FOR DEHYDRATING MATERIALS. JOHN H. ELSPASS, Wichita, Kans., assignor of one-third to M. Josephine Maloney, Oklahoma City, Okla. Filed Feb. 9, 1922. Serial No. 535,420. 15 Claims. (Cl. 34—30.)

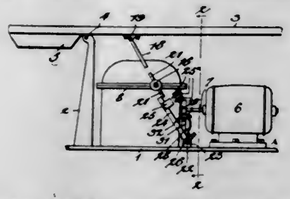


1. A step in the process of dehydrating fruit and vegetables consisting in subjecting the fruit and vegetables from three to five minutes in a closed chamber to steam at a temperature of approximaely 102° F.

1,504,109. MAGNETO-ELECTRIC COUPLING. RICHARD ERBAN, Vienna, Austria. Filed Oct. 26, 1920. Serial No. 419,711. 12 Claims. (Cl. 172—239.) (Granted under the provision of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

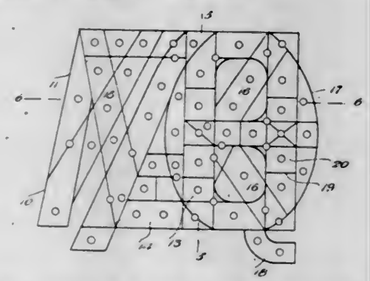
1. In an electromagnetic coupling, the combination of a body of magnetic material cooperative with a driving shaft, means to produce a magnetic field in said body, a stationary body of magnetic material, means to produce a second magnetic field therein, and electric circuit through said bodies, and a conductor forming part of said circuit cooperative with a driven shaft, the said conductor being arranged so as to be exposed to the joint and simultaneous action of both magnetic fields.

1,504,110. RESILIENT WHEEL. CHARLES F. ERICKSON, Brooklyn, N. Y. Filed Feb. 11, 1922. Serial No. 535,871. 9 Claims. (Cl. 152—29.)



1. A resilient wheel comprising a pair of plates, the periphery of each of which is formed into a bead gripping member, means securing said plates together, means supported by said plates for holding the walls of a tire in expanded condition, a tire including beads for co-operation with said plates and said walls for co-operation with the holding means, a ring mounted in said tire and comprising a plurality of pivotally connected blocks, a resilient means for holding said blocks in predetermined relationship.

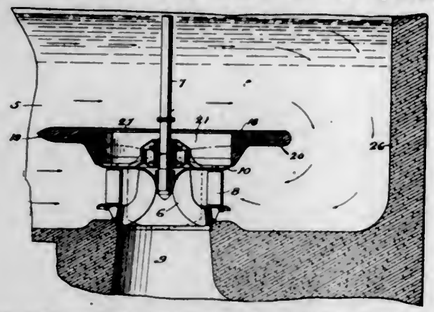
1,504,111. ATTACHMENT FOR CHIROPRACTIC TABLE. DOSSA D. EVINS, Davenport, Iowa. Filed Oct. 23, 1920. Serial No. 419,122. 2 Claims. (Cl. 128—73.)



1. A chiropractic table comprising a base, a platform pivotally mounted upon said base, a gear box mounted on said base below said platform, gearing mounted in said gear box, a motor having its shaft extending into said gear box and provided with a worm for operating said gearing, arms operable by said gearing, connecting

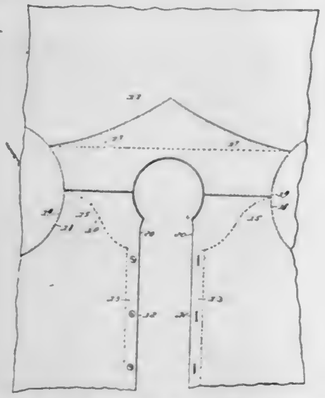
rods operable by said arm and having pivotal connection with said platform, an electric switch for controlling the operation of said motor, foot actuated means for closing said switch to cause movement of said platform in either

direction, and spring controlled automatic means for opening said switch upon the limit of movement of said platform in either direction, and a brake device automatically operable by the closing of said switch for overcoming the momentum of said platform.



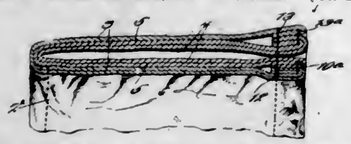
1,504,112. ELECTRIC SIGN. ARTHUR L. FAULKNER, Smithfield, N. C. Filed Apr. 5, 1920. Serial No. 371,355. 1 Claim. (Cl. 40—130.)

A sign comprising a base, vertically arranged spaced channels located at one end of the base, horizontally arranged channels connecting the vertical channels at their ends and at a point intermediate thereof, inclined channels extending from one side of one of the vertical channels at its point of connection with the intermediate horizontal channels and connecting with the other vertical channel at the point of connection of the latter with the horizontal end channels, other horizontal channels extending from the side of the vertical channel opposite the first mentioned horizontal channels and in line therwith, inclined channels connecting the other horizontal channels and connecting each other, an inclined channel extending substantially parallel with one of the inclined channels last named and crossing the other thereof, an end inclined channel member having connection with each of the channel members last named, certain of said channel members crossing each other and providing partitions dividing each of the channels into separate compartments, short partition plates dividing said channels into other compartments, and lamps arranged in said compartments.



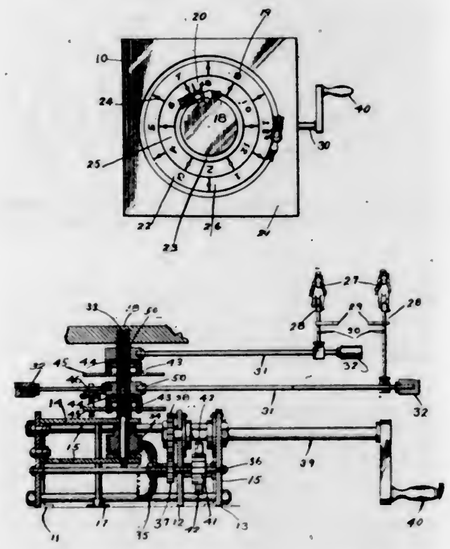
1,504,113. TURBINE INSTALLATION. JOHN H. FELTHOUSEN, deceased, late of York, Pa., by BIRDIE J. FELTHOUSEN administratrix, Baltimore, Md., assignor to S. Morgan Smith Company, York, Pa., a Corporation of Pennsylvania. Original application filed Dec. 20, 1919. Serial No. 346,253. Divided and this application filed Oct. 30, 1923. Serial No. 671,782. 16 Claims. (Cl. 253—125.)

1. In a turbine installation, the combination with a flume, of a wheel organization having water operated driving means, and a closure structure extending fully across the flume between the side walls thereof and having the wheel organization enclosed therein, the wheel organiznation and closure structure being submerged in the flume, the said closure structure being provided with reversely arranged partial scroll units cooperating



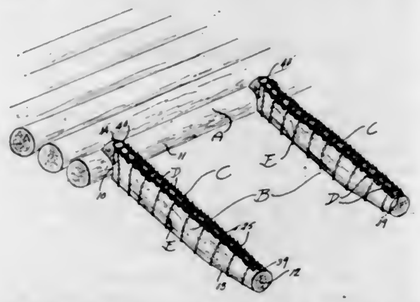
with the front and rear portions of the said driving means for controlling a proportional supply of water to different portions of the driving means to maintain free rotation of the latter in one direction.

1,504,114. YOKE CONSTRUCTION FOR SHIRTS. CLARENCE M. FLORA, Oklahoma City, Okla. Filed Dec. 15, 1922. Serial No. 607,128. 2 Claims. (Cl. 2—92.)



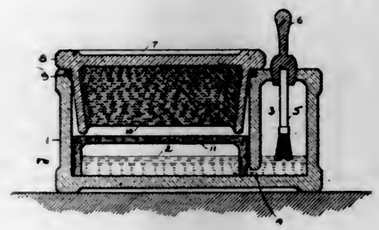
1. As an article of manufacture, a reinforcing lining yoke for the neck portion of a garment having an opening at the front, consisting of a blank of material comprising a body portion to extend across the back of the neck of the garment and conforming to the shoulders thereof, the body portion having a neck opening and front extensions to overlap at the front of the neck, said front extensions merging into reinforcing strips to be secured to the opposite portions of the opening at the front of the garment, thereby reinforcing the button and buttonholes.

1,504,115. FOLDING REVERSIBLE FRENCH CUFF. CLARENCE M. FLORA, Oklahoma City, Okla. Filed Aug. 1, 1923. Serial No. 655,118. 2 Claims. (Cl. 2—133.)



2. A reversible semi-stiff fold cuff consisting of a plurality of thicknesses of fabric extending the full width and length of the cuff, and an additional thickness of fabric constituting a stiffener within the cuff and extending the full width of the cuff and from the inner edge toward the fold and having a flat unfolded terminal edge adjacent to but short of the fold line, whereby the inner half of the cuff may be stiffened with the outer half left soft.

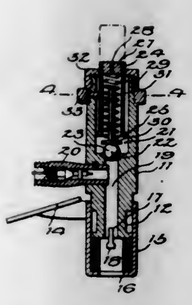
1,504,116. AMUSEMENT APPARATUS. JOSEPH FRANK, New York, N. Y. Filed Sept. 23, 1922. Serial No. 590,162. 4 Claims. (Cl. 46—56.)



1. An amusement apparatus, comprising a plurality of objects, a pointer on each of said objects, a dial for co-action by each of said pointers driven units which move on anti-friction devices and each of said driven units having weighted arms on one of which arms of each driven units is arranged one of said objects, and means for effecting the rotation of said driven units, said means including make and break devices carried by each of said driven units for co-action with said arms.

1,504,117. ANTISLIPPING DEVICE FOR SKIDS. ROBERT FRIEDLEY, Edmonton, Alberta, Canada. Filed Nov. 9, 1922. Serial No. 599,827. 1 Claims. (Cl. 193—41.)

1. In a logging guideway, the combination of a skid member, an anti-slip chain for said skid member, and means for attachment of said anti-slip chain to said skid member.

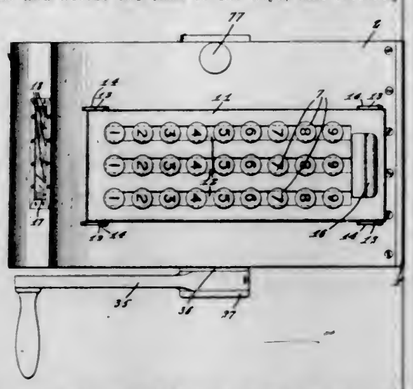


1,504,118. ADHESIVE POT. FREDERICK H. GANSE, Tulare, Calif. Filed July 15, 1919. Serial No. 311,022. 8 Claims. (Cl. 91—67.1.)

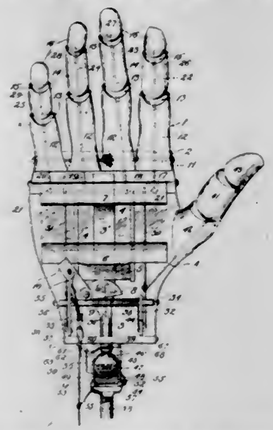
1. A paste pot comprising a liquid container, a paste container above said liquid container, and removable means therebetween to carry the moisture into proximity to said paste.

5. A paste pot comprising a water containing vessel, an inverted cup for paste, inserted into said vessel, and an inverted cup of porous material in said vessel and under said paste container.

1,504,119. TIRE-PRESSURE DEVICE. OSWALD H. HANSEN, Elmhurst, N. Y. Filed July 20, 1922. Serial No. 576,325. 4 Claims. (Cl. 137—53.)



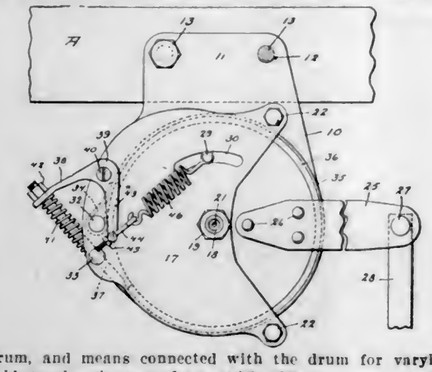
4. In a pressure gage of the character described, a valve, a spring for holding said valve to its seat, an indicating member movable toward and from said valve for varying the tension of said spring, means for locking said indicating member in an adjusted position, said means comprising a locking plate movable transversely of said indicating member, said locking plate having a cam surface, and a ring formed with a cam surface coacting with the cam surface on the plate for moving the plate so that it will press against said indicating member when the ring is moved in one direction and will release the pressure on the plate when moved in the opposite direction.



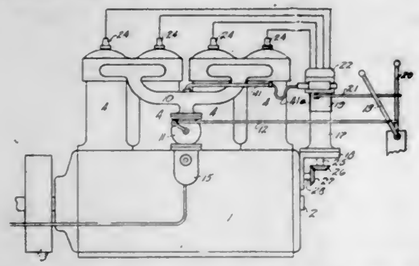
1,504,120. ADDING MACHINE. WALTER KARL HARRIS, Lockhart, Tex. Filed Nov. 19, 1921. Serial No. 516,423. 10 Claims. (Cl. 235—79.)

1. In an adding machine a plurality of depressible keys arranged in columns, disks mounted for rotation, peripheral projections thereon, a carrying bar actuated

by the user for movement in a path concentric with the disks and across the ends of the keys, and laterally tiltable channeled coupling devices carried by said carrying bar and shiftable by the depressed keys for engaging predetermined projections upon the respective disks.



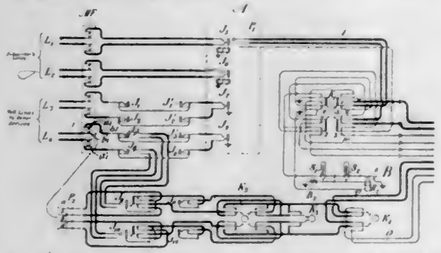
1,504,121. ARTIFICIAL LIMB. ROMAINE R. HARRIS, Los Angeles, Calif., assignor, by direct and mesne assignments, to Natural Function Limbs Company, a Corporation. Filed Sept. 25, 1917. Serial No. 193,196. Renewed Dec. 18, 1922. 24 Claims. (Cl. 3—12.)



1. An artificial limb comprising a shoulder rest, having a floor connected therewith and arranged for accommodation of the stump, a humerus member flexibly carried by said floor, a radius member flexibly connected to said humerus member, a hand section flexibly connected to said radius member, a locking means for each of the flexible connections, a means for moving the hand section, means on the floor of the shoulder rest and controllable by the movement of the stump for operating said hand section, moving means and locking means, means controllable by the shoulder movement for moving the radius member, and a covering for the radius and humerus member.

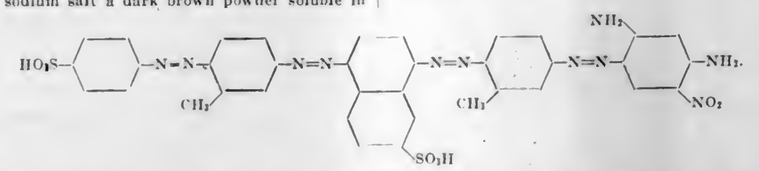
1,504,122. SHOCK ABSORBER. ROY H. JACKSON, Oakland City, Ind. Filed Oct. 31, 1923. Serial No. 671,958. 10 Claims. (Cl. 188—130.)

1. A shock absorber for vehicles comprising a support stationarily mounted upon one portion of a vehicle, a drum rotatably mounted upon the support and connected with an element of the vehicle capable of movement with respect to the first named portion, a friction band encircling the drum and having one end anchored to the support, means for applying spring tension to the other end of the band tending to constrict the band about the drum, and means connected with the drum for varying said tension in accordance with the movement of the drum.

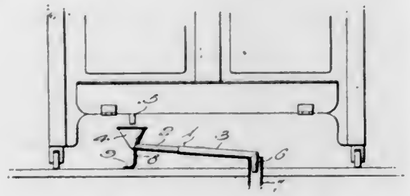


1,504,123. IGNITION CONTROLLER. WILLIAM O. KENNINGTON, Anderson, Ind., assignor to Remy Electric Company, Anderson, Ind. Filed Jan. 7, 1915, Serial No. 285,835. Renewed Mar. 28, 1919. 32 Claims. (Cl. 123—117.)

1. An ignition controller, including the combination with an internal combustion engine, of ignition timing means timer controlling means actuated by the vacuum in the intake pipe of said engine, second timer controlling means actuated by the speed of said engine and cooperating with said vacuum actuated means, and a manually operated timer controlling means.



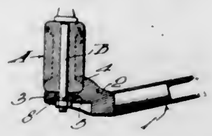
1,504,124. ELECTRICAL TESTING SYSTEM. GEORGE W. KUHN, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Feb. 7, 1920. Serial No. 356,836. 5 Claims. (Cl. 179—175.)



3. In a testing system, the combination of a plurality of line circuits, a plurality of test trunks extending from a test desk to a switchboard each adapted for connection with any line circuit, a plurality of testing circuits and a plurality of switching means individual to each test trunk to connect the respective trunk with any of said testing circuits.

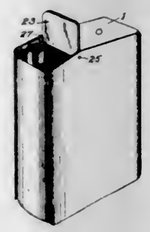
1,504,125. TETRAKISAZO DYES. WERNER LANGE, Berlin-Friedenau, and LUDWIG NEUMANN, Berlin, Germany, assignors to Actien Gesellschaft für Anilin Fabrikation, Berlin, Germany. Filed Aug. 23, 1922. Serial No. 583,909. 4 Claims. (Cl. 260—70.)

4. The herein-described tetrakisazo dye being in the shape of its sodium salt a dark brown powder soluble in water to a reddish brown solution not being altered by soda lye but from which the dye is separated by hydrochloric acid, being insoluble in alcohol, ether, benzene, being destroyed by strong reducing agents dyeing cotton reddish brown tints and corresponding to the general formula:

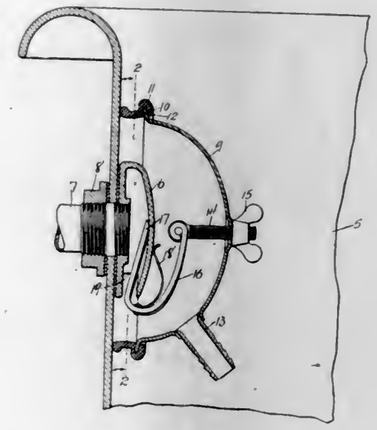


1,504,126. REFRIGERATOR DRAIN PIPE. CLARENCE KING LASSELL, East Providence, R. I. Filed Oct. 11, 1923. Serial No. 668,003. 1 Claim. (Cl. 137—9.)

A device of the class described comprising a pipe adapted to be disposed in an inclined position under a refrigerator and having its lower end turned downwardly for loose disposition in the upper end of a drain pipe or the like, an upwardly opening funnel secured to the upper end of said inclined pipe for disposition directly under the drip outlet of the refrigerator, a substantially flat supporting plate secured to the lower side of the upper end portion of said inclined pipe under said funnel, said plate extending transversely of said inclined pipe and having a wide straight lower edge to rest upon the floor to support said inclined pipe in an inclined position with said funnel disposed with its mouth facing upwardly, said plate being readily bendable intermediate of its upper and lower edges on a line parallel to its lower edge to provide a laterally extending supporting foot.



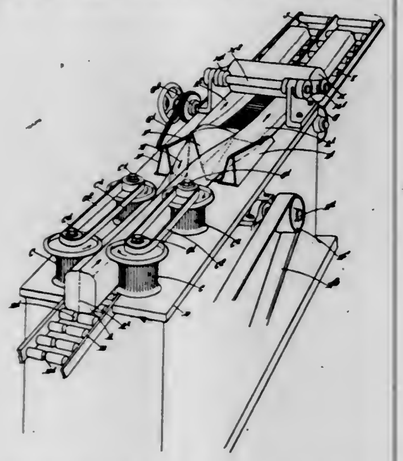
1,504,127. FRONT-AXLE RADIUS ROD. BOLIVAR L. LIGHT, Rogers, Ark. Filed Aug. 24, 1923. Serial No. 659,200. 4 Claims. (Cl. 267—66.)



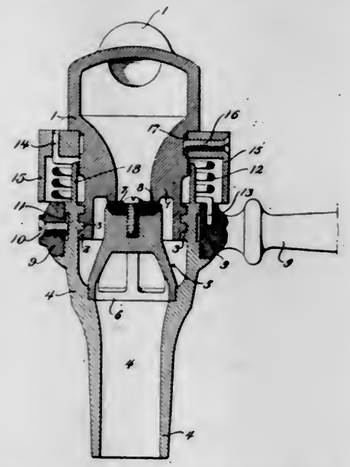
1. A front axle radius rod having a lip to extend under the axle and a shoulder to abut the rear side of the axle, said lip having a cavity in one side, and an eccentric in said cavity having an opening to receive the usual radius rod attaching bolt, said eccentric being adapted for rotary adjustment in said cavity to vary the space between its bolt hole and said shoulder and insure tight contact of the latter with the axle.

1,504,128. CIGARETTE CASE. CARL GABRIEL LINDBOM, Dover, N. H. Filed Mar. 3, 1922. Serial No. 540,695. 10 Claims. (Cl. 206—41.)

1. A cigarette case comprising a top, opposed sides projecting from said top and spaced to receive a cigarette package between them, and a tongue projecting from said top intermediate said sides for insertion between the package and its wrapper, said sides having inturned flanges cooperating with said tongue to frictionally grip the wrapper and hold the package in the case.

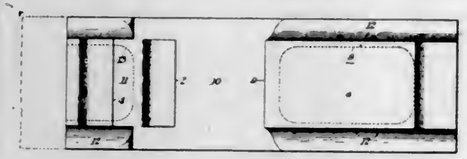


1,504,129. HOSE-ATTACHING DEVICE. LOUIS V. LUCIA, Hartford, Conn., assignor to The Fuller Brush Company, Hartford, Conn., a Corporation of Connecticut. Filed Aug. 25, 1922. Serial No. 584,251. 8 Claims. (Cl. 4—148.)



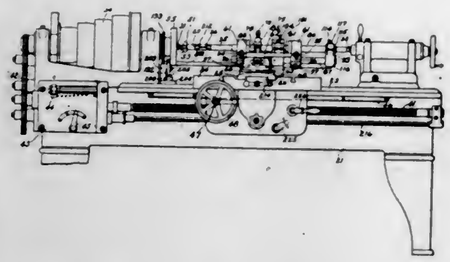
1. A hose attaching device comprising a shell having a hose attachment thereon, a member shaped for reception within the opening at one side of the bell-shaped inlet fixture to a receptacle, and a device attached to said member and projecting through the wall of the shell as a means for securing said member and shell in place.

1,504,130. MANUFACTURE OF SOLID RUBBER TIRES. COLIN MACBETH and HARRY WILLSHAW, Birmingham, England, assignors to The Dunlop Rubber Company, Limited, Westminster, London, England. Filed June 9, 1919. Serial No. 302,921. 9 Claims. (Cl. 164—61.)



1. An apparatus of the class described comprising means for guiding and feeding a double solid rubber tire, a base for supporting the tire in its travel, a cutter positioned in the path of travel of a tire placed in said apparatus and adapted to divide the tire through its longitudinal center, and means for turning each of the sections thus formed about an axis parallel with its path of travel to cause it to move resting upon its cut surface.

1,504,131. NOZZLE-OPERATED FAUCET. JOHN MACKAY, Audubon, N. J., assignor to Thomas Savill's Sons, Philadelphia, Pa. Filed Dec. 8, 1922. Serial No. 605,553. 6 Claims. (Cl. 251—115.)

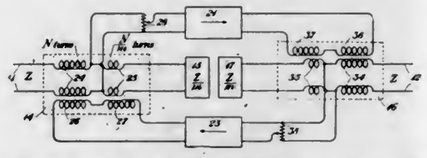


5. A nozzle operated faucet comprising a neck having recesses; a housing; means for securing the housing to a selected recess in the neck; a valve; a nozzle having recesses; a handle; means for securing the handle to a selected recess in the nozzle, and a spring connected with the housing and handle for automatically moving the nozzle to effect a closing of the valve.

1,504,132. SLIDE PLATE. ANDREW MORRISON, Penn Township, Allegheny County, Pa., assignor to Dilworth, Porter and Company, Incorporated, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 12, 1923. Serial No. 638,502. 8 Claims. (Cl. 246—453.)

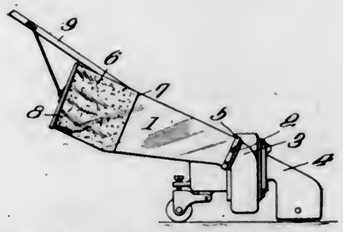
1. A slide plate having on its upper face a rail supporting portion and a switch tongue supporting portion, the lower face of the plate having a greater effective tie-engaging surface per unit of area under the rail supporting portion than at the other portions of the plate at each side of said rail supporting portion, substantially as described.

1,504,133. GROOVING ATTACHMENT FOR LATHES. OSCAR W. MUELLER, Cincinnati, Ohio, assignor to The Mueller Machine Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Apr. 28, 1923. Serial No. 635,356. 15 Claims. (Cl. 82—18.)



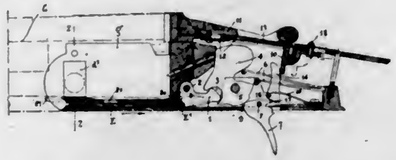
1. In a grooving attachment for a metal turning lathe, the combination with the carriage, the cross-slide and work-turning means of the lathe, of a tool-saddle on the cross-slide, a reciprocating tool support thereon reciprocating lengthwise of the axis of said work-turning means, a housing at the rear of the carriage, driving means thereon, connecting means between said driving means and said tool-support to reciprocate the latter, and cross-feeding means for said tool-support.

1,504,134. DISAZO DYE. WILHELM NEELMEIER and KARL HEUSSNER, Leverkusen, near Cologne-on-the-Rhine, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Filed Apr. 14, 1923. Serial No. 632,131. 2 Claims. (Cl. 260—79.)



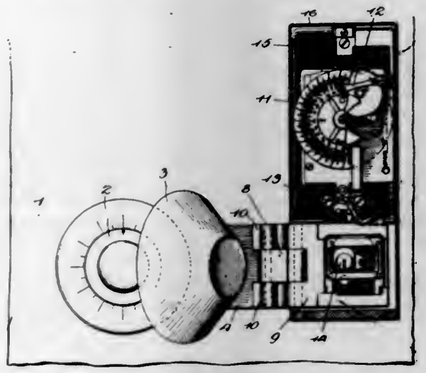
2. The herein described new azodye obtainable by combining the diazocompound of 5-amino-2-acetylamino-1-anisol with 1-amino-2-naphtholmethylether-6-sulfonic acid, redlazotizing, combining with 1-naphthol-4-sulfonic acid and splitting off the acetyl group, which dye is after being dried and pulverized in the shape of its sodium salt a black powder soluble in water with a greenish-blue and in concentrated sulfuric acid with a blue coloration; being split up upon treatment with stannous chlorid and hydrochloric acid into 2.5-diaminoanisol, 1.4-diamino-2-naphtholmethylether-6-sulfonic acid and 2-amino-1-naphthol-4-sulfonic acid; dyeing cotton blue shades giving a greenish-blue fast to washing and to light on being diazotized and developed with sodium naphtholate, substantially as described.

1,504,135. TELEPHONE REPEATER CIRCUITS. HARRY NYQUIST, Elmhurst, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 2, 1921. Serial No. 497,842. 12 Claims. (Cl. 179—170.)



1. In a repeater circuit comprising transmission lines interconnected by one-way repeater paths including amplifiers and having balancing networks associated with the lines for rendering the outgoing side of one repeater path conjugate with respect to the incoming side of the opposite repeater path, the method of increasing the effective capacity of the amplifiers, which consists in decreasing the absorption of output energy in the balancing network and increasing the ratio of amplification of each amplifier to compensate for the consequent decrease in the absorption by each amplifier of input energy from the line.

1,504,136. SANITARY DUST BAG. LOUISE H. PATTERSON and HANNAH L. H. PATTERSON, Coronado, Calif. Filed Oct. 4, 1923. Serial No. 666,495. 3 Claims. (Cl. 183—44.)

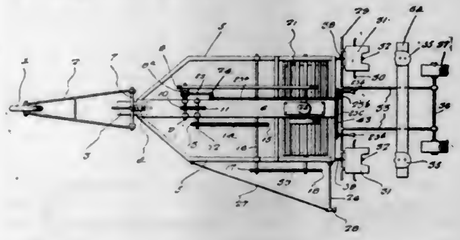


1. A dust bag for a vacuum cleaner composed mainly of non-porous paper and provided with a cloth portion for the egress of the air.

1,504,137. SPORTING GUN WITH SUPERPOSED BARRELS. BONIFACE PETRIK, St. Etienne, France, assignor to Société Petrik & Cie., St. Etienne, Loire, France. Filed July 24, 1922. Serial No. 577,073. 4 Claims. (Cl. 42—46.)

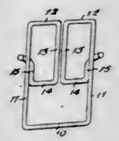
1. A gun or rifle with superposed barrels comprising hammers and lever means for cocking the hammers, a trigger, safety means for locking the trigger when the gun is open, pins connected with the cocking lever, vertical sliding parts movable upon and with said barrels, and under which the ends of the pins pass, a pusher provided on each side of the barrel-block, a spring pressing upon each pusher, a catch pivoted on each pusher, a projection of the barrel-block engaging each catch, an extractor rod operated by each pusher, shoulders provided at the ends of the sliding vertical parts, and springs pushed inwardly by the shoulders and unlocking the catch so as to release the extractor pushers.

1,504,138. RECORDING PROTECTOR FOR SAFE LOCKS AND OTHER OBJECTS. EDWIN SANFORD PHELPS, Montclair, N. J. Filed Sept. 7, 1923. Serial No. 661,486. 6 Claims. (Cl. 234—1.)



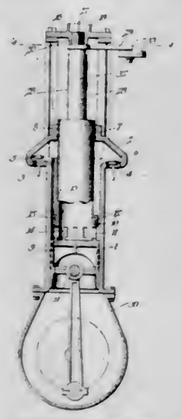
1. The combination with an element to be covered, of a movable cover for the element, a mechanically operable member connected with the cover to move it relatively to the covered element, and recording mechanism connected with the operable member for making a record of the movement of the cover to covering and also to uncovering positions.

1,504,139. DIAPHRAGM. WILLIAM F. R. PHILLIPS, Washington, D. C. Filed Sept. 16, 1921. Serial No. 501,026. 3 Claims. (Cl. 181—33.)



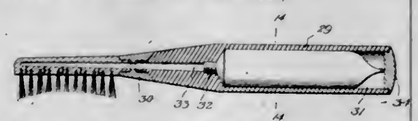
3. A diaphragm comprising at least four wooden sectors having the grain approximately radially symmetrically disposed around the center of the diaphragm in such manner that the grain is substantially perpendicular in each sector to the axis of symmetry of the sector.

1,504,140. CELERY PLANTER. LOUIS POLL, Hamilton, Mich., assignor of one-half to Alex Blenc, Hamilton, Mich. Filed Oct. 4, 1922. Serial No. 592,311. 2 Claims. (Cl. 111—3.)



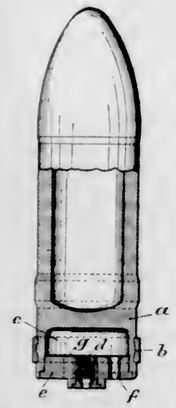
1. In an implement of the character specified, a plant-supporting platform, a furrow opening means depending therefrom, a seat in the rear of said platform, and foot rests for the occupant of said seat carried by said platform.

1,504,141. CLIP. NATHAN RITTER, Brooklyn, N. Y. Filed Apr. 11, 1923. Serial No. 631,413. 3 Claims. (Cl. 40—11.)



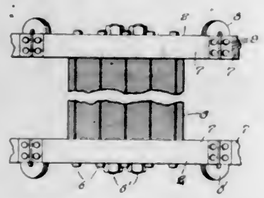
2. As a new article of manufacture, a clip constructed of a length of material bent upon itself to define a pair of clamping portions at opposite ends each having an entrance mouth disposed toward the opposite ends of said clip, and indicia bearing means carried by said clip disposed on opposite sides and at opposite ends of the clip.

1,504,142. INTERNAL-COMBUSTION ENGINE. ALBERT O. ROBERTS, New Kensington, Pa. Filed Apr. 12, 1922. Serial No. 551,808. 2 Claims. (Cl. 123—1.)



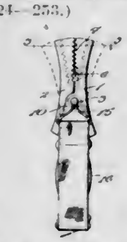
1. An internal combustion engine, comprising a main cylinder having a port for the entry of air and also having a port for the discharge of products of combustion, valves to control said ports, a piston arranged to work in said cylinder, a cylinder arranged in and spaced from the main cylinder, and movable rectilinearly with the piston and about its axis independently of the piston, the latter to control communication between its interior and the space between it and the main cylinder, means closing the second-named cylinder, means to supply the second-named cylinder with explosive mixture; said means including a tube and a valve controlling communication between said tube and the interior of the second-named cylinder, a sleeve surrounding said tube, an operating arm on said sleeve, a saddle in the second-named cylinder, and guide means on said sleeve and engaging said saddle.

1,504,143. TOOTHBRUSH. WILLIAM ELLSWORTH ROBERTS, Kenosha, Wis. Filed Apr. 7, 1922. Serial No. 550,337. 2 Claims. (Cl. 15—135.)



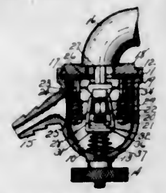
1. A tooth brush comprising a brush head having paste outlets, a resilient barrel attached to said head, and a collapsible tube of paste wholly supported within the barrel and collapsed by the compressing of the resilient barrel.

1,504,144. PROJECTILE. HEINRICH ROMBERG, Dusseldorf, Germany, assignor to the Firm of Rheinische Metallwaaren- und Maschinenfabrik, Dusseldorf-Derendorf, Germany. Filed June 28, 1921. Serial No. 481,067. 2 Claims. (Cl. 102—12.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



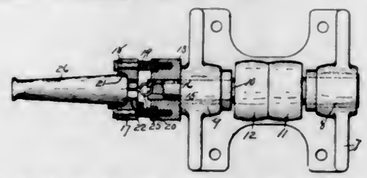
2. A projectile having a space to contain the driving charge, a base closing said space and formed with apertures having rounded edges, and a thin plate closing said apertures and located between said base and the driving charge.

1,504,145. DYNAMO-ELECTRIC MACHINE. GEORGE MAURICE ROTHENBERGER, Mansfield, Ohio, assignor to Ideal Electric & Manufacturing Company, Mansfield, Ohio, a Corporation of Ohio. Filed Apr. 4, 1922. Serial No. 549,374. 4 Claims. (Cl. 171—252.)



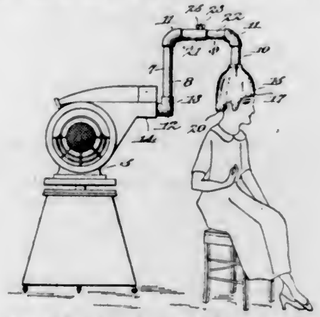
1. In a dynamo-electric machine, a squirrel-cage end-ring comprising a plurality of segments and resilient U-shaped connectors for said segments and secured rigidly thereto, said segments having their ends slotted tangentially to receive the ends of the connectors respectively.

1,504,146. STOCKING SUPPORTER. JOHN ROUPP, Hesston, Kans. Filed Feb. 4, 1924. Serial No. 690,527. 3 Claims. (Cl. 24—253.)



1. A device for the purpose set forth comprising mating jaws adapted to clasp a garment, a pivot pin connecting the jaws between the ends thereof, means housed between the jaws for yieldably holding the working ends thereof toward each other in engagement with a garment, and means on one end of the pivot pin for carrying a stocking supporter.

1,504,147. FAUCET REDUCER. WALTER H. RUDOLPH and LOUIS V. LUCIA, Hartford, Conn., assignors to The Fuller Brush Company, Hartford, Conn., a Corporation of Connecticut. Filed Mar. 4, 1922. Serial No. 541,034. 22 Claims. (Cl. 285—188.)

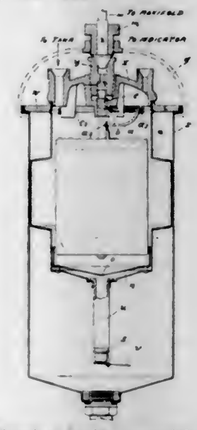


1. A reducer comprising a shell having an outlet, clamp levers mounted within the shell, a packing element at the end of the shell, said levers projecting through said packing element, and means for yieldingly forcing the clamp levers into clamped position and the packing element into packed position.

1,504,148. SCREW-EYE-AFFIXING MACHINE. WALTER H. RUDOLPH, West Hartford, Conn., assignor to The Fuller Brush Company, Hartford, Conn., a Corporation of Connecticut. Filed Feb. 27, 1923. Serial No. 621,584. 4 Claims. (Cl. 144—32.)

1. A screw-eye affixing machine including a rotatably mounted spindle having in its end means to engage opposite sides of a screw-eye to rotate it, and a plunger head mounted for reciprocating movement toward and from the spindle, said head being located for free access to receive a portion of a manually supported device with a screw-eye therein and said head having a cavity at its outer side for self-centering the device therein.

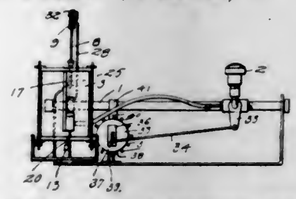
1,504,149. ATTACHMENT FOR HAIR-DRYING MACHINES. LOUIS RUFFIO, New York, N. Y. Filed Jan. 23, 1923. Serial No. 614,444. 7 Claims. (Cl. 34—26.)



1. In a means for introducing a drying medium to the head in the process of waving the hair, a hood formed to fit cap-like upon the head, and a conduit opening at one end of the hood and formed at its free end for connection with the nozzle of a blower, said conduit formed of a pair of adjustable parts.

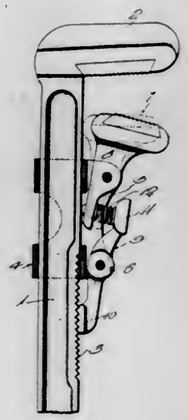
1,504,150. MANUFACTURE OF PAPER FOR PHOTOGRAPHIC PURPOSES. EDUARD SCHLOEMANN, Duren, Germany. Filed June 9, 1923. Serial No. 644,488. 6 Claims. (Cl. 91—69.)

2. In the process for the manufacture of paper for photographic purposes the production of a coating emulsion of sulphate of barium, which consists in bringing together Ba-ions and SO_4-ions in the presence of a protective colloid and allowing said emulsion of sulphate of barium to mature until a certain size of grain is obtained.



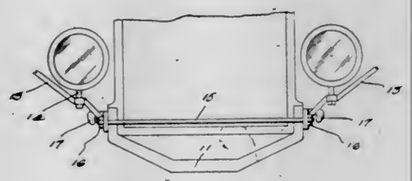
5. The process for the manufacture of paper for photographic purposes, which consists in mixing a heated solution of 500 gr. of chloride of barium in 10 litres of 20% watery gelatine with a solution of 300 gr. sulphate of ammonia in 2.5 litres of water, allowing said emulsion of colloidal distributed sulphate of barium in gelatine to stiffen, granulating, washing, re-melting and applying it to the raw paper.

1,504,151. VACUUM TANK FOR MEASURING PETROL CONSUMPTION. WILLY SECK, Berlin-Wilmersdorf, Germany. Filed May 15, 1922. Serial No. 561,233. 16 Claims. (Cl. 103—236.)



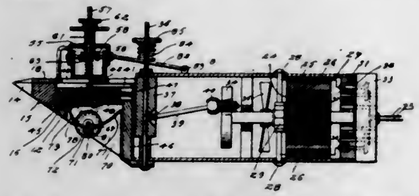
1. Liquid delivering device comprising in combination, a tank, a liquid controlling valve connected with said tank, a float in said tank, a pair of cooperative trip levers in engagement with said float and said valve, respectively, a knife edge on one lever resting on part of said tank and means for causing said levers under the influence of said float to change of a sudden their position and the operative position of said valve.

1,504,152. LAWN SPRINKLER. ALBERT N. SLACK, Bakersfield, Calif. Filed Nov. 11, 1922. Serial No. 600,374. 4 Claims. (Cl. 299—66.)



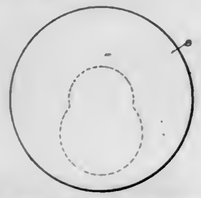
1. In a lawn sprinkler, a water-pipe, means for imparting an oscillatory movement to the water pipe, a nozzle mounted upon the water pipe, means for imparting an oscillatory movement to the nozzle in a plane at right angles to the oscillation of the pipe whereby to distribute the water over the length and breadth of a given area, means for varying the amplitude of oscillation of the pipe, and other means for varying the amplitude of oscillation of the nozzle, whereby to adapt the device to a variable area to be sprinkled.

1,504,153. PIPE WRENCH. ANDREW L. SLATER, Garfield, Utah. Filed May 21, 1923. Serial No. 640,557. 2 Claims. (Cl. 81—97.)



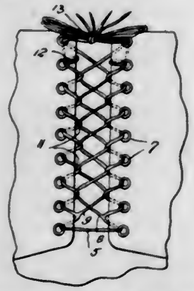
1. A wrench comprising a toothed shank having a lateral jaw at its outer end, a carrier slidable on said shank, a movable jaw pivoted on said carrier for movement toward and away from said shank and toward and away from said lateral jaw, a thumb-lever pivoted between its ends on the carrier and having its rear end toothed to engage the teeth of the shank, and spring means interposed between said lever and a portion of said pivoted jaw and exerting pressure to normally swing said jaw away from the lateral jaw and to lock said lever to hold it in engagement with the teeth of the shank.

1,504,154. SUPPORT. CHARLES E. SMALLEY, Sioux City, Iowa. Filed July 30, 1923. Serial No. 654,681. 1 Claim. (Cl. 280—106.)



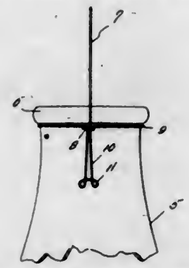
The combination with an automobile frame and a pair of fender irons, each having a relatively broad attaching portion secured to the frame, of a pair of substantially U-shaped members arranged to straddle one end of each attaching portion of said irons, the intermediate portion of each element projecting beyond the forward end of the frame and provided with an opening, a rod arranged transversely across the fender of the frame and received by said openings, nuts threaded on the ends of said rod, each element including a relatively long limb terminating to provide an obliquely disposed hook like extremity adapted to extend downwardly over the attaching portion of the adjacent fender iron, whereby the truss rod is supported on the frame.

1,504,155. CLIPPER. HARRY O. SMITH, Los Angeles, Calif. Filed May 1, 1923. Serial No. 635,917. 10 Claims. (Cl. 30—1.)



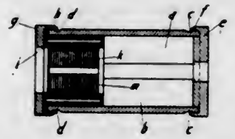
1. In a clipper, a head, a stationary cutter blade secured to said head, a cutter plate to coact with said cutter blade, and means having tractive action on the surface traversed to adjust the position of said cutter plate relatively to the penetrating end of the stationary cutter blade.

1,504,156. SANITARY ATTACHMENT FOR TELEPHONE MOUTHPIECES. HELEN C. SOMERS, Jersey City, N. J. Filed Mar. 7, 1923. Serial No. 623,482. 2 Claims. (Cl. 179—185.)



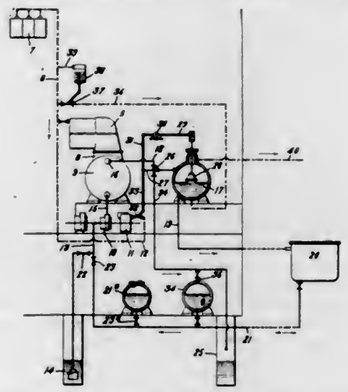
1. A sanitary mouth piece attachment for telephones comprising a disk formed with a slot having an enlarged portion and a restricted portion, and a piece of yieldable material secured to the marginal edge of said disk.

1,504,157. LACING DEVICE. WILLIAM A. SOWERS, Akron, Ohio. Filed July 10, 1923. Serial No. 650,614. 1 Claim. (Cl. 24—143.)



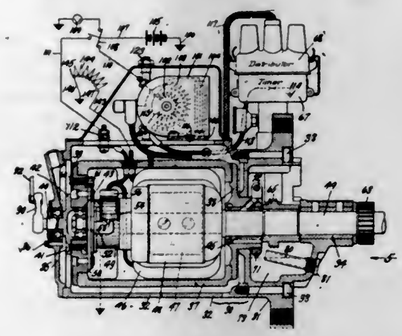
A shoe lace comprising a string adapted to be threaded through the eyelet at the opposite side portion of the upper of a shoe and in the form of successive loops disposed about the edge portion of the upper and string sections continuously joined with the said string at points spaced from each other and approximately at equal distances from a point located midway between the ends of the string, said string sections adapted to be threaded through the loops of the string at the respective side portions of the upper and adapted to serve as means for tightening the loops whereby the opposite side portions of the shoe upper may be drawn toward each other, the string sections and the end portions of the strings being of such relative length that they may be tied together at the top of the upper in the form of a knot when the lace is applied and the loops are tightened.

1,504,158. BOTTLE CARRIER. WILLIAM J. SPAULDING, Gold Bar, Wash. Filed Aug. 15, 1923. Serial No. 657,514. 2 Claims. (Cl. 215—100.)



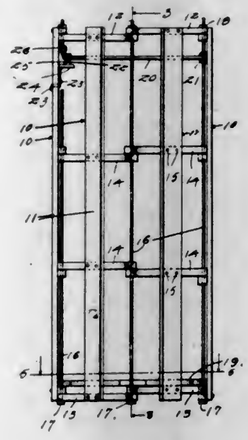
1. In an article of the character described, a single length of wire bent to form a pair of spring jaw members that are connected together by downwardly extending leg portions, and a bail member formed at its lower end with eyes adapted for surrounding said leg portions and to be freely slidable thereon.

1,504,159. BELL-SHAPED MAGNET. HERMANN STEINHART, Stuttgart, Germany, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Filed Oct. 13, 1922. Serial No. 594,403. 3 Claims. (Cl. 171—209.)



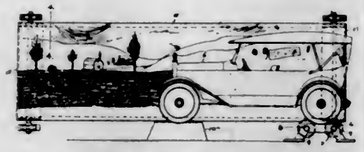
1. A bell-shaped magnet for magneto-electric machines and apparatus, comprising, in combination, straight profile bars consisting of magnet steel and having recesses at the outer surfaces of their ends, and yokes having flanges, of which the portions at the magnet bar ends are pressed down into said recesses.

1,504,160. POWER INSTALLATION. THEODOR STEIN, Schoneiche, Germany, assignor to General Electric Company, a Corporation of New York. Filed Aug. 16, 1922. Serial No. 582,190. 5 Claims. (Cl. 60—94.)



1. In a power installation, the combination of a prime mover, a condenser into which it exhausts, a hot water storage reservoir from which hot water is drawn for industrial purposes, a conduit connecting the cooling water exit of the condenser to the reservoir, means for supplying a uniform quantity of cooling water to the condenser, means for disconnecting said conduit from the reservoir when the level therein reaches a predetermined high point, and means for increasing the flow of cooling water to the condenser when the conduit is thus disconnected.

1,504,161. GOVERNING DEVICE. GUY B. STONE, Chicago, Ill. Filed Mar. 17, 1919. Serial No. 283,109. 16 Claims. (Cl. 290—40.)



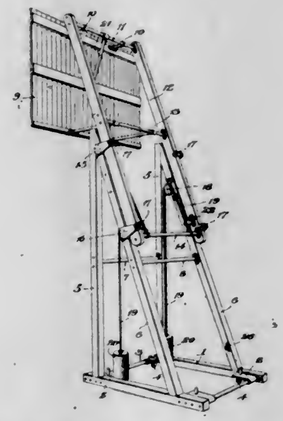
1. In an engine governor, the combination with means actuated by the engine for moving an engine throttle valve; of means for retarding the movement of said throttle moving means by a retarding action varying with the degree of opening of the valve.

1,504,162. COLLAPSIBLE CRATE. GEORGE H. TATGE, CHARLEY MANZER, and EARL MANZER, Norfolk, Nebr. Filed Jan. 31, 1923. Serial No. 616,033. 1 Claim. (Cl. 217—43.)

A collapsible crate having an even number of frame units, each unit consisting of a main slat and transverse slats, said transverse slats extending equidistantly from opposite sides of the main slat, the transverse slats of alternate units being superimposed on the adjacent transverse slats and at the ends, tie rods passing through said ends parallel to the main slats and constituting pivots for the units, a form ring within the crate, means pivoting said ring to one of the main slats, and a fastening latch on said ring on another slat.

1,504,163. DEVICE FOR INSTRUCTION IN AUTOMOBILE DRIVING. JOHN H. THEISS, Parlin, N. J. Filed Nov. 4, 1922. Serial No. 599,165. 1 Claim. (Cl. 35—12.)

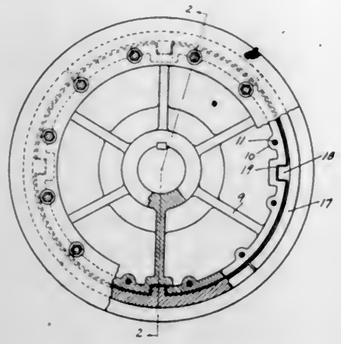
An instruction apparatus of the character described comprising a plurality of grooved rollers arranged in pairs, a shaft receiving one roller of each pair whereby rotation of these last mentioned rollers is transmitted to the shaft, a gear keyed to one end of said shaft, spaced parallel vertically disposed shafts mounted for rotation, a gear keyed to one of said vertically disposed shafts and meshing with the gear first mentioned, grooved idle rollers fixed to the ends of said vertically disposed shafts and a panoramic belt trained over the grooved idle roller as and for the purpose specified.



1,504,164. MANUFACTURE OF DYESTUFF INTERMEDIATES. JOHN THOMAS, Carlisle, England, assignor to Scottish Dyes, Limited, Carlisle, England. Filed Aug. 3, 1923. Serial No. 655,548. 2 Claims. (Cl. 260—57.)

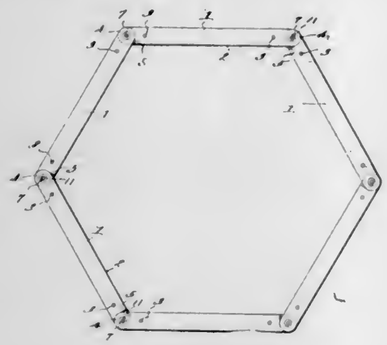
1. The process which consists in chlorination of 2-methyl-anthraquinone and direct oxidation of the product of the aforesaid chlorination all while dissolved in strong sulphuric acid with no isolation of intermediate products.

1,504,165. MANUFACTURE OF QUINIZARINE AND THE LIKE. JOHN THOMAS, Carlisle, England, assignor to Scottish Dyes, Limited, Carlisle, England. Filed Aug. 3, 1923. Serial No. 655,549. 3 Claims. (Cl. 260—58.)



1. The process which consists in the chlorination by free chlorine in concentrated sulphuric acid of a hydroxy-anthraquinone containing a hydroxy group in the alpha position.

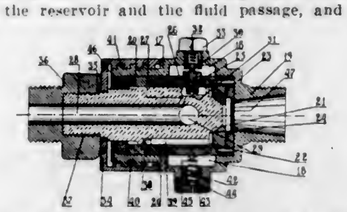
1,504,166. BASKET-BALL BACK-STOP. ALBERT E. THORNLEY, Pawtucket, R. I., assignor to Narragansett Machine Company, Pawtucket, R. I. Filed July 28, 1923. Serial No. 654,416. 7 Claims. (Cl. 46—59.)



5. In a basket ball back stop, a portable base frame having inclined guides, and a movable frame having a back stop board and slidable on said guides.

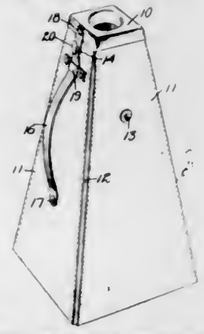
1,504,167. SAFETY EXPANSION BRAKE DRUM. WALTER C. TROUT, Lufkin, Tex. Filed July 3, 1923. Serial No. 649,224. 5 Claims. (Cl. 188—218.)

1. In a hoisting drum, a brake drum comprising a drum support, a removable drum band made up of a plurality of sections spaced apart, means on each section to prevent slipping of said sections on said drum support, and means to secure said sections on said support, including an outer retaining plate on said support, having a groove to receive said sections.



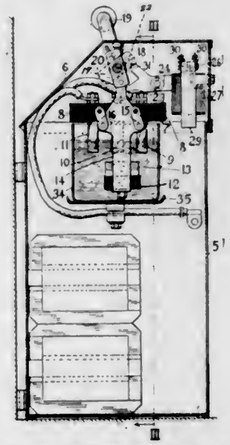
1,504,168. GRAIN BIN. CARL H. VIEBROCK and HENRY W. VIEBROCK, Douglas, Wash. Filed Aug. 12, 1922. Serial No. 581,547. 1 Claim. (Cl. 20—1.2.)

A bin of the class described formed of a plurality of sections which are hingedly connected together, each section being composed of a plurality of pieces connected together in staggered relation, one end of each piece being convex and its other end substantially concave, the convex ends projecting beyond the concave ends to form hinge parts and the concave ends of the pieces of one section engaging the convex ends of the pieces of the adjacent section.



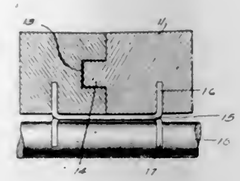
1,504,169. LUBRICATING DEVICE. FRANÇOIS WECKMAN, Herstal, Belgium. Filed Oct. 26, 1922. Serial No. 597,110. 2 Claims. (Cl. 184—56.)

1. An automatic lubricating device comprising a tap having a plug for regulating the admission of a fluid under pressure, through a fluid passage, a lubricant reservoir, a needle valve controlling communication between the reservoir and the fluid passage, and a rigid



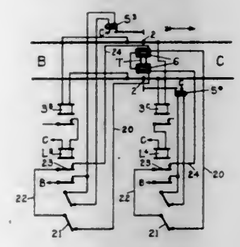
connection between the valve and the plug for simultaneously moving the valve and the plug, to open position.

1,504,170. COLLAPSIBLE MEGAPHONE. ANTHONY C. WEINS, Racine, Wis. Filed Mar. 28, 1923. Serial No. 628,341. 11 Claims. (Cl. 181—27.)



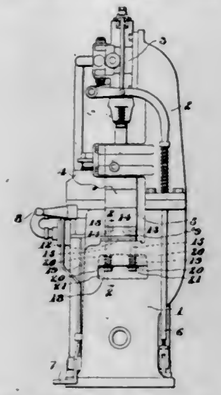
1. A collapsible megaphone comprising side members, hinges connecting them at adjacent edges, a mouth piece having an annular polygonal flange adapted to fit closely over the side members at one end thereof, and a circular flange adapted to fit into and tangentially contact the side members, said mouth piece holding the side members in open position, and means to secure the mouth piece in place, substantially as set forth.

1,504,171. ELECTRIC SWITCH. HAROLD ELIJAH WHITE, Montclair, N. J., assignor to Crocker-Wheeler Company, Ampere, N. J., a Corporation of New Jersey. Filed Jan. 16, 1920. Serial No. 351,843. 2 Claims. (Cl. 200—6.)



1. An electric switch comprising a support, a fixed contact carrying element carried by the support, a movable contact-carrying element, and equal parallel links in a triangularly disposed relation for connecting points in fixed triangular relation on the movable contact-carrying element with points in fixed triangular relation on the support, substantially as described.

1,504,172. SILO STRUCTURE AND ANCHORING MEANS THEREFOR. JERRY WILLEY, Des Moines, Iowa. Filed Jan. 2, 1923. Serial No. 610,382. 4 Claims. (Cl. 20—1.4.)

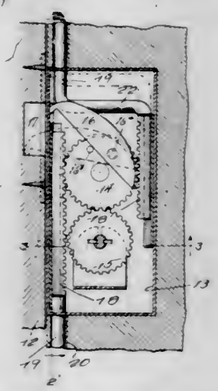


1. In combination with a silo having a plurality of vertical staves arranged with coacting tongues and grooves on their adjacent edges, an anchoring means for preventing twisting movement of staves relative to each other, said anchoring means comprising a member adapted to extend over the joint of two adjacent staves, tapered prongs on said member adapted to extend into said staves and spaced fingers projected from the ends of said member in a direction opposite from said prongs for receiving an iron band therebetween for forming a pocket therefor.

1,504,173. AUTOMATIC TRAIN-CONTROL SYSTEM. SEDGWICK N. WIGHT, Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Mar. 18, 1921. Serial No. 453,302. 23 Claims. (Cl. 246—33.)

1. In a train control system for single track railroads provided with track circuits, the combination with a track element having an inherent tendency to assume an active stopping condition and adapted when in that condition to communicate a stopping influence inductively through an intervening air gap to a train traveling in either direction thereby, said track element including an iron core and a winding thereon, two separate control circuits for said track element each passing through said winding, said track element being in the same inactive condition if either of said circuits is closed, and means controlled by a plurality of track circuits on opposite sides of the track element for separately and independently governing said circuits.

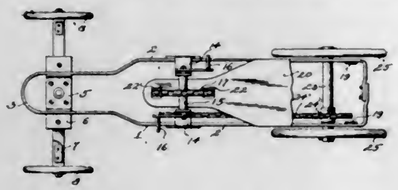
1,504,174. FORGING MACHINE. WADE H. WINEMAN, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 31, 1917. Serial No. 209,793. 20 Claims. (Cl. 76—5.)



1. In a forging machine, a frame, an anvil thereon, and means operative automatically to constantly maintain the anvil in rigid relation to the frame despite wear therebetween.

1,504,175. COATING COMPOSITION. LYNDON D. WOOD, Bala, Pa., assignor to Fototone Co., Inc., Rochester, N. Y., a Corporation of New York. Filed Sept. 22, 1922. Serial No. 589,951. Renewed May 1, 1924. 2 Claims. (Cl. 219—76.)

1. A composition for coating surfaces for the purpose of permitting electric currents to operate by the action of light comprising a mixture of metallic strontium, barium, sulphur and tungstate of soda.

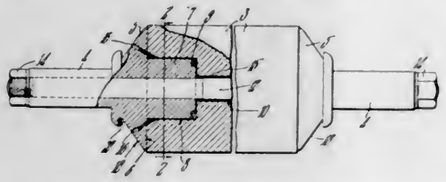


1,504,176. LOCK. JAMES WRIGHT, New York, N. Y. Filed Sept. 19, 1923. Serial No. 663,629. 2 Claims. (Cl. 70—7.4.)

1. In a lock and in combination with a casement and closure coacting therewith, coacting eyes carried by said casement and closure, a lock carried by the closure and engageable with the casement and having a bolt engageable with the casement, a pin normally engaging the closure carried eye, and a connection between said pin and bolt shifting the pin to simultaneously engage the eyes when the bolt is operated to engage the casement.

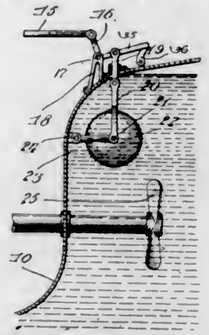
1,504,177. TOY VEHICLE. ROSS E. WYATT, Mansfield, Ohio. Filed May 9, 1923. Serial No. 637,864. 1 Claim. (Cl. 208—32.)

In a device of the class described, the combination with a frame including a pair of side bars, a wheeled axle for supporting the front end of said frame, a wheeled axle for supporting the rear end of said frame, a sprocket secured to the rear axle, a pair of standards supported by the side bars, a crank actuated shaft journaled in the upper ends of the standards, a sprocket secured to said shaft, a pair of sprockets supported between the



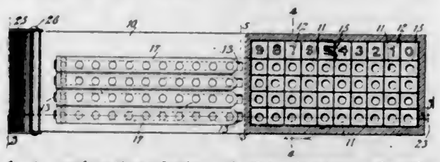
base, a sprocket chain connecting one of the sprockets and the second named sprocket, a sprocket chain connecting the other sprocket and the sprocket on the rear axle, a seat having its rear end supported by the frame and its forward end engaged between and supported by said standards, said seat having openings therein for passage of one of the sprocket chains.

1,504,178. PROCESS FOR THE PRODUCTION OF ETHERS OF CARBOHYDRATES. GEORGE YOUNG, London, England, assignor of one-third to Augustus Dacre Lacy, and one-third to Richard Charles Denington, both of London, England. Filed Aug. 28, 1922. Serial No. 584,860. 3 Claims. (Cl. 260—152.)



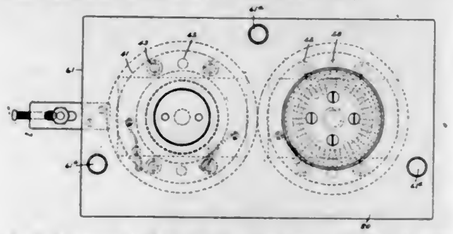
2. Process for the production of ethers of cellulose which consists in intimately mixing the cellulose with a 40 per cent aqueous solution of caustic soda, the resulting mass being subjected to gentle pressure for the removal of the excess of liquid so that the residue consists approximately of two parts of cellulose with 2 or 3 parts of caustic alkali and 1 to 1½ parts of water, by weight respectively, when the cellulose thus treated is placed into the autoclave or other reaction vessel and the alkylating agent is introduced in about the proportion of 20 molecular weights to one molecular weight of the cellulose to be treated, such autoclave or other reaction vessel being heated to 100° to 150° centigrade, and the mass agitated by any convenient means whereby the complete reaction takes place within 6 to 8 hours resulting in a product that is insoluble in alcohol.

1,504,179. ROLL FOR PAPER-MANUFACTURING MACHINES. PAUL W. BIDWELL, Easthampton, Mass., assignor to B. F. Perkins & Son, Inc., Holyoke, Mass., a Corporation of Massachusetts. Filed Aug. 2, 1922. Serial No. 579,162. 6 Claims. (Cl. 92—49.)



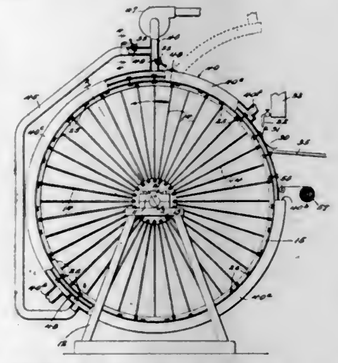
1. A roll comprising a cylindrical body having an aperture extending therethrough; said aperture being enlarged at opposite ends thereof to form recesses, an axle extending through said aperture and projecting beyond the ends of said body, hollow trunnions fitting the projecting ends of said axle, said trunnions having an unflanged substantially flat face for engaging the ends of said body, trunnion extensions projecting into said recesses and having cross-sectional contours corresponding to that of said recesses, and nuts threaded upon the extremities of said axle and bearing against said trunnions for binding together said body and trunnions.

1,504,180. PROPELLING MECHANISM FOR BOATS. ALFRED BONOM, Paterson, N. J. Filed Sept. 19, 1921. Serial No. 501,858. 3 Claims. (Cl. 137—159.)



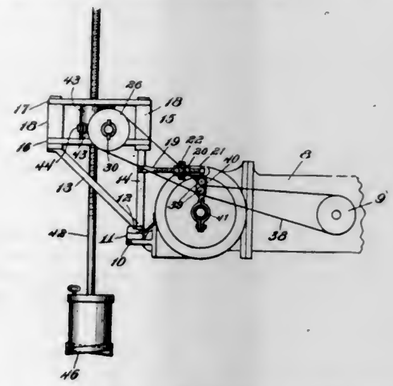
1. The herein described apparatus comprising a propeller, a motor for actuating the propeller, a valve controlling the motor and consequently the propeller, a float mounted adjacent the propeller, a yoke supporting the float and adapted for connection to a propelled body, a second yoke connected to the float, and an operative connection between said second yoke and the valve.

1,504,181. PERFORATING DEVICE. KARL HENRY BORLAND, Watertown, N. Y. Filed Mar. 7, 1923. Serial No. 623,516. 5 Claims. (Cl. 164—111.)



1. A perforating device of the character described, comprising a perforated base plate, a perforated top plate associated with the base plate so that when they are brought together the perforations of one plate aline with the perforations of the other plate, a plurality of punch members adjustably mounted on the top plate and adapted to project through the perforations in said plate, a hinged cover constituting a plunger to depress all of the punch members simultaneously, and means provided in conjunction with the plates for retaining the punch members in position in the top plate so that they may be operated.

1,504,182. PUNCH AND DIE. JOHN J. CARTER, Anderson, Ind., assignor to General Motors Corporation, a Corporation of Delaware. Filed May 6, 1922. Serial No. 558,921. 4 Claims. (Cl. 164—118.)

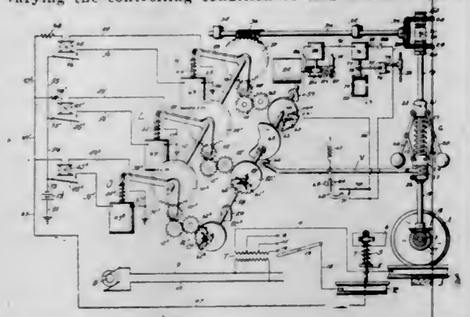


1. In a punch and die, the combination of the die member having a punch receiving orifice; a punch guide attached to said die and having punch guiding orifice in alignment with the die orifice; a punch guided by the punch guide; and means for moving the punch into and out of the die, said means including a punch block adapted to be attached to a punch press plunger and having a floating connection with the punch.

1,504,183. MACHINE FOR MANUFACTURING GELATIN SHEETS OR FILMS. HENRY M. CONGER, Washington, D. C., and ASHER O. TRAVIS, Del Ray, Va., assignors, by direct and mesne assignments, to Seattle Luminous Products Corporation, Seattle, Wash. Filed June 30, 1921. Serial No. 481,586. 16 Claims. (Cl. 18—15.)

2. An apparatus of the class described, in combination, a rotatable support, an arc-shaped member having a receiving surface of glass or similar material detachably secured to said rotatable support, the center or curvature of said member being on the axis of rotation of said rotatable support and means for spreading a gelatinous substance on said surface.

1,504,184. EARTH-BORING MACHINE. EVERETTE C. DE SHON, Clarksdale, Mo. Filed Feb. 17, 1922. Serial No. 537,278. 6 Claims. (Cl. 255—22.)

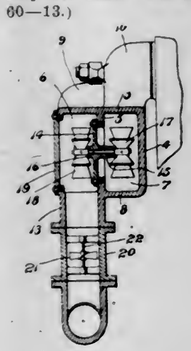


1. In a device of the class described, a frame, a power shaft carried by said frame, a normally idle power wheel upon said shaft, means governed by movements of said shaft longitudinally for causing the shaft to be coupled to and rotated in either direction from said power wheel, means for sliding said shaft, and drill mechanism including a drill shaft having threaded engagement with the frame and rotatable in one direction or the other according to the direction of rotation of said power shaft.

1,504,185. AUTOMATIC SPEED-CONTROL SYSTEM FOR RAILWAYS. CHARLES F. ESTWICK, Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Mar. 31, 1917, Serial No. 158,822. Renewed Dec. 29, 1922. 37 Claims. (Cl. 246—35.)

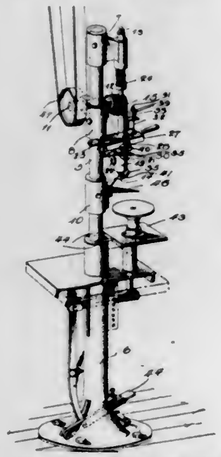
1. In an automatic train control system, apparatus for controlling the movement of a railway vehicle including a permissive speed device adapted to assume

different controlling conditions, means controlled by the progress of the vehicle along the track for gradually varying the controlling condition of said device so as to



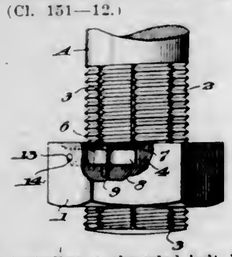
increase or decrease the permissive speed established thereby, and impulse transmitting means comprising elements partly on the vehicle and partly along the track for governing the last mentioned means in accordance with traffic conditions.

1,504,186. WHISTLING BUBBLE BLOWER. CLEVE E. EVANS and IONA H. ANGELSBERG, Dallas, Tex., assignors of one-third to H. G. Stearns, Dallas, Tex. Filed May 30, 1923. Serial No. 642,373. 2 Claims. (Cl. 46—31.)



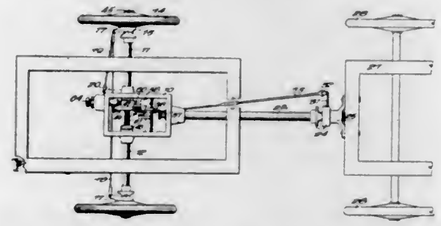
1. A device adapted for the blowing of bubbles, comprising a hollow vessel with a flaring, film-and-bubble-holding outlet, a lower receptacle for suds, and an upwardly inclined tubular mouth-piece through which air is blown through the vessel, the mouth-piece being notched to form a whistle, and provided with an air deflector to prevent air from the whistle from reaching the blowing bubble.

1,504,187. CARBURATION FOR INTERNAL-COMBUSTION ENGINES. JAMES J. FORTIER and JOHN W. SHERWOOD, Grand Rapids, Mich.; said Fortier assignor of one-sixteenth to James R. Fortier, Grand Rapids, Mich. Filed July 19, 1920. Serial No. 397,307. 3 Claims. (Cl. 60—13.)



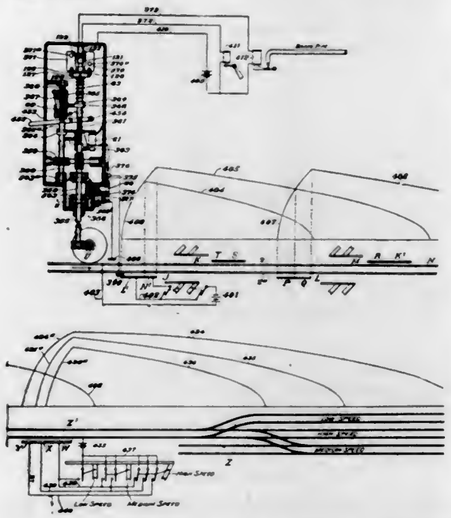
1. In combination with a manifold for internal combustion engines having two horizontal compartments located side by side and separated by a partition, said manifold being adapted to be applied to an internal combustion engine, the exhaust gases from the engine traversing one compartment and the intake mixed fuel and air the other compartment, the front side of the front compartment having an opening therethrough and the partition also having an opening therethrough, a plate attached to the partition and formed with a horizontal journal bearing, a shaft rotatably mounted in and passing through said bearing, a fan secured at each end of the shaft, and a plate attached to and covering the opening in said front side of the front compartment.

1,504,188. CAN-CAPPING MACHINE. JOSEPH M. FREDERICK, Baltimore, Md., assignor to Pompeian Romanza Corporation, Baltimore, Md. Filed Jan. 26, 1923. Serial No. 615,029. 3 Claims. (Cl. 113—24.)



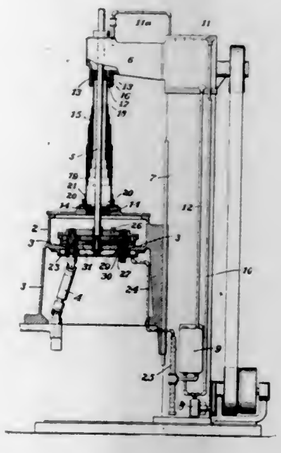
1. In a can capping machine, of the character described, in combination, a standard, a crimping device comprising brackets mounted on said standard, a non-rotatable shaft mounted in said brackets and having a flaring portion at the end thereof, a sleeve enveloping said shaft for a portion of its length, means whereby said sleeve is rotated, a rotatable head rigidly associated with said sleeve, a crimping arm resiliently pivoted in said rotatable head, a crimping wheel mounted in said crimping arm, means adapted to bring said crimping wheel into close proximity with said flaring portion of said shaft, said means comprising a collar having a beveled portion at the end thereof, an operating handle pivoted to said standard and associated with said collar, and a wheel mounted on said crimping arm and adapted to co-act with said beveled portion of said collar, a table adapted to be upwardly moved, and means associated with one of said brackets holding a can in operative position, said non-rotatable shaft being resiliently mounted thereby to hold the can with the necessary degree of firmness.

1,504,189. LOCK NUT. CHARLES E. REES, Newtonville, Mass. Filed Feb. 3, 1923. Serial No. 616,782. 1 Claim. (Cl. 151—12.)



A nut-lock including a threaded bolt having a plurality of longitudinally disposed ratchet grooves or notches extending across the threads, a nut having a substantially L-shaped recess formed in the inner face at one of its angles, a dog or pawl located within the recess, a spring for holding the dog or pawl in its normal position, movable means protruding beyond the outer surface of the nut, and in position to be pressed inwardly against the dog or pawl and against the action of the spring when it is desired to unlock the nut, a cover-plate corresponding in shape with the recess and adapted to close same, and a screw serving to hold the cover-plate in position and as the pivot of the dog or pawl.

1,504,190. TRAILER. OMAR E. CLARK and JAMES T. CLARK, Denver, Colo. Filed Jan. 30, 1922. Serial No. 532,736. 14 Claims. (Cl. 280—33.55.)



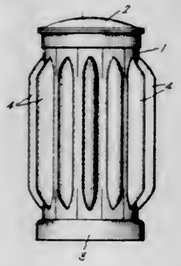
1. The combination with a trailer having shiftable supporting wheels, of means for coupling the trailer to a draft vehicle, a controlling link for the trailer wheels extending longitudinally of the coupling means and having its front end shiftable to opposite sides of the same, and means operated by the wheels on their reverse rotation for automatically shifting said front end.

1,504,191. RAILWAY-TRAIN-CONTROL SYSTEM. ALBERT V. T. DAY, Rye, N. Y., assignor to The Union Switch and Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Original application filed June 4, 1913, Serial No. 771,650. Renewed Mar. 14, 1922, Serial No. 543,767. Patent No. 1,479,286, dated Jan. 1, 1924. Divided and this application filed Feb. 6, 1923. Serial No. 617,401. 23 Claims. (Cl. 246—178.)

17. Railway traffic controlling apparatus, comprising contact rails of different lengths located in the trackway, and governing mechanism on a vehicle controlled by said rails and responsive to different degrees to rails of different lengths.

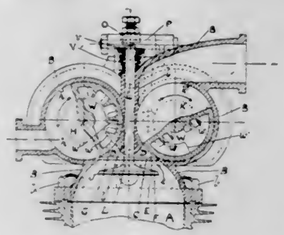
1,504,192. DRILLING-MACHINE-OILING SYSTEM. WILLIAM R. FOX, Jackson, Mich. Filed Mar. 17, 1923. Serial No. 625,923. 12 Claims. (Cl. 77—22.)

1. In combination in a drilling machine, a column, a head movable along the column vertically and having a gear chest, a gear box at the top of the column, a vertical shaft driven from means in the gear box and extending down into the gear chest to drive gearing therein, means for supplying oil to the gear box, a sleeve made up of telescoping members enclosing the said vertical shaft, the upper one of said members being connected with the gear box and the lower member with the gear chest to direct oil from the gear box to the gear chest, and prevent it from being thrown off upon the surroundings by the revolution of said shaft, substantially as described.



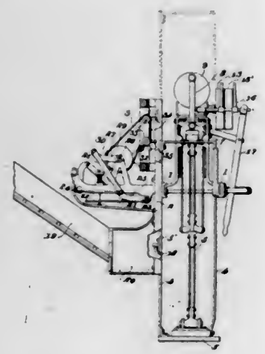
1,504,193. ELECTRICAL PROTECTING APPARATUS. EDWARD D. TREANOR, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Oct. 3, 1921. Serial No. 505,092. 1 Claim. (Cl. 175—361.)

In electrical protecting apparatus, the combination with a main transformer, of an auxiliary transformer provided with a fuse-blowing winding adapted to have



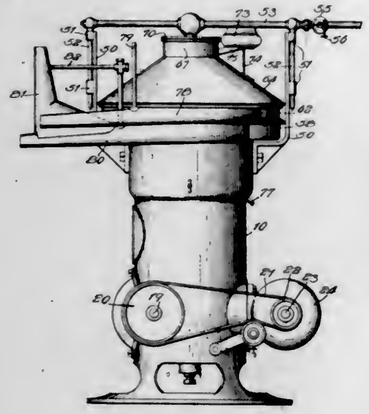
fuse-blowing current induced therein upon an unbalancing of the magnetic fluxes in said auxiliary transformer, said auxiliary transformer being mounted upon a superstructure carried by said main transformer to form a unitary structure, a fuse in circuit with said fuse-blowing winding, a casing enclosing said main and auxiliary transformers, and a separate compartment containing said fuse and carried by said casing to separate the fuse from the transformer space within the casing, whereby vapor from within the transformer space is prevented from reaching said fuse.

1,504,194. CONTAINER AND METHOD FOR PRODUCING IT. EDWARD D. TREANOR, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed July 3, 1922. Serial No. 571,558. 8 Claims. (Cl. 113—116.)



1. The method of producing a container, including the forming of spaced notches in an edge of a sheet metal blank, forming corrugations terminating between said notches while the edges of said notches remain in the original plane of said blank, the notches being substantially closed by a flow of the metal at their edges in said plane, and shaping the corrugated sheet to form the container wall.

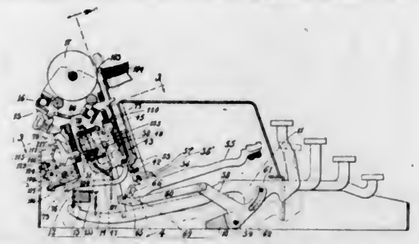
1,504,195. VALVULAR ARRANGEMENT OF INTERNAL-COMBUSTION ENGINES. DOUGLAS GEORGE FISHER WHITE, Newton Abbot, England, and LYON WILSON NEILSON, Glasgow, Scotland. Filed July 12, 1923. Serial No. 651,158. 2 Claims. (Cl. 123—190.)



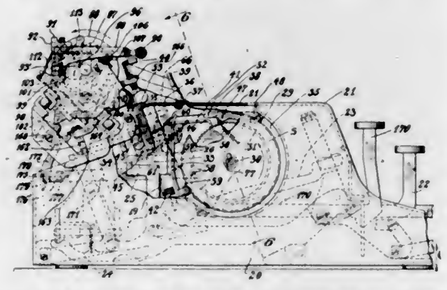
1. In an internal combustion engine a cylinder, a head thereon having a casing providing a poppet valve opening and seat, and also providing a pair of cylindrical valve housings, each having a port arranged in communication with said valve seat, one of said housings having an induction port and the other having an exhaust port, a poppet valve to open and close said valve seat, a pair of cylindrical rotary valves one in each of said housings, and respectively arranged to open and close communication between the cylinder and the inlet and exhaust, and bearings for the said rotary valves, said bearings having air gaps therein, and said valves having means cooperating with said air gaps to cause air to circulate around and cool said bearings.

1,504,196. COTTON TRAMPER. WILLIAM DORSETT WILSON, Belzoni, Miss. Filed Jan. 26, 1924. Serial No. 688,746. 5 Claims. (Cl. 100—25.)

1. In a cotton tramper, a cotton feed box, a tramper head having a back adapted during a portion of the stroke of the tramper head to close said cotton feed box, pivoted gates adapted to close the cotton feed box and means operated by the tramper head to swing said pivoted gates during a portion of its stroke.



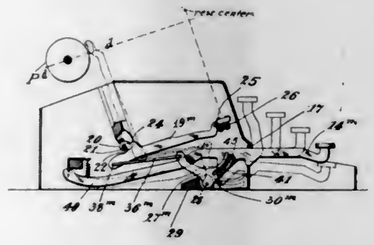
1,504,197. METHOD OF PASTEURIZING MILK, ETC. WILLIAM J. DAVIS, Chicago, Ill.; Gladstone B. Davis administrator of the said William J. Davis, deceased. Filed Oct. 2, 1922. Serial No. 591,758. 2 Claims. (Cl. 99—15.)



1. The method of pasteurizing milk, etc., which consists in exposing the liquid for a brief interval to a pasteurizing heat in excess of 144° Fahrenheit while said liquid is being positively rotated and subjected to a strong centrifugal action.

1,504,198. TYPEWRITING MACHINE AND THE ELEMENTS THEREOF. LOUIS A. NEMCOVSKY, New York, N. Y. Filed Sept. 21, 1922, Serial No. 589,571. Renewed June 28, 1924. 34 Claims. (Cl. 197—186.)

1. In a typewriting machine, in combination, a frame including a segment plate, a universal bar assembled to said frame adjacent said segment plate and extending to the rear thereof, escapement mechanism and ribbon shift mechanism to the rear of said segment plate, both actuated from said universal bar, part of said universal bar actuated mechanism extending between the front and rear of said universal bar.



1,504,199. TYPEWRITING MACHINE. LOUIS A. NEMCOVSKY, New York, N. Y. Filed Dec. 19, 1922. Serial No. 607,766. 14 Claims. (Cl. 197—151.)

1. In a typewriting machine, in combination, a base frame, a separable frame comprising a pair of standards and a segment plate secured to and connecting said standards, each of said standards having ribbon spool mounting means thereon, and means securing said standards upon said base frame.

1,504,200. TYPEWRITING MACHINE. LOUIS A. NEMCOVSKY, New York, N. Y. Filed June 26, 1923. Serial No. 647,776. 31 Claims. (Cl. 197—22.)

1. In a typewriting machine, in combination, a casing, a system of key levers pivoted at their rear ends, an inclined segment plate narrower than said system of key levers, type bars pivoted with their width radially thereof and extending substantially parallel to each other and displaceable in planes radially of said segment plate, a linkage system connecting said key levers to said type bars, each said linkage system including a camming connection affording a mechanical advantage of operation co-related with the length of key lever and the angular relation of the type-bar for substantially uniform touch of all the keys and further including pitman links of uniform length.

THE

OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 325—No. 2. TUESDAY, AUGUST 12, 1924. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $5.00 per annum; single numbers, 10 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Interference Notices.

U. S. Patent Office, *Washington, July 17, 1924.*

William P. Dunham, his assigns or legal representatives, take notice:

An interference having been declared by this Office between Kaufmann Bros. & Bondy, 33 East Seventeenth Street, New York, N. Y., for registration of a trade-mark and trade-mark registered January 21, 1919, No. 124,192, to William P. Dunham, 501 Fifth Avenue, New York, N. Y., and a notice of such declaration sent by registered mail to said William P. Dunham at the said address having been returned by the post-office authorities as undeliverable, notice is hereby given that unless said William P. Dunham, his assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, July 21, 1924.*

The Vim Medicine Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between J. P. Miller, Box 56, Port Gibson, Miss., for registration of a trade-mark and trade-mark registered February 28, 1905, No. 44,243, to The Vim Medicine Co., 510 National Union Building, Toledo, Ohio, and a notice of such declaration sent by registered mail to The Vim Medicine Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless The Vim Medicine Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, July 21, 1924.*

American Chemical Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the Waverly Oil Works Company, Fifty-fourth Street and Allegheny Valley Railroad, Pittsburgh, Pa., for registration of a trade-mark and trade-mark registered August 6, 1895, No. 26,907, to the American Chemical Co., Minneapolis, Minn., and a notice of such declaration sent by registered mail to the American Chemical Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless the American Chemical Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Aug. 1, 1924.*

Lone Star Blacking & Mfg. Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Tom A. Tirado, jr., 703 West Alabama Street, Houston, Tex., for registration of a trade-mark and trade-mark registered May 31, 1910, No. 78,255, to Lone Star Blacking & Mfg. Co., 852 Commerce Street, Dallas, Tex., and a notice of such declaration sent by registered mail to said Lone Star Blacking & Mfg. Co. at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Lone Star Blacking & Mfg. Co., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

U. S. Patent Office, *Washington, Aug. 2, 1924.*

Eagle Water Heater Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of the American Heater Corporation, of 1100 North Sixth Street, St. Louis, Mo., for registration of a trade-mark and trade-mark registered August 7, 1906, No. 55,000, to the Eagle Water Heater Company, 126–130 Sixth Avenue, New York, N. Y., and a notice of such declaration sent by registered mail to said Eagle Water Heater Company at the said address of record having been returned by the post office undeliverable, notice is hereby given that unless said Eagle Water Heater Company, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the Official Gazette for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

Condition of Applications Under Examination at Close of Business August 1, 1924.

(Total number of applications awaiting action, excluding Trade-Mark Division, 60,542; Trade-Mark Division, 1,748. Oldest new case, Nov. 20, 1923; oldest amended, Nov. 26, 1923. The dates given are 1923 except where * indicates 1924.)

DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decision.

STEVENS *v.* HARSEL AND NALL.

Decided April 15, 1924.

1. INTERFERENCE—SUBSTITUTION BY PRIMARY EXAMINER OF REISSUE APPLICATION FOR ANOTHER APPLICATION.

Where an interference was dissolved on the ground that the issue was not patentable to the party H. and N. over certain claims of their parent application, which had become a patent, and H. and N. after an appeal filed an application for reissue of their patent, with the claim of the issue included, and withdrew their appeal, *Held* that the Primary Examiner committed no error in proceeding ex parte to reform the interference by substituting the reissue application of H. and N. after obtaining jurisdiction under the approval of the Commissioner.

2. SAME—SUBSTITUTION BY PRIMARY EXAMINER OF EARLIER APPLICATION.

Wherever the Primary Examiner finds an earlier application of a party already involved in an interference, which earlier application the Examiner holds should be substituted for the application actually involved, the Examiner should proceed ex parte and make the substitution, if no testimony has been taken and the issue remains unchanged.

3. SAME—SAME—ACTION BY OPPOSING PARTY.

After the ex parte substitution by the Primary Examiner of an earlier application of a party already involved in an interference the opposing party has his opportunity to bring such motion or petition as he may believe necessary to correct any supposed error of the Primary Examiner in making the substitution.

4. SAME—FILING OF REISSUE APPLICATION AS SUBSTITUTE FOR APPLICATION IN INTERFERENCE—SUBSEQUENT WITHDRAWAL OF APPEAL FROM ACTION OF LAW EXAMINER DISSOLVING ORIGINAL INTERFERENCE.

Where H. and N. appealed from a decision of the Law Examiner dissolving the interference on the ground that the issue was not patentable over certain claims of a patent granted to them, then filed an application for reissue of the patent, with the claim of the issue included in it, and withdrew their appeal, whereupon S. moved for judgment on the record on the ground that such withdrawal of the appeal amounted to an abandonment of the invention of the issue, *Held* that since the reissue application was filed before the withdrawal of the appeal the interference was not terminated and the Examiner of Interferences was right in dismissing the motion for judgment on the record.

ON PETITION.

TIRE-MAKING MACHINE.

Mr. Albert L. Ely for Stevens.

Mr. R. S. Trogner for Harsel and Nall.

KINNAN, *First Assistant Commissioner:*

This case is before me on petition by the party Stevens—

that a certain order or letter of the Examiner of Interferences and letter of the Examiner, dated Jan. 23, 1924, be set aside and that judgment on the record in the interference * * * be entered forthwith.

The petition also prays that—

the new interference set up by said order and Examiner's letter of Jan. 23, 1924, be dismissed.

It appears from the record that an interference was declared between these parties on December 8, 1921, such interference having the same number as that borne by the present proceeding. In such interference an application, Serial No. 297,108, filed May 14, 1919, of Harsel and Nall, was included, and since the Stevens filing date was November 14, 1917, the latter was made senior party. Thereafter it appeared the application of Harsel and Nall was a division of an earlier-filed application filed prior, by a few days, to the filing of the Stevens application. Harsel and Nall in consequence moved to shift the burden of proof, while Stevens moved to dissolve on the ground that the issue was not patentable to Harsel and Nall because of certain claims in their parent application, which latter had, subsequently to the filing of the divisional application of Harsel and Nall, become a patent. The Law Examiner granted Stevens's motion, holding the issue unpatentable to Harsel and Nall in view of the claims in their parent application, which had become a patent on October 25, 1921, No. 1,395,182. On appeal to the Examiners in Chief the Law Examiner's decision was affirmed. Appeal was taken by Harsel and Nall to the Commissioner; but before hearing of such appeal Harsel and Nall filed an application for the reissue of their patent and incorporated the claim of the issue of this interference in such reissue application and then withdrew their appeal. Upon the withdrawal of this appeal Stevens moved before the Examiner of Interferences for a judgment on the record. This motion was dismissed January 23, 1924. Thereupon the Primary Examiner obtained jurisdiction, under the approval of the Commissioner, of the interference and reformed it by substituting the reissue application of Harsel and Nall. The issue remained the same and the interference was continued under the same number, all parties in interest being identical. Harsel and Nall brought a motion before the Examiner of Interferences to shift the burden of proof, which motion was dismissed because the date of filing by Harsel and Nall of their original application, on which their patent was granted and for which the reissue was filed, was prior to that of Stevens and the substitution of such reissue application by the Primary Examiner automatically made Harsel and Nall senior party and placed the burden of proof upon Stevens.

It is contended on the part of Stevens that the procedure of the Office, following the withdrawal of the appeal by Harsel and Nall to the Commissioner, was improper, was in violation of several of the rules of practice, and that the decision of the Examiner of Interferences dismissing the motion for judgment was in error, and that such withdrawal of the appeal by Harsel and Nall, notwithstanding they had already filed their reissue

application with the claim of the interference issue included in it, amounted to an abandonment of the invention of the issue and entitled Stevens to a judgment of priority. Especial reliance is placed upon the rules and the decisions which forbid the declaration of a second interference between the same parties after a termination of the first interference. Stevens vigorously contends the first interference was terminated when the appeal to the Commissioner was withdrawn. Stevens also contends the substitution of the reissue application of Harsel and Nall by the Examiner without notice to Stevens was improper and contrary to the rules and established procedure.

[1, 2, 3] A careful review of all the circumstances in this case fails to disclose that any error in procedure has been committed. While Rule 106 does provide for the substitution of a divisional for a parent application while an interference is proceeding, such rule does not specifically provide for the situation of the case at bar. Perhaps none of the other rules are so nearly pertinent as Rule 106. However, it is believed the practice is fairly established that whenever the Examiner finds an earlier application of a party already involved in an interference should be substituted for the application actually involved the Examiner should proceed ex parte and make the substitution, if no testimony has been taken. It is not thought such a proceeding is an inter partes one. After the substitution the opposing party has his opportunity to bring such motion or petition as he may believe necessary to correct any supposed error of the Primary Examiner in making the substitution. The making of the substitution by the Examiner amounts to a holding by him that the substituted application discloses the issue and that it is patentable to the party involved in that application, subject to the interference.

[4] Most of Stevens's contentions that the rules of practice have been violated are based upon his view that the first interference was terminated and the present proceeding is a second interference. It is believed this view is in error. There has been but one interference which has not been concluded. The preliminary and interlocutory proceedings have not served to terminate the original interference. The fact that prior to the withdrawal of the appeal Harsel and Nall had pending in this Office their reissue application with the claim of the issue included in it precludes a holding that such withdrawal resulted in a dissolution of that interference. Their claim or demand was continuous and their reissue application was filed to overcome the grounds upon which that issue had been denied them by the Law Examiner and the Examiners in Chief. It is believed the procedure of the Office follows similar procedure in equity courts and that no specific rule is violated in following the practice so far involved in the instant case.

It is not seen that any rights of Stevens have been prejudiced by this procedure. If the Law Examiner and the Examiners in Chief were correct in their holding that the issue is not patentable to Harsel and Nall in their divisional application because the invention of the issue is already claimed in their patent, then this issue is unpatentable likewise to Stevens unless he can overcome by an interference proceeding the effect of that patent to Harsel and Nall.

Finding no error in the acts of the tribunals below, the petition is denied.

Court of Appeals of the District of Columbia.

IN RE JOHNSON, JR.

No. 1,589. Decided February 5, 1924.

INVENTION—NEW FUNCTIONS—INCREASED EFFICIENCY.

A snap clamp having opposed jaws, one of which is a multiple jaw, with its members independently movable toward and from the other jaw, *Held* patentable over snap clamps which are similar to it in character except for the feature of the double or divided jaws, where new functions and increased efficiency and utility have been produced by means of the double jaws.

Mr. E. G. Siggers for Johnson.

Mr. T. A. Hostetler for the Commissioner of Patents.

Argued before SMYTH, Chief Justice, ROBB, Justice, and MARTIN, Presiding Judge United States Court of Customs Appeals.

MARTIN, *J.:*

This is an appeal from a decision of the Commissioner of Patents rejecting 13 claims of the application. Six of these have been withdrawn by the applicant, leaving claims 1, 2, 5, 6, 9, 11 and 13 still in question. Claims 1, 6, and 11 are copied as sufficiently illustrative:

1. A snap clamp for tapping electric line conductors, having opposed jaws of like gripping area, one of which jaws is a multiple jaw with the members independently movable toward and from the other jaw.

6. A snap clamp for tapping electric line conductors, comprising two opposed jaws hingedly connected with one jaw having a normal constraint toward the other and said jaw being composed of a plurality of members with meeting edges extending lengthwise of the jaw and each member being independently elastically yieldable away from the first-named jaw.

11. A snap clamp for tapping electric line conductors, comprising two jaws hingedly connected together, one jaw being an effectively one-piece jaw and the other jaw comprising two separate members each yieldable and independently constrained toward the first-named jaw, the separate members of the second-named jaw having longitudinal meeting flanges at their meeting edges projecting away from the face of the jaw, and the first-named jaw having guide fingers at its side portions embracing those edges of the second-named jaw remote from the flanges.

The device covered by the appealed claims is a snap clamp designed to fit tightly upon any high-tension transmission wire so as to tap the line by grounding the electric current through a branch conductor connected with the clamp. The chief service of the device is to make that part of the transmission line which is beyond the clamp safe for workmen when engaged in removing or replacing insulators thereon. The clamp is fastened upon the end of a pole which is carried by the operator, by means of which it may be snapped over an overhead wire and wrenched free again after use. The clamp is made of metal, having one rigid or stationary jaw to which are hinged at one end two opposing jaws having a combined area equal to that of the first-named jaw. Each of the hinged or movable jaws is pressed against the stationary one by means of a separate spiral spring. The pressure of each spring upon its movable jaw is exerted through a metal rod which projects through the spring and through both jaws, having a head at one end bearing against the spring and at the other end a number of holes through any one of which a pin may be passed to bear against the stationary jaw. Different degrees of spring pressure may be secured by an adjustment of these pins. The stationary jaw carries a pair of arms to keep the movable jaws in alignment, and carries also the socket into which the branch or grounding conductor is soldered. The movable jaws have a straight inner edge of two flanges abutting one another. These are wide at the hinge end, and are narrowed at the free end, being rounded at their outer edges so as to prevent injury to the transmission wire to which the clamp may be attached.

It appears from the references that in the years 1912 and 1917 the present applicant secured patents upon certain snap clamps which were similar to this in character except for the feature of the double or divided hinged or movable jaws of the present device, the former inventions having but a single movable jaw. That jaw however was pressed against the stationary jaw by means of a spiral spring substantially as in the present device.

Upon these and other references the claims of the applicant were successively rejected by the Primary Examiner, the Examiners in Chief, and the Commissioner, who held in effect that the applicant had incorporated into the present device merely such features as were old in the art or such variations thereof as were produced without the exercise of invention.

We are constrained to disagree with this decision and to approve the claims of the applicant. The provision in this device for two independently-movable jaws, each forced toward the opposite jaw by an independent and adjustable spring, is a novel and useful construction which is not shown or suggested in the former patents nor any of the references, and by means thereof new functions and increased efficiency and utility have been produced. This device enables the clamp to carry a much heavier electric current before melting the solder as compared with the earlier clamps, without increase of weight or cost. It is true that multiple jaws designed to improve electric contacts are not new in the art, but in this case however other novel results are produced. The clamp is made capable of being snapped on or off of the line more easily and quickly than formerly since one spring jaw at a time may now be twisted sidewise either on or off of the wire by the operator, thereby requiring much less effort. This is an important quality in view of the hazardous position of the operator when applying the clamp. Also when snapped over the line this clamp automatically indicates by the alignment of the movable jaws whether it is properly seated on the wire. Again, it may be applied to the line at greater angles than the former clamps thus increasing the safety and efficiency of its operation; and because of the several holding springs it may the better be adjusted to the varying diameters of line conductors. These qualities disclose a unitary advance over the former art by way of invention and not mere mechanical skill only. *Regent* v. *Penn*, 121 Fed. 80; *Canda* v. *Michigan Malleable Iron Co.*, 124 Fed. 486; *Buchanan* v. *Perkins*, 135 Fed. 90; *General Electric Co.* v. *Yost Electric Mfg. Co.*, 139 Fed. 568; *Stuber* v. *Central Brass Stamping Co.*, 224 Fed. 712; *Loom Company* v. *Higgins*, 105 U. S. 580; 21 O. G. 2031. We refer also to the well-established rule that where as in this case a distinct advance has been made in a given art, and the question is close, it will be resolved in favor of the applicant, especially where his claims are specific. *In re Eastwood*, 33 App. D. C. 291; 144 O. G. 819; *in re Harbeck*, 39 id. 555; 191 O. G. 586; *in re Katzenberger*, 46 id. 539; 245 O. G. 553; *in re Glafcke*, 51 id. 204; 296 O. G. 647.

In our view the claims of the applicant should have been allowed. The decision of the Commissioner is therefore reversed, and the case is remanded accordingly.

Court of Appeals of the District of Columbia.

VIDAVER *v.* SHERMAN.

No. 1,594. Decided February 5, 1924.

INTERFERENCE—ORIGINALITY.

Where a manufacturing company learned of V.'s device by means of negotiations with him, proceeded to dismiss him from the transaction and to employ S. to work the same idea into a similar device, and S. first acquired the idea of the invention through the company's officers, who had learned of it from V., *Held* that V. was the original inventor and was entitled to priority.

Mr. Geo. W. Dorr for Vidaver.

Mr. F. C. Curtis for Sherman.

Argued before SMYTH, Chief Justice, ROBB, Justice, and MARTIN, Presiding Judge United States Court of Customs Appeals.

MARTIN, *J.:*

This is an interference proceedings in which the appellant is the junior party, he having filed his application for a patent on January 8, 1920, whereas a patent for a similar invention was issued to the appellee on December 9, 1919. The invention relates to the manufacture of bristle brushes having their bristles set in rubber pads. The device in question is an appliance whereby the rubber pads may be punctured mechanically by means of small hollow tubes filled with one or more bristles, which are first forced through the rubber and then withdrawn, whereupon the rubber contracts upon the bristles and firmly retains them in place in an upright position. The pads are then mounted upon suitable frames and are ready for use.

The following count is copied as illustrative of the invention:

Count 1. That improvement in the art of inserting bristles in an apertured elastic pad which consists in supporting the pad on one side with a plate provided with an opening opposite the aperture in the pad; in-

serting into the aperture in the pad from its other side a bristle-guiding tube, larger than said aperture, whereby said aperture is expanded, and one or more bristles within said tube, and then withdrawing the tube leaving the bristle inserted in the aperture in the pad, and permitting the material of the pad to contract upon said inserted bristles.

The only issue in the case is that of originality, and the testimony relating to it is conflicting. We have however drawn the following conclusions from the evidence:

In the latter part of 1910 the Universal Brush Company was engaged in the manufacture of brushes having their bristles set in rubber pads. The operation of puncturing the pads and setting the bristles in them was performed by hand, there being then no mechanical contrivance to do this work. The labor was performed by operatives at their homes, and the system was unsatisfactory. This condition was brought to the attention of the appellant by his brother-in-law, a Mr. Koenigsberger, who was an employee of the company. The appellant was a physician and an inventor, and he then and there conceived the idea which constitutes the present invention. He took a hypodermic needle from his medicine case, cut some bristles from a brush and placed them inside the hollow needle. He then forced the loaded needle through a common rubber band, and when it was withdrawn the rubber contracted and clutched the bristles thus holding them securely in an upright position. The appellee and Koenigsberger regarded this as a solution of the problem. It was disclosed to several persons, and the appellant began to devise a working model of the invention. At the same time he undertook to perfect a "shaker box" to be used in connection with the invention as a means of loading the hollow needles mechanically with bristles. During the entire time covered by this matter Henry Alexander was the president and principal owner of the Universal Brush Company, and afterward of its successor the Henry L. Hughes Brush Company, and his son, M. W. Alexander, was the secretary of the same, the latter being actively engaged in its management. Several meetings took place between the appellant and Henry Alexander at which others were present. The appellant testifies that he then exhibited the shaker box and began to show how the hollow needle would operate, when Alexander said it was unnecessary to do so as he understood it fully. This is denied by Alexander and the other persons who were present, they claiming that only the shaker box was exhibited and that no mention was made of the use of a hollow needle. As a result of the meetings however a proposed contract was drafted whereby the company was to advance not more than $500 to enable the appellant to construct a working model, and was to pay him for the use of the invention if successful. The contract however was never executed, but was destroyed by Alexander at the last meeting, with the statement that he would no longer deal with the appellant. Alexander explains this by stating that the appellant disclosed to him at the meeting that he had approached other brush makers upon the subject, and that this made him indignant. The appellant however denies this entirely, and claims that Alexander having become informed of the invention wished to use it without paying the appellant for it, and accordingly summarily dismissed him upon a feigned excuse. It may be noted that it appears from the testimony that in the latter part of 1910 Alexander's company was the only manufacturer of cushion-back brushes in this country. Notwithstanding this rebuff the appellant completed his device such as is described in the above counts, and in June, 1911, applied for a patent upon it. The application was allowed in September, 1911, but no patent was ever issued, because of a failure to pay the final fees. The appellant testifies that this default was due to his extreme poverty, and the testimony sustains this plea. He testifies further that afterwards in March, 1919, he discovered by chance that the company was in fact using his invention in its factory. Thereupon on January 8, 1920, the appellant filed his present application in the Patent Office, and this proceeding in interference was ordered. The appellant testifies that his delay in filing the present application after learning that the company was using his invention resulted from advice of his counsel to the effect that it was too late to assail the Sherman patent, and that the proper remedy was an action for damages against the company. Such an action was in fact begun in April, 1919, and is still pending.

We may say at this point that we believe the appellant's foregoing statement to be true and correct. It would however fail to prove that the appellee, Sherman, had acquired a knowledge of appellant's invention prior to his own conception of the same idea. That defect in the proof however is supplied by Sherman's own testimony.

The appellee, William T. Sherman, was a skilled mechanic who first entered the employ of the company on September 1, 1912. He had never before engaged in the manufacture of brushes, yet in his application for his present patent he claims to have conceived the idea upon the day when he entered into the service of the company. He did not however complete the device until some months later. He then employed hypodermic needles, as did the appellant, as the means of setting the bristles into the rubber pads. He says that he had never seen a hypodermic needle before he procured these for his invention; that he went into a hardware store in Troy, N. Y., to buy some tubes for this purpose when a clerk advised him to use hypodermic needles instead; that he does not remember who the clerk was nor the store where the occurence took place. He testified that he was paid $1000 by the company for his invention. A reference to the account books of the company discloses that the item is entered as payment for labor, no reference to any invention appearing in the entry. The appellee denies, as do the other witnesses who

are interested in the company, that any communication was made to him in relation to the appellant's ideas or invention. It is claimed indeed that none of them ever learned from the appellant or otherwise that his device made use of hollow needles as carriers for the bristles in the process of setting them in the rubber pads. This statement however is contradicted by the testimony of a witness, Bradshaw, who states that M. W. Alexander told him in the year 1911 that the brushes could be filled by means of hollow needles such as hypodermic needles, for inserting the bristles into the rubber pads, and that this had been suggested by a doctor who was a friend or acquaintance living in New York city.

It may be noted at this point that Koenigsberger, the brother-in-law of the appellant, who arranged the first meeting between Alexander and the appellant and was present thereat, was not called as a witness in this proceeding. He has remained an employee of the company, as well as a relative of the appellant, and his testimony was not taken by either party to the proceeding.

We do not undertake to discuss the testimony in detail. It is true that it is circumstantial in character in so far as it relates to Sherman, but we are constrained to say that upon a review of all of it we are fully convinced that the appellant's claim is substantially true, and that the company having learned of the appellant's device by means of the negotiations with him, proceeded to dismiss him from the transaction and to employ Sherman to work the same idea into a similar device; and that Sherman first acquired the idea of the invention from the company's officers who had learned of it from the appellant. We therefore hold that the appellant is the orignal inventor and is entitled to priority, and that the decision of the Assistant Commissioner awarding priority to the appellee should be and it is reversed. The case is remanded accordingly.

ADJUDICATED PATENTS.

(C. C. A. N. Y.) The Just and Hanaman patent, No. 1,018,502, for a tungsten-filament lamp, *Held* valid and infringed. *General Electric Co.* v. *P. R. Mallory & Co.*, 298 Fed. Rep. 579.

(C. C. A. N. Y.) The Langmuir patent, No. 1,180,159, for an electric lamp, claims 4, 5, 12, and 13 *Held* valid and infringed. *General Electric Co.* v. *P. R. Mallory & Co.*, 298 Fed. Rep. 579.

(C. C. A. Wis.) The Kelling patent, No. 1,235,697, for a fleshing machine, claims 1, 2, 3, and 5 *Held* valid and infringed. *Laskin* v. *Monarch Fleshing Machine Co.*, 298 Fed. Rep. 576.

(D. C. N. Y.) The Frederic patents, No. 1,313,232, for hair-waving means and process of producing the same, claims 5 and 7 *Held* valid and infringed, and No. 1,425,956, for hair-waving means, claims 9 and 10 *Held* valid and infringed. *E. Fredcrics, Inc.*, v. *Eugene, Limited*, 298 Fed. Rep 633.

(C. C. A. Wis.) The Schroedter and Kelling patent, No. 1,382,126, for fleshing machines, claims 1, 2, 3, and 5 *Held* valid and infringed; claim 4 *Held* valid and infringed by one machine, but not by another; claims 6, 7, and 8 *Held* invalid, and claims 9, 10, 11, and 12 *Held* not infringed. *Laskin* v. *Monarch Fleshing Machine Co.*, 298 Fed. Rep. 576.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,296,076, C. K. Harding, Electric spark plug, decided July 3, 1924, claim 2.

Pat. 1,423,926, G. Facciole, Voltage-regulating system, decided July 3, 1924, claim 1.

Pat. 1,445,227, E. B. Meyrowitz, Lens for eyeglasses and spectacles, decided June 30, 1924, claims 1 and 2.

Disclaimer.

1,382,126.—*John O. Schroedter* and *John Kelling*, Milwaukee, Wis. FLESHING MACHINE. Patent dated June 21, 1921. Disclaimer filed July 11, 1921, by the assignee, *Monarch Fleshing Machine Company.*

Hereby disclaims, under the provisions of section 4917 of the Revised Statutes, the following claims in said patent, to wit:

"6. In a fleshing machine, a supporting frame, one portion of the frame having a bearing, an axle receiving slot providing an entrance to the bearing, a rotary fleshing knife, an axle extending from the knife and disposed in said bearing and co-operating means on the axle and frame to retain the former in the bearing.

"7. In a fleshing machine, a supporting frame, one portion of the frame having a bearing, an axle receiving slot providing an entrance to the bearing, a socket surrounding the bearing, a rotary fleshing knife, an axle extending from the knife and disposed in said bearing and an element disposable on said axle and engageable in said socket to retain the axle in said bearing.

"8. In a fleshing machine, a supporting frame one portion of the frame having a bearing, an axle-receiving slot providing an entrance to the bearing, a socket surrounding the bearing, a rotary fleshing knife, an axle extending from the knife and disposed in said bearing and a nut disposed on the axle and having an annular flange seated in said socket to retain the axle in the bearing."

TRADE-MARKS

OFFICIAL GAZETTE, AUGUST 12, 1924.

[VOL. 325. No. 2.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

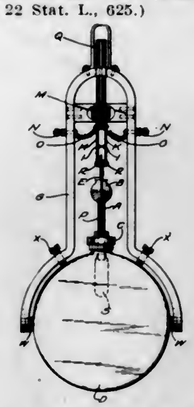
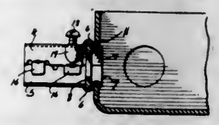
REISSUES



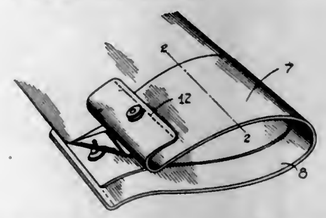
AUGUST 12, 1924.

15,889. BRICK MACHINE. JAMES R. TACKETT, Olive Hill, Ky., assignor to General Refractories Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 2, 1924. Serial No. 723,840. Original No. 1,460,455, dated July 3, 1923, Serial No. 588,715, filed Sept. 16, 1922. 10 Claims. (Cl. 25—45.)



1. In a brick treating machine, a brick press, a brick re-press in spaced relation to each other, a brick support interposed between the presses on which bricks are transferred from one press to the other, horizontally reciprocating brick pushing elements for engaging bricks and pushing them over the support, vertically and longitudinally reciprocating brick carrying elements in operative relation to the support for lifting the bricks from the support and transferring them longitudinally thereof and re-depositing them thereon, and means for operating the brick pushing elements and brick carrying elements oppositely.

15,890. THERMOSTAT. GEORGE F. TAYLOR, Washington, D. C., dedicated, by mesne assignments, to the Citizens of the United States of America. Filed June 2, 1924. Serial No. 717,447. Original No. 1,484,802, dated Feb. 26, 1924, Serial No. 680,473, filed Dec. 13, 1923. 1 Claim. (Cl. 297—3.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)

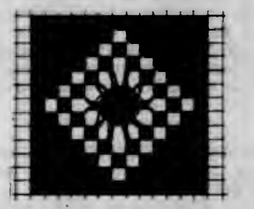


A thermostat consisting of a frame, a tube and an expansion bulb supported by said frame, said tube having an enlargement at its upper end and a rubber sack at its lower end, a spherical piston fitting loosely into said tube, a stem attached to said piston at its lower end and extending upwardly through said tube, said expansion bulb adapted to enclose said sack, said sack, tube and the lower part of the said enlargement of said tube containing mercury, a small air space provided in said tube around said piston, said sack and lower end of said tube being hermetically sealed into said expansion bulb, said expansion bulb containing liquid, said piston and stem adapted to be moved in an upward or downward direction by means of motion imparted thereto by the rising or falling of the mercury in said tube resulting from compression or the release of compression on the mercury in said rubber sack due to the expansion or contraction of the liquid in said expansion bulb.

15,891. ELECTRICAL CONNECTING DEVICE. GEORGE C. THOMAS, Jr., New York, N. Y., assignor to The Thomas & Betts Co., Elizabeth, N. J., a Corporation of New Jersey. Filed May 23, 1924. Serial No. 715,493. Original No. 1,418,989, dated June 6, 1922, Serial No. 339,575, filed Nov. 21, 1919. 6 Claims. (Cl. 247—25.)

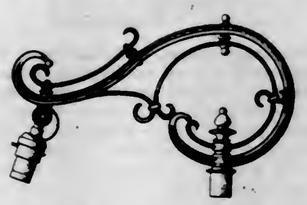
1. In connecting devices, the combination of an outlet box having a wall with an opening therethrough, a sleeve device having a threaded aperture and adapted to receive an electric conduit, said device having a seat portion adapted to bind within said opening and comprising a plurality of parts movable to cause enlargement or restriction of said seat portion, a screw mounted in the threaded aperture of one of the parts and arranged to bear upon a conduit within said device to anchor the conduit in position and simultaneously force the parts of said portion outwardly into firm engagement with the periphery of said wall opening, and a ring bushing retained within a groove made adjacent the seat to form a stop for the end of the conduit and a guide for the cable wires.

15,892. CUFF CONSTRUCTION. ALBERT ADOLPHE FOURNIER, Ottawa, Ontario, Canada. Filed July 7, 1924. Serial No. 724,742. Original No. 1,487,452, dated Mar. 18, 1924, Serial No. 568,430, filed June 15, 1922. 1 Claim. (Cl. 2—124.)



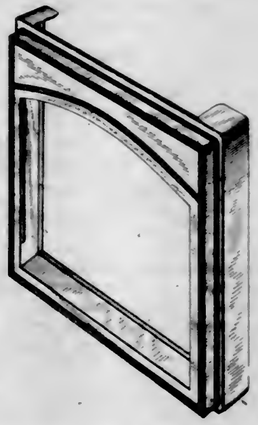
As an improved completed article of manufacture, a soft cuff comprising two thicknesses of material the longitudinal edges of which are united to form a flattened tubular member with the sole points of union at such edges of the two thicknesses disposed at opposite wearing edges of the cuff and entirely concealed within the cuff, whereby the opposite outer faces of the cuff are disconnected from each other adjacent said edges to form a rolled edge, the opposite faces of the cuff at the ends being provided with button holes.

DESIGNS



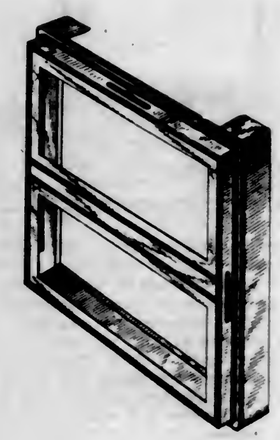
AUGUST 12, 1924.

65,392. LACE. HARRY B. BARNUM, Stratford, Conn., assignor to The American Fabrics Company, a Corporation of Connecticut. Filed Nov. 1, 1923. Serial No. 7,640. Term of patent 14 years.



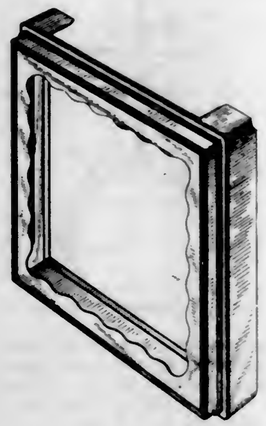
The ornamental design for lace substantially as shown.

65,393. BRACKET FOR LAMP AND LIKE STANDS. LESLIE H. BURLIN, Chicago, Ill. Filed June 19, 1924. Serial No. 9,912. Term of patent 7 years.



The ornamental design for a bracket for lamp and like stands, as shown.

65,394. BOX FRONT. MARTHA H. CONNOR, Baltimore, Md., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md., a Corporation of New Jersey. Filed Sept. 26, 1923. Serial No. 7,333. Term of patent 3½ years.

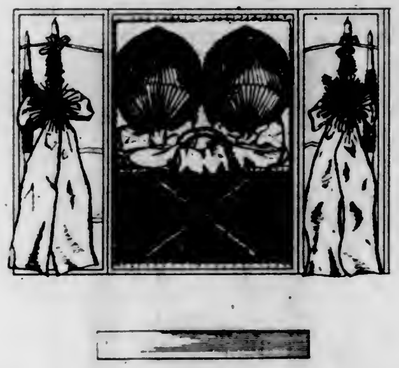


The ornamental design for a box front, as shown.

65,395. BOX FRONT. MARTHA H. CONNOR, Baltimore, Md., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md., a Corporation of New Jersey. Filed Sept. 26, 1923. Serial No. 7,334. Term of patent 3½ years.

The ornamental design for a box front, as shown.

65,396. BOX FRONT. MARTHA H. CONNOR, Baltimore, Md., assignor to The Tin Decorating Company of Baltimore, Baltimore, Md., a Corporation of New Jersey. Filed Sept. 26, 1923. Serial No. 7,336. Term of patent 3½ years.

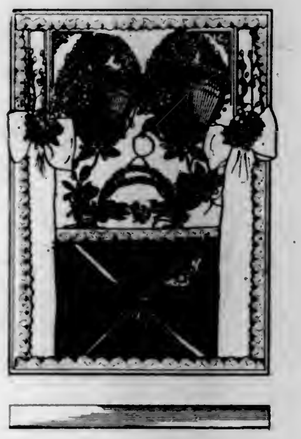


The ornamental design for a box front, as shown.

65,397. FACEPLATE FOR AN AUTOMOBILE BUMPER. WILLIAM G. COX, Cleveland, Ohio, assignor, by mesne assignments, to The Eaton Axle and Spring Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 10, 1921. Serial No. 499,839. Term of patent 7 years.

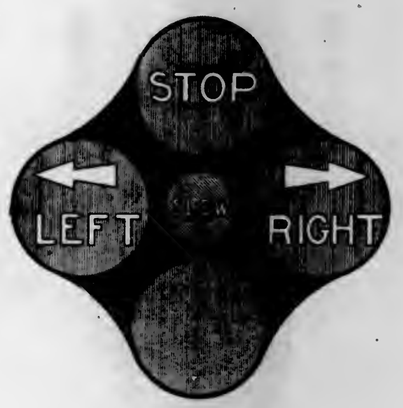
The ornamental design for a faceplate for an automobile bumper, as shown.

65,398. DECORATED BOX. GEORGE DORROS, New York, N. Y. Filed Feb. 28, 1923. Serial No. 5,318. Term of patent 14 years.



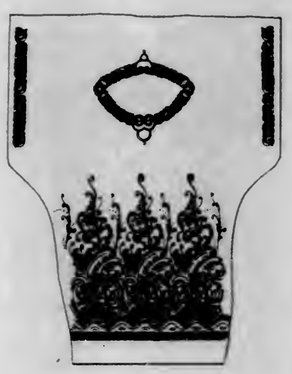
The ornamental design for a decorated box, as shown.

65,399. DECORATED BOX. GEORGE DORROS, New York, N. Y. Filed Feb. 28, 1923. Serial No. 5,319. Term of patent 14 years.



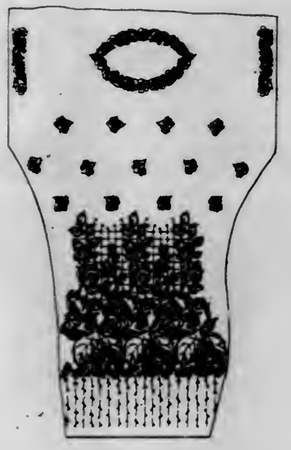
The ornamental design for a decorated box, as shown.

65,400. DECORATED BOX. GEORGE DORROS, New York, N. Y. Filed Feb. 28, 1923. Serial No. 5,320. Term of patent 14 years.



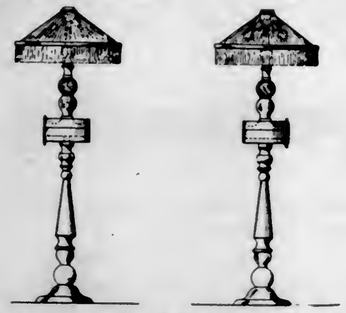
The ornamental design for a decorated box, as shown.

65,401. TAIL-LIGHT FACEPLATE. ISRAEL V. EDGERTON, Oak Park, Ill. Filed June 6, 1923. Serial No. 6,422. Term of patent 3½ years.



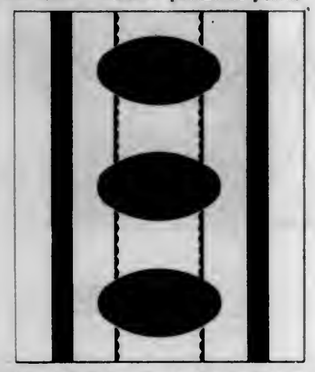
The ornamental design for a tail light faceplate, as shown.

65,402. TEXTILE FABRIC. JOHN FOLK, New York, N. Y., assignor to United Textile Print Works, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 10, 1924. Serial No. 9,216. Term of patent 3½ years.



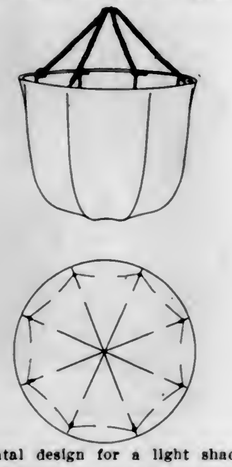
The ornamental design for a textile fabric as shown.

65,403. TEXTILE FABRIC. JOHN FOLK, New York, N. Y., assignor to United Textile Print Works, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 10, 1924. Serial No. 9,217. Term of patent 3½ years.



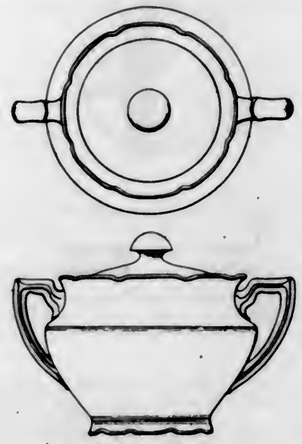
The ornamental design for a textile fabric as shown.

65,404. LAMP PEDESTAL. CLINTON W. FORD, Detroit, Mich. Filed Nov. 7, 1922. Serial No. 4,236. Term of patent 3½ years.



The ornamental design for a lamp pedestal as shown.

65,405. SHEET OF WRAPPING PAPER. WILLIAM J. FREIHOFER, Philadelphia, Pa. Filed Feb. 26, 1923. Serial No. 5,270. Term of patent 14 years.

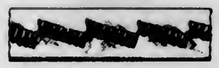


The ornamental design for a sheet of wrapping paper substantially as shown.

65,406. LIGHT SHADE OF SIMILAR ARTICLE. ISABEL C. GULICK, Boston, Mass. Filed Feb. 7, 1924. Serial No. 8,564. Term of patent 14 years.

The ornamental design for a light shade or similar article, as shown.

65,407. SUGAR BOWL. MARK A. HALEY, Syracuse, N. Y., assignor to Onondaga Pottery Company, Syracuse, N. Y., a Corporation of New York. Filed Nov. 29, 1922. Serial No. 4,441. Term of patent 14 years.

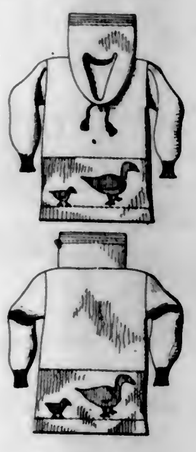


The ornamental design for a sugar bowl, substantially as shown.

65,408. CUP. MARK A. HALEY, Syracuse, N. Y., assignor to Onondaga Pottery Company, Syracuse, N. Y., a Corporation of New York. Filed Nov. 29, 1922. Serial No. 4,443. Term of patent 14 years.

The ornamental design for a cup, substantially as shown.

65,409. BIAS TRIMMING. JOSEPH JACOBS, South Norwalk, Conn., assignor to Webbing & Edging Corporation, New York, N. Y., a Corporation of New York. Filed June 4, 1924. Serial No. 9,793. Term of patent 3½ years.

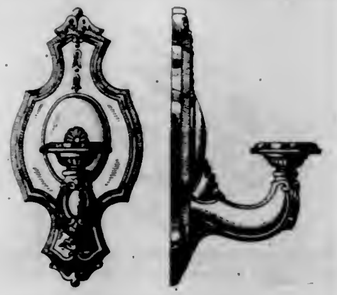


The ornamental design for bias trimming substantially as shown.

65,410. ARTIFICIAL LEAF FOR MILLINERY AND THE LIKE PURPOSES. MAX KAPLAN, New York, N. Y. Filed Feb. 24, 1922. Serial No. 857. Term of patent 3½ years.

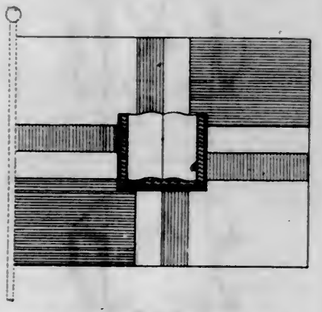
The ornamental design for an artificial leaf for millinery and the like purposes as shown and described.

65,411. SWEATER. HARRY A. KAUFMAN, New York, N. Y., assignor to Manhattan Knitting Mills, Incorporated, New York, N. Y. Filed Mar. 21, 1923. Serial No. 5,549. Term of patent 7 years.



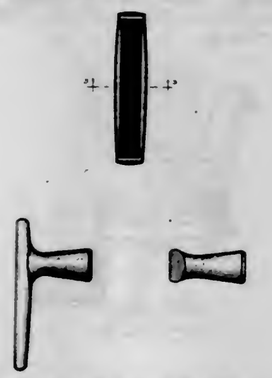
The ornamental design for a sweater, as shown.

65,412. CHAIR. FRANK KOENIGKRAMER, Cincinnati, Ohio. Filed Oct. 19, 1922. Serial No. 4,028. Term of patent 7 years.



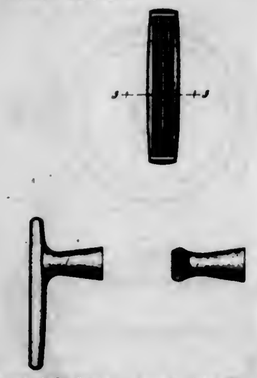
The ornamental design for a chair as shown.

65,413. WALL BRACKET. SAMUEL KRAMER and ABRAHAM KRAMER, Brooklyn, N. Y. Filed June 24, 1924. Serial No. 9,959. Term of patent 3½ years.



The ornamental design for a wall bracket, as shown.

65,414. FLAG. PIERRE de CHAIGNON LA ROSE, Cambridge, Mass., assignor to The Catholic Students' Mission Crusade, Cincinnati, Ohio, a Firm composed of Henry Moeller, Frank J. Beckmann, Frank A. Thill, Robert B. Riordan, William B. Foley, and F. J. Helm. Filed Dec. 31, 1923. Serial No. 8,204. Term of patent 14 years.

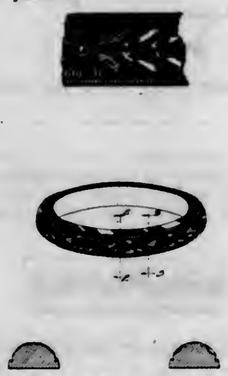


The ornamental design for a flag, as shown.

65,415. HANDLE FOR AUTOMOBILE DOORS. ROLLO MARPLE, Charlotte, Mich., assignor to Hancock Manufacturing Company, Charlotte, Mich., a Corporation of Michigan. Filed Mar. 3, 1924. Serial No. 8,801. Term of patent 3½ years

The ornamental design for a handle for automobile doors, substantially as shown.

65,416. HANDLE FOR AUTOMOBILE DOORS. ROLLO MARPLE, Charlotte, Mich., assignor to Hancock Manufacturing Company, Charlotte, Mich., a Corporation of Michigan. Filed Mar. 3, 1924. Serial No. 8,802. Term of patent 3½ years

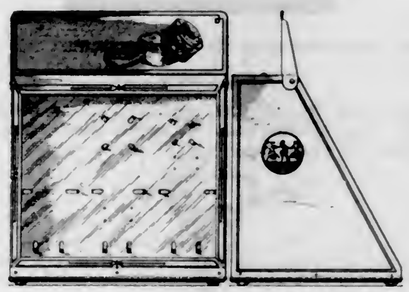


The ornamental design for a handle for automobile doors, substantially as shown.

65,417. BOTTLE. GEORGE N. MAS, Lynchburg, Va. Filed June 29, 1923. Serial No. 6,614. Term of patent 14 years.

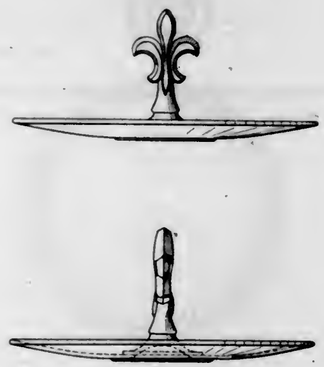
The ornamental design for a bottle as shown.

65,418. RING. JULIUS J. MELMS and CHARLES E. WALLACE, Detroit, Mich.; said Melms assignor to said Wallace. Filed May 5, 1924. Serial No. 9,482. Term of patent 7 years.



The ornamental design for a ring as shown.

65,419. PIN. VERA MENEFEE, Los Angeles, Calif. Filed Apr. 2, 1924. Serial No. 9,141. Term of patent 3½ years.



The ornamental design for a pin, as shown.

65,420. DISPLAY CABINET. FRANK I FOUS, Coshocton, Ohio, assignor to Nymfaun Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 20, 1924. Serial No. 9,011. Term of patent 3½ years.

The ornamental design for a display cabinet, substantially as shown.

65,421. SANDWICH TRAY OR SIMILAR ARTICLE. CALVIN B. ROE, Moundsville, W. Va., assignor to Fostoria Glass Company, Moundsville, W. Va., a Corpotion of West Virginia. Filed Jan. 7, 1924. Serial No. 8,260. Term of patent 14 years.

The ornamental design for a sandwich tray or similar article as shown.

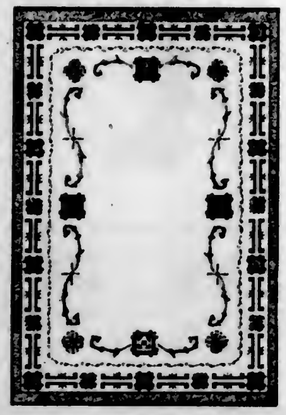
65,422. BOTTLE. ANDREW J. SANFORD, Newark, Ohio, assignor to A. H. Heisey & Co., Newark, Ohio. Filed Aug. 3, 1920. Serial No. 401,061. Term of patent 3½ years.

The ornamental design for a bottle, as shown.

65,423. LAMP PEDESTAL OR OTHER SIMILAR ARTICLE. JOSEPH SOHN, New York, N. Y. Filed May 20, 1924. Serial No. 9,746. Term of patent 7 years.

The ornamental design for a lamp pedestal or other similar article, as shown.

65,424. AUTOMOBILE RADIATOR SHIELD. JAMES N. SOMMERVILLE, Fresno, Calif. Filed Mar. 25, 1924. Serial No. 9,058. Term of patent 7 years.



The ornamnetal design for an automobile radiator shield as shown.

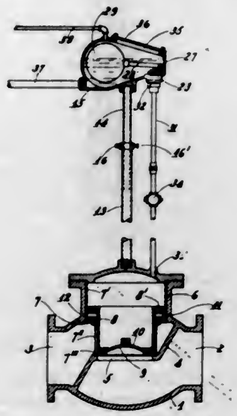
65,425. RUG. RAYMOND WALDO, St. Paul, Minn., assignor to Crex Carpet Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 28, 1924. Serial No. 9,419. Term of patent 3½ years.

The ornamental design for a rug, as shown.

65,426. RUG. RAYMOND WALDO, St. Paul, Minn., assignor to Crex Carpet Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 28, 1924. Serial No. 9,420. Term of patent 3½ years.

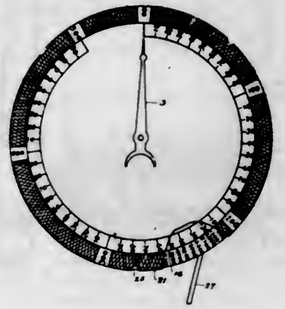
The ornamental design for a rug, as shown.

65,427. ICE-CREAM CONE. HELEN C. WINNIE, Chicago, Ill. Filed Feb. 11, 1924. Serial No. 8,606. Term of patent 3½ years.



The ornamnetal design for an ice cream cone as shown.

PATENTS

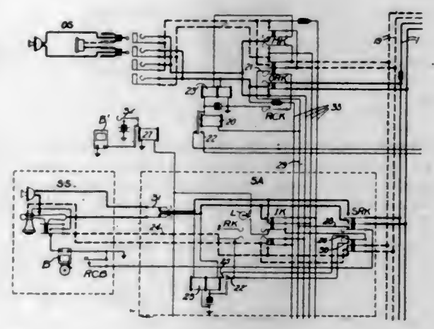


GRANTED AUGUST 12, 1924.

1,504,201. AUTOMATIC CONTROLLING VALVE FOR TANKS. EDWARD V. ANDERSON, Monessen, Pa., assignor of one-half to Charles E. Golden, Crafton, Pa. Filed June 29, 1922. Serial No. 571,782. 4 Claims. (Cl. 137—101.)

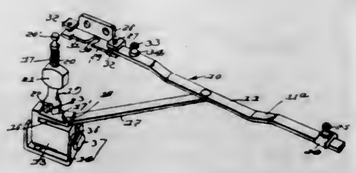
1. The combination of a vessel to be filled, a supply conduit discharging thereinto, a main valve interposed in said supply conduit, a vertical standard fixed to the main valve housing, a float chamber in communication with the vessel and having a stem depending therefrom adjustably fixed to said standard whereby to vary the height thereof, a float disposed within the chamber, a vent pipe connecting the main valve housing above the valve therein with the float chamber, a normally closed vent valve in the vent pipe, said float being adapted to open the vent valve to relieve pressure above the main valve whenever the liquid in the float chamber reaches a predetermined low level.

1,504,202. DIAL SCALE. NILS H. ANDERSON, Bridgeport, Conn., assignor to E. and T. Fairbanks and Company, St. Johnsbury, Vt., a Corporation of Vermont. Filed Feb. 3, 1921. Serial No. 442,323. 13 Claims. (Cl. 265—48.)



1. A registering mechanism including a pair of graduated dials arranged one in back of the other, the rear dial being stationary, the front dial including a ring-shaped body and being adapted to rotate with respect to said rear dial, the inner edges of said front dial overlapping the outer edges of said rear dial, the graduations on one of said dials being interpretive of the graduations on the other of the same.

1,504,203. SCALE LOOP. NILS H. ANDERSON, Trumbull, Conn., assignor to The E. & T. Fairbanks & Company, St. Johnsbury, Vt., a Corporation of Vermont. Filed Mar. 24, 1922. Serial No. 546,251. 4 Claims. (Cl. 74—104.)



1. A scale loop comprising a U-shaped body formed of a single piece of metal having perforations through its ends, angular plates loosely inserted in said perforations, and means sprung into said perforations for retaining said plates in the perforations.

1,504,204. SWITCHING CIRCUIT FOR RADIO AND SIMILAR SYSTEMS. WALLACE P. ANDRICK, Hohokus, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 15, 1920. Serial No. 417,080. 18 Claims. (Cl. 179—2.)

1. A signaling system, having a . tusmit-receive switch which in one position renders said system effective for transmission and in another position renders said system effective for reception, a plurality of substations adapted for connection to said system, a switching circuit for connecting a selected substation to said system, and means controlled by the connection of a selected substation to said system whereby said transmit-receive switch is placed under the control of means at the selected substation.

1,504,205. SASH FASTENER. HJALMAR ARVESKAUG, Fessenden, N. Dak. Filed Mar. 18, 1922. Serial No. 544,801. 11 Claims. (Cl. 292—263.)

1. A sash holding and fastening device having frame and sash attaching plates, a seating block detachably secured to the frame attaching plate, a toggle lever having its arms pivotally connected respectively with said seating block and sash attaching plate, and means for locking said arms respectively in their extended and folded relations, the arm which is connected at one end with the sash attaching plate being adapted at the other end to overlap and engage said seating block.

1,504,206. PROCESS OF AND MEANS FOR NICKEL PLATING. EDWIN M. BAKER, Ann Arbor, Mich., assignor to Christian Girl, Kalamazoo, Mich. Filed Jan. 5, 1923. Serial No. 610,927. 12 Claims. (Cl. 204—14.)

1. The process of nickel-plating articles which comprises the following steps:

(*a*) Subjecting the articles to an electro-plating treatment, employing therein anodes of substantially pure nickel, a current density of approximately 100 amperes per square foot of metal treated, and a bath heated to about 85° C. and containing the following ingredients, in substantially the proportions stated, per gallon of solution:

32 oz. nickel sulphate ($NiSO_4.7H_2O$)
3.3 oz. nickel chloride ($NiCl_2.6H_2O$)
2 oz. boric acid (H_3BO_3).

(*b*) Subjecting the said articles to a copper-plating treatment in a bath agitated with air and at a temperature of approximately 30° C., said bath containing the following ingredients in approximately the proportions stated per gallon:

28 oz. of copper sulphate ($CuSO_4.5H_2$)
11 oz. of sulphuric acid (H_2SO_4).

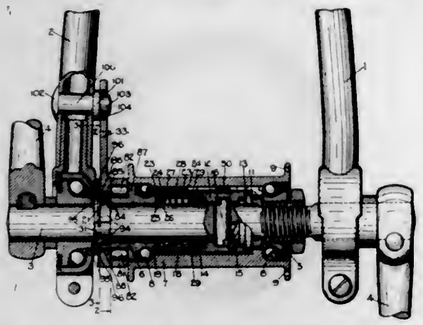
(*c*) Nickel-plating the articles in substantially the same manner and in a bath of the same character as set forth in step (*a*) hereinbefore.

1,504,207. METHOD OF DETERMINING BORIC ACID IN NICKEL-CONTAINING SOLUTIONS. EDWIN M. BAKER, Ann Arbor, Mich., assignor to Christian Girl, Kalamazoo, Mich. Filed Jan. 24, 1923. Serial No. 614,685. 12 Claims. (Cl. 23—30.)

11. A mixture of bromo-cresol purple with bromothymol blue in proportions suitable to form an indicator capable of undergoing a sharp change in color immediately upon neutralization by a standard alkali of the boric acid in a nickel-containing solution.

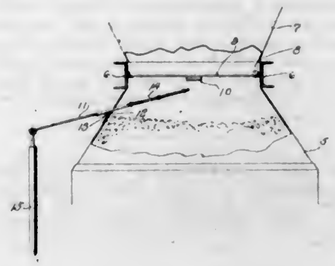
1,504,208. ELECTRICAL HEATER FOR OIL WELLS. PERCIVAL F. BRINE, Boston, Mass., assignor to Oil Wells Renewal Company, Chicago, Ill., a Corporation of Delaware. Filed Sept. 5, 1922. Serial No. 586,192. 14 Claims. (Cl. 219—33.)

1. An electric heater for oil wells, comprising, in combination, a pair of heads each having a plurality of threaded tube-receiving apertures, tubes connecting said heads and having threaded ends entering the threaded apertures, the threads upon one end of the tubes extending along the same a sufficient distance to permit the tubes to be screwed into one head an abnormal distance and then screwed into the other head by backing the tubes



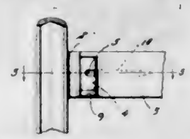
outwardly in the first head to the normal position, electrical resistance coils within said tubes, and a cable for supplying current to said coils.

1,504,209. PENCIL AND PROCESS OF MAKING THE SAME. LUCIAN W. BUGBEE, Indianapolis, Ind. Filed Jan. 18, 1924. Serial No. 687,031. 16 Claims. (Cl. 18—47.5.)



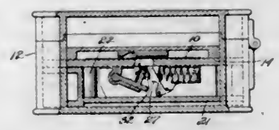
1. The process of making a pencil, which process includes forming a lead composed of clay and carbonaceous material intermixed and heating the lead sufficiently to harden the clay and char the carbonaceous material and convert it into charcoal or the like.

1,504,210. DRIVING AND BRAKING MECHANISM. GEORGE G. BUSH, Bristol, Conn., assignor to The New Departure Manufacturing Company, Bristol, Conn., a Corporation of Connecticut. Filed Mar. 10, 1922. Serial No. 542,776. 38 Claims. (Cl. 192—6.)



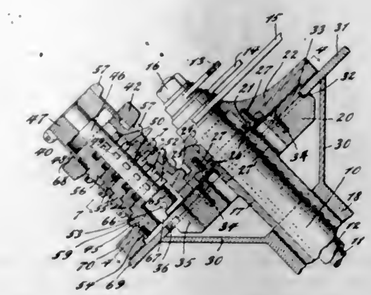
1. In a driving and braking mechanism, a driver, a driven wheel, and means whereby through mere backward movement of said driver said wheel can be driven backwardly and can be braked; substantially as described.

1,504,211. MATERIAL-HANDLING EQUIPMENT. MORGAN R. BUTLER, Waukesha, Wis. Filed Aug. 25, 1922. Serial No. 584,371. 3 Claims. (Cl. 110—114.)



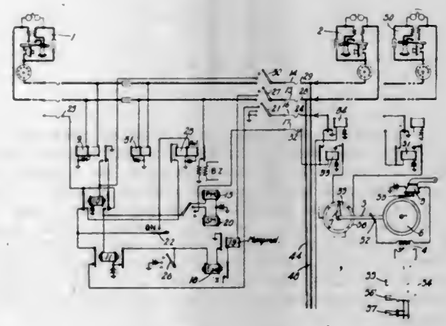
2. In a device of the character described, the combination with a measuring hopper and a supply bin arranged to discharge therein, of a lever having its inner end adjacent the discharge of the supply bin and its other end positioned exteriorly of the hopper, and means normally urging the inner end of the lever upwardly toward the supply bin discharge, the material entering the hopper from the bin tending to depress the lever inner end against the force of said means, said means raising the lever inner end when the passage of material from the supply bin into the hopper ceases and the volume of material in the hopper is less than a predetermined amount.

1,504,212. SPECTACLE-HINGE CONSTRUCTION. CHARLES O. CARLSON, Providence, R. I. Filed Apr. 3, 1922. Serial No. 548,906. 16 Claims. (Cl. 88—53.)



1. The combination with a non-metallic spectacle frame of a concealed metallic temple connecting hinge for connecting the temple thereto, having metallic bearing surfaces throughout its pivotal length, the frame having a non-metallic portion projecting over said hinge to conceal it from view.

1,504,213. RECORDER FOR WATCHMEN AND THE LIKE. EVERETT D. CHADWICK, Winchester, Mass. Filed May 27, 1920, Serial 384,570. Renewed Jan. 9, 1924. 11 Claims. (Cl. 234—37.)

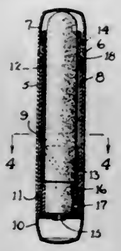


1. Recording apparatus comprising, in combination, a casing having a movable record sheet therein, actuating means for moving said sheet, and a series of individually distinguishable keys adapted to make records on said sheet and to set said actuating means in position to effect automatically the movement of said sheet after a record has been made.

1,504,214. STEERING-WHEEL LOCK. GANDOLFO CIPRIANO, New York, N. Y. Filed Nov. 17, 1920. Serial No. 424,655. 12 Claims. (Cl. 70—129.)

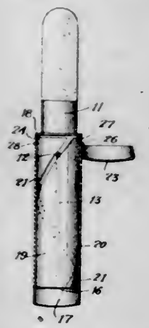
1. In mechanism for locking steering wheels, the combination of a steering shaft, a steering member fixed on said steering shaft fixed casing surrounding the steering shaft, two independently rotatable members which cooperate with said casing to enclose the steering member, and means for locking said rotatable members to the steering member.

1,504,215. TELEPHONE-EXCHANGE SYSTEM. HENRY P. CLAUSEN, Mount Vernon, and CHARLES L. GOODRUM, New York, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 5, 1919. Serial No. 302,030. 4 Claims. (Cl. 179—16.)



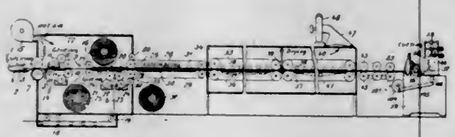
1. In a telephone system, telephone lines, each including a calling signal, means for calling said lines and actuating said signals, a secondary calling signal common to said lines, said secondary signal comprising a phonographic speech reproducing circuit arranged to reproduce calls individually characteristic of said lines, and means dependent on the condition established for actuating a particular one of said first signals for subsequently actuating said secondary calling signal in a manner characteristic of the particular first signal actuated.

1,504,216. LIPSTICK CONTAINER. CHARLES N. CORTELL, Mamaroneck, N. Y. Filed Dec. 27, 1923. Serial No. 682,913. 12 Claims. (Cl. 206—56.)



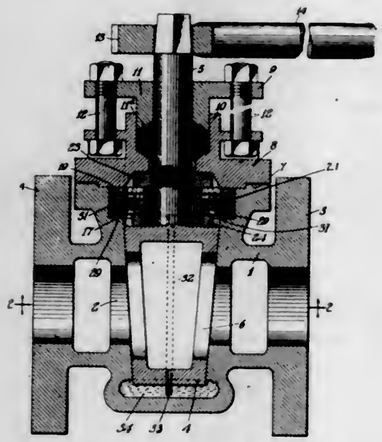
1. In a holder of the character disclosed, a case, a sleeve rotatably mounted within said case provided with a helical shoulder, a carrier within said sleeve having a drive lug engaging said helical shoulder, a guide carried

by the case for directing the carrier in a substantially straight non-rotative movement within the case upon rotation of the sleeve within the case, means for rotating



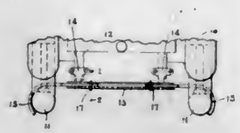
the helically shouldered sleeve within the case, said guide being a tube fixed at one end to the case and swivelly connected at its opposite end to the rotatable sleeve.

1,504,217. LIPSTICK CONTAINER. CHARLES N. CORYELL, Mamaroneck, N. Y. Filed Feb. 23, 1924. Serial No. 694,558. 18 Claims. (Cl. 206—56.)



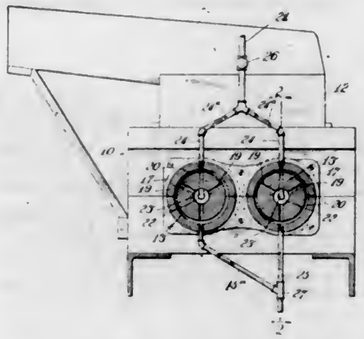
1. In a holder of the character disclosed, relatively rotatable tubular members having angularly related shoulders to produce longitudinal travel of an element engaged with said shoulders upon relative rotation of the members, a longitudinally shiftable part guided b yone of said tubular members and a pin having a coiled head portion frictionally engaged with a wall of said longitudinally shiftable part and a portion projecting from said coiled head into engagement with the relatively inclined shoulders on the two relatively rotatable tubular members.

1,504,218. PROCESS AND MACHINE FOR MAKING CROSS-CORRUGATED PAPERBOARD. CHARLES H. CROWELL, Brooklyn, N. Y. Filed June 5, 1923. Serial No. 643,590. 19 Claims. (Cl. 154—30.)



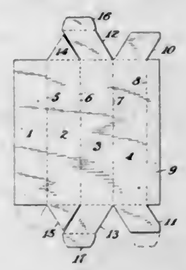
12. In machines for making cross corrugated paper board, circumferentially corrugated splicing rolls to splice and continuously feed forward strips of longitudinally corrugated paper liner, gluing rolls to apply adhesive to both sides of said liner, means to continuously feed and apply adhesive to a transversely corrugated web of paper liner, feeding rolls to feed between and on the outside of said liners paper facing webs to form a continuous web of cross corrugated paper board, feeding belts and guides to hold said paper board in assembled position and continuously feed the same forward, and drying means including a substantially air-tight chamber provided with air circulating devices around the assembling webs to force blasts of hot drying medium through the transverse and longitudinal channels around said liners to dry the adhesive in the moving paper board, and means to cut the assembled and substantially dried paper board into sheets.

1,504,219. PLUG COCK. ALBERT A. CRYER, New York, N. Y., assignor to D. G. C. Trap & Valve Co., Inc., New York, N. Y., a Corporation of New York. Filed July 21, 1922. Serial No. 576,417. 13 Claims. (Cl. 251—97.)



1. A valve for fluid control comprising a valve chamber having a conical seat therein, a valve key conforming to said seat and carried by an operating stem, a double cam also carried by said stem above the key and cooperating with a pair of opposed cam bearing surfaces and a plurality of bearings having rolling surfaces situated between each of the lower and upper surfaces of the cam and its corresponding cooperating cam surface.

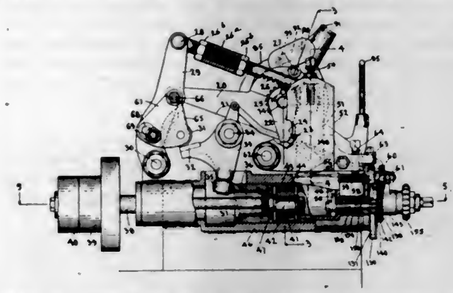
1,504,220. MEANS FOR LOCKING AUTOMOBILES. HERMAN DEGEN, Milwaukee, Wis. Filed June 18, 1921. Serial No. 478,593. 4 Claims. (Cl. 188—31.)



1. A locking device comprising in combination a fixed member adapted to be secured to the frame of a vehicle between a pair of wheels, hook-shaped locking members connected with said fixed member and adapted to project between the spokes of the wheels with said hooks extending partly around the tires of said wheels, and means for locking said locking members to said fixed member.

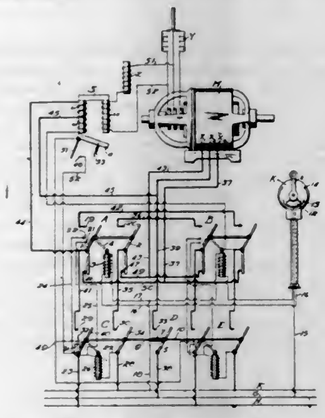
1,504,221. BUTTER WORKING AND PRINT MACHINE. CHARLES DOERING and HENRY H. DOERING, Chicago, Ill. Filed Jan. 23, 1922. Serial No. 531,015. 11 Claims. (Cl. 31—65.)

1. In a machine of the character described, provided with a chamber, a worm rotatably mounted in said chamber, means disposed at the delivery end of the worm whereby the material operated on is divided into a plurality of small vermicular portions, and means rotatably mounted in the path of said vermicular portions whereby a thorough commingling of the portions is effected.



1,504,222. COLLAPSIBLE-BOX BLANK. FRANK L. DYER, Montclair, N. J. Filed Jan. 20, 1922. Serial No. 530,608. 2 Claims. (Cl. 229—38.)

1. A blank for collapsible boxes, diamond-shape in cross-section, comprising four panels, one of the outer panels being formed at its ends with diamond-shape flaps facing outward, the adjacent panel being formed at its ends with diamond-shape flaps facing inward, an overlap on one of the outer panels, and a tongue at the top and bottom of the blank formed on one of said diamond-shape flaps, substantially as set forth.

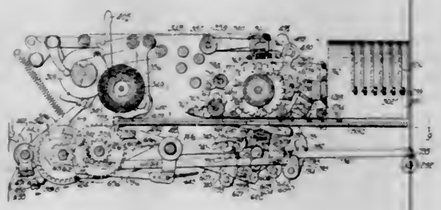


1,504,223. GEAR-GENERATING MACHINE. EDWIN R. FELLOWS, Springfield, Vt., assignor to The Fellows Gear Shaper Company, Springfield, Vt., a Corporation of Vermont. Filed July 29, 1922. Serial No. 578,288. 49 Claims. (Cl. 51—52.)

1. A machine for generating and forming the teeth of gear wheels and analogous articles comprising a cutting tool having an active portion mounted to rotate in a plane perpendicular to its axis of rotation, a work-holding carriage guided to travel in a plane which is inclined to said active portion, a work spindle rotatably mounted in said carriage and adapted to support a work piece in operative relation to the cutting tool, a former connected rigidly with said work spindle, an abutment cooperating with the former and means for giving a reciprocating movement to said carriage and simultaneous oscillating movement to said spindle while maintaining the former in contact with the abutment, said former and abutment having contacting faces shaped to compel the rotary movement of the spindle to take place at such a

rate, in combination with the translative movement of the spindle, that a predetermined curve is generated in the work by its resultant motion relatively to the cutting tool.

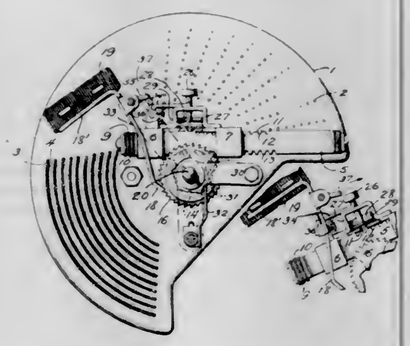
1,504,224. DYNAMIC BRAKE FOR ALTERNATING-CURRENT MOTORS. ROBERT H. FISHER, Chicago, Ill. Filed Apr. 29, 1920. Serial No. 377,600. 1 Claim. (Cl. 172—152.)



The combination of an induction motor, a source of current for the motor, switching mechanism for connecting the source of current to the motor to rotate the same, said switching mechanism comprising a plurality of electro-magnetic responsive switches acting conjointly to complete the motor circuit, one of said switches being deenergized at will, another constituting an auxiliary switch cooperating with said deenergized switch to effect a reversing of the phases of the motor, whereby a dynamic braking effect is applied to the motor, and automatic means actuated through the slowing down of the motor for deenergizing said auxiliary switch to cut off the motor circuit, whereby the motor is stopped, said automatic means comprising a locking circuit for the auxiliary switch, and a selecting switch connected with the rotor circuit of the motor for breaking the locking circuit when the motor slows down.

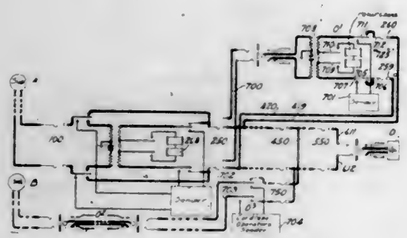
1,504,225. PROCESS FOR THE PREPARATION OF COMMERCIAL PRODUCTS FROM BLOOD. FREDERIC WILLIAM VESEY FITZGERALD, Caversham, England. Filed May 19, 1921. Serial No. 470,975. 7 Claims. (Cl. 106—38.)

1. A process for obtaining solid or moldable substances from blood of which the fluidity has been preserved according to which the blood to be treated is



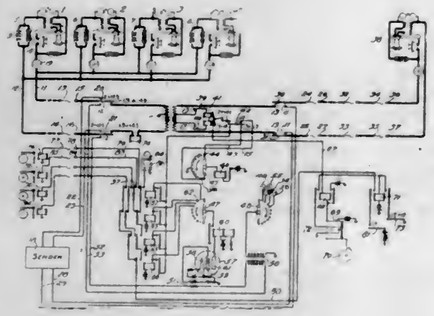
partially dehydrated at a regulated temperature not substantially exceeding 120° F. and thoroughly exposed to air and when the dehydration has been carried to such a point that coagulation to a stiff jelly can be effected in from half an hour to two or three hours by the addition of 2 to 4 per cent of 40% formaldehyde, the desiccation is then continued with as little exposure of the body of the material to air as is conveniently practicable until a solid residue is obtained.

1,504,226. CASH REGISTER. FREDERICK L. FULLER, Bridgeport, Conn., assignor to The National Cash Register Company, Dayton, Ohio. Filed May 7, 1918. Serial No. 233,146. 54 Claims. (Cl. 235—3.)



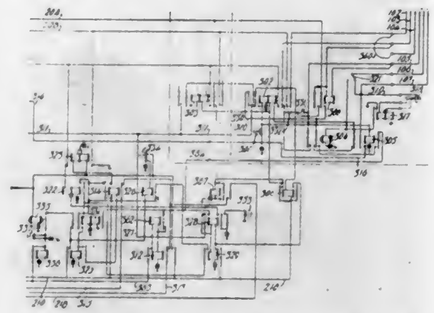
1. In a machine of the class described, the combination of a plurality of type carriers, a main operating mechanism, mechanism operated by the main operating mechanism for moving said type carriers differentially, manipulative means controlling the extent of movement of said mechanism, and means operated by the main operating mechanism for shifting the type carriers simultaneously with their actuation by the differential mechanism to print in different laterally spaced columns on record material.

1,504,227. AUTOMATIC TELEPHONE SWITCH. EDGAR WALTER GENT, Morristown, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 17, 1921. Serial No. 470,365. 11 Claims. (Cl. 179—27.5.)



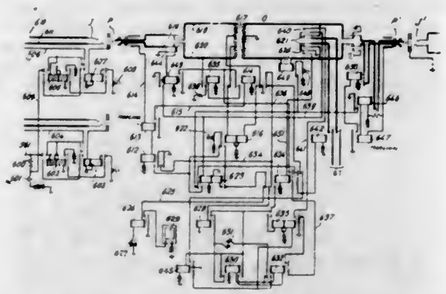
1. An automatic switch comprising stationary contacts arranged in groups, a movable contact member, a single motor mechanism for moving said contact member first in one direction to select a group and then in another direction to select a contact in the selected group and mechanical means for automatically effecting the change in direction of movement of said contact member.

1,504,228. TELEPHONE-EXCHANGE SYSTEM. JOHN W. GOODERHAM, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 30, 1920. Serial No. 427,445. 8 Claims. (Cl. 179—27.)



1. In a telephone exchange system, a calling subscriber's line, automatic switching mechanism for extending a connection from said line to a desired subscriber's line, terminals in the terminal banks of said switching mechanism to which no subscriber's lines are connected, an operator's position, trunk lines extending from a portion only of said terminals to such operator's position, means for controlling said switching mechanism and means effective when said switching mechanism is operated by said controlling means to make connection with one of said terminals to which no subscribers' lines are connected to cause said switching mechanism to connect with an idle one of said trunk lines.

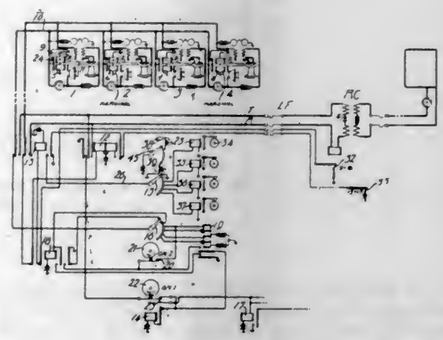
1,504,229. TELEPHONE-EXCHANGE SYSTEM. JOHN W. GOODERHAM, Yonkers, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 28, 1921. Serial No. 488,075. 16 Claims. (Cl. 174—9.)



1. In combination with a main circuit and a plurality of normally open branches therefor, of an electrically selective device associated with each of said branches, said several devices differing from each other in their selectivity, means associated with each of said branches for effecting its closure, a plurality of sources of current of different characteristics, means for associating said sources in succession with said main circuit, and means selectively responsive to the flow of said electric currents through said selective device for determining which of said branches is closed.

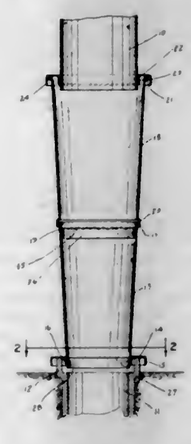
1,504,230. TELEPHONE-EXCHANGE SYSTEM. JOHN W. GOODERHAM, Yonkers, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 19, 1921. Serial No. 508,711. 23 Claims. (Cl. 179—27.)

1. In a telephone system, a plurality of lines, an operator's position, means for connecting the operator's position to one of said lines, means for connecting the operator's position to a second line, and means for rendering said last connecting means ineffective when the operator's position is disconnected from the first line subsequent to the initiation of the call on said second line.



1,504,231. TELEPHONE-EXCHANGE SYSTEM. JOHN W. GOODERHAM, Yonkers, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Original application filed Nov. 30, 1920, Serial No. 427,445. Divided and this application filed Oct. 30, 1922. Serial No. 597,729. 19 Claims. (Cl. 179—9.)

1. In a telephone exchange system, a calling subscriber's line, a call charging device associated with said line, an operator's position, a trunk line extending to said position, switching means for extending a connection from said subscriber's line to said trunk line, means associated with said switching means for applying ringing current to said trunk line, a cord circuit at said operator's position for connection with said trunk line, and means in said cord circuit effective upon the connection of said cord circuit with said trunk line for a period sufficient for tripping said ringing current, but for a period insufficient for operating said call charging device.

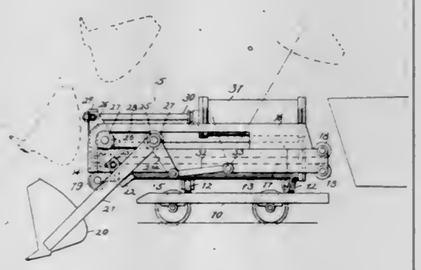


1,504,232. METERING SYSTEM FOR PARTY TELEPHONE LINES. CHARLES L. GOODRUM and EDWARD E. HENRICHSEN, New York, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 6, 1921. Serial No. 482,713. 9 Claims. (Cl. 179—9.)

1. In a party line metering circuit arrangement, a meter for each station at the central office, sources of current of different character at the central office, a metering circuit, means for automatically connecting the proper meter to the metering circuit upon the initiation of a call comprising a number of relays one at each station adapted to be selectively operated by currents of different character from said sources, a switch set in motion by the initiation of a call and at each step applying to said line a current

of different character, and at each step also connecting a different meter to the metering circuit, said switch continuing in motion until the proper current is applied to operate the relay at the calling station, means controlled by said relay in operating to stop said switch with the corresponding meter connected to the metering circuit, and means for thereafter closing said metering circuit.

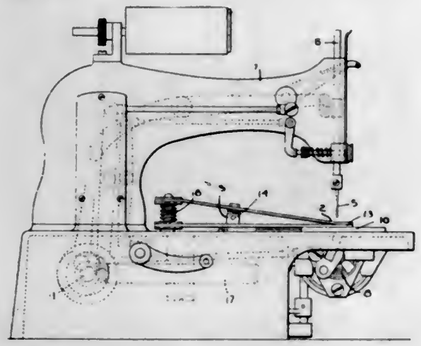
1,504,233. DRAIN PROTECTOR. LOU ELLEN GRAHAM, Indianapolis, Ind. Filed Nov. 7, 1921. Serial No. 513,379. 2 Claims. (Cl. 210—88.)



1. A removable drain protector filtering construction including tubular means having an enlarged inlet for the telescopic reception of a down spout, an outlet for telescopic engagement with a soil pipe, screening means within the tubular means, and a collar wedgingly supported on said tubular means and seatable on the soil pipe to close the latter and restrict the telescopic movement of the tubular means into the soil pipe.

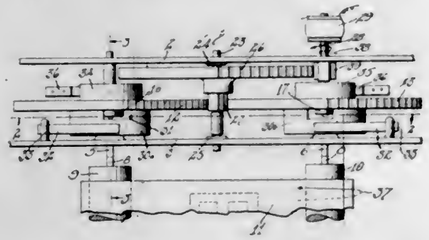
1,504,234. BRASSIÈRE HOOK. NATHANIEL WYMAN GREEN, Meadville, Pa., assignor to The Spirella Company, Meadville, Pa., a Corporation of Pennsylvania. Filed July 14, 1923. Serial No. 651,455. 2 Claims. (Cl. 24—73.)

1. A brassière hook comprising a resilient body having an elongated slot formed therein adapted to receive the post of a corset clasp to which it is to be attached, the end of the said body being folded upon itself to form a bill, said bill overlying and completely covering the said slot.



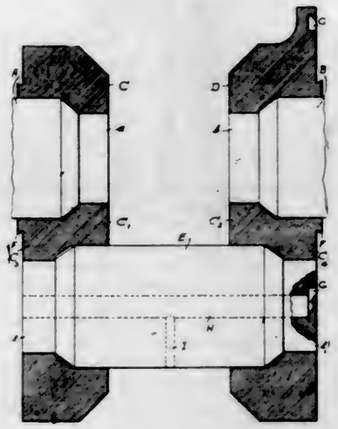
1,504,235. LOADING MACHINE. ROBERT P. GREENLEAF, Cleveland, Ohio, assignor to Frank Billings, Cleveland, Ohio. Filed July 17, 1919. Serial No. 311,591. 12 Claims. (Cl. 214—134.)

1. In a loading machine, a frame, a ram movable forwardly and rearwardly with respect to the frame, a shovel adapted to be swung from in front of the machine upwardly and rearwardly to dump material at the rear thereof, an arm connecting the shovel to the ram and mounted on the latter for rotary movement and for forward and rearward movement relative thereto, the arm and ram having means comprising a rigid element connected to one part and engaging the other part at a certain or given point for imparting a rotary movement to the arm in one direction when it is moved forwardly with respect to the ram and a rotary movement in the reverse direction when it is moved rearwardly with respect to the ram.



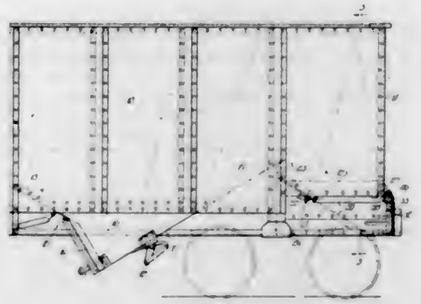
7. In a loading machine, a frame, a shovel adapted to receive a load at the front of the machine and to be swung over the machine to dump the material at the rear thereof, a ram movable forwardly and rearwardly of the frame, a member movable forwardly and rearwardly with respect to the ram, an arm connecting the shovel to said member, and an arm connected to the ram and co-operating with said first-named arm to tilt the latter and the shovel.

1,504,236. THREAD TRIMMER FOR SEWING MACHINES. CHRISTIAN H. T. HAGELSTEIN, Boston, Mass., assignor to The Reece Button Hole Machine Company, Boston, Mass., a Corporation of Maine. Filed Mar. 15, 1922. Serial No. 543,987. 8 Claims. (Cl. 112—252.)



1. In a sewing machine constructed to sew a short seam and then come to rest and having a needle, a shuttle, and means for operating them to cause a loop of needle thread to be carried about the shuttle, the combination with a loop spreader operative during the formation of the last stitch to engage the side of the loop of needle thread leading to the needle and draw it out, of a thread selector operative to engage the other side of said loop and carry it in another direction, and means to cut the latter side of the loop while said loop is retained by the thread selector and loop spreader.

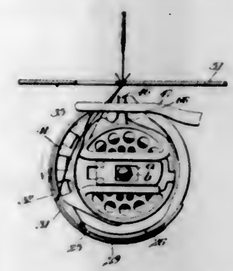
1,504,237. RATCHET DRIVE MECHANISM. JOHN F. HALVERSON, Madison, Wis., assignor of one-half to Charles E. Friday, Madison, Wis. Original application filed Oct. 18, 1921, Serial No. 506,741. Divided and this application filed Aug. 6, 1923. Serial No. 656,035. 2 Claims. (Cl. 74—7.)



1. A clutch mechanism of the character described comprising a pair of shafts, a gear wheel rotatably mounted on each of said shafts, said gear wheels arranged to be driven both in the same direction, means for causing one of said gear wheels to grip and turn its associate shaft and to cause the other of said gear wheels to turn freely on its associate shaft when said gear wheels are driven in one direction, said means comprising a ratchet wheel associated with each of said shafts, a pawl associated with and mounted on each of said gear wheels, said pawls being adapted for engagement with the adjacent ratchet wheels on said shaft, and shells loosely mounted on said shafts, spring pressed drag members in contact with said shells, said shells being arranged to engage with said pawls to move one of said pawls in engagement with its adjacent ratchet wheel, and the other pawl out of engagement with its adjacent ratchet wheel, depending upon the direction of rotation of said gear wheels.

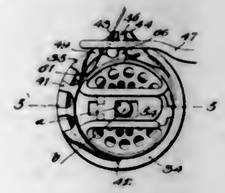
1,504,238. CRANK SHAFT. REINHARD HILDEBRAND, Webster Groves, Mo., assignor to Fulton Iron Works Company, St. Louis, Mo., a Corporation of Delaware. Filed Dec. 30, 1920. Serial No. 434,175. 2 Claims. (Cl. 74—38.)

1. A crank arm provided with a stepped off aperture and a circular concentric oil groove around said aperture, and a passage from said oil groove leading to the bearing surface of the crank pin.



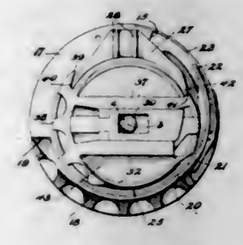
1,504,239. DUMP CAR. DAVID HINDAHL, Chicago, Ill., assignor to Harry S. Hart, Chicago, Ill. Filed Feb. 11, 1922. Serial No. 535,923. 6 Claims. (Cl. 105—248.)

1. A dump car having sides, ends and a floor, a center sill structure rising into the floor over the trucks and forming shedding portions, and dump doors on each side of said shedding portions hinged at or near the bolster and extending toward the end of the car for dumping the load over the trucks downwardly and longitudinally with respect to the car.



1,504,240. STITCH-FORMING MECHANISM. RICHARD K. HOHMANN, Peru, Ind., assignor to Hohmann Sewing Machine Company, Peru, Ind. Filed Dec. 13, 1916. Serial No. 136,688. Reewed Nov. 22, 1922. 21 Claims. (Cl. 112—228.)

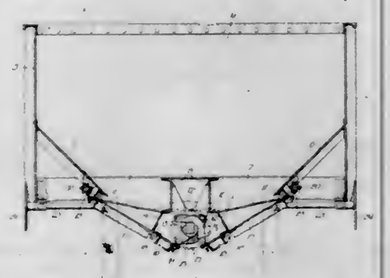
1. In a rotary hook sewing mechanism, a rotating looptaker having an interior raceway formed with a notch having a beak at one side to seize the thread loop formed by the needle, and a loop deflector extending circumferentially across the notch forward and rearward of the



beak, the edge of the looptaker in which said notch is formed also having a curved recess extending rearwardly from near the base of said beak.

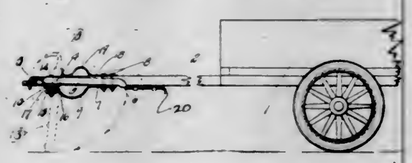
1,504,241. BOBBIN HOUSING FOR ROTARY-HOOK SEWING MACHINES. RICHARD K. HOHMANN, Peru, Ind., assignor to Hohmann Sewing Machine Company, Peru, Ind. Original application filed Dec. 13, 1916, Serial No. 136,688. Divided and this application filed Mar. 22, 1918, Serial No. 224,602. Renewed Mar. 17, 1924. 9 Claims. (Cl. 112—231.)

1. A carrier for a rotary hook sewing machine comprising a casing having a circumferential bearing rim formed with a hook near the top facing the top, and having means to receive a bobbin therein with the axis of the bobbin offset below and on the side opposite the hook with respect to the axis of the rim.



1,504,242. BOBBIN CASING AND CARRIER FOR ROTARY-HOOK SEWING MACHINES. RICHARD K. HOHMANN, Peru, Ind. Filed Feb. 28, 1921. Serial No. 448,577. 9 Claims. (Cl. 112—228.)

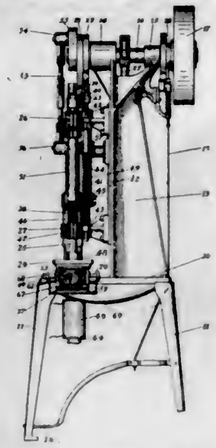
1. In a rotary hook sewing machine comprising a non-rotatable carrier adapted to be mounted in a rotary hook and formed with a bobbin receiving chamber, a bobbin casng having a bobbin encircling portion cut away at one side and mounted in said carrier with said



portion extending into said chamber except at the cut-away side thereof, and with the bobbin axis laterally displaced from the hook axis by a distance greater than would be possible if said casing were not cut away.

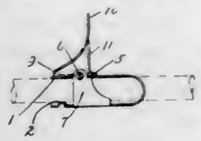
1,504,243. DUMP-CAR CONSTRUCTION. WILLIAM J. HOSCEIT, Chicago, Ill., assignor to Rodger Ballast Car Company, Chicago, Illinois, a Corporation of Maine. Filed Aug. 15, 1921. Serial No. 492,249. 3 Claims. (Cl. 105—251.)

1. In a dump car, center sills, a floor having openings either side of said center sills, doors covering the floor openings, the doors consisting of frame members pivoted at one side of said openings and inner members pivoted in the frame members adjacent the opposite side of the floor openings, a longitudinal shaft adjacent the center sills, arms on said shaft and links connecting the arms to similar door members on either side of said center sills, shafts adjacent the outer edges of the doors, and means connecting said shafts to the remaining door members, the links coacting with the center shaft and the means coacting with the outer shafts in such manner as to release or to draw up the door members to which they are connected, when the shafts are rotated.



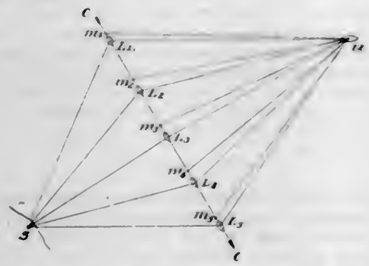
1,504,244. TRAILER HITCH. GEORGE L. HOWELL, Munger, Mich. Filed Nov. 25, 1922. Serial No. 603,262. 5 Claims. (Cl. 280—33.4.)

1. The combination with a draft member, of a trailer hitch comprising a strap member secured to the draft member and provided with an eye therein, a ground engaging prop pivotally connected to the draft member and formed with a bill or hook on the upper end thereof, adapted when folded to engage the eye in the strap member.



1,504,245. MACHINE FOR MAKING PAPER CUPS. ERNEST R. HUNTLEY, Milwaukee, Wis., assignor, by mesne assignments, to Milwaukee Lace Paper Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Sept. 29, 1919. Serial No. 327,111. Renewed Mar. 25, 1922. Serial No. 546,884. 28 Claims. (Cl. 93—60.)

1. In a machine for making cups from flat blanks, means for plaiting the sides of the cup, a punch shaped to fit the interior of the cup to be formed, a sectional die shaped to fit the exterior of the cup, and arranged to receive said punch, the sections of said die being



resiliently supported and adapted to move outwardly in order to open the die and permit the cup to be projected therethrough by said punch.

1,504,246. TUBE COMPRESSOR. FRANK S. HYATT, Brooklyn, N. Y. Filed Feb. 4, 1921. Serial No. 442,375. 7 Claims. (Cl. 251—5.)

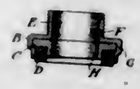
1. In a tube compressor, the combination of upper and lower clamping members, brackets rising from opposite sides of one of said members and an operating cam engaging the other member and having rigid ears pivoted in fixed position in openings in said brackets, said ears being stamped out of the sheet metal of the cam integral therewith and of a form adapting them without bending to act as hooks on being entered in said openings in the assembling operation.

1,504,247. METHOD AND MEANS FOR DETECTING AND LOCATING SUBMARINES. WILLIAM WHITE JACQUES, Chester, Nova Scotia, Canada. Filed May 14, 1918. Serial No. 234,401. 9 Claims. (Cl. 181—0.5.)

4. The method of finding the location of a submarine within a body of water, which consists in producing at some known point within the water, a musical sound

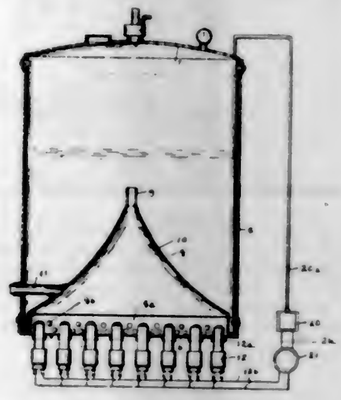
sympathetic in pitch with some note within the range of resonance of the submarne; and then measuring, at each of two known points within the water, the interval of time between the arrival of the musical sound coming directly from the source and the arrival of the resonated musical sound coming from the submarine.

1,504,248. LUMBER CUT-OFF MACHINE. CHARLES JOHNSON, Minneapolis, Minn. Filed Apr. 5, 1922. Serial No. 549,669. 3 Claims. (Cl. 143—168.)



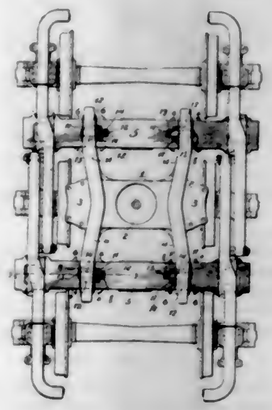
1. The combination with a saw table, a co-operating saw and a board guide on said table, of a board-stopping device comprising a rock shaft mounted in bearings fixed in respect to said board guide, a rail extended parallel to and secured in respect to said board guide, bearing blocks slidably mounted on said rail, stop arms that are free for differential oscillations on said shaft and have hubs connected to said rock shaft by couplings that cause said arms to move with said rock shaft progressively from and to operative positions, and means for securing said bearing blocks to said rail in different set positions as to distance from said saw.

1,504,249. TWO-PART GARMENT. HENRY KLEIN, Cleveland, Ohio. Filed Oct. 30, 1922. Serial No. 597,768. 4 Claims. (Cl. 2—144.)



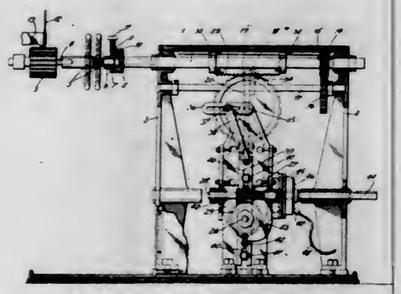
1. A garment comprising two parts one of said parts being provided with a plurality of openings and strap-like members which cover said openings the other part of said garment having a plurality of openings adapted to register with openings in the first mentioned part and strap-like members which cover said openings, the strap-like members on either part being adapted to extend through the openings on the other part, and means adapted to engage said strap-like members when inserted through openings thereby to retain the said strap-like members and to fasten the garment parts together.

1,504,250. QUICK-ACTING RIM NUT OR THE LIKE. HENRY P. KRAFT, Ridgewood, N. J. Filed Feb. 24, 1921. Serial No. 447,490. 6 Claims. (Cl. 85—32.)



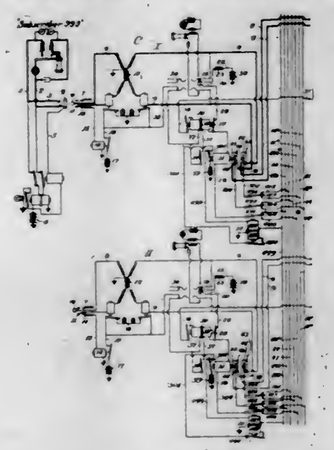
1. A quick-acting nut, or the like, comprising two associated members, each having mutilated threads, the thread portions being adapted to be brought into and out of alignment by a relative rotation of said members and a pin and groove connection wholly within said members for limiting the relative rotary movement therebetween.

1,504,251. STEAM GENERATOR. RICHARD H. LANSING, Chicopee Falls, Mass. Filed Apr. 13, 1923. Serial No. 631,861. 3 Claims. (Cl. 219—38.)



1. A steam generator consisting of a boiler having a bottom and a conical member therein providing a steam generating chamber under the conical member and over the bottom, said member having normally open communication with the boiler, one end of the conical member providing an outlet, a feed water connection leading to said steam generating chamber, and an electrical heater projecting into the steam generating chamber.

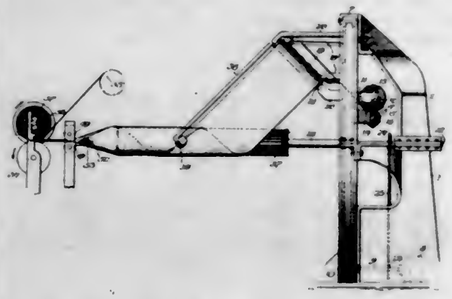
1,504,252. CAR TRUCK OF THE SIX-WHEEL TYPE. JACOB C. LARSEN, Columbus, Ohio, assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Filed Apr. 7, 1923. Serial No. 630,540. 4 Claims. (Cl. 105—188.)



1. In a truck, the combination of a transverse bolster, a longitudinal bolster having its end constructed to fit over the transverse bolster, and means for supporting the transverse bolster within the end of the longitudinal bolster and permitting limited endwise movement thereof.

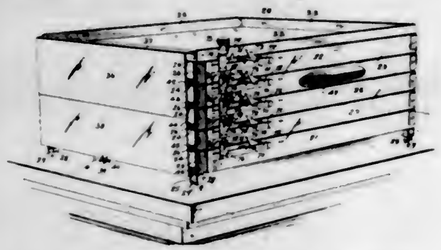
1,504,253. ARMATURE-WINDING MACHINE. CLAUDE M. MCCORD, Richmond Heights, Mo., assignor to Armature Rewinding Company, St. Louis, Mo., a Corporation of Missouri. Filed July 30, 1923. Serial No. 654,589. 24 Claims. (Cl. 242—13.)

1. A machine of the character described, comprising a support for an armature core, means for holding said support in different adjusted positions for operation, and mechanism for imparting alternating longitudinal and rocking movements to said support and thereby to the armature core in all of the adjusted positions of said support.



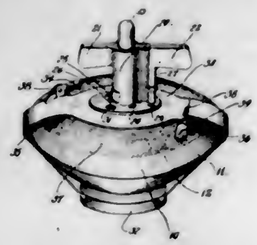
1,504,254. SEMIMECHANICAL TELEPHONE-EXCHANGE SYSTEM. JAMES L. MCQUARRIE, Chicago, Ill., and ALBERT M. BULLARD, New York, N. Y., assignors, by mesne assignments, to Western Electric Company, Incorporated, a Corporation of New York. Filed Feb. 5, 1907, Serial No. 355,884. Renewed Apr. 22, 1909. Serial No. 491,601. 37 Claims. (Cl. 179—27.)

1. The combination with a plurality of connecting circuits, of switching mechanism associated therewith, a series of sending mechanisms, and means whereby the first idle sending mechanism of the series may be automatically associated with any one of said circuits.



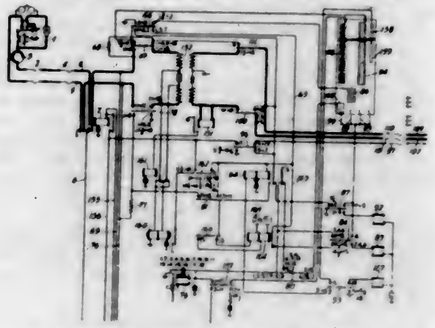
1,504,255. METHOD OF MANUFACTURING BIAS FABRIC AND APPARATUS THEREFOR. FRANK J. MACDONALD, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Dec. 24, 1918. Serial No. 268,123. 32 Claims. (Cl. 154—1.)

7. The method of transforming woven fabric into bias fabric for use in tire construction, comprising the steps of forming said woven fabric into a helix, the several turns of said helix being overlapped sufficiently to form



a splice cutting said helix along parallel lines, and withdrawing the bias fabric from said helix.

1,504,256. PAPER FEEDING AND COLLATING DEVICE. ELIAS MARCUSON, New York, N. Y. Filed Mar. 17, 1922. Serial No. 544,577. 16 Claims. (Cl. 270—58.)

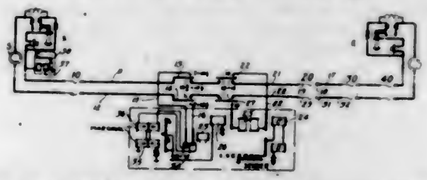


1. In a device of the kind described, a plurality of separable sections each forming a sheet holding compartment, means for coupling said sections one above another, each section having a sheet ejecting means, actuating means for each ejecting means, and means intermediate said several actuating means for transmitting operative motion from one to another to produce a simultaneous operation thereof.

1,504,257. SPARKING TOP. LOUIS MARX, New York, N. Y. Filed Nov. 1, 1922. Serial No. 598,280. 11 Claims. (Cl. 46—32.)

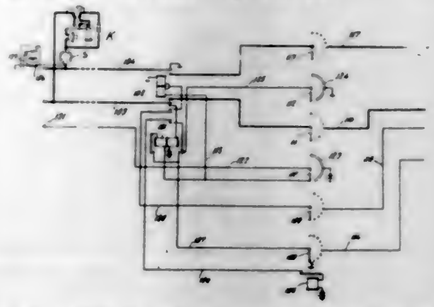
1. A sparking spinning top comprising a rotatable spinning top body, a stationary mounting therefor, a winding means for setting the top into spinning action and means carried by the top body and its mounting for producing an emission of sparks when the top is spun.

1,504,258. TELEPHONE-EXCHANGE SYSTEM. WILLIAM H. MATTHIES, Hackensack, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 5, 1922. Serial No. 527,071. 13 Claims. (Cl. 179—18.)



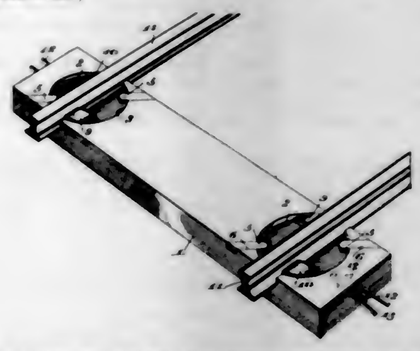
1. In a register system, an automatic switch, an impulse circuit, a plurality of registering devices arranged for control over said impulse circuit, certain of said registering devices being permanently associated with said circuit, means whereby others of said registering devices are temporarily associated with said circuit, means to position said registers, and means to operate said automatic switch under the control of said registering devices.

1,504,259. WIND-POWER GENERATOR. WILLIAM O. MILLER, Detroit, Mich. Filed June 22, 1923. Serial No. 647,024. 11 Claims. (Cl. 170—37.)



1. A device of the character described including a member to be rotated by air currents and comprising a shaft and a blade extending longitudinally and spirally of the shaft, said spiral being of gradually increasing diameter from one end of the shaft toward the opposite end, and means for pivotally supporting said shaft intermediate its ends, whereby wind pressure will turn said member upon its pivotal support with its end of smallest diameter facing the wind.

1,504,260. TELEPHONE-EXCHANGE SYSTEM. ELLIS H. MILLS, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 25, 1920. Serial No. 412,717. 17 Claims. (Cl. 179—63.)

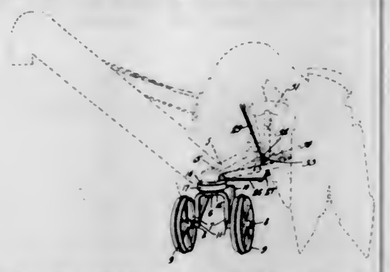


1. In a telephone exchange system, a central office, a calling line, a called line, means at said central office for extending a connection between said lines, a charging device on said calling line, means at said central office for arresting the completion of said connection until after the operation of said charging device, and means comprising a plurality of marginal differential relays for rendering said arresting means ineffective.

1,504,261. TELEPHONE-EXCHANGE SYSTEM. ELLIS H. MILLS, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 30, 1920. Serial No. 433,987. 19 Claims. (Cl. 179—6.3.)

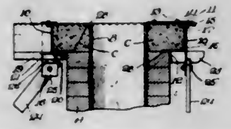
1. In a telephone exchange system, a calling line, a service charging device on said calling line, automatic switches for extending effective talking connections from said calling line, central office means for controlling the extension of connections, means associated with said central office means for arresting the completion of certain of said connections from said calling line until after the operation of said charging device and means operative for rendering said arresting means ineffective during the extension of other of said connections from said calling line.

1,504,262. COMBINED TIE AND RAIL FASTENER. HARVEY ZWINGLE MORGAN, Pine Bluff, Ark. Filed Jan. 25, 1924. Serial No. 688,534. 5 Claims. (Cl. 238—263.)



1. A combined tie and rail fastener comprising a body having recesses opening through the upper wall thereof adjacent to opposite ends of the tie body, each recess being circular in horizontal section, a rotatable disc interfitting each recess and terminating below the plane of the upper end of the recess, rail-engaging projections upstanding from the disc for engaging opposite sides of a rail when the disc has been rotated to a certain position in respect to a rail extending thereacross, and means for releasably holding the disc in such position in the recess in which it is disposed that said projections remain in engagement with said rail.

1,504,263. STEERING DEVICE. EDWARD D. MUELDER, Orange City, Iowa. Filed Apr. 29, 1922. Serial No. 557,275. 2 Claims. (Cl. 280—97.)



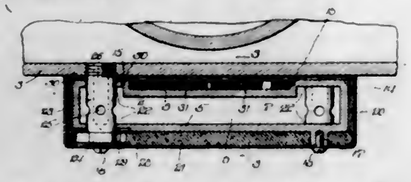
1. In combination with the stub tongue of an agricultural machine, a guiding truck, means for pivotally connecting the guiding truck to the stub tongue, a segmental gear carried by the guiding truck, a disk having a de-

pending flange, housing the segmental gear, said disk having a curved opening, said curved opening adapted to accommodate the connecting means between the guiding

truck, and stub tongue to permit of lateral movement of the guiding truck with respect to the tongue, and means for rotating the disk to move the guiding truck.

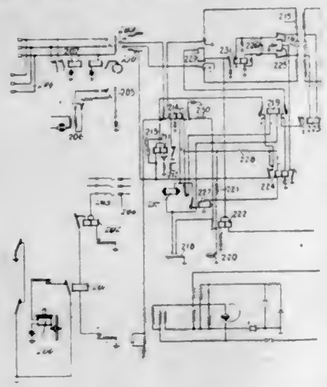
1,504,264. FORM FOR CONCRETE CONSTRUCTION. CARL NELSON and JOHN L. MONTEN, Chicago, Ill. Filed June 29, 1924. Serial No. 481,194. 12 Claims. (Cl. 25—131.)

7. A form for concrete construction comprising a form unit; means for securing said unit in position, said means comprising a bar; a block adjustably mounted on said bar; and means on said block for engaging the upper and lower ends of said unit in clamping relation, said means accommodating itself to irregularities in the contour of the unit.



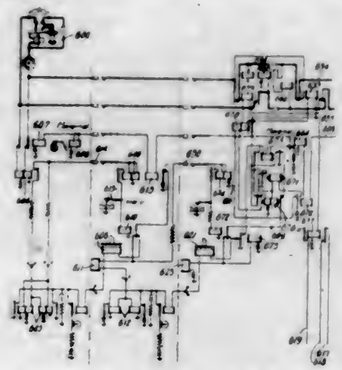
11. A form for concrete construction or the like comprising angularly disposed form units, and a pair of members on one unit adapted to swing about the other unit and interlock with each other at their free ends.

1,504,265. APPARATUS FOR TREATING LIQUIDS WITH GASES. CHARLES S. PALMER, Pittsburgh, Pa. Filed Mar. 12, 1920. Serial No. 365,271. 3 Claims. (Cl. 261—79.)



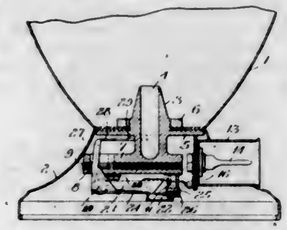
1. In an apparatus for treating liquids with gases, the combination, with a closed absorber vessel for holding a column of liquid, means for introducing the liquid, and controlled means for removing the liquid, of a conduit for gas, leading down into said vessel and opening thereinto adjacent the bottom of the vessel, and a helical leader of many turns encircling said conduit and submerged in and extending substantially throughout the column of liquid, said leader having a continuous, downwardly open, channel at its under side for entraining within the column of liquid a stream of gas in its upward flow, and for causing the gas to issue in bubbles directly into the column of liquid, the bubbles being carried around the leader in a centrifugal helical whirl, thus breaking the bubbles into smaller bubbles, whereby they are more readily adapted to be absorbed by the liquid, said channel freely communicating throughout its entire length with the space within the wall of the closed absorber vessel.

1,504,266. ELECTRIC HEATER FOR WATER-CIRCULATING SYSTEMS. RICHARD K. PECK, Elgin, Ill. Filed Jan. 3, 1922. Serial No. 526,779. 6 Claims. (Cl. 123—174.)



1. In a device of the character described, the combination with a motor having a water jacket, of an auxiliary heating unit comprising a wall enclosing and forming a water chamber and having an inwardly extending recess, an insulated electric heating element in said recess, means for attaching said heating unit to said water jacket in heating relation to said water jacket and to said water chamber and means for connecting the water chamber inwardly with said water jacket.

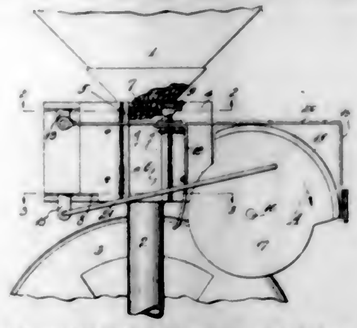
1,504,267. MACHINE-SWITCHING TELEPHONE SYSTEM. LIPA POLINKOWSKY, London, England, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 18, 1918. Serial No. 258,683. 5 Claims. (Cl. 179—27.)



1. A telephone exchange system comprising a toll board, manual switching sections and machine switching sections, calling and called lines terminating therein, trunk lines, a ringing key in said toll board, and means in said manual switching sections for causing the application of ringing current over said trunk lines to a local line in said machine switching sections by the operation of said ringing key after a substantial interval only.

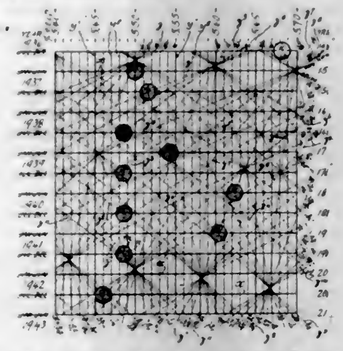
1,504,268. MACHINE-SWITCHING TELEPHONE-EXCHANGE SYSTEM. LIPA POLINKOWSKY, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 21, 1919. Serial No. 298,707. 15 Claims. (Cl. 179—18.)

1. In a telephone exchange system, a subscriber's line, a switching station, a trunk line outgoing therefrom, a distant switching station in which said trunk terminates, switches at said first station for connecting the subscriber's line to said trunk, switches at said distant station for extending said trunk line, an impulse circuit including the talking conductors of said trunk which is free from impedances at the first station for transmitting impulses from the subscriber's line to the distant station to control the switches therein, a source of talking current associated with the talking conductors of said trunk circuit at the first station, and means for rendering said source of current effective for conversation.



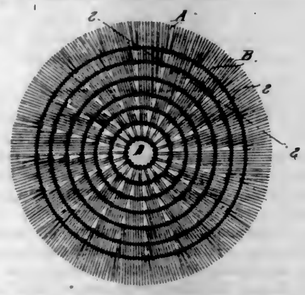
1,504,269. THERMOSTATIC SWITCH. WILLIAM A. RANKIN, Rochester, N. Y., assignor to Robeson-Rochester Corporation, Rochester, N. Y., a Corporation of New York. Filed Oct. 4, 1923. Serial No. 666,487. 5 Claims. (Cl. 219—43.)

1. The combination with an electrical heating unit having circuit contacts, of a switch element normally closing the circuit through said contacts, a thermostatically controlled detent for maintaining the normal position of the switch and a weight tending to open the switch.



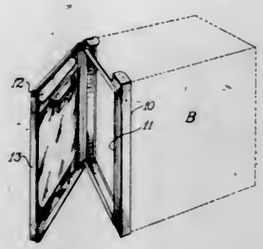
1,504,270. FEEDING DEVICE FOR POP-CORN MACHINES. WILLIAM D. ROOT, Lakewood, Ohio, assignor, by mesne assignments, to The Guardian Savings and Trust Company, trustee, Cleveland, Ohio. Filed Oct. 25, 1920. Serial No. 419,556. 2 Claims. (Cl. 221—112.)

1. Apparatus for feeding measured charges of popcorn or similar small grains or kernels, comprising a reservoir having an opening through which the material is fed, a gate slidable across said opening to control the flow of material therethrough, an actuating member connected to said gate, said member having spaced arms, a cam mounted between said arms and engageable therewith to shift said gate, said actuating member and cam



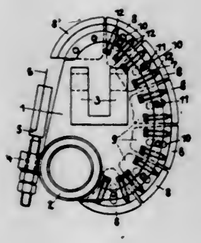
being so arranged that said gate is moved from a full open position to a position in which the opening is practically but not entirely cut off.

1,504,271. CHART. JOHN CHADBOURN ROBISON, New York, N. Y. Filed Feb. 13, 1922. Serial No. 535,995. 14 Claims. (Cl. 283—1.)



1. A chart having delineated thereon maturity lines indicating time intervals, yield lines at an angle thereto indicating percentages of return on securities, and a plurality of price curves designating market prices of various securities at various coupon rates, said price curves being plotted so that they intersect said maturity lines at points which indicate the yields of given securities at given coupon rates.

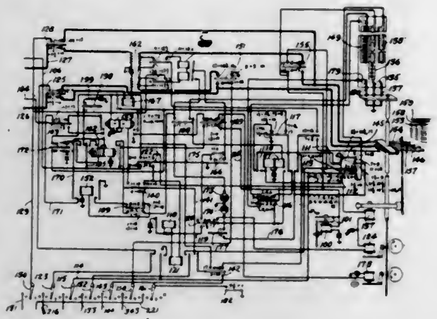
1,504,272. BUFFING WHEEL. CHARLES P. SCHLEGEL, Rochester, N. Y. Filed Jan. 12, 1921. Serial No. 436,773. 12 Claims. (Cl. 51—193.)



2. A circular one-piece woven fabric buffing wheel in which all of the weft threads are arranged radially in the same plane and the warp threads circularly.

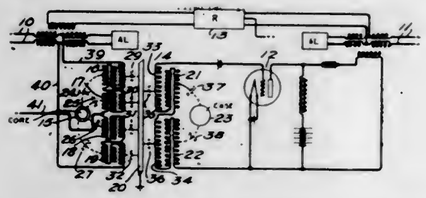
1,504,273. BOX DISPLAY COVER. CHARLES F. SCHNEBELIN, Peoria, Ill. Filed Aug. 14, 1922. Serial No. 581,612. 4 Claims. (Cl. 217—58.)

1. A box display cover comprising, a frame adapted to close the open end of a box, a hinged cover therefor, means for detachably mounting a transparent pane therein, including an upper tensioned holder member, spaced rearwardly bent flap members at the lower side of said cover, and a clamping member surrounding the lower edge of the pane and including thereon relatively spaced engagement members adapted to underlie said flap members.



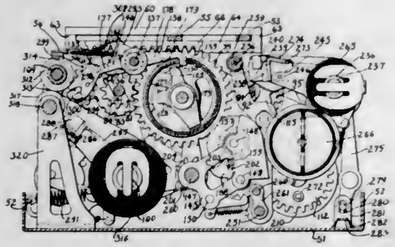
1,504,274. ADJUSTABLE CAM DISK FOR USE IN CONNECTION WITH THE RECIPROCATING WORKING FRAMES OF EMBROIDERY MACHINES. FRITZ SCHNEIDER, Plauen, Germany. Filed Sept. 24, 1923. Serial No. 664,596. 6 Claims. (Cl. 74—1.)

1. A cam disk for use in connection with the reciprocating working frame of an embroidery machine, comprising, in combination, a cam-shaped body, and a plurality of adjustable segments arranged along the peripheral surface of said body at some distance therefrom, and supporting means located in the gap between this surface and the opposite faces of the said segments.



1,504,275. AUTOMATIC TELEPHONE-EXCHANGE SYSTEM. FREDERICK J. SCUDDER, Long Island, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 23, 1921. Serial No. 479,730. 8 Claims. (Cl. 179—18.)

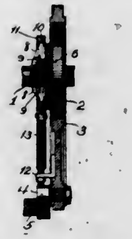
1. In a telephone exchange system, an incoming line, an outgoing line, an automatic switch for interconnecting said lines, a sending device, means to operate said sending device, means to selectively control said switch during a portion of the operation of said sending device, a differential relay controlled in accordance with the electrical condition of said incoming line, release circuits effective upon the operation of said relay at certain times to cause the immediate restoration of said switch and said sending device, and means effective upon the



operation of said relay at other times to cause the release of said switch and said sending device only after the complete operation of said sending device.

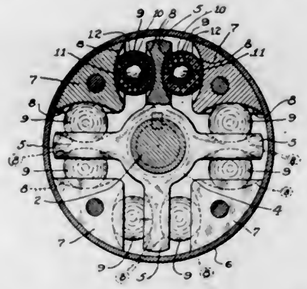
1,504,276. TRANSMISSION CIRCUITS. WILLIAM J. SHACKELTON, Scotch Plains, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 17, 1921. Serial No. 522,985. 9 Claims. (Cl. 178—44.)

1. A transmisssion circuit comprising a transformer having a multi-layer primary winding, a multi-layer secondary winding, and a shield between said windings, each of said windings being in a plurality of sections, the inner layer of each section of one winding being symmetrically connected to the two sides of said circuit.



1,504,277. CASH REGISTER. BERNIS M. SHIPLEY, Dayton, Ohio, assignor to The National Cash Register Company, Dayton, Ohio. Filed Dec. 19, 1919. Serial No. 346,134. 16 Claims. (Cl. 235—3.)

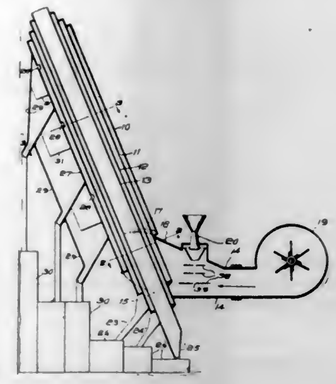
1. In a machine of the class described, the combination of manipulative devices, a main operating mechanism, a totalizer, actuators therefor operated by the manipulative devices, a consecutive counter, actuators therefor, printing mechanism, means interposed between said printing



mechanism and said consecutive counter and operated by the main operating mechanism for transferring the consecutive number from the consecutive counter to the printing mechanism, and a member for restoring a portion of said means to normal position thereby transferring said number back upon the consecutive counter and for simultaneously restoring the totalizer actuators to normal position, the remaining portion of said means being restored to normal position by the main operating mechanism.

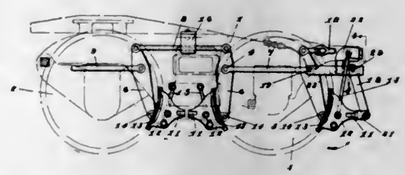
1,504,278. GOVERNING MEANS FOR ENGINES. WILLIAM ALEXANDER SMITH, Jackson, Tenn., assignor of one-half to R. L. Beare, Jackson, Tenn. Filed July 3, 1923. Serial No. 649,326. 4 Claims. (Cl. 74—1.)

1. In governing means for engines, the combination with a governor shaft, an eccentric thereon and an eccentric strap cooperable with a valve shaft of an engine, of a compensating spring cooperable with said strap to sustain and tend to neutralize the weight of said strap, whereby the weight of the governor eccentric strap is prevented from constituting a deterring factor when it operates to open the engine valves.



1,504,279. FLEXIBLE COUPLING AND ROLLERS THEREFOR. CLARENCE W. SPICER, Plainfield, N. J., assignor to Spicer Mfg. Corporation, South Plainfield, N. J., a Corporation of New Jersey. Filed June 16, 1922. Serial No. 568,738. 9 Claims. (Cl. 64—96.)

1. The combination in a flexible coupling of driving and driven parts, and spherical rolling members intermediate said parts and acting under compression, said members having a resilient outer layer and a core which is hard relatively to said outer layer.

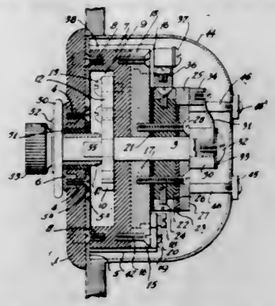


1,504,280. CONCENTRATOR. ALBERT H. STEBBINS, Los Angeles, Calif. Filed Apr. 12, 1922. Serial No. 551,933. 8 Claims. (Cl. 83—54.)

1. A concentrator comprising, in combination, an upwardly extending container, a plurality of tubes arranged concentrically within the container and having openings in their walls for the passage of air inwardly from one tube to the other, the tubes having their length increased in the order in which they are arranged one within the other to increase the area of the tubes, means for introducing air bearing the materials to be treated into the container with a spirally whirling upward movement to throw the heavier particles outwardly by centrifugal

force, means for discharging air from the innermost tube, and means for discharging from the container and tubes the materials deposited therein by the air passing through the concentrator.

1,504,281. BRAKE MECHANISM. JOHN F. STREIB, Avalon, Pa., assignor to Pressed Steel Car Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Aug. 8, 1923. Serial No. 656,403. 21 Claims. (Cl. 188—212.)

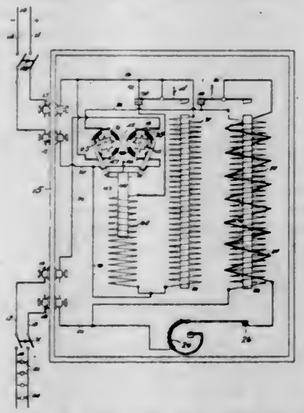


5. In a brake mechanism, a brake beam, a brake rod, and means connected with said beam and rod adapted to maintain said beam level in its released position, said means permitting independent movement between said beam and rod when the braking power is being applied.

1,504,282. SYSTEM OF PREVENTING THE THEFT OF MOTOR VEHICLES. ELVEZIO TARAGNOLI, West New York, N. J., assignor of one-third to Richard Jauch and one-third to Charles Bertoni, both of West New York, N. J. Original application filed Nov. 29, 1921, Serial No. 518,554. Divided and this application filed Mar. 26, 1923. Serial No. 627,790. 7 Claims. (Cl. 200—43.)

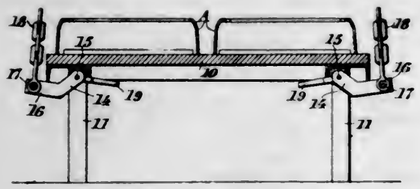
1. A permutation switch embodying a front plate provided with a polygonal aperture, a shaft or spindle coaxial with said aperture and projecting rearwardly of the front plate, a contact mounted on and rotatable with the spindle, a relatively fixed contact spaced from the axis of the spindle and with which the movable contact is adapted to be brought into engagement through rotation of the spindle, a knob shaped to detachably interfit with the forward end of the spindle and to be locked against rotation therewith, a dial rotatably mounted on the knob and having a polygonal shank adapted to interfit with the polygonal aperture of the front plate to lock

the dial against rotation, and an indicating pointer rigid with the knob and adapted to travel over the dial when the knob is rotated, whereby an operator by following



the movements of the indicating pointer can position the movable contact in engagement with the fixed contact provided that the combination of the lock is known.

1,504,283. SEQUENCE SWITCH. HERBERT B. TAYLOR, Westfield, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 17, 1921. Serial No. 470,304. 8 Claims. (Cl. 179—27.5.)



7. In a switch, a rotatable shaft, a circuit controlling disc secured to said shaft comprising conducting and non-conducting members, said disc being fomed of a plurality of parts whereby it may be removed laterally from said shaft, each of said parts being provided with mutually cooperating interlocking means for holding said disc together.

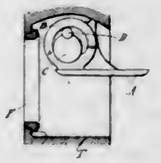
1,504,284. CIRCUIT-CONTROL DEVICE. VICTOR PEREZ TAYLOR, Mexico, Mexico, assignor of one-half to Charles Jellinek, New York, N. Y. Filed Nov. 3, 1919. Serial No. 335,282. 10 Claims. (Cl. 175—294.)

3. In a device of the class described, the combination of a main electric circuit including a lamp lead, a normally closed thermostatically actuated circuit closer, an electro-thermostat operatively connected to said circuit closer to open the same and thus break the current when an additional lamp is introduced into the lamp lead, an electro-magnet having a high resistance and having a low resistance winding with the low resistance winding in said main circuit, a normally closed circuit closer adapted to be opened by the passage of current through said high resistance windings, an electro-magnetically actuated step-by-step commutator and a main lead, a shunt circuit from the portion of the main circuit between the commutator and the last named normally closed circuit closer and leading through said high resistance windings and by passes therefrom around said thermostat circuit closer and said electro-thermostat to the lamp lead whereby abnormal current in the lamp lead will cause said electro-thermostat to break the circuit through the low resistance windings and cause the current to pass through the high resistance windings, a solenoid circuit bridged across the main line leading from one of the main leads back to the other main lead and including a circuit breaker controlling solenoid, an electro-motor circuit shunted from said solenoid circuit about said solenoid and including an electro-motor operatively connected to said step-by-step commutator to actuate the same and a normally closed circuit breaker moved to be held in its circuit-breaking position by the energizing of said solenoid.

1,504,285. LOAD-TIGHTENING MEANS. WILLIAM H. TAYLOR, St. Johnsbury, Vt., assignor to E. and T. Fairbanks and Company, St. Johnsbury, Vt., a Corporation of Vermont. Filed Oct. 29, 1923. Serial No. 671,621. 1 Claim. (Cl. 280—179.)

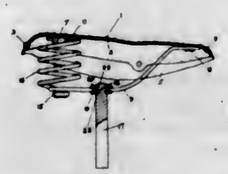
Load tightening means comprising in combination, levers pivoted to a load receiving member, a binder element passed over the load on said receiving member and attached to said levers, and means for raising said platform and engaging said levers to tighten said binder element.

1,504,286. METAL-PUNCHING MACHINE. GEORGE P. THOMAS, Glenshaw, Pa. Filed May 11, 1923. Serial No. 638,270. 8 Claims. (Cl. 164—117.)



1. In a metal punching machine, the combination with a punch, a spacing table, a work carriage movable upon the table, and interdependent electrically-operated-elements borne respectively by said punch and carriage; of a drum rotatably mounted on said carriage, insulated electric conductors on said drum and connecting said electrically-operated elements borne by the punch with those borne by the carriage, and means for rotating the drum to reel the conductors upon and to pay them out from it as the carriage moves toward and from the punch.

1,504,287. POULTRY AND STOCK HOOK. WILLIAM S. THURSTON, Caldwell, Idaho. Filed June 14, 1922. Serial No. 568,218. 3 Claims. (Cl. 119—152.)

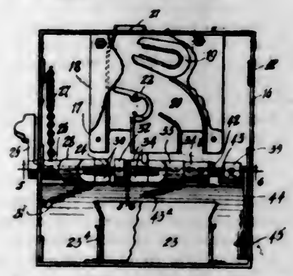


1. A stock catching tool having in combination with the staff or handle a hook provided with a shank having a cushioned sliding mounting upon the staff or handle, and yielding means for closing the throat of the hook.

1,504,288. FLAP VALVE. ZDENEK VENCL, Prague-Smichov, Czechoslovakia. Filed Mar. 31, 1924. Serial No. 703,219. 4 Claims. (Cl. 251—10.)

1. A flap valve comprising a housing a valve plate a seating for said valve plate in said housing, a projection adjacent the rim of said valve plate formed with a non-circular bore, an operating spindle rotatably mounted in said housing at right angles to the axis of the valve seating, eccentric means on said spindle co-operating with the said bore on rotation of the spindle to raise the valve plate by lever action on the point of the said seating furthest removed from said spindle.

1,504,289. CYCLE SADDLE. CHARLES WALDRON, Elyria, Ohio, assignor to The Troxel Manufacturing Company, Elyria, Ohio, a Corporation of Ohio. Filed Mar. 28, 1922. Serial No. 547,579. 15 Claims. (Cl. 208—15.)

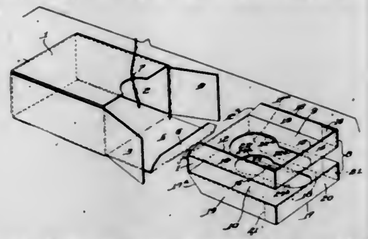


1. A saddle for cycles comprising a sheet metal seat frame having a cover secured thereon, and a supporting frame comprising longitudinally extending reach members joined at one end and secured to the pommel portion of said seat frame and having their opposite ends coiled, coiled springs secured to and depending from the cantle portion of said seat frame, the lower depending ends of said coiled springs being intertwined with the coiled ends of said reach members, and clamping means for connecting said reach members to a cycle.

1,504,290. SEAT. CHARLES WALDRON, Elyria, Ohio, assignor to the Troxel Manufacturing Company, Elyria, Ohio, a Corporation of Ohio. Filed Jan. 15, 1923. Serial No. 612,661. 5 Claims. (Cl. 208—15.)

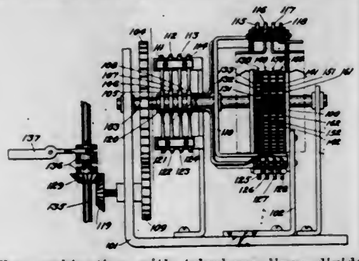
1. In a seat, the combination of a metal frame having retaining bosses formed near the rear end thereof and a looped member secured near the front end thereof; a pair of coiled springs extending from said frame, said springs having the inner ends thereof extending under the retaining bosses formed with said frame; and a bent truss rod extending through the looped member secured to said frame and having rearwardly extending arms provided with crimped ends bent to extend under said springs, each of said springs having the extended end bent around the crimped portion of the truss arm adjacent thereto.

1,504,291. PENCIL-VENDING MACHINE. JAMES B. WALKER, Dallas, Tex. Filed Dec. 9, 1921. Serial No. 521,092. 3 Claims. (Cl. 194—75.)



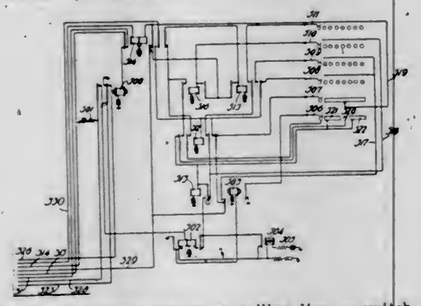
3. In a check controlled vending apparatus, an operating shaft, a cam mounted on said shaft, spaced sleeves slidably mounted on said shaft, each of said sleeves having check engaging means, means whereby a check is held between said check engaging means, said sleeves being operatively engaged with said cam and with each other when a check is held between said check engaging means, and vending means adapted to be operatively engaged by one of said sleeves.

1,504,292. PACKING AND SHIPPING BOX OR CASE. CLARENCE S. WICKES, Merchantville, N. J., assignor to Victor Talking Machine Company, a Corporation of New Jersey. Filed Mar. 5, 1921. Serial No. 449,818. 10 Claims. (Cl. 206—65.)



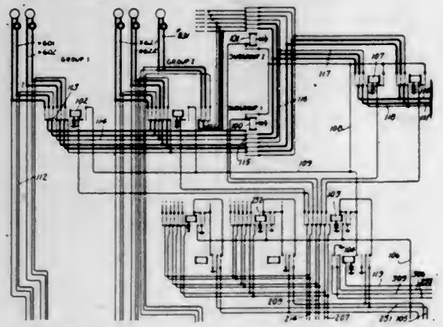
1. In a shipping case the combination with an outer casing, of a tray adapted to fit within said casing and comprising two tray members disposed substantially parallel to each other, adapted to lie flat against the opposite sides of an article placed between them, and pro-

vided with apertures, one of which is adapted to fit snugly around and frictionally hold said article within said member, a rectangular web connecting said tray members along one edge of each and forming a common



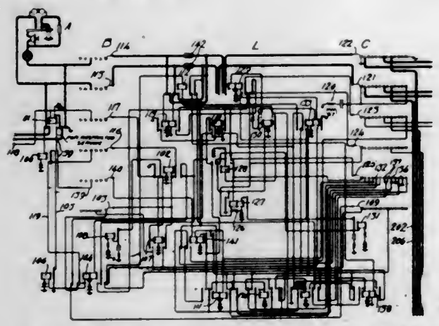
stiffening flange for both members, and outwardly extending flanges on the free edges of each of said trays to further stiffen said members, to respectively engage the walls of the outer casing, and to hold said article spaced from the walls of said outer casing.

1,504,293. TELEPHONE-EXCHANGE SYSTEM. SAMUEL B. WILLIAMS, Jr., Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 24, 1919. Serial No. 332,918. 18 Claims. (Cl. 179—18.)



1. The combination with telephone lines divided into groups, of finder switches for connecting with calling lines of said groups, a distributor switch and associated starting mechanism for starting one of said finder switches, and means for bringing said distributor switch at will into operative relation with one or another or a plurality of said line groups.

1,504,294. TELEPHONE SYSTEM. SAMUEL B. WILLIAMS, Jr., Brooklyn, and EDWARD E. HINRICHSEN, New York, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 24, 1920. Serial No. 412,482. 30 Claims. (Cl. 179—27.)

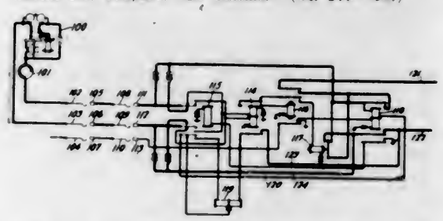


1. In a telephone system, a calling line, a switch for extending said line having directive and automatic movements, a brush for said switch having a normal position, a stepping circuit for said switch controlled through said brush when the same is in its normal position, a relay through contacts of which said stepping circuit is also controlled, means responsive to impulses for rendering said stepping circuit effective to step the switch in a directive movement, means whereby said stepping circuit is controlled through contacts of said relay independently of said brush after the latter is stepped from normal and during the directive movement of said switch, and means for returning said stepping circuit to the joint control of said brush and relay during an automatic movement of said switch.

1,504,295. TELEPHONE-EXCHANGE SYSTEM. SAMUEL B. WILLIAMS, Jr., Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 15, 1920. Serial No. 430,823. 23 Claims. (Cl. 179—18.)

1. In a telephone exchange system, a plurality of lines arranged in connective sections, the lines of each of said sections being divided into a plurality of groups and each of said groups being further divided into a plurality of subgroups, a link circuit, and means comprising a plurality of relays each individual to one of said groups of lines, a plurality of relays each individual to a particular subgroup of all of said groups and a plurality of relays each individual to a particular line in all of said subgroups for establishing connections between said lines and said link circuit.

1,504,296. TELEPHONE SYSTEM. SAMUEL B. WILLIAMS, Jr., Brooklyn, and EDWARD E. HINRICHSEN, New York, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 14, 1921. Serial No. 469,650. 13 Claims. (Cl. 179—27.)

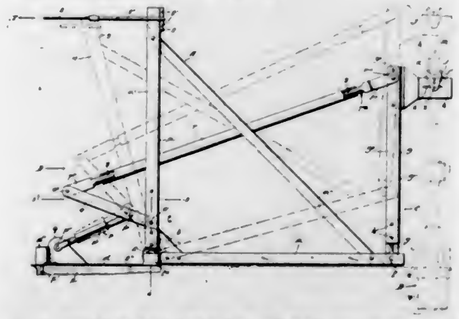


1. In a telephone system, a calling line, a switch having a normal position, a stepping relay for said switch, means responsive to impulses transmitted from said calling line for controlling the operation of said stepping relay, and means made effective by the first operation

of said stepping relay in response to the first of a series of impulses for preventing said switch from moving from its normal position.

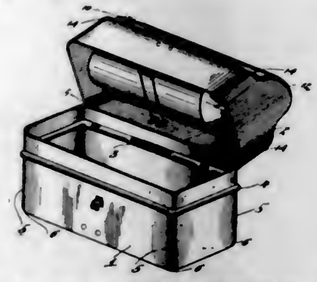
8. In a telephone system, a subscriber's line, a trunk circuit, a switch for connecting said trunk circuit to said subscriber's line, means at said switch for normally preventing the connection of said trunk circuit to said line if the line is busy, means in said trunk circuit for operating the last named means to connect the trunk to the line during the busy condition of the latter, and means operable when the line becomes idle to signal the same.

1,504,297. TELEPHONE-EXCHANGE SYSTEM. SAMUEL B. WILLIAMS, Jr., Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 20, 1921 Serial No. 478,816. 13 Claims. (Cl. 179—18.)



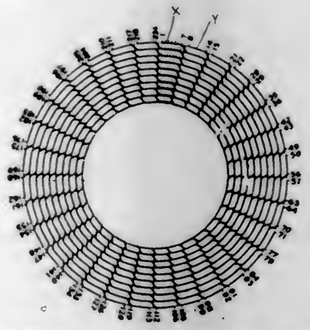
1. In a telephone system, a plurality of groups of trunks, a plurality of senders, one associated with each group of trunk, each of said senders being arranged normally to serve the group of trunks with which it is associated, means for connecting said senders to the trunks of the groups they normally serve, and means for connecting one of said senders to the trunks of some group other than the one it normally serves.

1,504,298. PROCESS OF RUSTPROOFING BY COATING WITH CADMIUM. WILLIAM A. WISSLER and CHAD H. HUMPHRIES, Kokomo, Ind., assignors to The Udylite Process Company, Kokomo, Ind., a Corporation of Indiana. Filed Apr. 9, 1921. Serial No. 459,983. 10 Claims. (Cl. 204—1.)



1. The method of rust proofing iron or steel articles by electro-depositing thereon, metallic cadmium from a suitable cadmium solution, which method consists in passing a current, maintained at high current densities, through said solution from a graphite, carbon or non-polarizing anode.

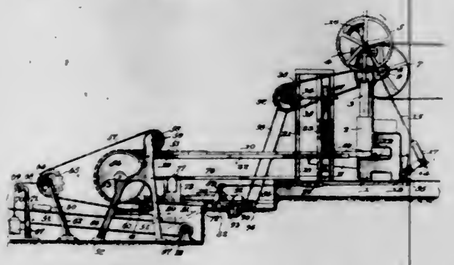
1,504,299. OIL-WELL PUMPING JACK. JOHN M. WOLFE, Oil City, Pa. Filed Sept. 5, 1922. Serial No. 586,276. 3 Claims. (Cl. 74—5.)



1. A post-free and beam-free oil-well pumping-rig devoid of support by the oil-well casing and including a V; a polish-rod-actuating pitman carried by the V; a lever fulcrumed on the V; a link that connects the lever with the pitman; a sole upon which the V is mounted free to rock; and a second link that connects the lever and the sole; the sole being provided with pivot-bearings for the V and the last-named link, and such pivot-bearings being fixed at a predetermined distance apart.

1,504,300. RECEPTACLE. THOMAS B. WRIGHT, Cincinnati, Ohio. Filed Jan. 24, 1922. Serial No. 531,477. 1 Claim. (Cl. 206—4.)

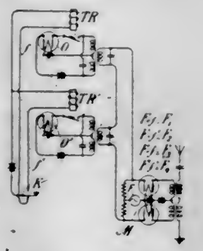
A sanitary lunch receptacle consisting of upper and lower parts, each formed of a single piece of stamped metal, said lower part having a bottom, and side and end walls, the side walls being parallel to one another and the end walls also being parallel to one another, curved corners connecting the side and end wals and curved corners also connecting the side and end walls to the bottom, a bead formed integral with the side and end walls and extending outwardly to form a substantially continuous flange arranged below the upper edge of the lower portion of the receptacle, the upper portion of the receptacle having a top, and side and end walls, the side walls of the upper portion being parallel and being adapted to snugly ngage the side walls of the lower portion, and the end walls of the upper portion being parallel and adapted to engage the end walls of the lower portion, the lower edge of one of the walls of the upper portion being hinged to the bead of the lower portion, so that the portions will overlap for a considerable height when the upper portion is closed on the lower portion, the upper portion having the central part of its top of semi-cylindrical shape from end to end and the outer parts of said top being substantially concave from end to end, all of the corners of the top portion being rounded on the interior to facilitate cleaning.



1,504,301. METHOD OF PRODUCING A BALANCED TELEPHONE EXCHANGE. ARTHUR H. ADAMS, Galion, Ohio, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 27, 1918. Serial No. 268,525. 6 Claims. (Cl. 179—18.)

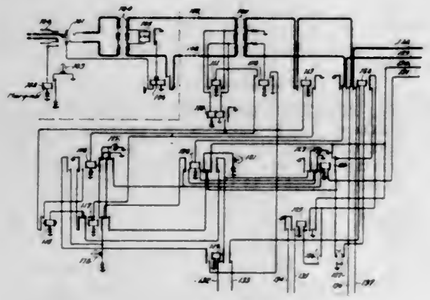
1. The method of economically routing traffic to be distributed over a number of channels with a given number (n) of channels over which any given unit of the

traffic may be routed, a given number (A) of units of traffic to be routed per channel per average routing time of a traffic unit, and a given fraction (P) of permissible traffic failures, which method comprises routing the traffic over a total number of channels such as to substantially satisfy the equation $A^n=P$.



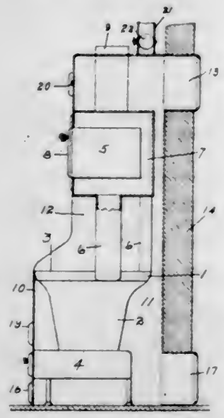
1,504,302. BRICK MACHINE. GEORGE C. ADAMS, Mechanicville, N. Y., assignor of one-fourth to Joseph M. Purcell and one-fourth to Richard A. Moore, both of Mechanicville, N. Y. Filed June 13, 1922. Serial No. 567,944. 13 Claims. (Cl. 25—2.)

2. In a brick machine, means for striking or rapping the molds comprising, gravity-actuated pendant swinging hammers adapted to strike the sides of the mold, and means for raising and releasing said hammers to permit them to fall by gravity to deliver their blows on the mold.



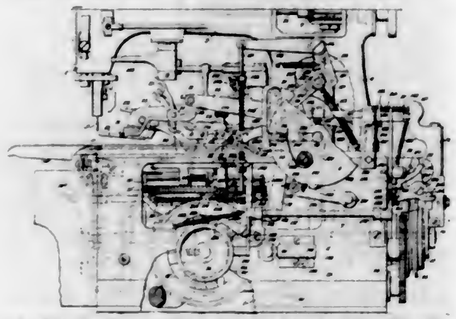
9. In a brick machine, means for unloading the molds containing the brick, comprising means for bringing the molds and their pallets into inverted position, means for supporting the mold when in inverted position, shiftable means for engaging and supporting the pallet and the brick when the mold is in inverted position, and means for lowering away the pallet and brick from the mold, said means being adapted to disengage the pallet supporting means when operating to engage the pallet and permitting the pallet supporting means to return to supporting position to support the pallet on a succeeding mold when the pallet and brick of a preceding mold have been lowered.

1,504,303. METHOD OF AND MEANS FOR REDUCING STATIC DISTURBANCES. HERMAN A. AFFEL, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed June 3, 1921. Serial No. 474,824. 13 Claims. (Cl. 250—10.)



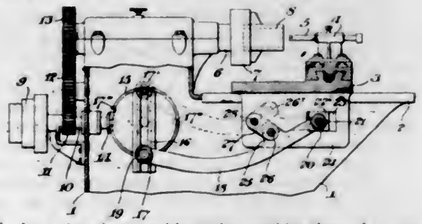
1. The method of reducing static disturbances which consists in transmitting a plurality of wave frequencies, producing a marking signal of a telegraph code at a receiving station by the conjoint action of certain of said frequencies, and producing the spacing signal of a telegraph code by the conjoint action of other of said frequencies, whereby static disturbances producing frequencies less in number than the number required to produce a signal will be without effect.

1,504,304. TELEPHONE-EXCHANGE SYSTEM. WALTER P. ALBERT, East Orange, N. J., and WARREN W. CARPENTER, Brooklyn, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 22, 1920. Serial No. 432,420. 5 Claims. (Cl. 179—27.)



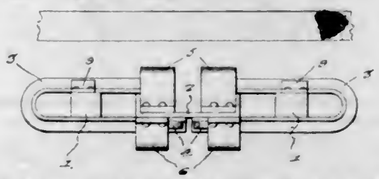
1. In a telephone system, an operator's position, a group of trunks, an automatic switch for extending telephone connections over the trunks of said group, a register sender for controlling the selective movement of the automatic switch, a timing device for governing the controlling operation of the register sender, a signal at the operator's position, means for controlling the timing device when the automatic switch finds all trunks busy in said group, and means responsive to said timing device for operating said signal.

1,504,305. COMBINATION WARM-AIR FURNACE AND KITCHEN RANGE. CLARENCE S. ALIG, Indianapolis, Ind. Filed Nov. 14, 1922. Serial No. 600,932. 3 Claims. (Cl. 126—4.)



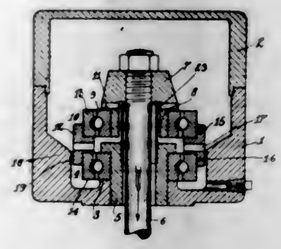
1. A combined furnace and range comprising a fire pot and a cooking top, an oven spaced above said cooking top, a casing surrounding said oven and having its walls spaced therefrom, a smoke pipe at the rear and on each side forming communication between the fire pot and the oven casing, a main casing having a lower portion surrounding the fire pot and an upper portion surrounding the oven casing said main casing having a double walled intermediate portion inclosing said cooking top on three sides and formed integrally with and inclosing said smoke pipes, substantially as set forth.

1,504,306. BUTTONHOLE-SEWING MACHINE. EDWARD B. ALLEN, Newtown, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a Corporation of New Jersey. Filed May 5, 1922. Serial No. 558,644. 11 Claims. (Cl. 112—68.)



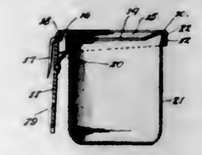
1. A buttonhole sewing machine having, in combination, buttonhole cutting mechanism, buttonhole working mechanism, continuously running power means for said mechanisms, clutch devices for throwing said mechanisms into and out of operation, a rotary control element driven by the buttonhole working mechanism, and means connected to be operated by said control element for locking the clutch device for the cutting mechanism against accidental operation during a predetermined period of the operation of the buttonhole working mechanism.

1,504,307. MACHINE FOR FORMING GROOVES. GILBERT V. ANDERSON, Philadelphia, Pa., assignor to William P. Fischer, Philadelphia, Pa. Filed Feb. 18, 1921. Serial No. 446,103. 5 Claims. (Cl. 90—39.)



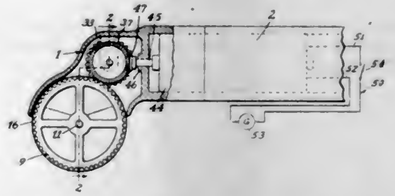
1. In a forming machine, the combination of a rotary member, a reciprocating member, and oscillatory mechanism whereby said rotary member operates said reciprocating member, and means connecting said oscillatory mechanism with said reciprocating mechanism for automatically adjusting the stroke of said reciprocating member relatively to the movement of said rotary member.

1,504,308. BRAKE. CHARLES EDWARD ARCHER, Sumter, S. C. Filed Aug. 27, 1923. Serial No. 659,661. 2 Claims. (Cl. 188—212.)



2. A support for a brake beam comprising a U-shaped member having one limb longer than the other, a pair of boxes for receiving the ends of the limbs, one box having its rear closed and engaging the end of the short limb and a spring latch on the long limb for engaging a part of the box to hold the member in position.

1,504,309. THRUST BEARING. STANLEY E. ARMSTRONG and EDWIN JOHN GOYETTE, Oakland, Calif. Filed Oct. 21, 1922. Serial No. 595,971. 3 Claims. (Cl. 64—49.)

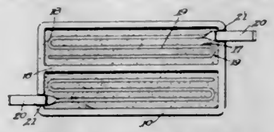


2. A thrust bearing comprising a casing, a plurality of superimposed bearings in said casing, said bearing consisting of an inner and an outer race, means to secure the inner race of the lower bearing to the casing, means to secure the inner race of the upper bearing to the shaft, and means to join the outer races of said bearings.

1,504,310. ASH TRAY. JOHN CLAYTON BACKUS, Smethport, Pa., assignor to Backus Novelty Company, Smethport, Pa., a Corporation of West Virginia. Filed Mar. 22, 1922. Serial No. 545,776. 7 Claims. (Cl. 131—51.)

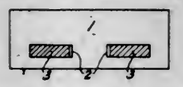
7. In an ash tray, the combination of a supporting bracket including a base plate having a top plate extending therefrom and provided with a depending split flange formed at its ends with lugs abutting the base plate for bracing the top plate with respect to the base plate, an attaching device carried by the bracket, a receptacle fitting in said flange, and means removably locking the receptacle upon the bracket.

1,504,311. ELECTRIC SAFETY RAZOR. CHARLES F. BAILEY, Los Angeles, Calif. Filed May 21, 1923. Serial No. 640,368. 7 Claims. (Cl. 30—12.)



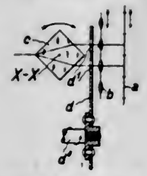
1. A razor including a housing, a blade comprising a cylindrical shell mounted in said housing and projecting therefrom, said blade being provided with spiral slots, one edge of which being sharp, and means for rotating said blade so that said sharp edges will shave.

1,504,312. SECONDARY STORAGE BATTERY. EUGENE N. BALDWIN, Donora, Pa. Filed Dec. 6, 1922. Serial No. 605,201. 7 Claims. (Cl. 204—29.)



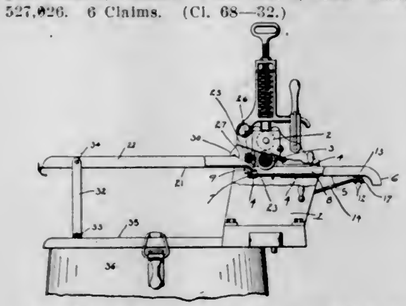
1. In a battery of the class described, a vessel divided by a partition-wall into compartments, a metallic elec-

trode strip bent back and forth upon itself and resting edgewise upon the bottom of the vessel, each electrode



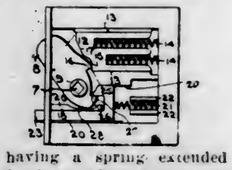
having a connector and extending to the exterior of the vessel, and suitable paste-like coacting materials in each compartment between the portions of the strips.

1,504,313. RESILIENT ROAD SURFACE, FLOORING, AND THE LIKE. WILLIAM FRANCIS BARNS, Ipoh, Perak, Federated Malay States. Filed Mar. 13, 1923. Serial No. 624,850. 7 Claims. (Cl. 94—12.)



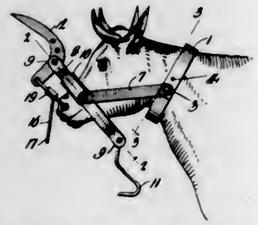
1. A surface comprising resilient blocks provided with a plurality of cavities and so laid as to form continuous channels, and holding means within the cavities longer than the width of the blocks and fitting the cavities as to height but smaller as to width.

1,504,314. EXPOSURE CINEMATOGRAPH. WALTHER BAUERSFELD, Jena, Germany, assignor to the Firm of Carl Zeiss, Jena, Germany. Filed Dec. 22, 1922. Serial No. 608,556. 1 Claim. (Cl. 88—16.8.)



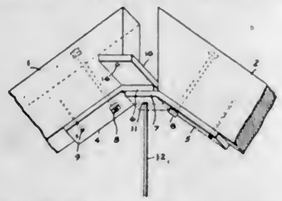
In an exposure cinematograph a uniformly traversed film, a device adapted to compensate the film motion and containing several objectives lying in the path of rays, which are movable approximately rectilinear and parallel to the direction of motion of the film, and an optical system movably disposed in front of the said compensating device and adapted to deflect the rays traversing it in such a manner that the axis of each of the said objectives during its presence in the field of rays coincides with one and the same ray.

1,504,315. WRINGER. WILLIAM GEORGE BEATTY, Fergus, Ontario, Canada. Filed Jan. 4, 1922. Serial No. 527,026. 6 Claims. (Cl. 68—32.)



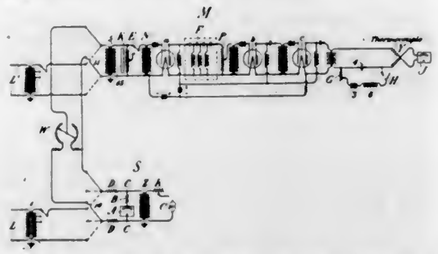
1. A wringer, comprising a set of rollers, a laterally adjustable drain board slidably mounted below the rollers, and means adjusting the drain board relatively to the rollers, comprising a rock shaft and a pitman communicating motion from the rock shaft to the drain board.

1,504,316. DOOR LATCH. HEDLEY BEAUCHAMP, Johannesburg, Transvaal, South Africa. Filed Sept. 21, 1920. Serial No. 411,806. 5 Claims. (Cl. 292—332.)



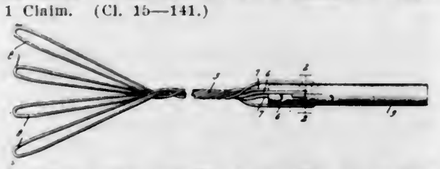
1. A latch having a spring extended latch bolt, a spring extended trigger adapted to be thrust in by contact with a fixed part, said trigger being adapted, when extended, to retain the bolt in a retracted position, and when thrust in to release said bolt said bolt when extended holding said trigger retracted from contact with the fixed part when the door to which the latch is attached is closed.

1,504,317. CATTLE POKE. JACOB B. BENTON, McLean, Tex., assignor, by direct and mesne assignments, to The Continental Tool and Manufacturing Company, Chickasha, Okla., a Business Trust. Filed Mar. 5, 1923, Serial No. 623,044. Renewed May 22, 1924. 1 Claim. (Cl. 119—141.)



In a device of the class described, a neck yoke including a pair of bowed sections pivoted together at their terminals, means for preventing the bowed sections from pivoting toward the head of the animal on which the yoke is placed, a pair of links connected to the bowed sections at their pivoted points and extending forwardly therefrom and a poke attached to the forward ends of said links so that should the animal endeavor to remove the poke the links will be pulled thereby pulling forwardly of the pivot points from the yoke causing the sections thereof to pivot thus making it impossible to slip the yoke over the animal's head.

1,504,318. JOINT CONSTRUCTION. EMANUEL BERGLUND, San Francisco, Calif., assignor to General Supply Company, Los Angeles, Calif. Filed May 1, 1922. Serial No. 557,578. 4 Claims. (Cl. 108—23.)



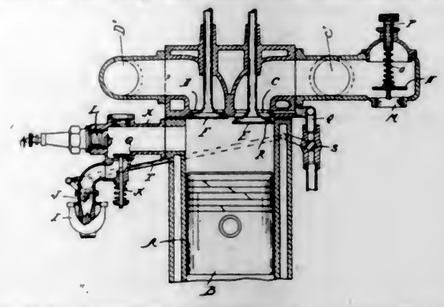
2. In combination with rafters a ridge-board contiguous therewith and a cross rafter extending between and joining the rafters, plates secured to the under sides of the first named rafters and overlapping one another at points beneath the ridge-board, a plate mounted upon the uppermost of the overlapping portions and extending outwardly from opposite sides of said overlapping portions, a rod extending thru said plate and the overlapping portions and secured to the cross rafter and bolts connecting end portions of the last named plate with the ridge-board.

1,504,319. TESTING APPARATUS. FRED H. BEST, Westfield, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Aug. 9, 1920. Serial No. 402,118. 11 Claims. (Cl. 179—175.)

10. The method of measuring cross-talk from a disturbing line to a disturbed line, which consists in applying a tone current to the disturbing line and measuring the response in the disturbed line by means of a circuit at its end, and then applying the same source of tone current through a calibrated adjustable impedance device directly to said measuring circuit.

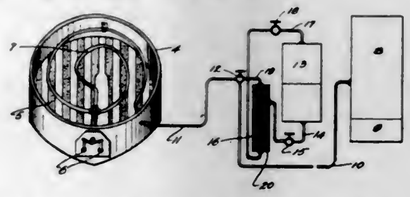
1,504,320. CARPET BEATER. NEWTON J. BISHOP, St. Louis, Mo. Filed Apr. 16, 1923. Serial No. 632,494. 1 Claim. (Cl. 15—141.)

A carpet beater including a plurality of lengths of wires, each length of wire being bent intermediate its end to provide opposed leg portions, the leg portions being twisted about each other to provide a body portion, a handle having an opening formed in one end thereof and having transversely disposed openings in spaced relation with one end, one of the leg members of each length of wire being disposed in the opening formed in the end of the handle, the opposed leg member of each length of wire extending through the transversely extending openings, and the ends of the last mentioned legs being bent into close engagement with the handle.



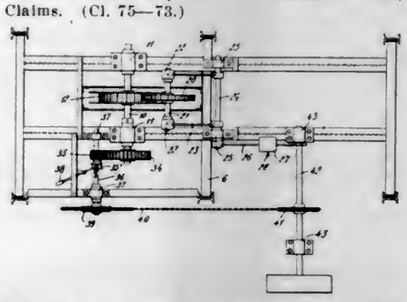
1,504,321. RELIEF MAP. ALFRED W. BJORNSTAD, St. Paul, Minn. Filed Feb. 23, 1921. Serial No. 447,268. 9 Claims. (Cl. 35—6.)

1. A relief map comprising a metal back having its surface pressed out to conform to the contour of the land represented by the map, a cushion member mounted on said back, covering its entire surface and a surface member mounted on said cushion member having printed on it a map, said cushion member conforming to the surface of the back throughout its entire surface, a metal band extending around the edge of said metal back and soldered thereto and a flange formed on said band extending inwardly from the edge thereof, said flange having an inwardly turned edge.



1,504,322. INTERNAL-COMBUSTION ENGINE. ALANSON P. BRUSH, Detroit, Mich. Filed Nov. 21, 1921. Serial No. 516,597. 3 Claims. (Cl. 123—75.)

3. An internal combustion engine comprising a cylinder, a reciprocating piston therein, a combustion chamber at one end of said cylinder, two inlets into said combustion chamber, a throttle valve controlling one of said inlets, a carbureter connected to said throttle controlled inlet for supplying a substantially uniform combustible mixture, an air drag associated with the other of said



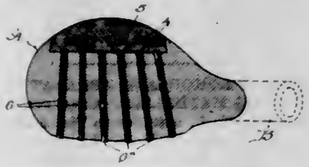
inlets for admitting air therethrough, means for supplying liquid fuel to said other inlet, and a valve operated by said throttle valve for varying the amount of fuel supplied through said other inlet independently of the air passing therethrough.

1,504,323. LIQUID-FUEL BURNER. CARL BUSH, Hollywood, Calif., assignor of one-half to B. R. Skinner, Seattle, Wash. Filed Sept. 23, 1922. Serial No. 590,042. 1 Claim. (Cl. 158—31.)

The combination with a liquid fuel burner of a fuel tank a supply pipe and an induction pipe, an auxiliary feed tank containing air under pressure, a mixing chamber between the auxiliary tank and induction pipe and connected to the latter, said chamber having an air pipe and a fuel pipe connection to said auxiliary tank, a control valve at the junction of the supply and induction pipes with the latter's connection to the mixing chamber, and control valves in said air pipe and fuel pipe.

1,504,324. METHOD AND APPARATUS FOR AGGLOMERATING MATERIALS. CLARENCE LEWIS COLBERT, Elizabeth, N. J., assignor to The American Metal Company, Ltd., New York, N. Y., a Corporation of New York. Filed May 19, 1922. Serial No. 562,063. 5 Claims. (Cl. 75—73.)

1. A method of agglomerating ores, concentrates, fluedust and like divided material, which comprises causing the material to advance through a heating chamber, subjecting it to gradual heating therein, regulating the rate of travel and the temperature of the material in accordance with its physical characteristics to avoid fusion but so as to discharge it from the chamber in a plastic con-

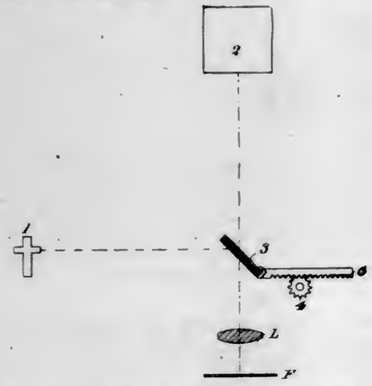


dition and in substantially its original divided form, and subjecting the divided material to pressure while in the plastic condition.

1,504,325. METAL STUDDING AND METHOD OF MAKING SAME. CORNELIUS COLLINS, Los Angeles, Calif. Filed Feb. 20, 1922, Serial No. 537,736. Renewed July 16, 1923. 7 Claims. (Cl. 72—115.)

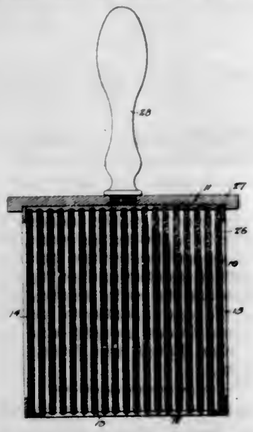
1. A studding member for the support of metal lath and the like, comprising a channel bar formed from sheet metal, prong carrying members formed as a continuation of one flange of said channel and adapted to be bent outwardly and against said flange, a prong member formed integral with one end of each of said prong carrying members and normally extending at right angles to said flange and in a plane transversely thereof.

1,504,326. GOLF CLUB. JOHN J. CULLINAN, Chicago, Ill. Filed Apr. 17, 1922. Serial No. 554,327. 3 Claims. (Cl. 46—4.)



1. A golf club or the like comprising a head of fibrous material, having a substantially flat striking face, and a strand of gut extending into said head substantially at right angles to the face thereof, the outer end of said strand having a heat enlarged head substantially flush with said face.

1,504,327. RAILWAY MOTOR CAR. CASCIOUS H. DE LA MONTE, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 18, 1922. Serial No. 530,033. 4 Claims. (Cl. 105—62.)

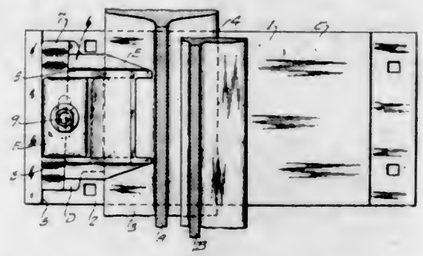


2. A rail motor car composed of two motor truck chassis mounted on flanged wheels and each having its own power plant and transmission, a car body mounted on said chassis, and hydraulic means operatively interconnecting the control elements for said transmissions, whereby simultaneous and corresponding conditions in said controls may be secured.

1,504,328. METHOD AND APPARATUS FOR PRODUCING MULTIPLE AND PHANTOM IMAGE EFFECTS IN PHOTOGRAPHY. LEON F. DOUGLASS, Menlo Park, Calif. Filed Apr. 18, 1922. Serial No. 555,088. 6 Claims. (Cl. 88—16.)

1. The method of producing phantom image effects upon a photographic film, which comprises interposing a semi-light-reflecting element in the path of the light rays from an object, reflecting an indistinct image of said object through a lens onto a sensitized film, simultaneously directing the light rays from another object through said semi-light-reflecting element and said lens onto said film, lineally moving said element to different positions and making successive exposures and lineally moving said reflected light rays across said film.

1,504,329. APPARATUS FOR BASE-EXCHANGING SUBSTANCES. OSCAR EDERSTEIN, Shelton, Conn., assignor to American Zeolite Corporation, Paterson, N. J., a Corporation of New York. Filed Dec. 31, 1920. Serial No. 434,208. 4 Claims. (Cl. 210—24.)

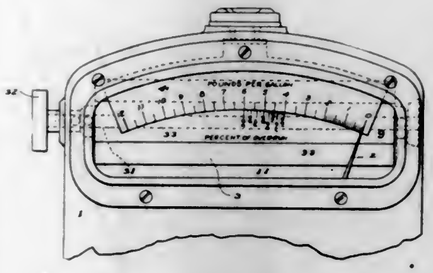


1. A holder adapted for hand use and having separated spaces therein in combination with a plurality of flat packages open for the passage of water therethrough and a base-exchanging content in said packages, the packages fitting within the spaces and being separated thereby.

1,504,330. FLANGE FROG. ROBERT E. EINSTEIN, St. Louis, Mo., assignor to American Flange Frog and Railway Improvement Company, St. Louis, Mo., a Corporation of Florida. Filed Oct. 12, 1923. Serial No. 668,122. 17 Claims. (Cl. 246—456.)

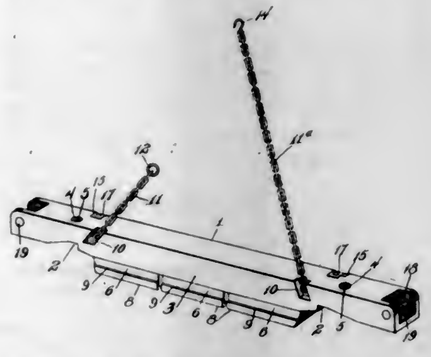
3. A flange frog provided with a point, a running surface, a guard member detachably combined with said elements and provided with a wheel rim engaging portion arranged in a higher horizontal plane than said running surface, and means on said guard member that supports and carries said point and running surface.

1,504,331. SPLIT SWITCH. ROBERT E. EINSTEIN, St. Louis, Mo., assignor to St. Louis Frog & Switch Company, St. Louis, Mo., a Corporation of Missouri. Filed Oct. 29, 1923. Serial No. 671,452. 7 Claims. (Cl. 246—453.)



1. A split switch, comprising a slide plate provided with a depressed seat that has an abutment at one end of same, a movable switch point slidingly mounted on said plate, a stationary track rail mounted on said seat with the inner end of its base flange bearing against said abutment, a brace arranged on the outer side of said rail, a second abutment on said slide plate at the opposite end of said seat, and an adjustable means interposed between said brace and the second abutment on said slide plate for holding said brace in engagement with said rail and for pressing the inner edge of the base flange of said rail against the abutment on the slide plate first referred to.

1,504,332. FLANGE FROG. ROBERT E. EINSTEIN, St. Louis, Mo., assignor to American Flange Frog and Railway Improvement Company, St. Louis, Mo., a Corporation of Florida. Filed Dec. 8, 1923. Serial No. 679,412. 14 Claims. (Cl. 256—456.)

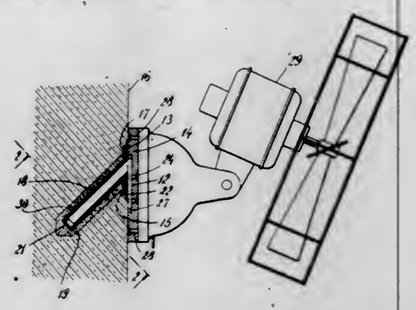


1. A frog having a main body portion formed by a casting provided on its underside with a hollow space having side walls formed by webs on sand casting, said webs having openings of such dimensions and shape that guard member fastening devices can be arranged transversely of said webs with their heads positioned inside of said pocket, without disturbing or changing the position of said casting in the track.

1,504,333. SCALE. ERNEST D. FEAR, Kansas City, Mo. Filed Aug. 16, 1923. Serial No. 657,662. 3 Claims. (Cl. 265—32.)

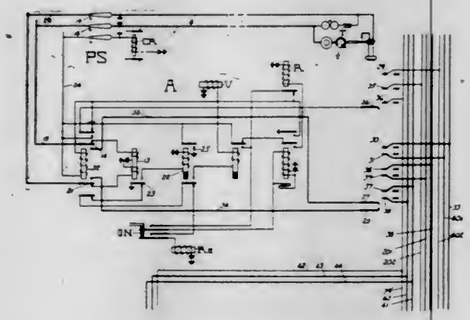
1. In a scale, in combination with a swingable pointer, a flat stationary scale, and a roller polygonally shaped in cross-section, and having upon each face a different scale computed upon different bases relative to the stationary scale, said roller being journaled to be rotated to bring any one of its faces into registry with the path of movement of the pointer, and said flat scale being mounted for movement away from the faces of the roller to permit rotation thereof, and towards said faces to lie normally closely adjacent and coordinated with the scales upon said faces.

1,504,334. BALLAST-PLOWING DEVICE. EARL G. FIDLER, Garrett, Pa., assignor of one-half to Lee W. Pollard, Garrett, Pa. Filed Jan. 14, 1924. Serial No. 686,230. 13 Claims. (Cl. 37—104.)



1. A device of the character described comprising a member adapted to travel upon the rails of a trackway, attaching means associated therewith, and plow elements secured to the under face of the member.

1,504,335. GASKET. AMBRUS L. FISHER, New Orleans, La. Filed Dec. 8, 1922. Serial No. 605,667. 1 Claim. (Cl. 288—1.)



A gasket comprising a pair of ring members, one formed at its inner edge with a bead contacting with the other ring member to space the rings, and the other ring member having its inner edge formed with a bead pressed back to contact with the first named ring member on the side opposite the first named bead.

1,504,336. WALL BRACKET. ORSON FRANK FOSTER, Englewood, N. J. Filed June 30, 1922. Serial No. 571,974. 10 Claims. (Cl. 72—105.)

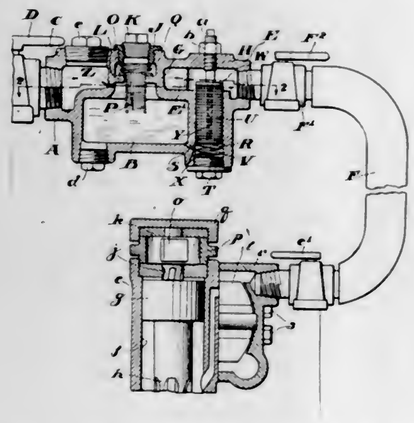
7. A wall bracket including a receptacle member having a face plate arranged to lie in a countersink in the wall and a socket portion extending from the plate and which is adapted to enter a hole in the wall, a finishing plate arranged to overlie the face plate in said countersink, and means for securing the finishing plate to the face plate, substantially as described.

1,504,337. TELEPHONE SYSTEM. HERBERT M. FRIENDLY, Portland, Oreg. Filed May 16, 1921. Serial No. 469,886. 74 Claims. (Cl. 179—27.)

1. In a telephone system calling and called lines, an operator's switchboard, automatic switches directly controlled from the calling line for interlinking a connection from the calling line to the switchboard, a transfer switch in a Y branch intermediate of the calling line and the switchboard for extending a connection from the calling line to a called line, and means in control of the switchboard for effecting at will a switching operation of the transfer switch and thereafter extending the connection from the calling line and switchboard to the called line.

1,504,338. ALLOY COMPRISING IRON, NICKEL, CHROMIUM, TUNGSTEN, OR MOLYBDENUM. PIERRE GIRIN, Paris, France, assignor to Societe Anonyme de Commentry, Fourchambault & Decazeville, Paris, France. Filed Dec. 9, 1918. Serial No. 265,985. 1 Claim. (Cl. 75—1.)

A high nickel ferrous alloy containing nickel, 60 to 70 per cent, chromium 10 to 15 per cent, tungsten, 2 to 5 per cent, manganese 1 to 2 per cent and carbon, 0.3 to 0.6 per cent, such alloy having at elevated temperatures great mechanical resistance and also great resistance to chemical agents and susceptible of retaining indefinitely its initial properties, notwithstanding prolonged service.

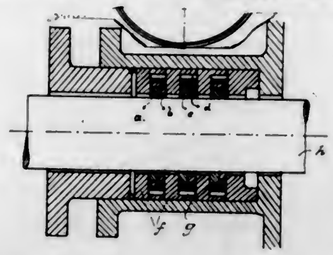


1,504,339. MANUFACTURE OF MONOSODIUM PHOSPHATE. WALTER GLAESER, Brooklyn, N. Y. Filed Apr. 12, 1922. Serial No. 551,916. 2 Claims. (Cl. 23—13.)

1. The method of manufacturing monosodium phosphate which consists in reacting upon dicalcium phosphate with sodium bin-oxalate in the presence of water while agitating the mixture, and then separating the mono-sodium phosphate formed from the calcium oxalate formed by filtration, and then evaporating the mono-sodium phosphate solution to solid form.

1,504,340. MANUFACTURE OF MONOSODIUM PHOSPHATE. WALTER GLAESER, Brooklyn, N. Y. Filed Apr. 12, 1922. Serial No. 551,917. 2 Claims. (Cl. 23—13.)

1. In a method of making mono-sodium phosphate, the steps which consist in treating phosphate containing material with sulphuric acid and water to produce mono-calcium phosphate and then converting the mono-calcium phosphate formed to mono-sodium phosphate by the addition of sodium oxalate.



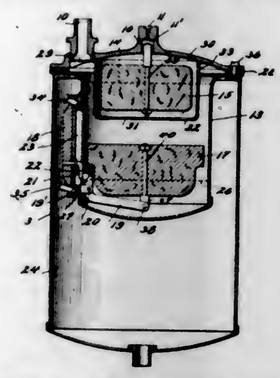
1,504,341. AIR-LINE OILER. CHARLES C. HANSEN, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Nov. 17, 1923. Serial No. 675,431. 10 Claims. (Cl. 184—55.)

1. An air line oiler comprising a casing having a passage in its upper portion through which an air current is adapted to pass, a cartridge chamber in the casing, an absorbent cartridge in said chamber, a reservoir for lubricant in the lower portion of the casing subject to the air pressure in said upper passage for supplying lubricant to said cartridge chamber and cartridge and means for exposing the upper portion of said cartridge to the air current passing through the passage in the upper portion of the casing whereby said current tends to dry the exposed portion of said cartridge and carries away small particles of lubricant.

1,504,342. METAL PACKING FOR PISTON RODS. FRANZ HAUBER, Vienna, Austria. Filed Feb. 7, 1923. Serial No. 617,590. 5 Claims. (Cl. 286—20.)

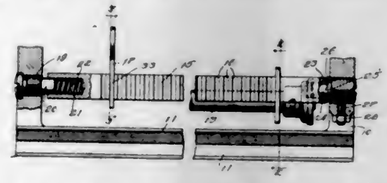
1. The combination with a stuffing box chamber and a piston rod extending through the same, of a segmental ring arranged in the chamber and bearing on the piston rod, a plurality of relatively strong, resilient springs sprung over the segmental ring and each split transversely at one point only in its periphery, the split portion of each spring being displaced at about 180 degrees relatively to the split of the other spring, and said resilient springs forming the only means for offering great resistance to the opening of the whole packing by the working medium.

1,504,343. DENTAL MIRROR. JOSEPH G. HEARD, Atlanta, Ga. Filed Mar. 1, 1923. Serial No. 622,088. 3 Claims. (Cl. 128—10.)



1. A dental instrument comprising a handle having a head from which extends two spaced stems, and a mirror supported in the free ends of said stems, said head being distant from the mirror, whereby a clear space is provided between the mirror and head for the reception of dental tools.

1,504,344. SAFETY DEVICE FOR VEHICLE DRIVERS. HENRY K. HENNIGH, Henry County, Ind. Filed June 9, 1922. Serial No. 567,033. 3 Claims. (Cl. 45—97.)

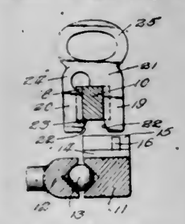


1. A device, of the character described comprising a substantially rectangular sheet of material having a reflecting surface, a support therefore comprising a single length of wire formed at one end into a resilient clamp and bent at the other end to lie against the other surface of the said sheet of material and to follow the periphery thereof, the corners of the sheet of material being bent reversely over the adjacent portions of wire for securing the wire to the sheet of material, substantially as set forth.

1,504,345. VACUUM FUEL-FEEDING DEVICE. EDWARD L. HOFFMAN, Dayton, Ohio. Filed Mar. 9, 1922. Serial No. 542,393. 7 Claims. (Cl. 103—236.)

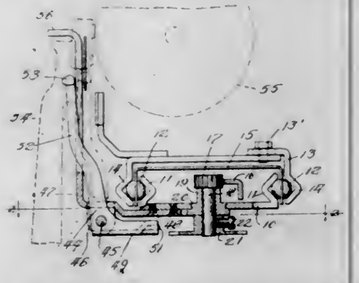
1. In combination with an internal combustion engine of such character that the pressure in the intake manifold is practically continuously less than atmospheric pressure, a main low level tank, a fluid supply receptacle located in a plane thereabove, said receptacle comprising an inner and outer container, means located wholly within said inner container for regulating the intake of said fluid from said main tank and the discharge of said fluid into and the admission of air thereinto from said outer container, said means consisting in a plurality of opposed fluid operated floats, and means connected thereto and adapted to regulate suction for supplying said fluid, and a fluid discharge and air admission valve between said inner and outer container.

1,504,346. STOP BAR. OTTO A. HOKANSON, Woodstock, Ill., assignor to The Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed Sept. 22, 1919. Serial No. 325,400. 2 Claims. (Cl. 197—176.)



1. In a typewriter, a platen carriage, a stop bar therefor, a journal support for one end of said stop bar arranged to permit rotation of said bar about its axis, a spring for forcing said bar away from said support, the opposite end of said bar having a cylindrical opening therein, a screw plug mounted in said platen carriage and arranged in said opening to provide a journal bearing for said bar, said plug having a threaded connection with said carriage and movable in said threaded connection to force said stop bar endwise against the tension of said spring to adjust the position of said stop bar, and a detachable device for holding said stop bar against rotation.

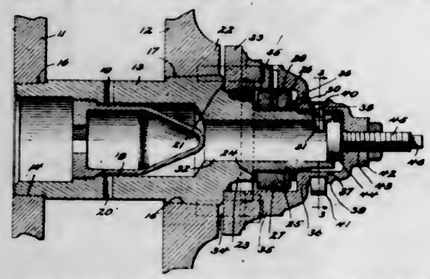
1,504,347. TABULATOR STOP FOR TYPEWRITERS. OTTO A. HOKANSON, Woodstock, Ill., assignor to The Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed Sept. 22, 1919. Serial No. 325,401. 2 Claims. (Cl. 197—70.)



1. The combination with a stop bar for typewriters having a plurality of transverse grooves thereon, of a bifurcated stop member arranged to straddle said bar

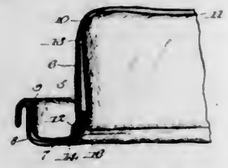
with a prong thereon positioned in one of said grooves to hold said stop against longitudinal movement on said bar, a yoke for connecting the prongs of said bifurcated stop comprising a split ring having said prongs secured to the free ends thereof and having a resilient portion arranged to permit movement of said prongs toward and away from one another, and a projection on one of said prongs extending toward the other prong and arranged to lie beneath a portion of said stop bar when said stop

is in position on said bar, the space between the inner portion of said projection and the opposite prong being less than the thickness of the portion of said bar straddled by said prongs so that said prongs must be sprung away from one another to permit movement of said stop into and out of position on said bar the projection having opposite beveled faces to engage said bar and spring said prongs when said stop is moved onto or off of said bar.



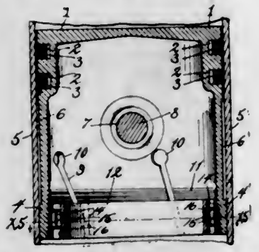
1,504,348. ESCAPEMENT MECHANISM FOR TYPEWRITERS. OTTO A. HOKANSON, Woodstock, Ill., assignor to Woodstock Typewriter Company, Woodstock, Ill., a Corporation of Illinois. Filed May 14, 1920. Serial No. 381,250. 21 Claims. (Cl. 197—60.)

1. In a typewriter, a platen carriage comprising a plate, a bed for said carriage comprising a plate arranged substantially parallel with the plate of said carriage, said plates having cooperating ways for guiding said carriage on said bed and for spacing said plates from one another, an escapement wheel having a fixed plane of rotation arranged substantially parallel with said plates, and rack and pinion mechanism positioned within the space included between said plates and controlled by said escapement wheel for regulating the movement of said carriage on said bed.



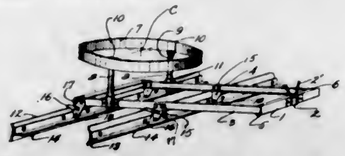
1,504,349. LUBRICATING DEVICE FOR CROSSHEAD PINS. HARRY A. HOKE, Altoona, Pa. Filed Dec. 13, 1922. Serial No. 606,713. 7 Claims. (Cl. 184—5.)

5. In a device of the class described the combination with a cross head pin having a longitudinal extension from one end of materially reduced diameter externally forming an outwardly facing circular shoulder, and of reduced interior diameter the bore being smooth and cylindrical and having a transverse slot like opening near its outer end, an integral member partly surrounding said extension including at its inner end a ring having sides in radial planes adapted to fit and engage at its inner edge said shoulder on said pin and having bolt holes at intervals beyond the periphery of said shoulder for screw-threaded connection to the wall of the cross head adjacent the pin, two arms extending from said ring longitudinally of said extension but spaced therefrom having inturned outer ends, a cap connected to said inturned ends provided with a cylindrical bore surrounding the end portion of said pin extension and its slot and having therein a corresponding slot, the bore of said



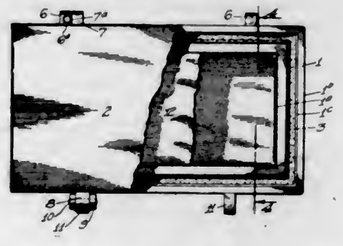
cap beyond the end of said extension being of greatly reduced diameter and screw threaded, a piston in the bore of said extension adapted to move longitudinally therein and a screw threaded rod connected to said piston extending through and in threaded engagement with the outer bore of said cap extending a material distance beyond it and so formed at its end as to be engaged for turning.

1,504,350. HAT. EMMA J. HUGHES, New York, N. Y. Filed May 13, 1922. Serial No. 560,635. 2 Claims. (Cl. 2—175.)



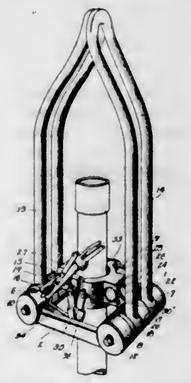
1. A hat comprising a band, a brim connected with the lower part of the band, a rigid ring-shaped member at the junction of the band with the brim, a crown member adapted to be placed over the band and an elastic strip at the mouth of the crown member for contracting the same against the ring member.

1,504,351. ADJUSTABLE PISTON. GEORGE M. HURLEY, Los Angeles, Calif. Filed Sept. 19, 1921. Serial No. 501,532. 2 Claims. (Cl. 74—108.)



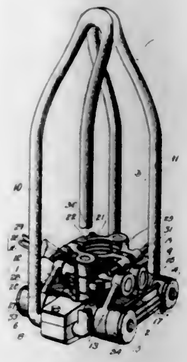
1. A piston provided with a slotted skirt having an internally screw threaded taper seat; a taper expanding ring screwed into said seat and provided with longitudinal cam grooves, locking rollers in said grooves provided with heads adapted to enter the spaces between the threads of the screw threaded seat for the purpose of locking the ring against rotation in said seat.

1,504,352. ROAD MACHINE. JAMES B. JARMIN, Spokane, Wash. Filed June 11, 1923. Serial No. 644,626. 3 Claims. (Cl. 37—156.)



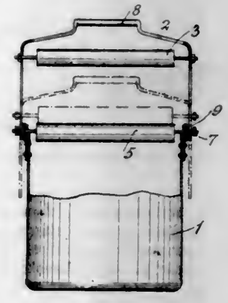
1. The combination with the side bars of a flexible frame having a fixed pivot point, of a rotary member having a fixed axial center, diametrically arranged supporting members fixed to said rotary member and pivotally connected to said side bars, and a pair of movable blades carried by said side bars disposed equi-distant about said axial center.

1,504,353. THERMOCONTAINER. WALTER C. KILIUS and JOHN F. RUDOLPH, Lompoc, Calif.; said Rudolph assignor to said Kilius. Filed Oct. 4, 1922. Serial No. 592,350. 4 Claims. (Cl. 220—9.)



1. A container of the class described, including a double-walled container member, a quickly removable double-walled cover member, a heat insulating material interposed between the wall portions of said container and cover members, interlocking lugs provided on one side of said container and cover members to permit ready disconnection of said members from each other and cover contracting latch members provided on the other side of said container and cover members.

1,504,354. WELL-TUBING ELEVATOR. GEORGE KRELL, Kansas City, Mo. Filed June 9, 1923. Serial No. 644,337. 7 Claims. (Cl. 294—91.)

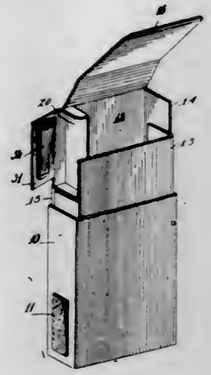


1. In a well tubing elevator, a frame, single rocker arms on the respective ends of the frame, jaws loosely mounted on the inner ends of the rocker arms, and means for supporting the frame.

1,504,355. CASING ELEVATOR. GEORGE KRELL, Kansas City, Mo. Filed June 9, 1923. Serial No. 644,338. 3 Claims. (Cl. 294—91.)

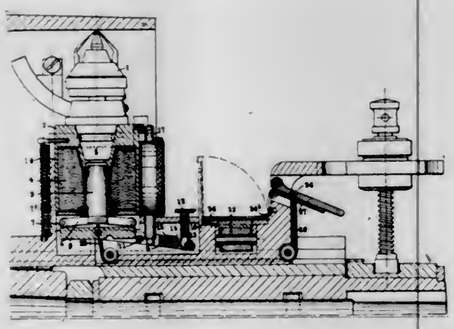
1. In a casing elevator, a frame, rock shafts, rocker arms carried by the frame, and casing engaging jaws carried by the rocker, each jaw consisting of two members, having a hinged connection.

1,504,356. WRINGING APPARATUS FOR SCRUBBING CLOTHS AND MOP CLOTHS. ERNST ULRIK LANDGRAFF, Christiania, Norway. Filed Nov. 9, 1923. Serial No. 673,848. 2 Claims. (Cl. 15—162.)



1. A combined mop pail and wringer, comprising, a bucket, a ball like handle, a roller journaled in said handle, longitudinal guide slots in the arms of said handle, projections on the bucket engaging said slots to permit sliding movement of the handle thereon, and a second roller journaled on said bucket and so positioned as to be brought into working contact with the first roller upon the lowering of the handle along said projections.

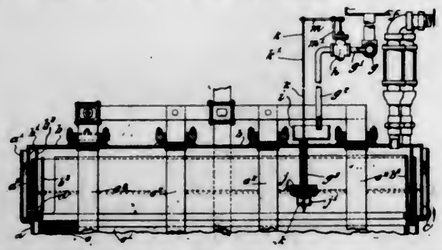
1,504,357. MATCH-HOLDING CIGAR OR CIGARETTE BOX. BENJAMIN LEBWOHL, New York, N. Y., assignor of one-half to Benjamin Mindich, New York, N. Y. Filed June 22, 1922. Serial No. 570,234. 1 Claim. (Cl. 206—48.)



A box of the type specified consisting of an outer member, and an inner member slidable therein, a partition ex-

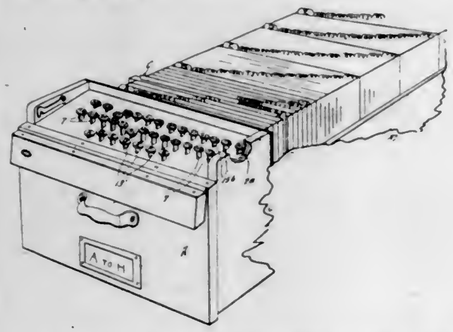
tending across said inner member from front to rear thereof to provide a match compartment adjacent one

side of the said inner member, the adjacent side wall of the inner member being in the form of a hinged flap covering said match compartment.



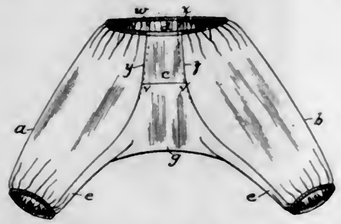
1,504,358. MACHINE FOR CUTTING DIAMONDS. EMILE FERDINAND ADELIN CHARLES LEPERRE, Antwerp, Belgium. Filed Aug. 15, 1921. Serial No. 492,496. 5 Claims. (Cl. 51—229.)

1. A machine for cutting precious stones comprising a dop carrier, a solenoid core, an energizing coil surrounding said core, a casing surrounding said coil and supporting said dop carrier, a pair of levers pivoted to said core, means for supporting the free ends of said levers, rollers on said coil casing bearing on said levers, a feed indicating device, means operated by said device for breaking the solenoid circuit and a spring for withdrawing said casing and dop carrier.



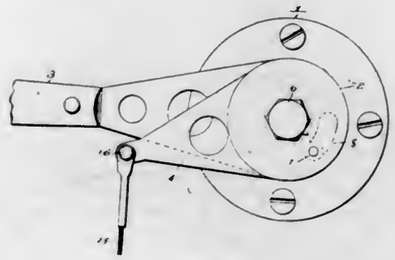
1,504,359. ELECTROLYTIC CELL. ISAAC H. LEVIN, New York, N. Y. Filed June 12, 1920. Serial No. 388,430. Renewed Oct. 26, 1923. 8 Claims. (Cl. 204—5.)

1. An electrolytic cell embodying therein a casing, means dividing the lower part of said casing into a plurality of communicating electrolyte compartments and the upper part thereof into a plurality of non-communicating gas chambers, means communicating with the cell below the normal level of the electrolyte therein and with atmosphere, whereby said electrolyte may flow between said cell and said means with varying pressure conditions therein, a pipe leading from a source of distilled water supply and discharging within a cell below the normal level of the electrolyte therein, a valve arranged in said pipe, and actuating means for said valve comprising means responsive to variations of the level of the electrolyte in the cell, and operative connections



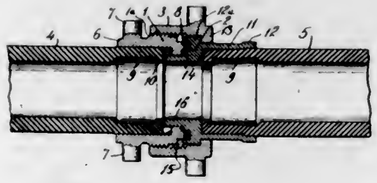
between said means and said valve whereby said valve will be opened when the electrolyte in the cell reaches a subnormal level and will be closed when the electrolyte in the cell is at the normal level.

1,504,360. INDEXING DEVICE. JOHN V. LILE, St. Louis, Mo., assignor, by direct and mesne assignments, to Donald A. Nevin and John V. Lile, trustees for Nevin-Lile Engineering Company, Limited, St. Louis, Mo. Filed Dec. 15, 1920. Serial No. 431,037. 33 Claims. (Cl. 129—16.1.)



1. A card-indexing device comprising a receptacle, cards located within said receptacle, selecting mechanism adapted to cooperate with said cards upon the operation of which any individual card in said receptacle may be moved laterally therein, card-raising means including inclined faces within the receptacle, and means on said cards adapted to cooperate with said card-raising means whereby said movement of any individual card will cause same to be raised above the other cards in the receptacle.

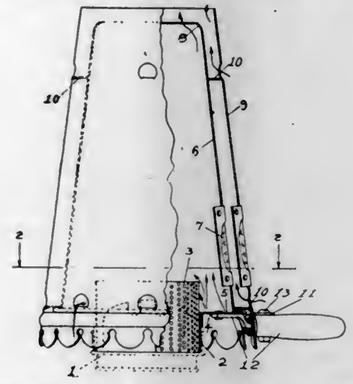
1,504,361. PANTALETS AND SIMILAR GARMENT. JOHN J. MCLOUGHLIN, Philadelphia, Pa. Filed Aug. 2, 1923. Serial No. 655,173. 4 Claims. (Cl. 2—231.)



1. A garment having legs and a body portion, comprising two spaced substantially identical sections and an inserted cross-shaped section secured to the side edges of said two sections respectively to form a seamless crotch.

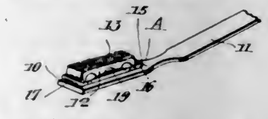
1,504,362. MEANS FOR RELEASING BOMBS. WALTER G. MCNEILL and HERBERT H. BLACKLEDGE, Dayton, Ohio. Filed May 17, 1923. Serial No. 639,558. 9 Claims. (Cl. 244—1.)

1. In means for releasing bbmbs, the combination of a plurality of bomb-releasing levers, a single control lever, and means actuated by said control lever in one continuous movement thereof in one direction, either fore or aft, to successively operate said bomb-releasing levers.



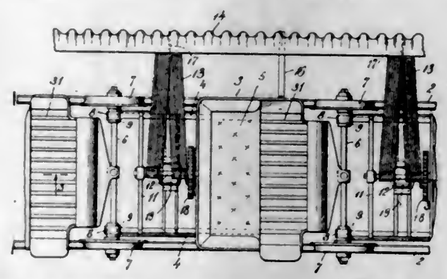
1,504,363. LOCKED COUPLING. THOMAS J. MADIGAN, New York, N. Y., assignor to Madigan Union Corporation, a Corporation of Delaware. Filed Jan. 20, 1921. Serial No. 438,580. 2 Claims. (Cl. 285—122.)

1. In a coupling, an externally threaded socket member having a polygonal opening through its center with a tongue projecting from the front face of said member and encircling said opening, an opposing socket member having a polygonal nipple projecting from its front face and having an annular recess encircling said nipple, said recess being provided with a gasket, said coupling members being adapted to telescope one into the other until said tongue seats on said gasket, a threaded collar movable forward over one of said socket members after the tongue is seated on said gasket to engage the threads on the opposing socket member and hold said members tightly in their telescoped relation, said collar-carrying socket member being provided with front and rear flanges for limiting the longitudinal movement of said collar.



1,504,364. HEATING ATTACHMENT FOR LAMPS. BRUNO MARTIN, Saginaw, Mich. Filed Oct. 10, 1923. Serial No. 667,779. 1 Claim. (Cl. 126—255.)

In combination, a lamp burner and a heating device comprising an annular ring, a perforated cylindrical screen removably seated in said ring and projecting above the top of said burner, a tapered inner shell having its top edge contracted and its bottom edge surrounding said screen and spaced apart therefrom, an annular perforated plate secured to the upper end of said ring and to the bottom edge of said inner shell, a tapered outer shell formed near its top and bottom with inwardly projecting integral lugs taking against said inner shell, said outer

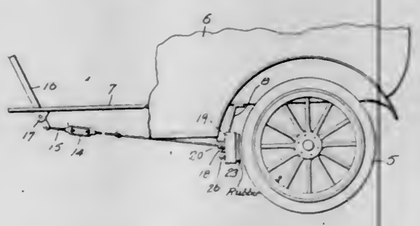


shell also formed with a projecting lug and a handle removably secured to said lug and also secured to said annular plate, for the purposes set forth.

1,504,365. BRUSH. FRANK HENRY MAYHOOD, Calgary, Alberta, Canada. Filed Apr. 11, 1922. Serial No. 551,668. 1 Claim. (Cl. 15—231.)

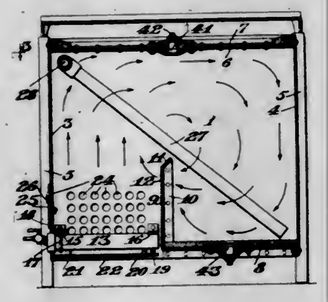
In a device of the character described, a frame, a handle formed integral therewith, a recess formed in the frame, a plug of resilient material and larger than the recess adapted to be fitted thereinto and designed to be held therein by its own expansion, a removable cover forming a contact surface for the plug, and means for holding the cover in place comprising a rigid band member adapted to embrace the frame, and retaining means formed on said band adapted to engage with said cover.

1,504,366. AMUSEMENT RAILWAY. HYLA FREDERICK MAYNES, Gaines, Pa., assignor, by direct and mesne assignments, to Maynes Corporation, Dover, Del., a Corporation of Delaware. Filed Dec. 18, 1922. Serial No. 607,521. 7 Claims. (Cl. 104—53.)



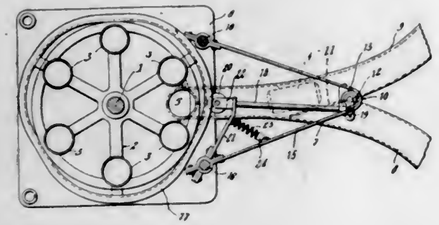
1. An amusement apparatus comprising the combination of a car, a folding canopy for the car normally lying in folded condition lengthwise of the car and to one side thereof, a fan-like support for the canopy pivoted on the car, a gear wheel secured to one of the radial elements of the support, and means for rotating the gear wheel to open and close the canopy.

1,504,367. PROCESS OF ELECTRIC WELDING. JOSEPH W. MEADOWCROFT, Philadelphia, Pa., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed June 30, 1921. Serial No. 481,729. 14 Claims. (Cl. 219—10.)



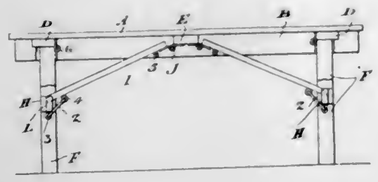
1. The process of uniting two pieces of metal consisting in forming a projection protruding above the surface of one of said pieces, electrically welding the pieces of metal together at said projection, and subsequently removing that part of the projection protruding above the surrounding surface.

1,504,368. AUTOMOBILE BRAKE. WILLIAM MULLOY, St. Louis, Mo. Filed June 12, 1922. Serial No. 567,554. 2 Claims. (Cl. 188—11.)



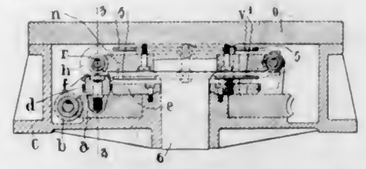
1. An automobile brake comprising in combination with an automobile body, brackets secured to the underside of said body, brake beams pivotally secured to said brackets, brake rods secured to said brake beams, means for operating said brake rods, a brake block carried by the brake beams, and a pneumatic brake shoe and means whereby said brake shoe is secured to the brake block by the inflation of said shoe.

1,504,369. HEATER. JOHN W. NEUMANN, St. Louis, Mo. Filed July 25, 1917. Serial No. 182,601. 6 Claims. (Cl. 126—85.)



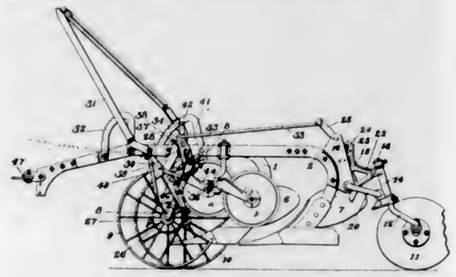
1. In a gas heat radiator, a hollow shell having a gas burner therein, an exhaust duct in said shell, said duct having its intake end in the zone of lowest temperature and extending through the zone of highest temperature, and a condenser outside of said shell and connected to the outlet end of said exhaust duct, said condenser having a vent opening and an air inlet, the vent opening being uppermost.

1,504,370. FRUIT-DELIVERING APPARATUS FOR PEELING MACHINES. HUGH F. OPPERMAN, Honolulu, Territory of Hawaii, assignor to California Packing Corporation, New York, N. Y., a Corporation of New York. Filed May 5, 1924. Serial No. 711,183. 6 Claims. (Cl. 146—6.)



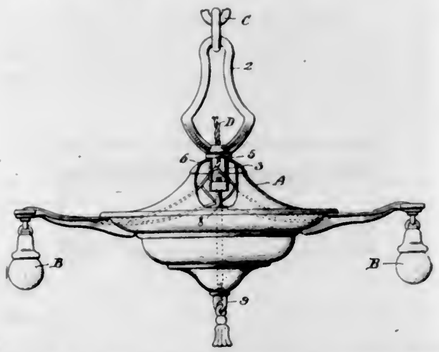
1. In apparatus to cooperate with a fruit peeling machine and a plurality of fruit trimming machines, the combination of guiding means for receiving the fruit from the peeling machine, and having branches adapted to lead to different trimming machines, respectively, and automatic means for guiding the fruit into the different branches successively.

1,504,371. COLLAPSIBLE TABLE. THOMAS JOSEPH ORMEROD, Toronto, Ontario, Canada, assignor of one-half to Walter Clark, Toronto, Ontario, Canada. Filed Feb. 8, 1924. Serial No. 691,469. 1 Claim. (Cl. 45—11.)



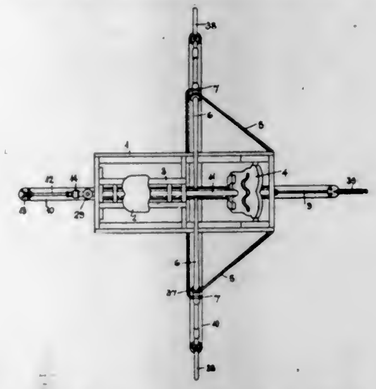
In a table of the character set forth having a top covering provided on its underside near each end with a transverse horizontal bar: a pair of tied legs hinged to each of the said horizontal bars so as to be moved inwardly towards the middle of the table when collapsed; a tie bar for each pair of legs substantially midway the length thereof; a middle horizontal transverse bar carried by the underside of said table covering; a strut hinged to each side of said middle horizontal bar and adapted to rest in contact each with its associated tie bar when the table is set up; coupling means carried by each of the said tie bars; coupling elements permanently coupled to each of the said struts near the lower and upper ends thereof; when the table is to be collapsed said coupling means being uncoupled from the coupling elements carried by the lower ends of said struts so as to permit of the disengaging of these lower ends with their associated tie bars, and the location of these struts between the top of the table and said tie bars when said legs are closed, the said coupling means being then coupled to the coupling elements carried by the upper ends of said struts to hold the various parts of the table rigidly in collapsed position, as set forth.

1,504,372. GEAR-CUTTING MACHINE. CHARLES ALGERNON PARSONS and STANLEY SMITH COOK, Newcastle-on-Tyne, England; said Cook assignor to said Parsons. Filed June 7, 1923. Serial No. 644,016. 11 Claims. (Cl. 90—4.)



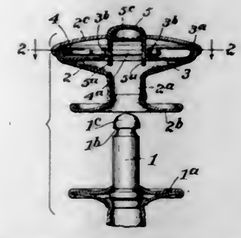
1. In a gear-cutting machine of the creep type, the combination of a plurality of creep-producing gear trains in parallel, together with means for equalizing the action of said trains, as set forth.

1,504,373. ROCKING COLTER. WILLIAM L. PAUL, Berkeley, Calif., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Feb. 24, 1921. Serial No. 447,398. 5 Claims. (Cl. 97—72.)



1. In a wheeled plow including a frame and a landwheel and a furrowwheel movable downwardly and rearwardly relative to the plow frame to raise the plow by the traction power of one of said wheels, the combination therewith of a rolling colter pivotally supported on the frame and adapted to be swung rearwardly and upwardly simultaneously with the downward and rearward movement of the wheels.

1,504,374. COMBINATION HICKEY LOOP. PAUL J. PFEIFER, Cleveland, Ohio, assignor to The Virden Company, Cleveland, Ohio. Filed Nov. 15, 1922. Serial No. 601,060. 3 Claims. (Cl. 240—78.)

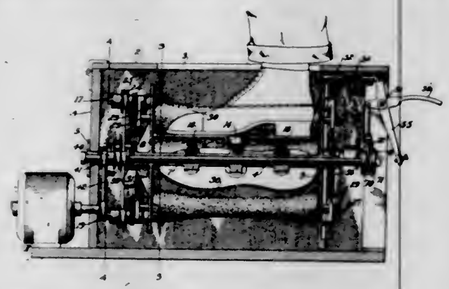


1. As an article of manufacture, a unitary fixture supporting member comprising an annular boss, a loop, and a hickey; the loop being integral with one side of the boss, and the hickey comprising arms extending from the other side of the boss and a connecting member having threaded supporting means, the hickey being of smaller diameter than the boss to provide a shoulder at their junction.

1,504,375. SCULLING MACHINE. HARRY PHILLIPS, London, England, assignor to Dental Manufacturing Company, Limited, London, England. Filed Nov. 10, 1922. Serial No. 600,141. 11 Claims. (Cl. 46—69.)

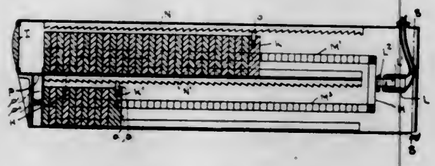
1. A sculling machine comprising a base, a frame slidably mounted thereon, a footboard, and outriggers carried in said frame, a seat slidably mounted on said frame so as to move along said frame during the forward movement of the latter, scull members pivoted on the outriggers, the outer ends of the scull members sliding in fulcrum members attached to the base, and means whereby said fulcrum members are adapted to move vertically and rotate about vertical and horizontal axes.

1,504,376. SEPARABLE BUTTON. JOHN V. PILCHER and JOHN F. BABBITT, Louisville, Ky., said Babbitt assignor to said Pilcher. Filed Aug. 13, 1923. Serial No. 657,092. 8 Claims. (Cl. 24—110.)



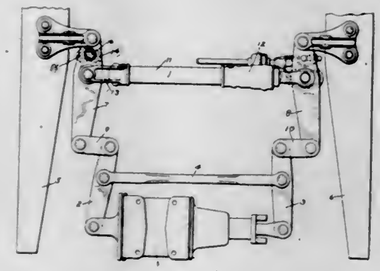
1. A button of the separable type, having a recessed stud, a circular socket member to receive the stud, a spring catch comprising a semi-circular spring portion terminating in approximately parallel portions to engage said stud, and a push piece having a wedge-shaped portion acting parallel to the axis of the stud and lying between said parallel portions.

1,504,377. SHOE CLEANING AND POLISHING MACHINE. HAROLD PLUMMER, Oakland, Calif. Filed Feb. 16, 1921. Serial No. 445,429. 16 Claims. (Cl. 15—34.)



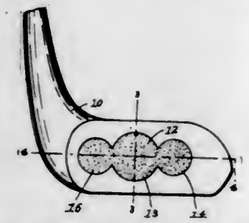
1. In a machine of the character described a casing, a shaft extending longitudinally therethrough, a pair of interspaced head members mounted on the shaft, a plu-

rality of pairs of cooperating brushes supported by said head members, an opening being formed in the casing,



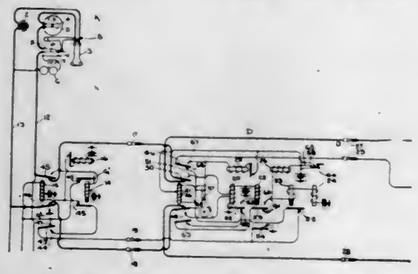
and means for imparting a turning movement to the head members to bring the brushes successively into alignment with the opening.

1,504,378. AUTOMATIC STREET INDICATOR FOR RAILWAY CARS. ESTLE DEE PLYLEY, Detroit, Mich. Filed Sept. 1, 1922. Serial No. 585,751. 8 Claims. (Cl. 40—50.)



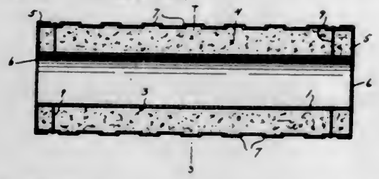
1. In a street indicator, the combination with a holder for a series of cards, of a follower slidably arranged in said holder, stationary ratchet bars having teeth facing in one direction, movable ratchet bars having oppositely facing teeth, dogs upon said follower engaging the respective ratchet bars, means for reciprocating said movable ratchet bars to advance said follower and the series of cards step by step and means operating after each advancement for removing a card from said holder.

1,504,379. SLACK ADJUSTER. JOHN E. REDFORD, Kinloch Park, Mo., assignor to The American Brake Company, St. Louis, Mo., a Corporation of Missouri. Filed June 14, 1922. Serial No. 568,097. 5 Claims. (Cl. 188—198.)



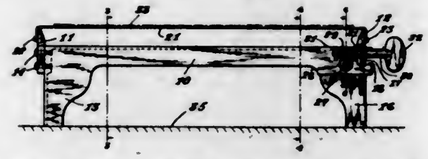
3. The combination with a brake rigging including brake levers and an automatic slack adjuster associated with the brake rigging and operated according to the angularity of the brake levers for taking up slack, of an adjustable frictional resistance device for opposing the free movement of the brake levers.

1,504,380. GOLF CLUB AND METHOD OF MAKING THE SAME. GEORGE W. REITENOUR, Union City, Ind. Filed May 8, 1922. Serial No. 559,369. 5 Claims. (Cl. 46—4.)



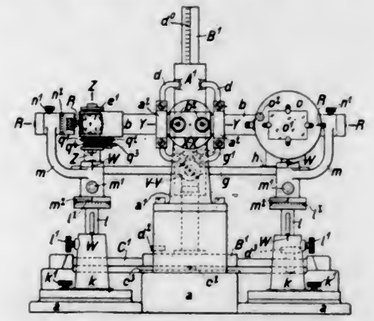
1. A double faced symmetrical golf club having a metal plate sunk in and flush with each face, each plate having the shape of a plurality of overlapping circles, and the centers of the circles of the plates being connected by pins.

1,504,381. AUTOMATIC TELEPHONE SYSTEM. RODNEY G. RICHARDSON, Chicago, Ill., assignor to Automatic Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 4, 1918, Serial No. 215,236. Renewed Apr. 12, 1923. 13 Claims. (Cl. 179—18.)



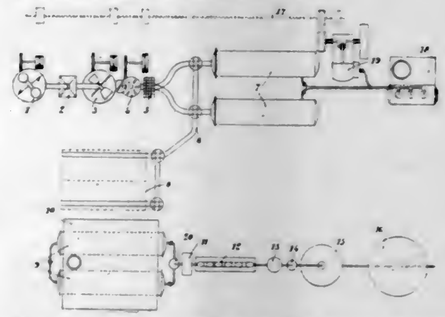
1. In a telephone system, an automatic switch, a rotary magnet for said switch, a differential relay therefor, a circuit for said rotary magnet controlled by said differential relay, means for closing a circuit for said differential relay and said rotary magnet to start the operation of said switch, means for substituting a second circuit for said differential relay and said rotary magnet to continue the operation of said switch, said differential relay adapted to remain deenergized during the operation of said switch, and means for energizing said differential relay to open said last mentioned circuit when the operation is completed.

1,504,382. DIFFUSING APPLIANCE. GEORGE J. RILEY, Manly, Iowa, assignor of one-fourth to Ernest J. Peterson, Manly, Iowa; one-fourth to William I. Keller, Stillwater, Minn.; and one-fourth to Edward C. Reindl, Manly, Iowa. Filed May 29, 1923. Serial No. 642,244. 8 Claims. (Cl. 299—24.)



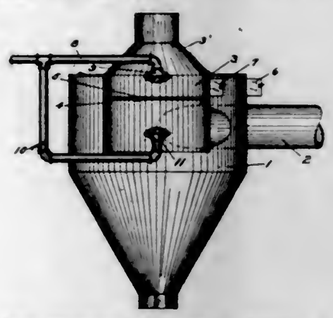
1. A diffusing appliance adapted to serve as a mandrel for a paper roll or the like comprising two members one disposed within the other and spaced therefrom, a filler of fuming material within such space, the peripheral wall of the outer member being perforated and also provided with protuberances.

1,504,383. NOODLE-FORMING MACHINE. ANTON RUGGIERO, Seattle, Wash. Filed Jan. 25, 1922. Serial No. 531,577. 2 Claims. (Cl. 107—20.)



2. In a noodle forming machine, in combination, a frame comprising side members disposed in spaced parallel relation having supporting integral legs formed upon one end thereof and having slotted guideways formed within the opposite end thereof, a detachably secured transverse bar disposed upon the said first named end, an adjustably mounted transverse bar disposed upon the said opposite end having the ends thereof disposed within said guideways, supporting legs removably secured upon said adjustably mounted transverse bar adapted to be guided for longitudinal sliding movement upon the inner faces of said side members, a plurality of cutting strands adapted to be secured at the ends thereof to said transverse bars, inwardly projecting integral rack portions on said adjustably mounted bar adapted to be slidably mounted upon the inner faces of said side members, shafts journalled in said side members, pinions rigidly secured upon the inner ends of said shaft adapted to mesh with said racks, worm wheels rigidly secured upon the outer ends of said shafts, worms meshing with said worm wheels, and manually operable stems rotatively mounted upon the outer faces of said side members adapted to be rigidly secured to said worms and to regulate the tension of said cutting strands.

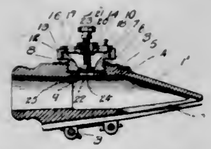
1,504,384. COPYING DEVICE. FRIEDRICH SCHNEIDER, Jena, Germany, assignor to the Firm of Carl Zeiss, Jena, Germany. Filed Aug. 13, 1921. Serial No. 492,133. 2 Claims. (Cl. 33—20.)



1. In a device for copying from a pair of photograms a copying system containing a member movable in any desired direction and a copying tool movable at least in a plane, coupling means between the movable member and the copying tool, a measuring system, a binocular telescope-forming part of this system and comprising a reflector system rotatably disposed about an axis parallel to the base-line of the telescope and so arranged that the distance apart of the entrance axes of this telescope is a multiple of the interocular distance, the foremost reflectors of this reflector system being constructed in such a way as to act partly reflecting, partly transmitting the light and being rotatably disposed each about an axis perpendicular to their chief reflecting plane, two links for connecting this binocular telescope with the said member of the copying system, each of these two links being rotatably disposed on the said members about a point and being further disposed on the said telescope rotatably about an axis parallel to the axes of rotation of the said two foremost reflectors, means for coupling each of the said two links to one of the said two foremost reflectors, these means being adapted to impart to the reflector a rotation by half the amount of rotation of the respective link, two objectives, each of which being disposed universally adjustable in front of one of the said two foremost reflectors, means for coupling each of the said photograms with the respective objective in such a manner that a displacement of the latter results in a similar displacement of the photogram, and two collimators, each of which consists of a lens and a sighting mark and is firmly connected with one of the said two links in such a manner that its optical axis is parallel to that of the link and that its lens faces the respective foremost reflector.

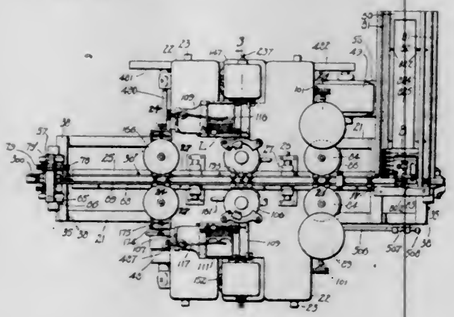
1,504,385. METHOD FOR DISTILLING AND GASIFYING PEAT AND LIKE SUBSTANCES. ADOLPHE ANTOINE FRANÇOIS MARIUS SEIGLE, Paris, France. Filed July 16, 1920. Serial No. 396,768. 4 Claims. (Cl. 222—4.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. A process for utilizing peat for the production of gas and plastic material, which consists in preparing agglomerates with a pulp of peat and substances suitable for the production of a good quality of hydraulic lime, treating the said agglomerates in a digester by means of saturated steam under pressure for the purpose of hardening said agglomerates by producing crystals of hydrosilicate of calcium, then heating the agglomerates in the first place at a slow rate up to a maximum of 550° C. and recovering the distilled products, and finally heating between 1000° and 1200° C. to complete the gas production and the calcination according to the desired production of hydraulic lime.



1,504,386. DUST COLLECTOR. WILLIAM B. SENSEMAN, Denver, Colo. Filed Apr. 20, 1921. Serial No. 462,786. 3 Claims. (Cl. 183—30.)

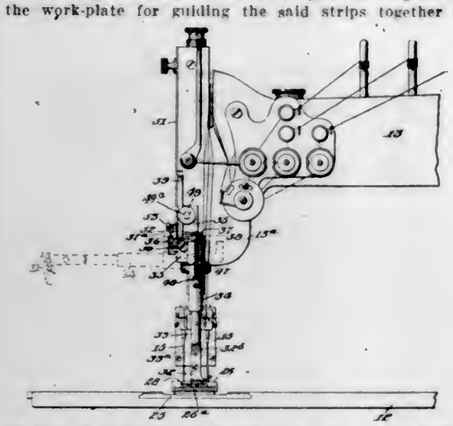
1. A dust collector comprising a housing to receive dust-ladened air, a supply pipe connected tangentially therewith, whereby to discharge said dust-ladened air tangentially into said housing to cause a whirling action,



a member with small holes therethrough mounted across the inside of said housing, and means within said housing for continuously spraying said member during the operation of said device, whereby to maintain a film of water over the holes in said member, for the purpose described.

1,504,387. TONE MODIFIER. FREDERICK E. SHANE, Kansas City, Mo. Filed Apr. 2, 1923. Serial No. 629,351. 3 Claims. (Cl. 84—283.)

3. A mouthpiece for musical instruments having a transverse opening and a recess surrounding the opening to provide a diaphragm seat, a diaphragm in the seat, a collar in the recess for clamping the diaphragm on the seat, a removable cap on the collar, a bushing projecting through the cap, a rotatable perforate disk having openings adapted to be brought into and out of register with corresponding openings in the cap, and a mute-carrying stem longitudinally adjustable in the bushing.

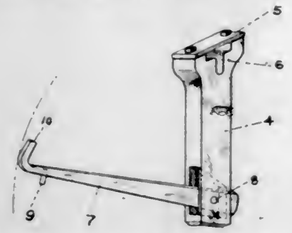


1,504,388. LABELING MACHINE. FREDERICK L. SHELOR, Petersburg, Va., assignor to International Filler Corporation, Petersburg, Va., a Corporation of Virginia. Filed Aug. 4, 1920. Serial No. 401,104. 49 Claims. (Cl. 216—55.)

1. In a machine of the character described, a magazine for objects having a longitudinal opening, conveying means working past one end of the magazine, a frame, supporting rods carried by the frame below the magazine parallel therewith, an endless belt having its upper run working within said opening for advancing the objects to the conveying means, pulley wheels around which said belt passes, label applying means cooperable with the objects conveyed, and brackets supporting said magazine and pulley wheels mounted adjustably on said rods.

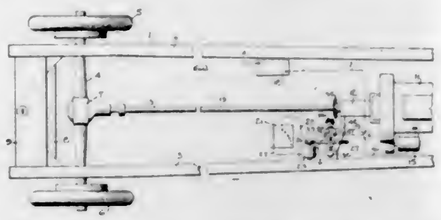
1,504,389. SEWING-MACHINE GUIDING ATTACHMENT. GEORGE W. SPALDING, Worcester, Mass., assignor to Royal Worcester Corset Company, a Corporation of Massachusetts. Filed Mar. 8, 1923. Serial No. 623,654. 9 Claims. (Cl. 112—147.)

1. A sewing machine attachment apparatus, comprising a double folder and guide adapted to be supported on the work-plate of the machine and constructed to guide a strip of fabric and fold in the opposite edges thereof upwardly, said folder and guide having a strip-guiding slot arranged to guide a second strip of fabric above said first-named strip and dispose said last-named strip between the infolded edges of said first-named strip, a second guide on the work-plate for guiding the said strips together to



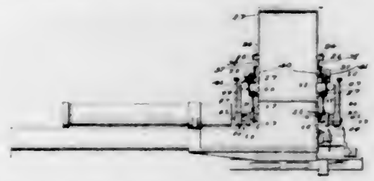
the needles of the machine, and a lap-seam guide adapted to be supported above the machine work-plate and over said last-named guide.

1,504,390. BOWLING ALLEY. EDGAR MCCLELLAN STEIGLEMAN, Highspire, Pa. Filed May 14, 1921. Serial No. 469,587. 3 Claims. (Cl. 46—61.)



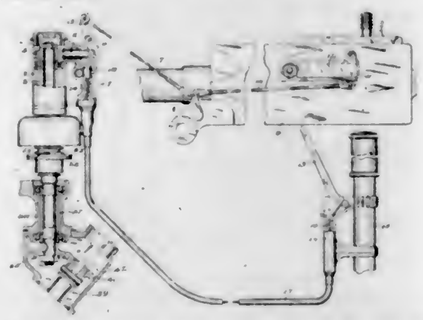
1. A bowling device comprising a playing alley, a bar transversely mounted over said playing alley, pins hingedly connected to said bar, and elastic resilient members for each of said pins, each of said members being connected at its ends to a pin on opposite sides of the hinge axis of its pin so that the same may engage said bar opposite to the hinge connection of its pin therewith to hold the same under tension.

1,504,391. CLUTCH-PEDAL DETENT FOR TRACTORS. LINUS STOFFERSEN, Seattle, Wash. Filed Nov. 11, 1922. Serial No. 600,192. 1 Claim. (Cl. 74—81.)



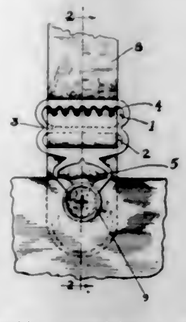
In a motor tractor having means, including a pulley, for communicating power to other mechanism, a clutch controlling pedal, and a foot bracket located adjacent the pedal, the combination of an elongated body portion having at one end a recess in form adapted to embrace said bracket, the other end adapted to extend, when in operative position, below the pulley, a clamp mounted to said recessed end, an arm pivotally connected with the other end of the body and adapted to idle below the pulley, and a hook at the free end of the arm, extending upwardly and approximately at right angles thereto, adapted to engage the pedal and maintain the clutch mechanism in released position.

1,504,392. AUTOMOBILE. JOSEPH STRAUSS, New York, N. Y., assignor to Abraham Kaplan, New York, N. Y. Filed Mar. 3, 1920. Serial No. 362,983. 2 Claims. (Cl. 290—9.)



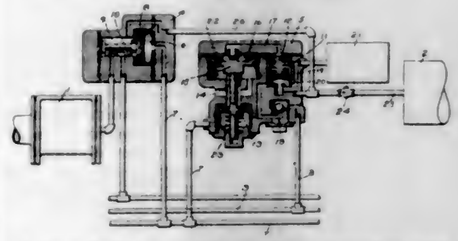
1. In an automobile in combination with the arrangement of motor, clutch, transmission, transmission shaft and differential to the rear axle, a motor, means for selectively connecting said motor to said transmission shaft to drive the same, or locking said shaft from rotation.

1,504,393. CARTRIDGE-FEEDING MECHANISM FOR AUTOMATIC GUNS. HARRY A. SUTTON and ALFRED V. VERVILLE, Dayton, Ohio. Filed Aug. 1, 1921. Serial No. 488,940. 6 Claims. (Cl. 89—33.)



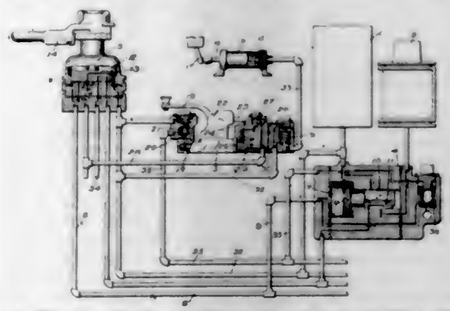
1. In a cartridge feeding mechanism for guns, a guide leading to the gun chamber, a plurality of magazines adapted to move along the guide, each magazine being adapted to feed successively into the chamber while the magazine is in discharging position adjacent to the chamber, and clutch means for automatically moving the magazines along the guide and bringing them successively into discharging position as each magazine discharges its last cartridge.

1,504,394. SYNCHRONIZING GUN CONTROL. HARRY A. SUTTON and CHARLES L. PAULUS, Dayton, Ohio. Filed Apr. 30, 1923. Serial No. 635,611. 4 Claims. (Cl. 89—27.)



1. In synchronizing gun control, rotary impulse generator shaft embodying terminally inter-fitting sections having reversely inclined cam ways, and a centrifugally controlled member engaging said cam ways to vary the relationship between said sections.

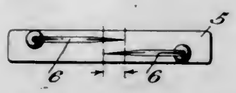
1,504,395. BUCKLE. SALVATORE A. TENUTA, Chicago, Ill. Filed June 9, 1922. Serial No. 566,942. 1 Claim. (Cl. 24—245.)



A suspender buckle, comprising a member having a pair of adjacent transverse slots, the upper wall of one slot having tangs, the lower end of said buckle having an opening enlarged at its upper end for receiving a button in tilted position, said opening merging into a smaller lower opening having a constricted throat.

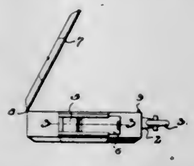
1,504,396. FLUID-PRESSURE BRAKE. FRANK B. THOMAS, Wilkinsburg, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Sept. 22, 1923. Serial No. 664,230. 4 Claims. (Cl. 303—63.)

1. In a fluid pressure brake, the combination with a source of fluid under pressure and a brake pipe, of a valve device operated by fluid under pressure for venting fluid from the brake pipe and means operated upon a predetermined reduction in pressure of said source of fluid pressure for supplying fluid to said valve device.



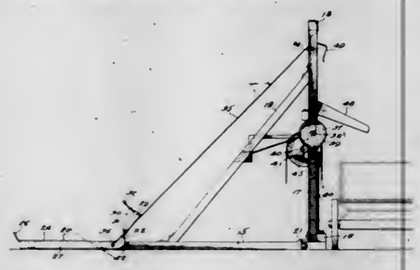
1,504,397. SAFETY CAR-CONTROL DEVICE. FRANK B. THOMAS, Wilkinsburg, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Sept. 22, 1923. Serial No. 664,231. 8 Claims. (Cl. 303—6.)

1. The combination with means for controlling the power circuit of the car motors, of means for controlling the car doors and means operated upon operation of said



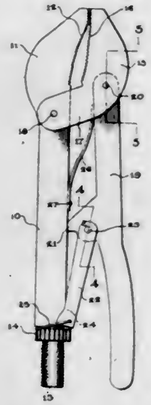
car door controlling means to open the car doors for effecting the operation of said power circuit controlling means to open the power circuit.

1,504,398. COMBINED FASTENING AND ATTACHING DEVICE. ALBIN LEE THORNTON, El Paso, Tex. Filed Nov. 24, 1923. Serial No. 676,809. 6 Claims. (Cl. 24—87.)



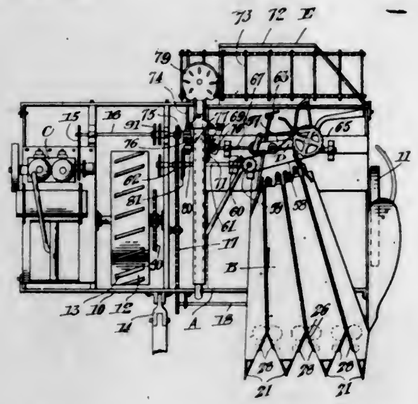
2. A device of the character specified comprising a body, and pins secured to the end portions of the body extended into overlapping relation, said pins being rigidly mounted and arranged at opposite sides of a longitudinal center of the object, so that the object is held in a predetermined position.

1,504,399. POCKET CONTAINER FOR SMOKERS' REFUSE. GOODWIN THORTVEDT, Glyndon, Minn. Filed Apr. 18, 1922. Serial No. 554,451. 1 Claim. (Cl. 206—37.)



A pocket container for smoker's refuse comprising a hollow body open at one side and having a hopper-shaped edge wall portion and an opening therein, a movable stem carried by said body, a catch also carried by the body and associated with and movable by the stem, and a lid hingedly connected to the body and arranged to be engaged by the said catch and also arranged when released from the catch to spring open; the said body being also characterized by a movable knife member guided on the edge wall of the body and adapted in one position to close the said opening therein.

1,504,400. LOADING MACHINE. LEVI THORTVEDT, Glyndon, Minn. Filed May 22, 1922. Serial No. 562,741. 2 Claims. (Cl. 214—130.)

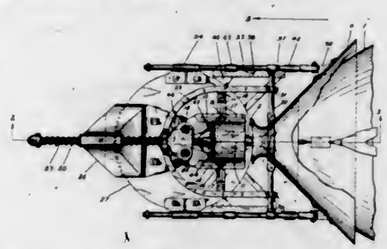


1. A hoisting mechanism comprising a stationary frame including ground sills, uprights and braces secured thereto, a movable frame straddling said stationary frame and pivoted thereto at the lower end thereof, a receiver formed as an elongated bottom member mounted on the movable frame and having upturned ends, and further having hinged side plates adapted to lie on the ground to constitute approach members for the receiver, a mechanism mounted on said uprights, and flexible members forming part of the winding mechanism trained over guide pulleys on the stationary frame and connected with said hinged side plates whereby initial lifting movement of the movable frame will swing said side plates into vertical position defining sides for said receiver, a chute pivoted on the end of said bottom member nearest the uprights, and a gate pivoted on said chute.

1,504,401. COMBINED PLIERS AND WRENCH. WILLIAM C. TULL and ROY J. BRISTOL, Stanton, Nebr. Filed Mar. 30, 1923. Serial No. 628,824. 3 Claims. (Cl. 81—84.)

1. A tool of the character described comprising a relatively stationary handle terminating at one end in a fixed jaw, a curved relatively movable jaw co-operating with said fixed jaw and terminating in arms straddling and pivoted upon said handle near the first named jaw, a relatively movable handle pivotally connected with the intermediate portion of said movable jaw, a link pivotally connected at one end with the intermediate portion of the relatively movable handle, and an abutment member movable on the first named handle and against which the other end of said link engages.

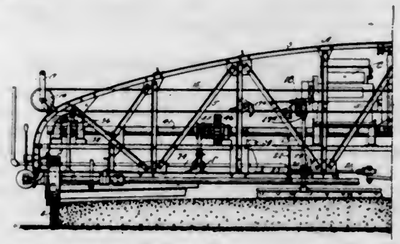
1,504,402. CONVEYING AND BINDING MECHANISM FOR FLAX-PULLING MACHINES. CHARLES HENRI VESSOT and CHARLES ULYSSES VESSOT, Ottawa, and GEORGE ALVIN PILKEY, Corunna, Ontario, Canada. Filed Mar. 24, 1922. Serial No. 546,489. 10 Claims. (Cl. 55—66.)



1. A flax pulling machine comprising contacting pulling belts adapted to lift the flax plants vertically, said belts converging towards each other at the rear end, vertically disposed binding mechanism adapted to bind the flax plants into shocks while in a vertical position, and means for supporting the shocks while in such vertical position.

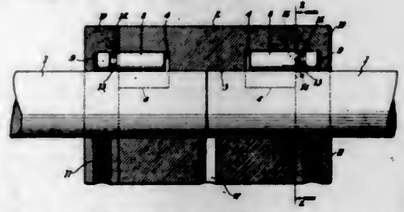
2. A flax pulling machine comprising contacting pulley belts adapted to lift the flax plants vertically, said belts converging towards each other at the rear end, vertically disposed binding mechanism adapted to bind the flax plants into shocks while in a vertical position, means for supporting the shocks while in such vertical position, and a horizontal conveyer adapted to convey the shocks away from the binding mechanism.

4. In a flax puller, in combination, a flax pulling belt, vertically arranged binding mechanism adapted to bind the flax plants into shocks while in a vertical position, a horizontally extending conveyer adapted to receive the shocks from the binding mechanism, the said conveyer comprising a platform and endless chains formed with connecting slats adapted to move over the platform.



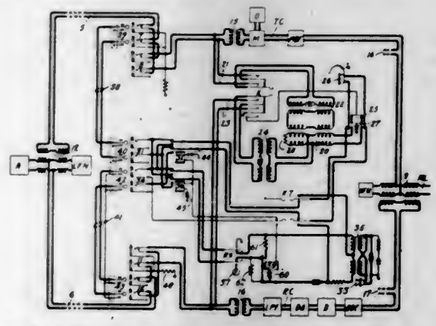
7. In a flax puller, in combination, converging flax pulling belts, vertically arranged binder decks adapted to engage the flax plants when they come from the flax pulling belts, packer arms and knotting mechanism arranged co-operatively with the binder decks and adapted to bind the flax plants into shocks.

1,504,403. AIRSHIP-MOORING DEVICE. STEPHEN R. WARREN, Dayton, Ohio. Filed Oct. 31, 1922. Serial No. 598,137. 2 Claims. (Cl. 244—2.)



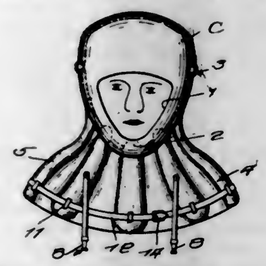
1. In combination, a device for mooring airships, a coupling stud provided with an enlarged head and mounted on the nose of said airship, coupling blocks mounted on a mooring mast and adapted to receive said coupling stud, means for automatically clamping and retaining said coupling stud in said coupling blocks when forced therein, and manual means for disengaging said coupling blocks from said coupling stud to allow the removal of said airship from said mooring mast, said manual disengaging means comprising hinged members connected to said coupling blocks and to a shaft supported by the mast supporting structure said shaft being provided with shock absorbing means and carrying a fixed collar, a cable attached to said collar and arranged about a pulley, a pull on said cable by the operator being adapted to swing said coupling blocks open and out of engagement with said coupling stud.

1,504,404. PAVEMENT-FINISHING MACHINE. GEORGE E. WEAD, Milwaukee, Wis., assignor to Koehring Company, Milwauke, Wis., a Corporation. Filed Feb. 14, 1922. Serial No. 536,529. 36 Claims. (Cl. 94—48.)



1. In a concrete finishing machine of the class described, the combination of a pressure apron adapted to be disposed over the road surface, means for subjecting said apron to pressure throughout its whole area at one time and while the apron is in contact with concrete aggregates, and means for vibrating the apron while subjected to such pressure.

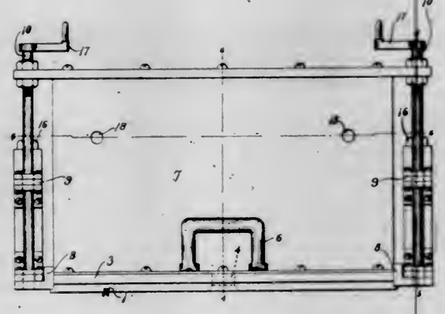
1,504,405. SAFETY SHAFT COUPLING. IRVING F. WEBB, Elizabeth, N. J., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a Corporation of New Jersey. Filed Mar. 18, 1922. Serial No. 544,716. 7 Claims. (Cl. 64—89.)



1. In a coupling device, a body-member having a shaft aperture and a clutch-roll chamber adjacent said shaft aperture, said chamber having an eccentric wall, a clutch-roll disposed in said chamber and projecting outwardly beyond the end of said body-member, and means external to said body-member for connecting said clutch-roll to rotate with a shaft-section in contact with the latter.

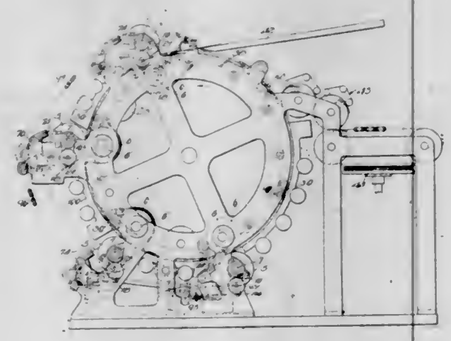
1,504,406. SIGNALING SYSTEM. CHARLES WHITE, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 5, 1921. Serial No. 466,932. 37 Claims. (Cl. 179—46.)

2. In a telephone system, a four-wire line, a telephone receiver, a conjugate transformer, a relay to connect said receiver to said conjugate transformer, and a key to connect the conjugate transformer to the four-wire line.



1,504,407. BATHER'S LIFE PROTECTOR. JAMES R. WILLIAMS, Cleveland, Ohio. Filed July 11, 1923. Serial No. 650,887. 2 Claims. (Cl. 9—20.)

1. A device of the class described comprising a cap like structure having a cut out portion for the accommodation of the wearer's face, a cape depending from the

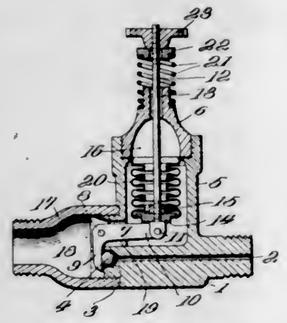


cap like structure, said cape being provided with a plurality of inflatable pockets, said pockets being divided into series, tubes connecting the pockets of one series with the pockets of a second series, said tubes being disposed upwardly of the cap like structure and across the top or crown thereof, and means for inflating each series of pockets.

1,504,408. STRAIGHTEDGE MACHINE. HENRY F. WOERTH, Columbus, Nebr. Filed Oct. 6, 1922. Serial No. 592,904. 2 Claims. (Cl. 94—45.)

1. A straight edge machine comprising a base, a supporting plate rotatably mounted thereon, a casing carried by the supporting plate, rods at the ends of the casing, a frame slidably mounted on each pair of rods and manually operated means for adjusting the frames vertically.

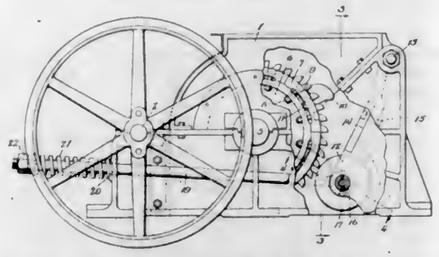
1,504,409. PRINTING MACHINE. JOHN C. YETTER, Chicago, and OTTO R. WOLF, River Forest, Ill. Filed Sept. 23, 1920. Serial No. 412,263. 3 Claims. (Cl. 101—152.)



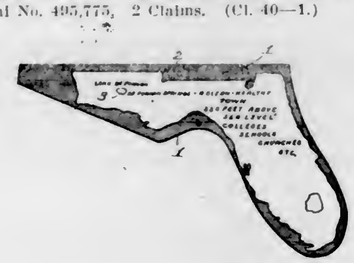
3. In a printing machine, a rotatable cylindrical structure provided with a plurality of sets of sheet gripping devices spaced around same, a plurality of pairs of impression rolls positioned around said structure in relatively fixed positions, one of each pair outside said structure and the other of each pair within the structure, a supporting roller between each pair of printing rollers arranged within the periphery of the cylindrical structure, said supporting roller having a depression permitting the passage of the gripping device.

1,504,410. HAT OR NAPKIN HOLDER. JOHN H. E. ZEIP, St. Louis, Mo. Filed Mar. 22, 1924. Serial No. 701,047. 1 Claim. (Cl. 24—81.)

A device of the kind described, comprising two clamps having their jaws curled inwardly, one of the jaws having a laterally disposed ear pierced with an eye, and the other jaw having an eye pierced through the end of the handle; and a chain connecting the two clamps through the said eyes thereof.



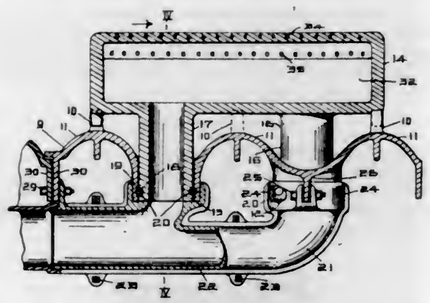
1,504,411. EXPANSION VALVE FOR REFRIGERATING SYSTEMS. CARL E. ANDERSON, Maywood, Ill. Filed May 19, 1920. Serial No. 382,469. 3 Claims. (Cl. 50—26.)



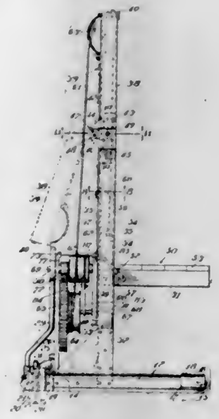
2. An expansion valve for refrigerating systems comprising a casing having a receiving chamber therein adapted to be attached to the vacuum side of the system, said casing having a passage leading to the chamber and adapted to be connected to the pressure side of the system, whereby cooling fluid is delivered to said receiving chamber, a ball valve for controlling said passage, a second chamber separated from and connected to said receiving chamber, an expansible element located in said second chamber and subject to the pressure in said vacuum chamber, an elbow lever extending from said second chamber into the receiving chamber for actuating the ball-valve, said lever being connected to said expansible element.

1,504,412. CRUSHING MACHINE. CARL T. ANDERSON, Elmhurst, Ill., assignor to Webster Mfg. Company, Chicago, Ill., a Corporation of Ohio. Filed Jan. 7, 1922. Serial No. 527,802. 21 Claims. (Cl. 83—14.)

1. In a crusher, the combination of a roll, a breaker plate disposed in operative relation to said roll, forming a hopper-like space with a discharge throat between the roll and the plate to receive the materials to be crushed, relatively short teeth on the roll, relatively long teeth on said roll, with said plate set back far enough from the roll to clear said long teeth, thus widening said throat to prevent the long teeth from passing through the face of the plate, and movable means projecting outward from said plate and between said long teeth and into operative relation to the ends of said short teeth, forming a contraction of said throat, whereby to crush said materials in said space and discharge the product from said throat in the operation of the crusher.

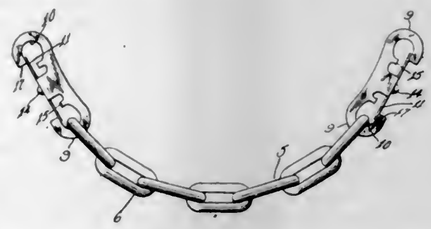


1,504,413. ADVERTISING DEVICE. LESTER HORTEN ATWELL, De Funiak Springs, Fla. Filed Aug. 26, 1921. Serial No. 495,775. 2 Claims. (Cl. 40—1.)



1. A new article of manufacture consisting of a plate having an outline approximating the outline of a geographical division and having upon its face an outline map of the same geographical division.

1,504,414. SMOKE CONSUMER. WILLIAM A. BAKER and FREDERICK A. RAMLER, Toledo, Ohio. Filed May 27, 1919. Serial No. 300,126. 5 Claims. (Cl. 110—75.)

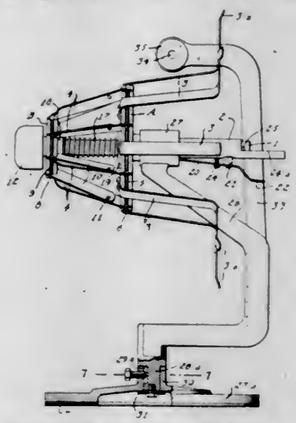


1. A furnace embodying a housing provided with a combustion chamber, there being a pair of openings into the furnace at said chamber and lugs projecting into the chamber from the housing adjacent said openings, of an auxiliary air supply device comprising an elongated chamber having air supply extensions protruding through said openings, eyes for engaging the lugs in sustaining the chamber of the device in the combustion chamber, and series of outlet holes variously directed from the device chamber into the combustion chamber.

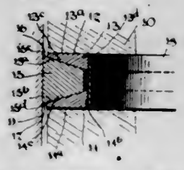
1,504,415. PORTABLE ELEVATOR. ARTHUR M. BARRETT, Winnetka, and FRANK L. EIDMANN, Chicago, Ill., assignors to said Arthur M. Barrett. Filed Apr. 26, 1922. Serial No. 556,711. 23 Claims. (Cl. 187—11.)

5. In a portable elevator, the combination with a wheeled base, an elevator frame mounted thereon and a load-carrying platform guided by said frame, of a hoisting drum mounted on the base and operatively connected with said platform, variable speed mechanism for rotating said drum to lift the platform, a brake drum mounted coaxially with said shaft, a ratchet wheel mounted on and rotating with said shaft, a pawl carried by said brake drum and engaging said ratchet wheel, a brake cooperating with said brake drum, and a governor connected with said brake drum for controlling the descending speed of the platform.

1,504,416. EMERGENCY CHAIN FOR NONSKID TIRE CHAINS. JOSEPH R. BAUDE, Chicago, Ill. Filed Feb. 12, 1923. Serial No. 618,650. 1 Claim. (Cl. 24—233.)



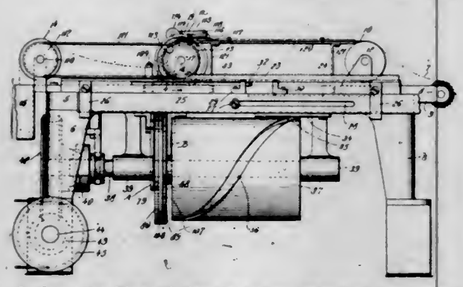
In a device of the type described, a hook comprising a body portion having two curved ends which provide link receiving recesses, said hook having a central portion, a leaf spring secured to said central portion and extending to the ends of said curved portions so as to normally close the recesses, and projections extending inwardly into said recesses, said projections aiding in carrying part of the force which may be exerted against said spring and also limiting the movement of said spring.



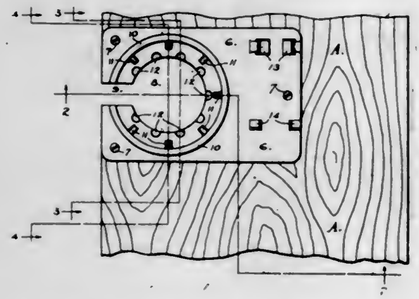
1,504,417. ROPE AND WIRE REEL APPARATUS. PATRICK D. BEAVERS, Washington, D. C. Filed Aug. 14, 1922. Serial No. 581,683. 12 Claims. (Cl. 242—111.)

6. A rope and wire reel apparatus of the character described comprising, a shaft, a housing through which

the shaft extends, a disc rotatably mounted on said shaft housing, spring arms carried by the disc with their extremities diverging outward, pivoted fingers on said disc and means for forcing same against a coil of wire positioned on the spring arms.

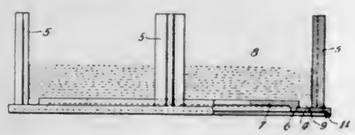


1,504,418. PISTON RING. MARCUS D. BELL, West Tulsa, Okla. Filed Nov. 9, 1922. Serial No. 599,898. 1 Claim. (Cl. 74—109.)



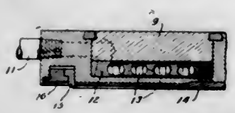
A piston packing comprising outer rings, an inner ring of greater diameter than the outer rings and arranged between the outer rings, the inner ring having a less longitudinal extent than the distance between the outermost faces of the outer rings whereby said inner rings and outer rings define oil receiving pockets providing oil seals, the contacting faces of the rings being inclined and a spring engageable with the outer rings and spaced from the inner ring for urging said rings into operative position and into packing relation with respect to each other.

1,504,419. MESH-MEASURING MACHINE. RICHARD HATLEY BERKLEY, Plainville, Mass., assignor, by mesne assignments, to Whiting & Davis Company, Plainville, Mass., a Corporation of Massachusetts. Filed Nov. 10, 1920. Serial No. 423,002. 29 Claims. (Cl. 33—131.)



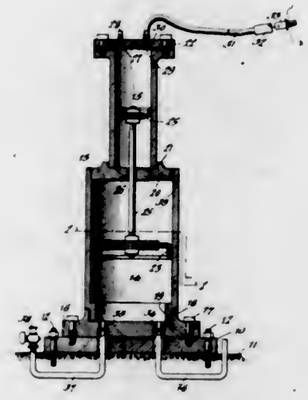
1. In a machine of the character described, the combination of a support for a piece of mesh of extended length, a member movable in contact with the mesh, and means actuated by movement of said member corresponding to a predetermined number of rows of links of the piece of mesh for acting upon the piece to indicate sections of the piece of predetermined length.

1,504,420. BENCH PLATE. EDWARD L. BINKLEY, Omaha, Nebr. Filed June 16, 1923. Serial No. 645,812. 2 Claims. (Cl. 29—89.)



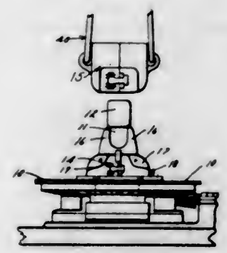
1. In a device of the class described, a plate having an annular upstanding flange, a series of tapering ribs extending radially inward from said flange, there being a large opening through the plate concentric with said flange and a slot from said opening to one edge of the plate, and a series of recesses formed in the face of the plate adjacent to said opening, for the purpose set forth.

1,504,421. TRAY FOR PHONOGRAPH RECORDS, ETC., JOSEPH W. BISHOP, Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill., a Corporation of Delaware. Filed Apr. 24, 1922. Serial No. 556,295. 3 Claims. (Cl. 211—14.)



2. A phonograph-record tray comprising a base provided with a plurality of standards rising therefrom and disposed in a circular series, and a record-supporting seat carried by and elevated above the base and disposed within and spaced from the standards.

1,504,422. MOLDING DIE. JOSEPH W. BISHOP, Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del., a Corporation of Delaware. Filed Feb. 23, 1924. Serial No. 694,647. 5 Claims. (Cl. 18—5.3.)

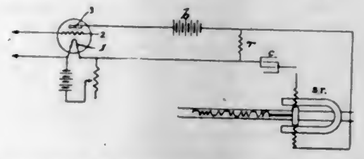


1. A molding die of the character described having a plurality of concentric channels and intermediate partitions, and a plug intersecting said channels and partitions and having diagonal channels therein connecting the ends of the concentric channels on one side of the plug with the other ends of said concentric channels on the other side of the plug.

1,504,423. LUBRICATING APPARATUS. HAROLD J. BONEBERG, Buffalo, N. Y. Filed Apr. 10, 1923. Serial No. 631,233. 1 Claim. (Cl. 221—74.)

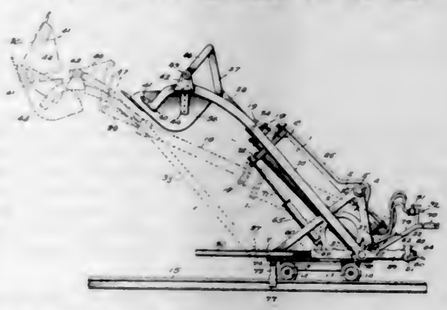
A lubricating apparatus of the character described comprising a supporting base, a working cylinder mounted on said base, said cylinder being internally threaded at its upper end and provided at its lower end with an externally-threaded neck, a head for the lower end of said cylinder attached to the supporting base and having a threaded socket in its upper side for receiving the threaded neck of said cylinder, a supplemental cylinder closed at its upper end surmounting said main cylinder and forming a container for the lubricant, and intermediate head located between the opposing ends of said cylinders and engaging the threaded end of the main cylinder, said intermediate head having a socket in its upper side for receiving the lower end of said supplemental cylinder, pistons slidable in said cylinders, and a rod connecting said pistons and passing through an opening in the intermediate head, the closed upper end of said supplemental cylinder having a grease-filling opening and a grease-discharge opening, and the lower head of said main cylinder having an inlet for compressed air and an air outlet.

1,504,424. METHOD AND APPARATUS FOR HANDLING WELL CASINGS. CHARLES R. BROWN, Brea, Calif. Filed May 7, 1923. Serial No. 637,191. 19 Claims. (Cl. 294—92.)



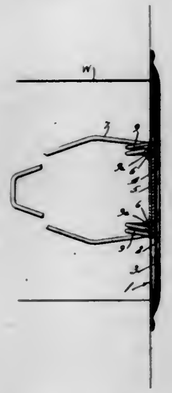
1. The hereindescribed method of handling a casing with a coupling on it including, holding the casing by engaging under the coupling at spaced points, and moving the casing by engaging under the coupling at points between those first mentioned.

1,504,425. TIE AND RAIL CONSTRUCTION. PERO S. BREICH, St. Louis, Mo., assignor of one-half to George Seper, St. Louis, Mo. Filed Apr. 5, 1924. Serial No. 704,361. 1 Claim. (Cl. 238—102.)



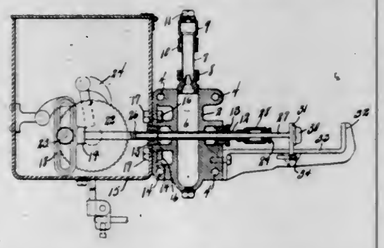
In combination with a tie having slots formed therein, a rail, locking blocks positioned in the slots in said tie, said rail positioned on said locking blocks in one of the slots in said tie, a key hole slot formed in each of said locking blocks of such shape that when a key is inserted in said key hole slot, it may be rotated to a position which will secure said blocks in frictional engagement with said tie and secure said rail in frictional engagement with said locking blocks.

1,504,426. WIRELESS TELEGRAPHY. WILLIAM M. BRUCE, Jr., Springfield, Ohio. Filed July 7, 1919. Serial No. 309,136. 4 Claims. (Cl. 250—8.)



1. In a system for recording wireless signals consisting of trains of high frequency currents of long and short duration, a vacuum tube detector to change said high frequency trains of currents into uni-directional currents of the same duration, and a recording device having a movable coil and a movable tape, means for causing said coil to be operated in one direction at the beginning of the flow of said uni-directional currents and to be retained in said moved position during the continuance of said current and to move to zero position at the end of sad current flow, said coil being provided with a proper stylus which will mark the tape in the direction of its travel during the continuance of a train of wireless waves so that the signals may be read longitudinally of the moving tape, the long and short intervals representing dots and dashes.

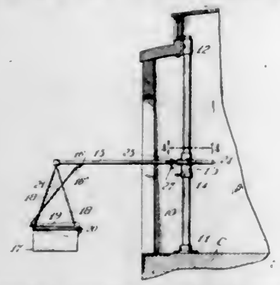
1,504,427. MINE SHOVEL. ROBERT S. BUTLER, Joplin, Mo. Filed Oct. 11, 1920, Serial No. 416,175. Renewed June 20, 1924. 18 Claims. (Cl. 214—140.)



1. A mine shovel comprising a cylinder, a pair of pistons mounted therein, piston rods secured to each of said pistons, and a pivotally mounted shovel connected to one of said rods to control its forward and rearward movement, the other piston rod being connected to said shovel to swing it on its pivot.

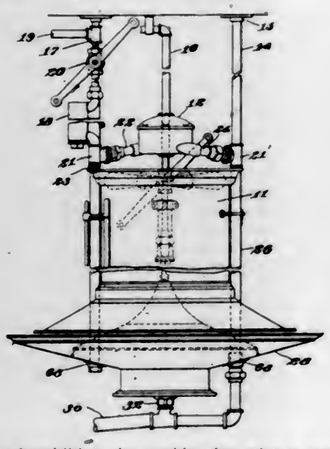
1,504,428. FLUE STOPPER. OREN G. BYERS, Tulsa, Okla. Filed Apr. 21, 1923. Serial No. 633,748. 1 Claim. (Cl. 126—319.)

A combined flue closure and ventilator comprising an annular sheet metal plate having a foraminous covering secured to its inner face, a small metal plate attached to the rear face of said covering, another plate superposed on said first mentioned small plate and having spaced sockets, and substantially ball-shaped retainers having the legs thereof provided with spring coils and inserted in said sockets.



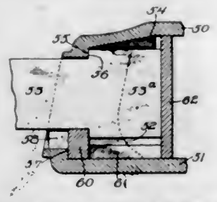
1,504,429. VALVELESS LUBRICATOR. AMOS H. CARSON, Fort Worth, Tex., assignor, by direct and mesne assignments, to The Valveless Lubricator Co., Fort Worth, Tex., a Corporation of Texas. Filed Dec. 30, 1922. Serial No. 609,800. 6 Claims. (Cl. 184—79.)

3. A lubricator for supplying the lubricant to a steam line comprising a supply reservoir, cooling means between said reservoir and the steam line consisting of a casing and a combined water reservoir and sight feed in communication with said casing and with said steam line, a hollow plunger reciprocating in said reservoir and to the point of discharge of the lubricant in said casing and provided with an inlet and discharge opening, a supplemental plunger mounted in said hollow plunger and moving therewith during a part of its travel and adapted to create a vacuum in said hollow plunger for causing an intake of lubricant on the inward thrust of said hollow plunger and adapted to discharge the lubricant from said hollow plunger on the outward thrust of said plungers, and stops for regulating the thrusts of said supplemental plunger.



1,504,430. MAIL CATCHER. EMMA EVANS CLARK, Hammond, Ind. Filed July 5, 1923. Serial No. 649,769. 4 Claims. (Cl. 258—20.)

1. A receiver comprising a vertical shaft mounted in a car, rotatable arms supported on a collar secured to said shaft providing a self contained operating handle safety bar and receptacle rod, a receptacle secured to one of the arms a cover for said receptacle operated by



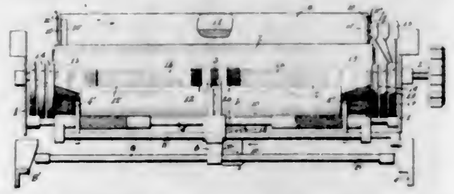
a flexible member connected thereto and passing through a central bore in one of said arms and means for limiting the angle of rotation of the receiver.

1,504,431. HUMIDIFIER. FRANK B. COMINS, Newton, and JOSEPH ARMSTRONG, Malden, Mass., assignors to American Moistening Company, Boston, Mass., a Corporation of Maine. Filed July 14, 1921. Serial No. 484,633. 7 Claims. (Cl. 261—115.)

1. In a humidifier, the combination with a water motor of a tubular hanger constituting both a support for the humidifier and a conduit for water passing through said motor.

1,504,432. DRAFT-GEAR YOKE. ROY J. COOK, Chicago, Ill., assignor to Keyoke Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 13, 1920. Serial No. 358,443. 1 Claim. (Cl. 213—70.)

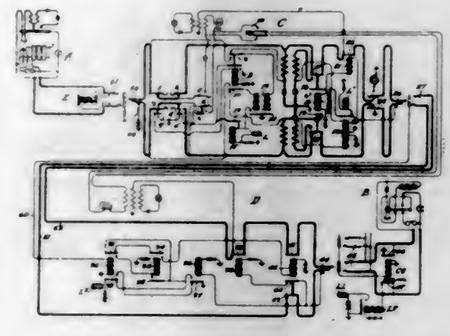
In combination with a coupler having a straight bottom shank and a butt rearwardly thereof, a yoke having arms and side walls at the front thereof uniting said arms, a hooded end opening to permit the insertion of said coupler butt, said arms each having an inturned



engageable flange at the front thereof, means carried by one of said arms rearwardly of said flange to contact and space said coupler butt from said arm, said hooded end being provided with inwardly projecting lugs, a removable block supporting the shank of said coupler and located between the butt of said coupler and the flange of the other of said arms, said block having a non-supporting portion located beneath said coupler butt, and a follower adjacent the end of said coupler butt, said portion of said block normally contacting with said follower block, the forward end of said block, normally contacting with said lugs.

1,504,433. NEEDLE SILENCER FOR TALKING MACHINES. MORITZ F. CORSWANDT, Chicago, Ill. Filed Apr. 18, 1924. Serial No. 707,491. 4 Claims. (Cl. 274—37.)

3. A device of the character described comprising a drum having a chamber, a yieldable tubular body extending through the chamber, there being means at the forward portion of the tubular body for engaging a reproducer needle, and means whereby the drum may be connected to the reproducer of a phonograph.



1,504,434. MANIFOLDING ATTACHMENT FOR TYPEWRITERS. MALCOLM L. COSSITT, Oakland, Calif., assignor to Manifold Impressions Corporation, Carson City, Nev., a Corporation of Nevada. Filed Oct. 3, 1923. Serial No. 666,289. 24 Claims. (Cl. 197—126.)

1. A manifolding attachment for typewriters, comprising a main paper guide apron adapted to direct a record sheet to and about the platen of the machine to present it in the line of type impact; a manifolding member; and a container adapted to house said manifolding member and present a section thereof in functional position in the line of type impact, said container lying in spaced relation to the main guide apron and forming a second guide apron for a second record sheet, with the exposed section of the manifolding member lying between the two record sheets, and said container being movably mounted to adapt it to vary the exposed section of its manifolding member, with relation to the line of type impact, while said section is in functional position.

1,504,435. TELEPHONE SYSTEM. HIRAM D. CURRIER, Chicago, and GEORGE R. EATON, Oak Park, Ill., assignors to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 28, 1921. Serial No. 448,387. 9 Claims. (Cl. 179—47.)

3. In a telephone system, an A board and a B board and a telephone line having terminals at the B board, said line connected to an operator's circuit at the A board through a plug and jack at said board and through a plug and jack at the B board, ringing means at the A board for signaling the subscriber on said line, and electrical switching means controllable by the operator

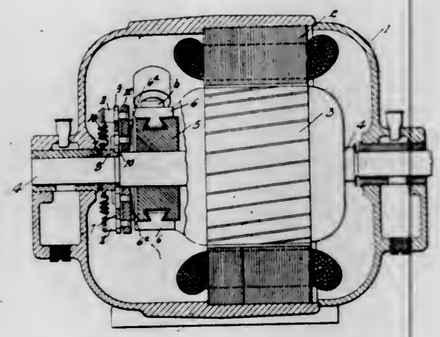
at the A board to make said line test idle at the B board while the plug at the B board continues in the jack.

1,504,436. SHAVING GAUGE. DEKRAN DAUGHLEY, Richmond, Va. Filed Oct. 16, 1923. Serial No. 668,803. 3 Claims. (Cl. 132—45.)

1. A shaving gauge consisting of a substantially flat and thin element adapted to embrace the ear and to lie against the side of the head, and having in its forward portion an edge to form a gauge to which the hair may be trimmed.

1,504,437. DYESTUFFS, PROCESS OF MAKING SAME, AND THEIR APPLICATION. GUILLAUME DE MONTMOLLIN and GERALD RONHÔTE, Basel, Switzerland, assignors to The Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 24, 1923. Serial No. 653,548. 8 Claims. (Cl. 260—80.)

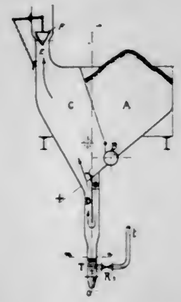
6. The herein described new azo-dyestuffs corresponding with the general formula:



$$R_1—N=N—R_2$$

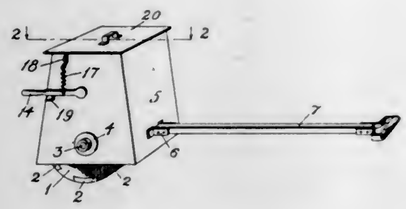
wherein R_1 represents an unsulfonated aromatic nucleus that carries a group —OR (wherein R represents an aryl residue) in ortho-position with regard to the diazo group and which may bear other substituents, and R_2 the radical of an arylide of the 2-oxynaphthalene-3-carboxylic acid, which compounds are in a dry state red powders insoluble in water.

1,504,438. SHORT-CIRCUITING DEVICE FOR MOTORS. CHARLES P. EISENHAUER, Dayton, Ohio, assignor to The Duro Pump & Manufacturing Company, Dayton, Ohio, a Corporation of Ohio. Filed Aug. 25, 1921. Serial No. 495,393. 5 Claims. (Cl. 172—279.)



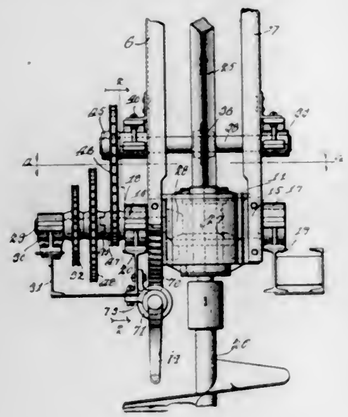
1. In a motor of the character described, the combination with an armature shaft and a commutator having a series of bars, of a disk mounted to rotate with said

shaft, a plurality of contacts slidably connected with said disk, and springs normally tending to hold the same toward the axis of the shaft, said contacts being located



in line with the ends of said bars so as to contact with said bars when impelled radially outwardly by centrifugal force.

1,504,439. APPARATUS FOR SORTING PULVERULENT MATERIALS. ANTOINE FRANCE, Liege, Belgium. Filed Sept. 1, 1921. Serial No. 497,723. 4 Claims. (Cl. 83—54.)

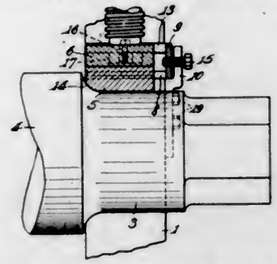


1. In apparatus for sorting or classifying pulverulent material such as coal dust, the combination of a closed dust extraction chamber having two downwardly converging sloping sides; a vertical flue depending from said chamber, terminating at the base into a narrower discharge conduit; a partition arranged within said flue to form two vertical conduits communicating at their lower end and of which the first has its upper end closed and the second has its upper end opening out into the base of the dust-extraction chamber; a transverse partition in said chamber forming a storage-hopper for the material to be treated having a delivery opening close to the lower edge of one of the sloping sides of such chamber; mechanically operated means, arranged in said delivery opening, for continuously feeding the material from said storage-hopper onto the lower portion of the last-named sloping side and projecting same across the upper end of the second of the aforesaid vertical conduits; adjustably controllable means for the introduction of gaseous fluid under pressure into the upper portion of the first of said conduits; adjustably controllable means for supplying liquid under pressure to the base of the aforesaid discharge conduit; interchangeable means for adjusting the size of the discharge opening at the lower end of said discharge conduit; an extraction chimney communicating with and leading upwardly from the dust-extraction chamber; and means for adjusting the effective cross-sectional area of the said chimney; all substantially as described.

1,504,440. ADVERTISING MACHINE. ALBERT EMIL GALLIN and ANGELO P. KACHIS, Portland, Oreg. Filed Oct. 20, 1923. Serial No. 669,730. 6 Claims. (Cl. 101—328.)

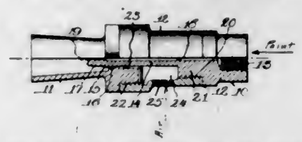
1. In an advertising machine, the combination of a roller having a plurality of longitudinal dovetailed grooves in its surface, dovetailed rubber blocks mounted in said grooves, said blocks being marked on their outer surfaces with characters, figures or signs, an axis through the roller, a tongue attached to the axis, a supply tank mounted above the roller, and a cloth attached to the bottom of the tank and being in sliding contact with the roller.

1,504,441. AUGER-SUPPORTING MECHANISM FOR EARTH-BORING MACHINES. GUSTAV R. GEHRANDT, Evanston, Ill., assignor, by mesne assignments, to International Earth-Boring Machine Corporation, a Corporation of Delaware. Filed Oct. 6, 1919. Serial No. 328,834. 3 Claims. (Cl. 255—22.)



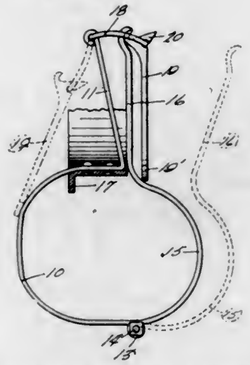
1. An auger supporting mechanism for earth boring machines and the like, having in combination, a gear-box, gears located therein, a tower rigidly secured to and pivotally carried by said gear box, an auger shaft extending along said tower and rotatable by the gears within the gear box, a segmental gear supported from said gear box, and a manually operable worm meshing with said segmental gears for inclining said tower and auger shaft.

1,504,442. BEARING BRASS FOR TOP ROLLS AND SUPPORT THEREFOR. IRA S. GEMAS, Martins Ferry, Ohio. Filed Jan. 16, 1924. Serial No. 686,530. 5 Claims. (Cl. 64—32.)



1. A top roll bearing brass and a carrier therefor, comprising a supporting frame embodying a bar adapted to

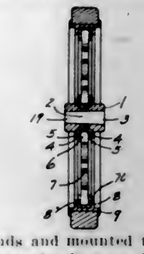
be mounted horizontally against the outer face of a roll housing, parallel guide members carried by and extending



inwardly from said bar, a rider-like block carried by and longitudinally slidable on said guide members, and a top brass rigidly carried on the under side of said block.

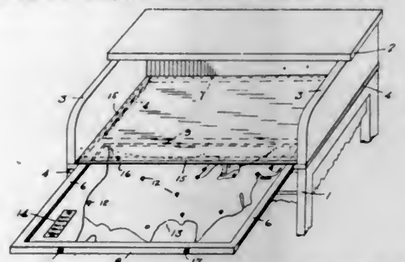
1,504,443. PAINT-SPRAYING APPARATUS. JAMES W. GIBBONS, Topeka, Kans. Filed Aug. 25, 1923. Serial No. 659,260. 12 Claims. (Cl. 91—45.)

1. In a device of the class described, an elongated stem having a passage therethrough, a casing surrounding said stem and spaced therefrom to form a chamber, and an elongated outwardly flared nozzle attached to one end of said casing, said stem projecting into said nozzle.



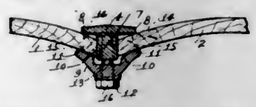
1,504,444. RIM AND TIRE CLAMP. OTTO GLASS, Rosebud, Tex. Filed May 4, 1923. Serial No. 636,526. 4 Claims. (Cl. 224—29.)

1. In a spare tire and rim clamp, a supporting member for attachment to the tire bracket of an automobile, an arcuate clamp lever hinged to the member and having an extension, an arm extending upwardly from the member, and a locking lever hinged to the arm and engaging the extension of the clamp lever.



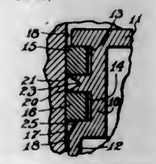
1,504,445. RESILIENT WHEEL STRUCTURE. ARTHUR GWATHNEY and WILLIAM J. BAILEY, Woodville, Ala. Filed Aug. 23, 1923. Serial No. 658,866. 2 Claims. (Cl. 152—50.)

1. A wheel of the kind described, comprising a hub and a pair of spoke plates cast at the central part thereof, the plates being formed with half-sockets enlarged inwardly and spaced apart and extended radially, the half sockets being aligned to form together complete spoke sockets; a rim having a pair of spaced flanges formed integrally around its inner periphery; a plurality of spoke locks filled in around the inner periphery of the wheel between the said flanges, the same being trough-shaped and formed with medially located split sockets which are enlarged inwardly; sinuous spring-bar spokes



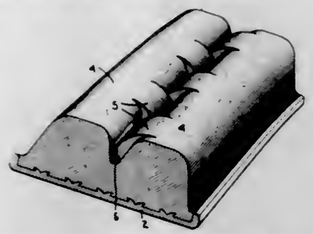
having enlarged ends and mounted thereby in the sockets of the hub and rim; and bolts passed transversely through the sides of the spoke locks and the spoke plates.

1,504,446. DRAWER UNIT FOR DESKS OR TABLES. KINGSLEY S. HALL, Chicago, Ill. Filed Nov. 12, 1921. Serial No. 514,550. 11 Claims. (Cl. 45—90.)



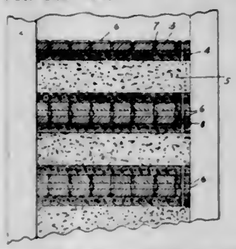
1. A removable shallow tray unit for the tops of desks and tables comprising a pair of side pieces, a shallow tray slidable therein, and a transparent cover fitting over the top of the tray and supported by the side pieces.

1,504,447. CHAIR. GEORGE H. HAMILTON and FRED J. BLAKSLEE, Grand Rapids, Mich., assignors to American Seating Company, Grand Rapids, Mich., a Corporation of New Jersey. Filed Jan. 23, 1922. Serial No. 531,135. 5 Claims. (Cl. 155—130.)



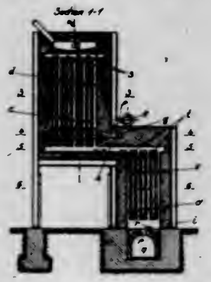
1. In a structure of the character described; an upwardly extending support having a body portion intermediate the mutually adjacent edges of the chair backs hereafter mentioned, and having laterally extending ribs; a pair of chair backs whose front surfaces are concave and rear surfaces convex in horizontal cross section; a clamp member; threaded means extending between the clamp member and the support's body portion for clamping them together with the mutually adjacent edge portions of the chair backs between the clamp member and said ribs.

1,504,448. PISTON. CHARLES C. HANCH, Connersville, Ind. Filed May 31, 1922. Serial No. 564,767. 19 Claims. (Cl. 74—108.)



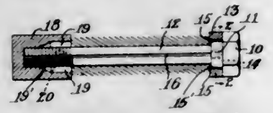
19. An internal-combustion engine piston having a head portion and a skirt portion, with a plurality of piston-ring grooves near the head, and a land between two adjacent piston-ring grooves having greater than expansion clearance throughout its width.

1,504,449. SOLID TIRE. ALBERT HARGRAVES, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Dec. 3, 1921. Serial No. 519,633. 7 Claims. (Cl. 152—1.)



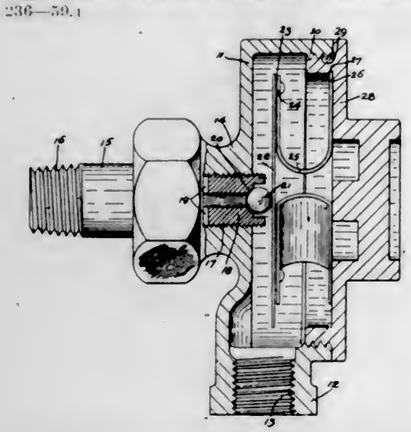
4. A resilient tire comprising two tread portions separated by a relatively deep circumferential groove, strengthening ribs extending from each tread portion to the other, said ribs being inclined toward the center of the tire in opposite directions alternately and extending from the tread surface of one portion to points inward of the tread surface on the other portion.

1,504,450. ART OF FORMING AND WRAPPING OIL-SEED CAKES. NELSON B. HENRY, Atlanta, Ga., assignor to The Murray Company, Dallas, Tex., a Corporation of Texas. Filed Sept. 9, 1919. Serial No. 322,656. 2 Claims. (Cl. 100—54.)



1. The improvement in the art of extracting oil from oil bearing vegetable material, which consists in enclosing each charge of material within a shaping die, between a pair of metallic plates; applying compacting pressure separtely to each charge placed in the die to preform the same and form a metal surfaced cake and successively removing each metal covered formed cake from the die to an oil extracting press, as and for the purpose described.

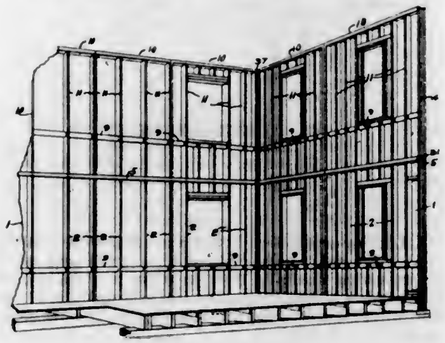
1,504,451. CONSTRUCTION OF VERTICAL-CHAMBER OVENS. WALTHER HIBY, Scheveningen, Netherlands, assignor to Johan Christiaan, Baron van Haersolte van Haerst, Driebergen, The Netherlands. Filed Dec. 17, 1920. Serial No. 431,469. 9 Claims. (Cl. 202—9.)



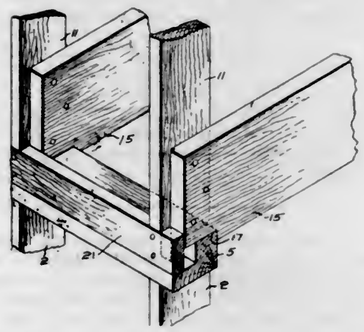
1. In a vertical chamber oven provided with flat sided vertical oven chambers with filling openings at the top and discharge openings beneath the oven chambers, the combination of vertical heating walls outside of said oven chambers and extending lengthwise of the longitudinal axes of said chambers and on each of the long sides thereof, vertical heating flues in the heating walls, means for supplying gas and air for combustion to said heating flues, said means being located in the lower part of the heating walls, a plurality of vertical flues for the burnt gases arranged adjacent to the heating flues, the tops of the heating flues and the inlet ends of the burnt gas flues of a heating wall communicating with each other, the discharge ports of the burnt gas flues located in the lower parts of the chamber walls so as to return the burnt gases to said parts; thereby securing an exchange of heat between the heating flues and the burnt gas flues.

1,504,452. LUBRICATING BOLT. FRANKLIN G. HIRST, Philadelphia, Pa. Filed Mar. 24, 1921, Serial No. 455,066. Renewed Dec. 8, 1923. 11 Claims. (Cl. 64—27.)

1. A lubricating bolt with external passage for lubricant along its shank having a head member with a lateral opening for a lubricant conduit and a recess in its abutting face adjacent the shank communicating with said opening, so that lubricant traversing said shank may pass therefrom directly to said recess and thence to said conduit, or vice-versa.



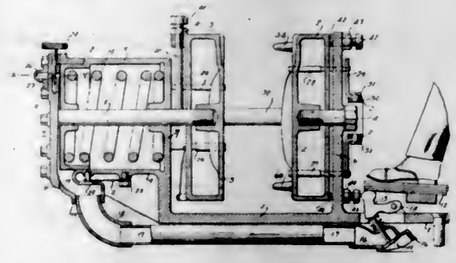
1,504,453. VALVE. BRUCE B. PRESTON, Cleveland, Ohio, assignor to Thomas G. Mount, Cleveland, Ohio. Filed Aug. 9, 1923. Serial No. 656,612. 4 Claims. (Cl. 236—59.)



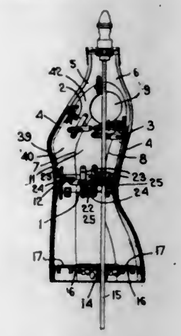
1. In combination, an adjustable valve seat, a thermostatic element comprising a plurality of curved members each fixed at one end and a baffle plate carried by the free ends of said elements arranged to divert fluid from said elements, and a valve supported by said seat and said plate, arranged to cooperate with said seat, and operable when said seat is properly adjusted, by said members through said plate and by a decrease in pressure in the duct communicating with said seat.

1,504,454. BUILDING CONSTRUCTION. THOMAS CALVIN TYSON, Medford, Mass. Filed July 31, 1920. Serial No. 400,510. 9 Claims. (Cl. 20—2.)

1. In building construction, the combination of lower and upper wall panels, each comprising a series of upright studs, a girt at the top of the lower wall panel having a shoulder extending longitudinally thereof, the upper panel studs having notches in their lower ends forming shoulders engaging the shoulder of the lower panel girt to prevent inward movement of the upper panel, joists resting on said girt and notched to form shoulders engaging the inner face of the girt and secured to the upper panel studs to prevent outward movement of the upper panel, and a member extending longitudinally of the girt and secured to the upper panel studs.



5. In building construction, a cornice unit comprising fascia, plancia and frieze, a ledger adapted to be secured to a wall of the building, and brackets permanently connected to the fascia, plancia, frieze and ledger and having portions adapted to be secured to the roof rafters and second portions depending from the first to be supported thereby in substantially a horizontal position.

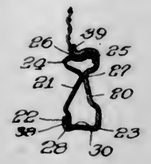


9. In building construction, a wall panel comprising a series of studs secured in lateral spaced relation and the studs having elongated openings formed therethrough in lateral alignment with stock remaining at all sides of the opening in each stud, and a wooden ribbon having a configuration in cross-section to fit said openings and inserted through the aligned openings to hold the side and intermediate studs of a panel rigidly in place and to stiffen the panel and prevent sheeting thereof.

1,504,455. MOLDING MACHINE. STANLEY M. UDALE, Detroit, Mich., assignor to Earl Holley, Detroit, Mich. Filed May 18, 1923. Serial No. 639,744. 5 Claims. (Cl. 22—92.)

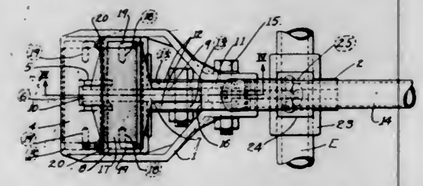
1. In a pneumatic molding machine comprising a pair of molds adapted to reciprocate back and forth relative to each other, means for supplying compressed air for the purpose of closing said molds, elastic means for opening said molds, means for cutting off the supply of compressed air, an adjustable leak valve whereby the molds are opened automatically a predetermined period after the supply of compressed air is cut off.

1,504,456. DRESS FORM. CHARLES A. UFFORD, Dorchester, Mass. Filed May 5, 1921. Serial No. 466,869. 3 Claims. (Cl. 223—18.)



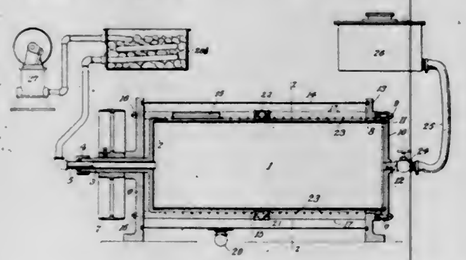
1. A dress form divided vertically from front to rear through each shoulder, and having two vertical divisions extending from each armhole, thereby to provide a solid under arm section at each side of the form, and means for adjustably connecting such sections together.

1,504,457. METAL FRAME FOR SCREENS AND THE LIKE. JOHN O. WAGNER, Chicago, Ill. Filed Dec. 29, 1916. Serial No. 139,554. 4 Claims. (Cl. 156—14.)



1. A metallic frame comprising in combination cooperating inner and outer members, the inner member being provided with transverse walls at its edges and being adapted to receive the other, said outer member

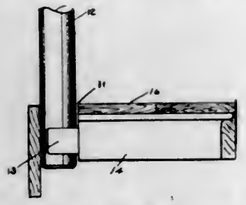
contacting with said inner member at its outer edges and also at a point intermediate its edges, inwardly extending portions on the inner faces of both transverse walls of said inner member, the rotation of said outer



member about said intermediate point of contact bringing both edges of said outer member into locking engagement with said inwardly extending portions.

1,504,458. DEVICE FOR GRINDING AND POLISHING ROLLS. ERNST H. WAHLERT, St. Louis, Mo. Filed July 7, 1922. Serial No. 573,390. 14 Claims. (Cl. 51—251.)

1. A device for grinding and polishing rolls, comprising an abrasive member, a supporting member for holding said abrasive member in contact with a roll, a second abrasive member, said second mentioned abrasive member being supported by said supporting member for said first mentioned abrasive member, and pivoted means whereby said second abrasive member may be moved into contact with a second roll.

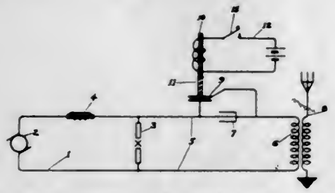


1,504,459. AMORPHOUS SACCHARINE POWDER CONTAINING IMPALPABLE SOLIDS AND PROCESS OF MAKING THE SAME. GEORGE WASHINGTON, Brooklyn, N. Y. Filed June 7, 1918. Serial No. 238,629. 14 Claims. (Cl. 99—11.)

1. As a new article of manufacture a powder composed of a mixture of amorphous soluble materials and impalpable insoluble materials, which powder is in the form of small, thin, readily soluble pellicles consisting of the desiccated and broken walls of bubbles of a perfect solution of the said soluble materials, together with the impalpable insoluble substances retained therein.

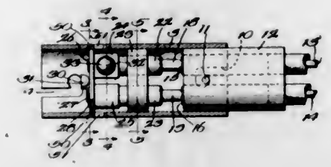
10. The process of forming a readily soluble powder of amorphous saccharine matter and soluble flavoring matter containing insoluble materials which comprises mixing with a perfect solution of the soluble materials an amount of finely divided insoluble material equalling about a third or less of the weight of the solid constituents of the soluble materials, evaporating the mixture and desiccating the solid residue at a low pressure and at a temperature which is below that of fusion of the saccharine matter and which will not produce any hurtful modification of the taste of the other material, until the same is transformed into a foamlike mass of bubbles, and then crushing the dry walls of such bubbles.

1,504,460. LOCK FOR FOLDING DOORS. LUTHER B. WATSON, Toledo, Ohio. Filed Sept. 21, 1923. Serial No. 663,987. 4 Claims. (Cl. 20—20.)



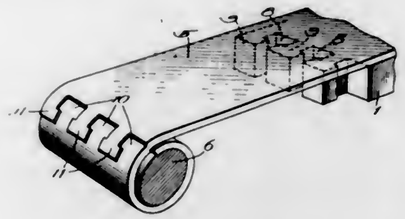
1. Locking mechanism for doors comprising a slotted member secured adjacent the door, a guide and locking rod extending vertically from the door into the slot, and a lock bolt arranged to be thrown into and out of position to secure said rod against movement in said slotted member.

1,504,461. BOWLING BALL. MICHAEL J. WHELAN, Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill., a Corporation of Delaware. Filed Feb. 20, 1922. Serial No. 537,674. 5 Claims. (Cl. 46—4.)



1. As a new article of manufacture, a bowling ball having a wood core and a composition covering vulcanized thereon and consisting of hard rubber compound and small sticks of wood thoroughly incorporated therewith.

1,504,462. TRANSMISSION OF RADIOSIGNALS EMPLOYING UNDAMPED WAVES. ROBERT B. WOOLVERTON, Washington, D. C. Filed July 25, 1921. Serial No. 487,247. 2 Claims. (Cl. 250—19.)

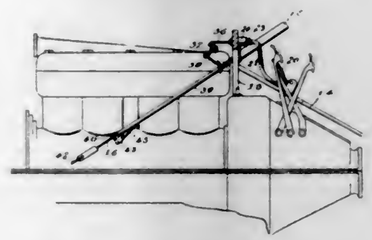


1. In radio transmitting apparatus for undamped waves, a tuned oscillatory circuit shunted about the generator of said transmitting apparatus, an antenna circuit electrically connected to the tuned oscillatory circuit, said oscillatory and antenna circuits being in exact resonance, a capacitance shunted about the capacitance of the tuned oscillatory circuit, and means for varying the relative positioning of the elements of said first capacitance whereby to destroy resonance between the oscillatory and antenna circuits, at times, whereby the energy in said antenna circuit is substantially interrupted.

1,504,463. CIRCUIT CONTINUING DEVICE. HARRY A. DOUGLAS, Bronson, Mich. Filed July 21, 1919. Serial No. 312,375. 3 Claims. (Cl. 173—328.)

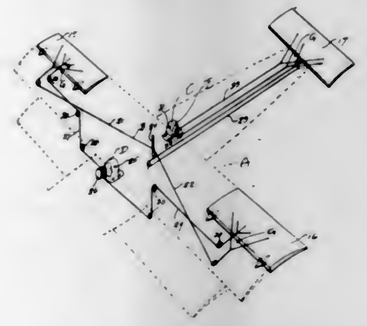
1. A circuit continuing device including a shell; a pair of contacts within the shell and movable along the same; an insulating disc with which said contacts are assembled; and a contacting portion carried by one of said contacts and spaced apart at one place from said disc, this contacting portion having formed therewith a spacing portion in the space between it and the disc.

1,504,464. METHOD OF MAKING JOINTS. HARRY A. DOUGLAS, Bronson, Mich. Filed Jan. 27, 1921. Serial No. 440,483. 3 Claims. (Cl. 29—187.)



1. The method of forming hollow bodies of sheet material which consists in forming a row of alternated mortises and tenons in a sheet of the material out of which the hollow body is to be made; partially forming a second row of alternated mortises and tenons by depressing material from the sheet in areas that are similar in arrangement and dimensions to the tenons in the first row; beading the sheet and bringing the tenons in the first row in registry with the partially formed mortises in the second row; and forcing the tenon portions in each row into the mortise spaces of the other row to remove the depressed material to complete the formation of the mortises and tenons in the second row and effect the location of the tenons in the mortises.

1,504,465. POLYCHROME SCREEN FOR COLOR PHOTOGRAPHY AND METHOD OF PRODUCING SAME. LEON FORREST DOUGLASS, San Rafael, Calif. Filed May 31, 1921. Serial No. 474,052. 18 Claims. (Cl. 95—81.5.)

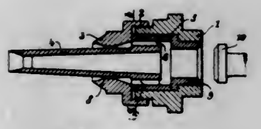


1. The method of making colored photographic screens which comprises exposing a single coated film by means of a camera to light rays emanating from an object having thereon evenly distributed black dots, developing the film, printing therefrom a positive film, dye-toning the black dots of said positive film red, sensitizing the film in a ferric salt solution, exposing said film to light, developing the film in a ferricyanide solution, and lastly dyeing the entire film in a yellow dye.

1,504,466. ACCELERATOR CONTROL. JULIUS J. ELSTER, Doyon, N. Dak. Filed May 4, 1923. Serial No. 636,080. 3 Claims. (Cl. 74—89.)

1. In an apparatus of the character described, a supporting member, a pedal carried thereby, a supporting wall, an extension carried by the lever support, a hinge connected between said extension and wall whereby to permit the pedal to be folded against said wall, and means whereby upon said pedal being folded the same may be turned a predetermined degree for the purpose described.

1,504,467. AIRCRAFT BALANCING SYSTEM. WILLIAM SHAW FERDON, Brownlee, Nebr. Filed June 10, 1921. Serial No. 476,635. 7 Claims. (Cl. 244—29.)



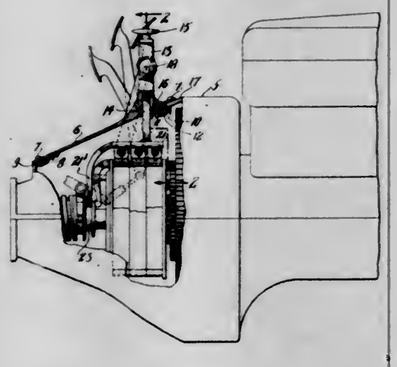
1. In a stability recording device, the combination with an aircraft, of a transparent liquid receptacle including means for determining the gravity level of liquid therein, means pivotally mounting said receptacle on said aircraft, means stationary on said aircraft for determining relative movement of said receptacle with respect to said aircraft, and means for adjustably maintaining said liquid receptacle in fixed position with respect to said stationary means.

1,504,468. STEAM-DISCHARGE PIECE FOR INJECTORS. LOUIS FRIEDMANN, Vienna, Austria. Filed May 3, 1922. Serial No. 558,288. 2 Claims. (Cl. 102—1.)

1. A steam discharge piece for injectors comprising a nozzle carrier provided on its outer surface with threads, an outer steam nozzle fixed to the nozzle carrier by the said threads, an inner steam nozzle, a collar provided on

the inner steam nozzle and arranged between the nozzle carrier and the outer steam nozzle and fastened by the screwing together of these parts, the said collar being provided with openings for the inlet of the steam into

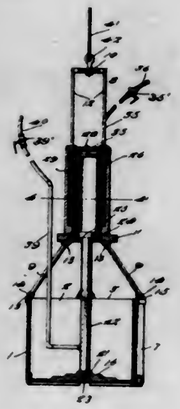
the annular space between the two steam nozzles, the whole area of the openings being larger than the smallest annular space between the outer and the inner steam nozzle.



1,504,469. AZO DYESTUFFS AND PROCESS FOR THE MANUFACTURE OF SAME. HERMANN FRITZSCHE and EMIL REBER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Oct. 8, 1923. Serial No. 667,407. 14 Claims. (Cl. 260—87.)

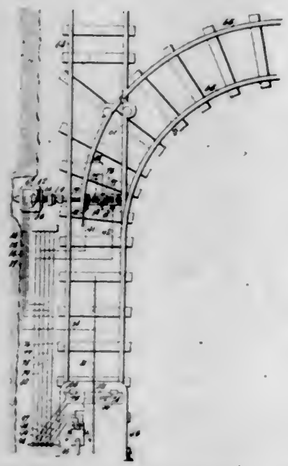
6. The herein described new azo dyestuffs which correspond with the general formula

$$R-N=N-R'$$



wherein R signifies a 1(3'-sulfamido)-aryl-3-methyl-5-pyrazolone, and R' a 2-oxynaphthalene-4-sulfonic acid nucleus where the azo bridge adheres to the position 1- of the naphthalene nucleus, which dyestuffs constitute red-brown to brown powders soluble in water to orange to brown-orange solutions which become more yellow and more pure on addition of alkalies, dyeing wool in an acid bath very uniform brown to orange tints which, by after-chroming, become red to blue-red, the dyeings being very fast to fulling and to potting.

1,504,470. TRANSMISSION LOCK FOR AUTOMOBILES. GEORGE A. GILLEN, Jersey City, N. J., assignor to Gillen Laboratories Corporation, New York, N. Y., a Corporation of Delaware. Filed June 27, 1922. Serial No. 571,173. 3 Claims. (Cl. 70—190.)

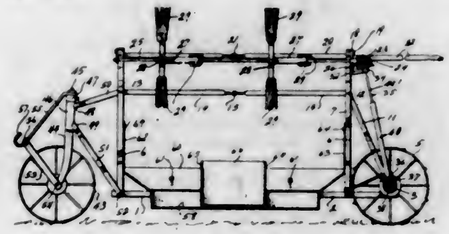


1. In a transmission lock, a vertically movable plunger, means for locking the plunger in raised or lowered position, a locking bar at the lower end of the plunger for engagement between the ears of a series of transmission bands when the plunger is lowered, and a toe formed integrally with the bar for engagement in the clutch ring of a transmission when the plunger is lowered.

1,504,471. DREDGE BUCKET. ADOLPH EUGENE GRAU, New Orleans, La. Filed Nov. 14, 1923. Serial No. 675,402. 7 Claims. (Cl. 37—54.)

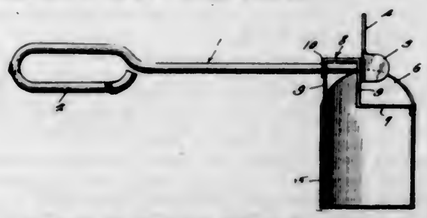
1. In a dredge bucket construction, a bucket comprising cooperative hinged sections spring-pressed toward closed position, and an ejector head interfitting the bucket and movable from a position to permit closing of the bucket to position to eject the contents of the bucket therefrom and to spread the bucket sections apart.

1,504,472. APPARATUS FOR OPERATING SWITCHES. EDWARD H. GRIM, Dott, W. Va. Orignal application filed June 20, 1923, Serial No. 646,731. Divided and this application filed Mar. 4, 1924. Serial No. 696,838. 5 Claims. (Cl. 246—240.)



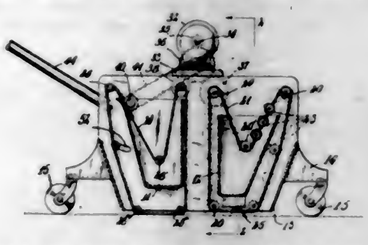
1. In mine switch operating systems, the combinations with the switch to be opened or closed, of an electric motor for opening and closing the same, electric circuit controlling means on a mine car for effecting the action of said motor as the car approaches the switch, a straight line screw shaft connection between the motor and the switch including a slip clutch spliced thereinto and a means for permitting lost motion whereby the motor will be permitted to pick up before moving the said switch, and signaling instrumentalities including signals on the mine car and signal operating devices associated with the switch to be opened and closed, for indicating the particular position of the said switch.

1,504,473. MILK BOTTLE. WALTER C. HATTES, Portsmouth, Va. Filed Oct. 27, 1923. Serial No. 671,157. 1 Claim. (Cl. 215—1.)



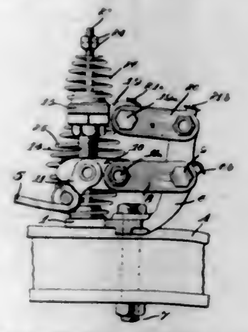
As an article of manufacture, a bottle comprising a body portion, a constricted neck portion, and an outwardly bulging mouth portion, said mouth portion adjacent the neck portion having an inwardly extending cap seating shoulder therein extending completely around the mouth portion to retain a circular cap therein, said mouth portion for a portion of the circumference of the neck being of a height sufficient to permit of its insertion in the mouth of the drinker and having its ends tapered downwardly and merging into a flat edge portion positioned in a plane above the shoulder and extending circumferentially of the neck between the tapered ends a sufficient distance to readily receive the nose of a person drinking from the bottle.

1,504,474. BOLL-WEEVIL GATHERER AND DESTROYER. GETTE W. HOLMES, Hosston, La. Filed Oct. 23, 1922. Serial No. 596,331. 1 Claim. (Cl. 43—142.)



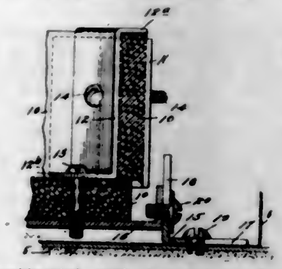
An apparatus of the class described comprising a portable body, corner uprights carried by the body, frames substantially in the form of an inverted U coacting with the corner uprights at each end portion of the body, said frame extending upwardly of the corner uprights, means for connecting the side members of each of said frames with the associated uprights, arms associated with the upper portion of each of the frames and extending outwardly therefrom, means for adjustably connecting said arms to the frames, a shaft rotatably supported by each pair of arms at one side of the frame, driven means operatively supported by the frames for rotating said shafts, and brush elements carried by the shafts.

1,504,475. PET-COCK WRENCH. RICHARD C. HOLTON, Clovis, N. Mex. Filed Sept. 14, 1923. Serial No. 662,711. 3 Claims. (Cl. 137—139.)



1. A device of the class described comprising a pet-cock key having an oil receiving vessel swingably mounted thereon cooperating means on said key and vessel whereby the vessel may be tilted to empty its contents without touching it with the hands.

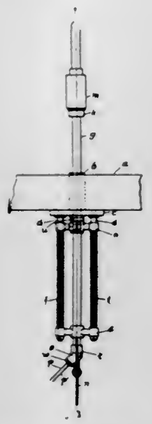
1,504,476. FLOOR-WASHING MACHINE. TEOFIL HOREMBALA, Windsor, Ontario, Canada. Filed Oct. 26, 1922. Serial No. 597,083. 2 Claims. (Cl. 15—99.)



1. In a floor washing machine, an endless cloth, a pair of rollers under which said cloth is adapted to pass in contact with the floor, a tensioning roller engaging said cloth, and a common means for lifting said pair of rollers and swinging said tensioning roller to maintain the tension on the cloth as the said pair of rollers is lifted.

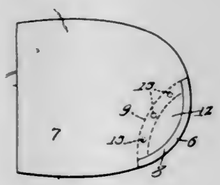
1,504,477. SHOCK ABSORBER. ALBERT HOWES, Santa Cruz, Calif. Filed Sept. 7, 1922. Serial No. 586,710. 3 Claims. (Cl. 267—29.)

1. In a shock absorber, a supporting casting, means for mounting said casting on a car, a standard rising from said casting, a cross bar flexibly carried by said standard and having depending means for supporting the main vehicle spring, coiled load supporting springs arranged between said casting and cross bar, swiveled rods carried by said casting and extending through said springs and cross bar, and recoil springs mounted on said rods above said cross bar.



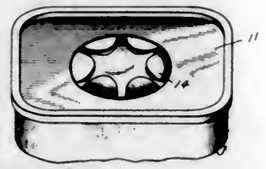
1,504,478. PANEL BOARD SUPPORT. GEORGE W. HYSER, Minneapolis, Minn. Filed Apr. 12, 1921. Serial No. 460,702. 4 Claims. (Cl. 247—12.)

1. The combination with a panel board, of a fixed base, and anchors pivotally connected to said board and to said base by pivots, the axes of which are perpendicular to the plane of the face of said board, said pivots



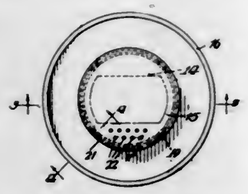
permitting said board to be adjusted in the plane of its face, said anchors being provided with means for permitting relative adjustment in a direction perpendicular to the plane of said board and so permitting said board to be set different distances from said fixed base.

1,504,479. STAMPING MACHINE. HENRY JANSSEN, Wyomissing, Pa., assignor to Textile Machine Works, Wyomissing, Pa., a Corporation of Pennsylvania. Filed Feb. 20, 1924. Serial No. 694,151. 2 Claims. (Cl. 101—27.)



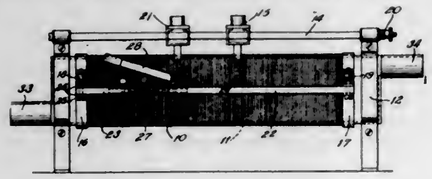
1. A stamping device comprising a fixed guide-way bearing, a reciprocatively operated die-carrier tube vertically slidable in said bearing and having a down-turned upper portion provided with a coil-heated die, and conductor wires extending within the tube from the die-heating coil to a passage-way therefor at the lower portion of the tube.

1,504,480. HEELPLATE. WESLEY B. JOHNSON, Rockford, Ill. Filed Aug. 3, 1923. Serial No. 655,550. 1 Claim. (Cl. 36—75.)



As a new article of manufacture, a top lift for a heel comprising, in combination, a top lift body having flat top and bottom faces and a curved striking end, a metallic heel plate having a striking portion set into the striking end of said body, reaching from said top to the bottom surfaces thereof and conforming to its end curvature, a narrow plate-fastening portion set into the top of said body flush with the top surface thereof, said plate-fastening portion being medially spaced from said striking portion and at its ends joined integrally thereto so as to allow an unobstructed body portion intermediate the striking and fastening portions through which fastening means may be passed through the body for securing it to the under lift of a heel, and spurs integral with said fastening portion at spaced points between its ends extending downwardly therefrom into the body for securing the heel plate thereto.

1,504,481. SIFTER TOP. HARRY W. JONES, New York, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed June 12, 1920. Serial No. 388,535. 13 Claims. (Cl. 221—61.)

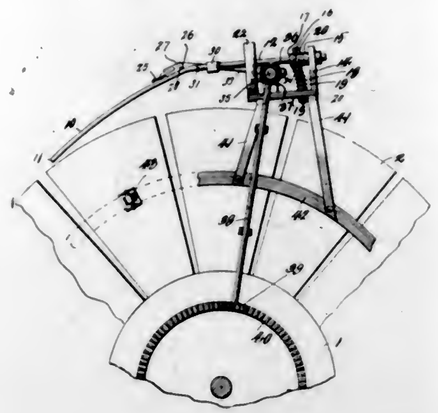


1. A can wall having lines cut through it and the parts of said wall being left in position to substantially close the can, the material of said wall at one side of said lines being capable of being pressed inwardly of the can to provide widened spaces forming sifter openings.

1,504,482. SIFTER-TOP CONTAINER. HARRY W. JONES, New York, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 1, 1920. Serial No. 407,352. 5 Claims. (Cl. 221—61.)

1. A sifter top container, comprising a part permanently fixed to the body and having a filling opening, and a perforated part rotatable upon said fixed part to bring the perforations of the same into and out of sifting registration with said opening, said rotatable part being readily removable to permit filling.

1,504,483. RHEOSTAT. PAUL E. KLOPSTEG, Chicago, Ill., assignor to Central Scientific Company, Chicago, Ill., a Corporation of Illinois. Filed May 31, 1922. Serial No. 564,768. 15 Claims. (Cl. 219—62.)

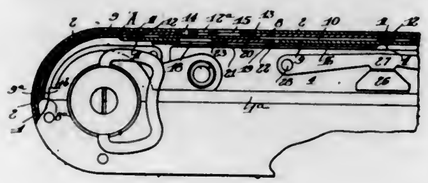


1. In a rheostat, a plurality of resistance coils, a double throw switch, and wiring between said coils and said switch permitting the resistance to be used in parallel with one throw of the switch and in series with the other throw of the switch.

1,504,484. BEET-HARVESTING MACHINE. FRANK W. KNOWLES, Seattle, Wash. Filed Nov. 22, 1922. Serial No. 602,617. 8 Claims. (Cl. 55—108.)

1. In a topper mechanism, a knife, a pair of fingers associated with the knife and bowed intermediate their ends, and means for rotating the fingers upon depression thereof in the manner and for the purpose specified.

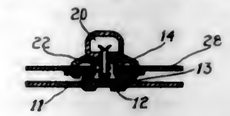
3. In combination, a knife, a pair of fingers associated with the knife, and bowed intermediate their ends, means for supporting adjacent ends of the fingers so that they may be rotated and pivoted, standards provided with racks, and pinions on the fingers engaging said racks so that the fingers will be rotated when pivoted.



6. In combination, a delivering mechanism and a topper mechanism associated therewith and including a knife, a pair of fingers associated with the knife so as to receive the beets from the delivering mechanism, said fingers being bowed intermediate their ends, means for pivotally and rotatably mounting the fingers, and means

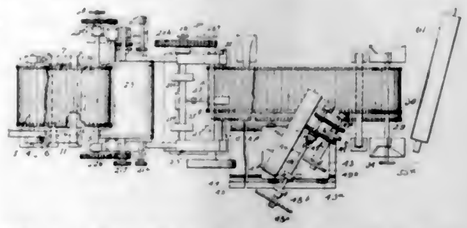
for rotating the fingers as the beets pass longitudinally therealong and depress the same whereby the fingers will properly guide the beets and clear the delivering mechanism in the manner and for the purpose specified.

8. In a harvesting machine of the class described, a topper mechanism including a guide mechanism, and a reciprocating knife, means for reciprocating the knife including a head, and a link adjustably connected to the head and to the knife.



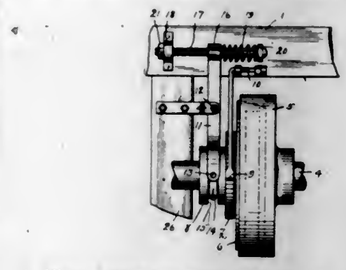
1,504,485. CAMERA BACK. ROBERT KNOEDEL, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Sept. 8, 1922. Serial No. 586,993. 6 Claims. (Cl. 95—1.1.)

1. The combination with a camera body having flanges on its rear side constituting one element of a light seal, of a back for the body embodying two nested plates secured together but spaced apart at their edges to receive the flanges in the body between them and to constitute the other element of the light seal.



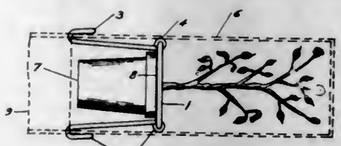
1,504,486. VEHICLE CURTAIN FASTENER. RICHARD D. LANE, Augusta, Ky., assignor to The F. A. Neider Company, Augusta, Ky., a Corporation of Kentucky. Filed July 24, 1923. Serial No. 653,592. 7 Claims. (Cl. 24—221.)

6. In a fastening device of the class described, the combination of a turn-button, a base rotatably supporting the turn-button, an eyelet for movement over the turn-button and a pair of yielding means associated with the



eyelet for exerting a yielding pressure on the base and turn-button.

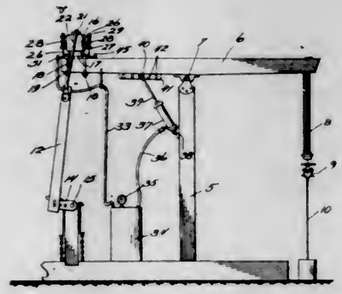
1,504,487. SHEET OPENER. EDWARD G. LEHMAN, Canton, Ohio. Filed Aug. 4, 1921. Serial No. 489,721. 69 Claims. (Cl. 29—17.)



49. In a sheet opener, means for opening the sheets at one end of a pack, a stripper comprising a plurality of traveling stripper rolls, means for pressing the pack against the stripper rolls, and traveling means for grasping the sheets at the opened part of the pack and separately pulling them over and around the traveling stripper rolls.

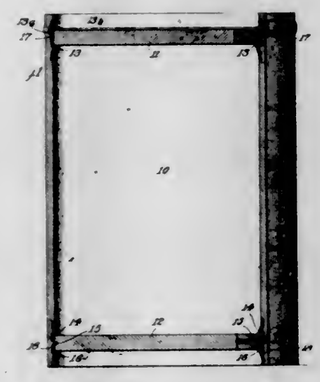
1,504,488. LOG-SETTING RETARDER. EDWARD MCCLUSKEY, Cloquet, Minn. Filed Mar. 6, 1923. Serial No. 623,093. 2 Claims. (Cl. 188—81.)

1. The combination with a shaft, of a brake mounted upon the shaft, means for preventing action of the brake upon the shaft when the latter is rotated in one direction and spring controlled adjustable means for regulating the frictional action of the brake.



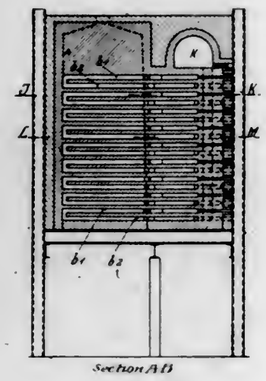
1,504,489. PLANT RECEPTACLE HOLDER. CHARLES D. MACKIE, Pittsfield, Mass. Filed Feb. 13, 1924. Serial No. 692,607. 1 Claim. (Cl. 206—46.)

A plant receptacle holder comprising a circular ring of resilient material and the ends of said ring adapted for interlocking with each other, parallel uprights composed of a continuous piece of resilient material having



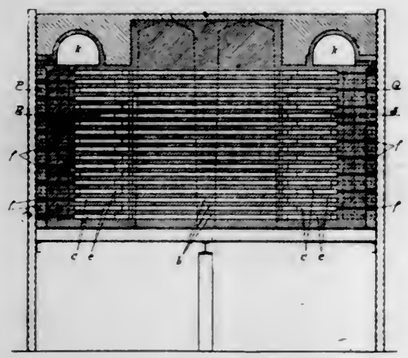
coiled lower portions pivotally connected to said circular ring, the upper ends of the said parallel uprights formed into U shaped keepers and said keepers bent and inclined towards the parallel uprights so as to form a wedge shaped opening between the keepers and the parallel uprights.

1,504,490. SHOCK-ABSORBING DEVICE FOR DRILLING AND PUMPING APPARATUS. RICHARD COLBERT MASON, Tulsa, Okla. Filed May 15, 1922. Serial No. 561,159. 9 Claims. (Cl. 255—16.)



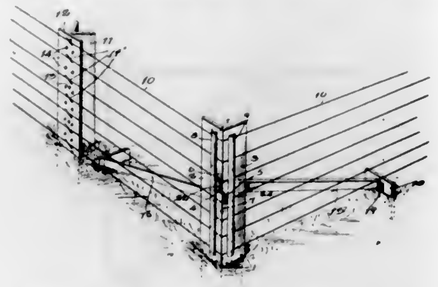
1. In an apparatus of the character described, the combination with the walking beam and pitman member for oscillating said beam, of a fluid-pressure shock-absorbing device connecting said pitman member with one end of said beam, and means for maintaining fluid pressure within said device.

1,504,491. PAPER RECEPTACLE OR CONTAINER AND ART OF MAKING THE SAME. FRED T. NICHOLSON, Bloomfield, N. J. Filed Jan. 24, 1920, Serial No. 353,692. Renewed Nov. 9, 1922. Serial No. 599,784. 35 Claims. (Cl. 229—67.)



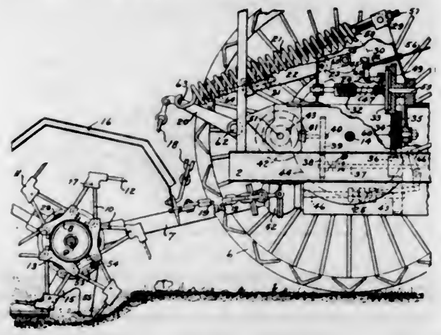
9. The method of making a container which comprises winding sheet paper to form a multi-layer tube, winding sheet metal around the partially finished tube, displacing said metal substantially radially to form a circumferential seat adjacent one end of the tube, and winding sheet paper over the metal.

1,504,492. VERTICAL-CHAMBER OVEN. CARL OTTO, Copenhagen, Denmark. Filed Feb. 6, 1922. Serial No. 534,627. 12 Claims. (Cl. 202—9.)



10. In vertical chamber ovens comprising in combination a plurality of vertical oven chambers arranged in a row, a plurality of heating walls, a series of superposed horizontal heating flues in each heating wall, a plurality of oven burners, adjacent to the oven chambers, each of said burners having a preheating air chamber, a plurality of waste heat chambers, one connected to the outlet of each flue, said preheating chambers and waste heat chambers being arranged alternately one above the other, so that the preheating chambers lie between the waste heat chambers, receiving heat from the latter.

1,504,493. VERTICAL-CHAMBER OVEN. CARL OTTO, Hellerup, Denmark. Original application filed Feb. 6, 1922, Serial No. 534,627. Divided and this application filed Feb. 20, 1924. Serial No. 694,102. 5 Claims. (Cl. 202—9.)

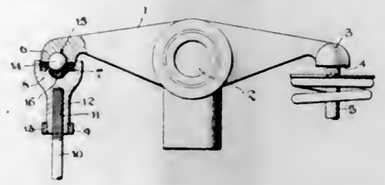


1. In a two-faced vertical chamber oven in which the oven chambers are arranged in rows, at least two oven chambers in each row, the combination of heating walls between the rows, each wall comprising a series of superposed heating flues, each running the whole length of the heating wall, and preheating chambers for gas and air, connected to each heating flue at one front of the oven and a waste-heat chamber connected to each heating flue near the other front of the oven, the preheating chambers lying between the waste-heat chambers so as to receive heat from the latter.

1,504,494. FENCEPOST. ALDUS M. PARSONS, Fargo, N. Dak. Filed Sept. 19, 1922. Serial No. 589,185. 2 Claims. (Cl. 256—35.)

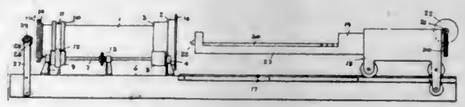
1. A fence post including an angle iron post, a removable face plate mounted on the apex of said post, said face plate provided with a series of spaced apertures arranged in staggered relation for receiving fastening means at either angle on said post.

1,504,495. ROTARY TILLER. JOHANN FRIEDRICH MAX PATITZ, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed May 27, 1918. Serial No. 237,359. 7 Claims. (Cl. 97—40.)



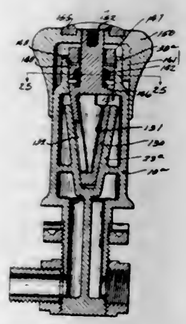
1. In a tiller, a vehicle, an engine for transporting said vehicle, a tiller rotor associated with said vehicle and adjustable relatively to the ground surface, and mechanism between said rotor and said engine for adjusting the position of said rotor, said mechanism comprising a pair of revolving members and locking means engageable with the same for locking said rotor in a predetermined position, means for releasing said locking means, and means for drivingly connecting the rotor adjusting means to said engine.

7. In a tiller, a vehicle, a tiller rotor swingably supported from said vehicle, means for effecting swinging movement of said rotor relatively to said vehicle, a pair of diametrically opposite revolving pins, a latch engageable with said pins to lock said rotor in predetermined positions, and resilient means for constraining swinging of said rotor upon release of said locking means.



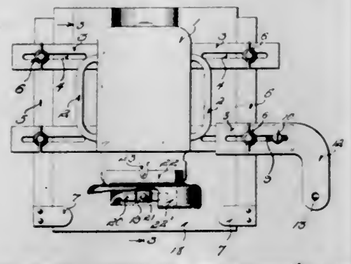
1,504,496. VALVE-ACTUATING MECHANISM. MYATIAN PECK, Nashville, Tenn. Filed Oct. 23, 1922. Serial No. 596,450. 2 Claims. (Cl. 123—90.)

1. In a valve actuating mechanism of the character described, a push rod having at its upper end a cup section formed with a chamber open at the upper end of the cup section, said chamber being adapted to receive a lubricant and having a central concave depression in its bottom wall, and a rocker arm fulcrumed intermediate its ends and having a depending end portion adapted to



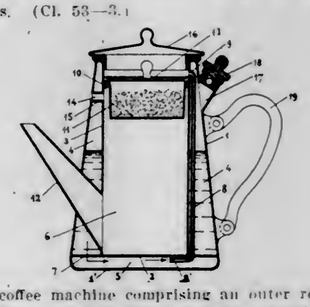
enter the chamber of said cup section and provided with a contact element having a convex lower part adapted to engage with the concave depression in the bottom wall of said chamber.

1,504,497. METHOD AND MEANS OF LINING PIPE MOLDS. JOHN A. PERRY, Toronto, Ontario, Canada. Filed June 27, 1921, Serial No. 480,873. Renewed June 25, 1924. 3 Claims. (Cl. 22—18.)



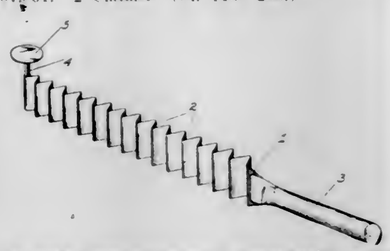
1. A method of lining pipe molds with refractory material, consisting in distributing the refractory material from a central holder circumferentially over the inner surface of a cylindrical casing while said casing is rapidly rotating and finally smoothing and compressing the material so distributed to a uniform thickness.

1,504,498. FAUCET. EDWARD CHARLES PETCHER, St. Louis, Mo. Filed Mar. 6, 1923. Serial No. 623,162. 6 Claims. (Cl. 251—106.)



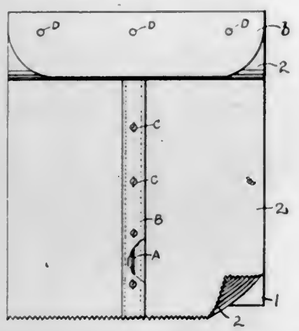
1. A faucet comprising a housing having a seat therein and hot and cold water supply compartments, said seat having ports therein communicating with the compartments therethrough, a valve rotatably disposed on said seat having a passageway therein for communication through the inlet ports of said seat, a second valve within the first mentioned valve having a port therein adapted for alignment with the port of said first mentioned valve, said second mentioned valve being hollow and having an exit port therein, means for joint or independent operation of said first and second mentioned valves flexibly connected thereto, and spring means normally urging said valves into seating relation with respect to each other and to their seats in the housing.

1,504,499. CORE-BOX CUTTER. CLAYTON E. PETERSON, South Milwaukee, Wis. Filed May 17, 1923. Serial No. 639,717. 2 Claims. (Cl. 144—136.)



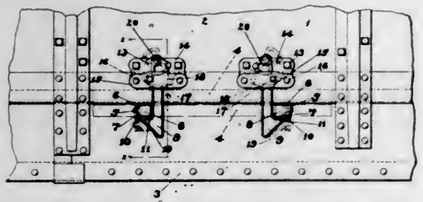
1. A machine for cutting core-boxes comprising a frame having laterally extending arms, guides adjustably carried by said arms adjacent their outer ends and adapted to engage opposite sides of the work, said frame being adapted to be slid at right angles to said arms longitudinally along said work, a shaft extending at right angles to said arms, a cutter carried by said shaft, an electric motor mounted above said shaft, and gearing connecting said shaft and said motor, whereby said cutter projects below the lowest portion of said frame and said motor is located wholly above the axis of said cutter.

1,504,500. COFFEE MACHINE FOR THE PREPARATION OF INSTANTANEOUS COFFEE. ETTORE PIZZOGLIO, Turin, Italy, assignor to Cesare Richiardi, Turin, Italy. Filed Dec. 15, 1922. Serial No. 607,070. 4 Claims. (Cl. 53—3.)



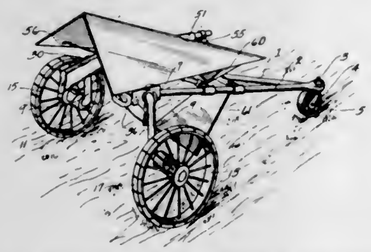
1. A coffee machine comprising an outer receptacle, a receptacle mounted therein forming an annular chamber between the two receptacles, said receptacles being connected at their upper portions to prevent communication between the annular chamber and the inner receptacle, a chamber formed below the inner receptacle, and means for establishing communication between the last named chamber and the upper portion of the inner receptacle.

1,504,501. SLICER AND DECORATOR. LAURA E. POPE, Stockton, Calif. Filed Apr. 21, 1924. Serial No. 707,851. 2 Claims. (Cl. 146—206.)



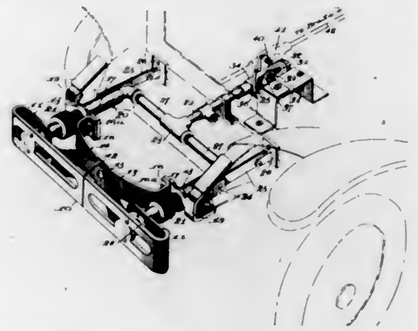
1. A slicer comprising a strip, formed with vertical and transverse corrugations throughout its length, and a handle at one end of the strip, said strip being longitudinally flexible and being free to flex horizontally from a straight vertical plane in any direction.

1,504,502. GARMENT-DISPLAY FOLDER. JOSEPH H. POWELL, Dallas, Tex. Filed Mar. 24, 1923. Serial No. 627,336. 2 Claims. (Cl. 211—34.)



1. In combination: a sample of fabric folded upon itself to conform in size to a completed garment folded for display purposes, and means simulating a finished portion of the garment, on said sample of fabric, said means comprising folds of the fabric and stitching; and a cover member for said sample of fabric, said cover member being approximately the length and width of said sample of fabric and attached thereto.

1,504,503. DOOR MECHANISM. ROBERT S. RAMSEY, Bellevue, Pa., assignor to Pressed Steel Car Company, Pittsburgh, Pa., a Corporation of New Jersey. Filed Nov. 29, 1922. Serial No. 604,099. 2 Claims. (Cl. 105—308.)

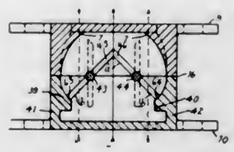


1. In a dump car, a discharge door, a bracket secured to said car, a member pivotally mounted in said bracket and adapted to support said door in closed position, and an extension on said member adapted to engage said bracket when said member is in door supporting position.

1,504,504. ORDNANCE. WILLIAM A. RANDOLPH, Seattle, Wash. Filed Mar. 21, 1923. Serial No. 626,533. 8 Claims. (Cl. 89—40.)

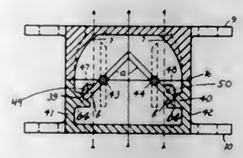
1. In a device of the class described, a frame structure having forwardly and downturned converging side beams, a caster wheel mounted to support the forward end of the frame, a transverse axle at the rear of the frame, supporting wheels mounted at the ends of the axle, a gun mounting pivotally supported from the frame and a shield supported by and movable with the gun mounting.

1,504,505. BUMPER. CLYDE CONRAD REED and HAL W. WATSON, Memphis, Tenn. Filed Dec. 28, 1923. Serial No. 683,215. 6 Claims. (Cl. 180—83.)



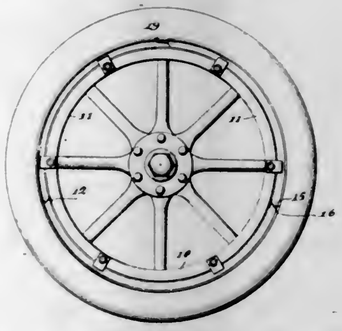
1. A bumper in two side sections hingedly connected at their adjacent ends and independently yieldable, a pair of centrally connected oppositely bowed springs, the free ends of one of which engage said bumper sections intermediate their ends, brackets to which the outer ends of the other spring are connected, air cylinders in connection with said brackets, and plungers extending rearwardly from the side sections of the bumper into said cylinders.

1,504,506. SAFETY-RAZOR-BLADE-SHARPENING MACHINE. FRANK A. REYNOLDS, Geneva, N. Y., assignor, by mesne assignments, to Nonak Stropper Company, Inc. Filed Mar. 6, 1922. Serial No. 541,492. 6 Claims. (Cl. 51—98.)



2. A safety razor blade sharpening machine comprising a housing including removable end walls, a sharpening roll in the housing, a spindle removably engaging said sharpening roll and the end walls of the housing and acting to retain the sharpening roll and end walls in place, and means for supporting a blade adjacent to the sharpening roll.

1,504,507. ENGINE VALVE. EDWARD E. RICHARDSON, Toledo, Ohio, assignor, by direct and mesne assignments, to The R. & S. Valve Company, Elyria, Ohio, a Corporation of Ohio. Filed Jan. 10, 1920. Serial No. 350,696. 10 Claims. (Cl. 277—1.)



1. In engine valves, a casing having a chamber, a plurality of shutters journalled in said chamber and snugly fitting the end walls thereof, means for rotating said shutters simultaneously in opposite directions, and seats projecting inwardly from the side walls of said chamber and being adapted to engage certain wings of adjacent shutters before the other wings engage with each other.

1,504,508. ENGINE VALVE. EDWARD E. RICHARDSON, Toledo, Ohio, assignor, by direct and mesne assignments, to The R. & S. Valve Company, Elyria, Ohio, a Corporation of Ohio. Filed Jan. 10, 1920. Serial No. 350,697. 11 Claims. (Cl. 277—1.)

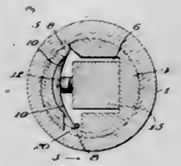
1. In engine valves, a casing having a chamber, shutter mechanism journaled in said chamber to provide wings therein of unequal length, a seat on a wall of said chamber and means operative to cause said wings to be moved to different operative positions, in one of said positions one of said wings will engage said seat and the other wing being so disposed as to maintain a slightly opened passage through said chamber, in another operative position said wing engaging said seat and said other wing closing the passage, and another operative position being that in which the passage is opened by both wings, said first wing being out of engagement with said seat.

1,504,509. DEMOUNTABLE RIM. HAROLD R. ROFFMANN, New York, N. Y. Filed Sept. 2, 1922. Serial No. 585,985. 5 Claims. (Cl. 301—32.)

4. A tire rim comprising pivoted segments each provided with an aperture adjacent its free end, a toggle member having a pivot head at one end to enter one of said apertures and a slot at its opposite end, a plate secured to the segment to retain said head in position, a cooperating toggle member having a pivot head to enter said slot and an angularly disposed foot to engage the other segment aperture, and a bent portion upon the first mentioned toggle member to retain said last mentioned pivot head in position.

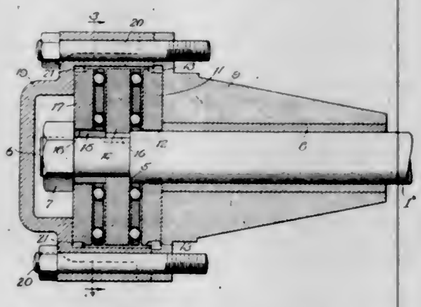
1,504,510. FENDER. ISAAC ROSENTHAL, Chicago, Ill. Filed Nov. 18, 1922. Serial No. 601,824. 5 Claims. (Cl. 280—152.)

1. A fender for motor vehicles composed of a sheet of textile material, resilient reinforcing means applied to the edge of the sheet, resilient shaping elements extend-



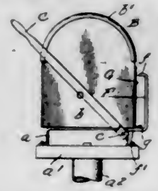
ing transversely of the sheet, and fender supporting arms to which said elements are connected at the inner edge of the sheet, said sheet also having inner edge portions which are secured to the arms.

1,504,511. NUT LOCK. SAMUEL E. ROSS, Evanston, Ill. Filed Dec. 9, 1921. Serial No. 521,228. 5 Claims. (Cl. 151—36.)



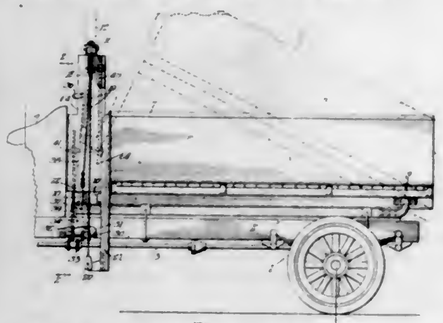
1. A nut lock of substantially annular form and constructed and designed concavo-convex in cross section to permit axial cross sectional deformation by bending within the elastic limit, the nut lock being cut at one point in its circumference to provide spaced ends, and the ends being displaced axially to provide biting edges on opposite sides thereof.

1,504,512. LOCK FOR GREASE-CUP PLUGS. FRED T. ROWLAND and WILLIAM H. LE GRESLEY, Emporia, Kans. Filed Oct. 1, 1923. Serial No. 665,920. 5 Claims. (Cl. 184—48.)



3. A grease cup having, in combination, an internally threaded body portion, a plug in threaded engagement with the interior thereof, said plug having a wrench socket, a locking spring arranged for movement in said plug to cause its end to engage or disengage the thread of said body portion, and means whereby said spring may be operated by the insertion and withdrawal of a wrench for rotating the plug, to effect a locking and unlocking engagement between said spring and said grease cup.

1,504,513. THRUST BEARING. GEORGE E. RUFFNER, Racine, Wis. Filed Sept. 12, 1921. Serial No. 500,250. 2 Claims. (Cl. 64—99.)

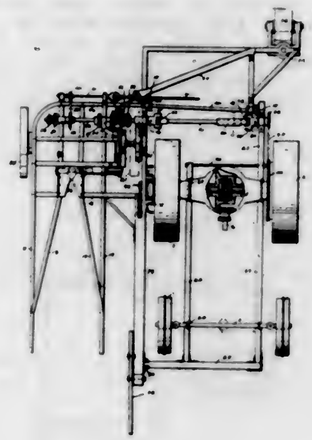


1. In a thrust bearing, the combination of a support, a shaft journalled therein and projecting at one end thereof, a thrust collar secured on the projecting portion of the shaft, a bearing plate bearing against and secured to the said end of the support, anti-friction devices between the collar and the bearing plate, a bonnet housing the projecting end of the shaft, the collar and the bearing plate and secured to the support, a second bearing plate within and secured to the bonnet and located at the outer side of the thrust collar, anti-friction devices between the collar and the second bearing plate, the shaft having a shoulder engaging the inner side of the collar, and a nut on the end of the shaft and provided with a part engaging the thrust collar and clamping the same against the shoulder.

1,504,514. MAIL BOX. FRANK GEORGE RYTHER, Copenhagen, N. Y. Filed Oct. 4, 1923. Serial No. 666,486. 10 Claims. (Cl. 232—17.)

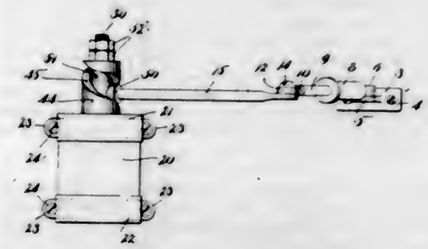
1. In a box, the combination of a box body portion, a cover portion therefor having a dependent skirt surrounding said box body portion, mechanism for moving said cover portion upwardly in a substantially vertical direction, and means engaging said cover portion after a predetermined upward movement thereof to convert the upward movement imparted thereto by said mechanism into a tilting movement.

1,504,515. MECHANICAL HOIST FOR TRUCKS. ALBERT T. SCANNELL, Chicago, Ill. Filed Nov. 15, 1919. Serial No. 338,188. 6 Claims. (Cl. 298—21.)



1. In a hois , a slidable ram, a beam loosely supported on two pivots carried by said ram at the top thereof, one of said pivots being disposed on each side of the longitudinal axis of said ram and the load being supported from opposite ends of said beam, whereby the latter may rock from one of said pivots to the other to provide a long or a short lever arm on either side of said longitudinal axis depending upon the distribution of the load between the opposite ends of said beam.

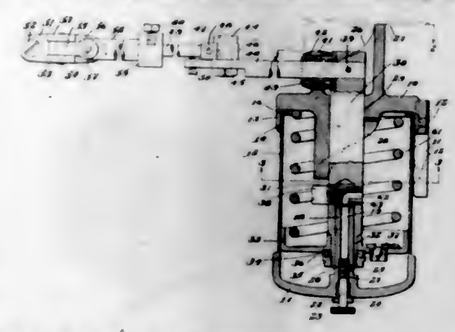
1,504,516. SUPPORTING AND DRIVING ATTACHMENT FOR MOTOR-DRIVEN VEHICLES. ARNO SCHMECHEL and GEORGE SCHUBERT, Thiensville, Wis. Filed May 12, 1923. Serial No. 638,581. 18 Claims. (Cl. 180—53.)



1. A supporting and driving attachment for tractors comprising the combination of an auxiliary frame adapted to be detachably connected with the tractor axles, a beam pivotally hung from said frame and from one of the tractor wheels and adapted to support one side of an auxiliary machine frame, a driving gear connected with the opposing tractor wheel, and associated power

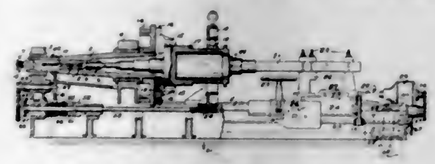
transmitting mechanism journaled in said detachable frame and extending transversely of the tractor and said

connecting beam and provided with coupling means, whereby it may be operatively connected with power operated mechanism on the auxiliary machine.



1,504,517. DOOR CHECK. ABRAHAM SCHNITZLER, Roxbury, Mass. Filed Mar. 4, 1922. Serial No. 541,204. 4 Claims. (Cl. 16—70.)

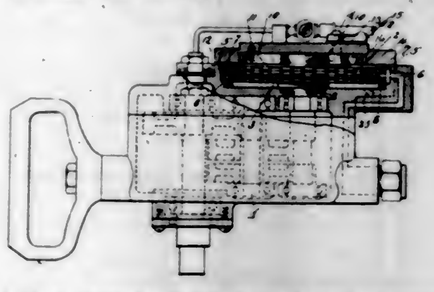
1. Door closing apparatus of the kind described, comprising a movable link and lever, a spring permitting opening of the door against its tension and thereafter automatically acting to close said door, restraining means comprising a cam path and roll traversing the same, during its door closing action, so constructed and arranged as to relieve the restraining means just before the closing action is completed.



1,504,518. DOORCHECK. ABRAHAM SCHNITZLER, Boston, Mass. Filed Nov. 17, 1922. Serial No. 601,502. 2 Claims. (Cl. 16—70.)

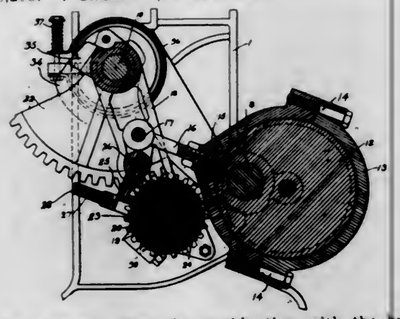
1. Door closing apparatus of the kind described a movable link and lever, a spring permitting opening of the door against the tension of the spring and thereafter automatically acting to close said door, restraining means for said spring including a cam path and roll traversing the same during its door closing action, said cam terminating short of the complete door closing ac-

tion, and a safety cam restraining means associated with said spring for restraining the door closing apparatus at the initiation of the door closing action.



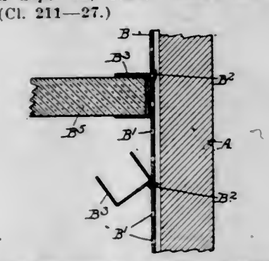
1,504,519. LATHE. CHARLES ED. SEARCH, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Original application filed Mar. 25, 1918, Serial No. 223,393. Divided and this application filed Mar. 20, 1922. Serial No. 544,994. 14 Claims. (Cl. 82—21.)

1. In a lathe, a work support, a tool support, a feed shaft for said tool support, a motor cooperable with said shaft to move said tool support relatively to said work support in one direction, and an independent motor cooperable with said shaft to move said tool support in the opposite direction.



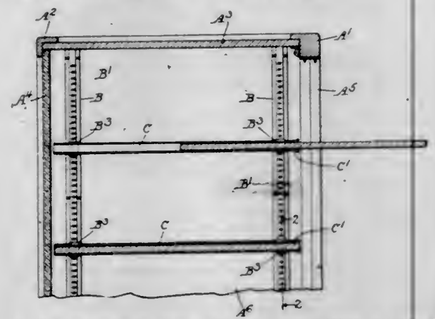
10. In a lathe, a tool support, a threaded shaft for moving said support in opposite directions, a motor having a permanent driving connection with one end of said shaft, and a second motor having a releasable driving connection with the opposite end of said shaft.

1,504,520. TURBINE WHEEL. LOUIS H. SEIBEL, Lakewood, Ohio. Filed Apr. 3, 1922. Serial No. 549,114. 7 Claims. (Cl. 253—2.)



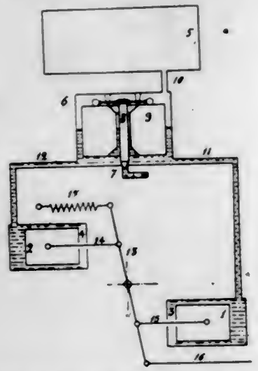
1. In a laminated turbine wheel, a metal stamping, comprising a disc having spaced and inclined alternate projections and recesses in its sides adjacent to its outer edge, and an annular groove in one side communicating with the recesses in that side.

1,504,521. PAPER-CUTTING MACHINE. CHARLES SEYBOLD, Dayton, Ohio. Filed Oct. 20, 1920. Serial No. 418,205. 7 Claims. (Cl. 164—54.)



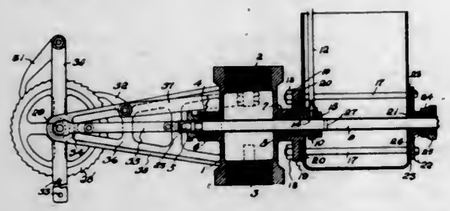
1. In a paper cutter, the combination with the knife driving mechanism and a rock shaft for actuating the clamp, of means for rocking the shaft comprising a member fixed thereto and a member loosely mounted thereon in engagement therewith a friction clutch for the loosely mounted member and means for actuating said member to rock the clamp actuating shaft and actuate the clamp in both directions.

1,504,522. SHOW CASE. WILLIAM T. SHERER, Evanston, Ill. Filed Sept. 11, 1922. Serial No. 587,291. 2 Claims. (Cl. 211—27.)



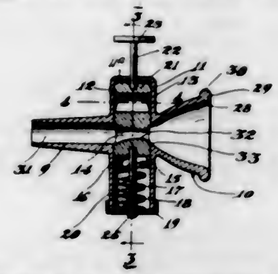
2. In a shelf assembly, a plurality of vertical supports provided with vertically aligned apertures, shell supporting channel irons adapted to be adjustably and removably supported upon said vertical supports and shelves slidably mounted in said channel irons, and supporting means for said channel irons comprising lugs inwardly and upwardly projecting from a point adjacent the upper angle of each channel iron and adapted to penetrate said apertures, said lugs constituting means for holding the said channels against longitudinal movement in relation to said supports.

1,504,523. ADJUSTABLE SHELF SUPPORT. WILLIAM T. SHERER, Chicago, Ill. Filed Feb. 5, 1923. Serial No. 616,957. 6 Claims. (Cl. 211—27.)



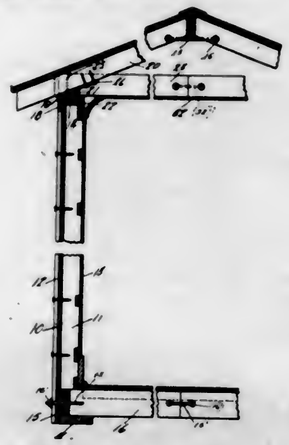
1. An adjustable shelf support comprising a plurality of adjacent supporting elements, holding members vertically adjustable upon each of them and a shelf supporting track mounted in said holding members, said track being secured against longitudinal movement in relation to one of said holding members and being in slidable contact with the other of said members.

1,504,524. CONTROL OF PETROL CARBURETORS FOR AEROPLANE AND AIRSHIP ENGINES. FIRMIN SMAL, Couthuin, Belgium, and CAMILLE TURQUOIS, Paris, France. Filed Nov. 17, 1920. Serial No. 424,688. 1 Claim. (Cl. 137—156.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



An apparatus for automatically controlling a carburetor for aeroplanes, according to the changes in atmospheric pressure and temperature, due to different altitudes, said apparatus comprising an airtight reservoir, filled with air, and communicating with another airtight reservoir, partially filled with air and partially with oil, the oil level being kept at a constant height by means of an oil feeding pipe and a suitable controlling device, such as a float combined with a needle valve, the oil of the reservoir communicating by means of two tubes with a pair of cylinders in each of which moves a single acting piston, not provided with rings, and the free side of which is open to the pressure of the outside air, the connecting rods of the pistons being attached respectively to the two arms of a lever pivoted at a point between its ends in such a way that the combination of pistons, levers and connecting rods is balanced, the two extremities of the lever being respectively attached, one to a reaction spring and the other to a suitable cable or rod connection with the altimetric correcting device of the carburetor.

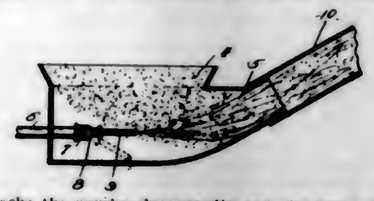
1,504,525. VALVELESS LUBRICATOR. FRANK R. SPINNEY, Fort Worth, Tex., assignor, by mesne assignments, to The Valveless Lubricator Co., Fort Worth, Tex., a Corporation of Texas. Filed Nov. 22, 1921. Serial No. 517,004. 5 Claims. (Cl. 184—79.)



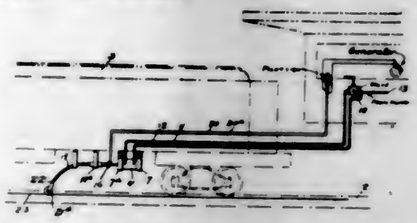
1. A lubricator comprising a body coupling member to be interposed in a steam line and having bearing members, and a race therein and through said bearing members, packing glands formed in said bearing members, an air-cooled plunger provided with an oil carrying pocket and being hollow throughout its length and ends for circulation of air, means for reciprocating said plunger through said bearings and said coupling member, and means for charging said pocket with a lubricant.

1,504,526. DUPLEX-APERTURE MOUTHPIECE. CHARLES E. STACY, Los Angeles, Calif., assignor to Frank C. Olds, Los Angeles, Calif. Filed Nov. 21, 1921. Serial No. 516,793. 4 Claims. (Cl. 84—399.)

4. A mouthpiece for wind instruments comprising a casing, a tube having a bore opening to said casing, a mouthpiece opening to said casing opposite the bore, a plunger mounted to reciprocate in said casing transversally of the tube having a plurality of apertures of different diameters adapted to be positioned in register with the bore of the tube, means whereby said plunger may be depressed from the exterior of said casing, and a spring for opposing depression of the plunger and for restoring it to a normal position.



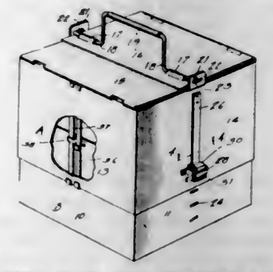
1,504,527. BUILDING CONSTRUCTION. JACK E. STEGALL, Tulsa, Okla. Filed Jan. 23, 1923. Serial No. 614,362. 6 Claims. (Cl. 20—2.)



1. In a building construction, the combination of a side wall having a plate at its top, a plurality of spaced fastening members mounted on the plate, ceiling joists engaging said members and resting on said plate, roof rafters, and keepers carried by said rafters and engaging said fastening members for uniting the side walls and the rafters, said joists holding the side walls against spreading.

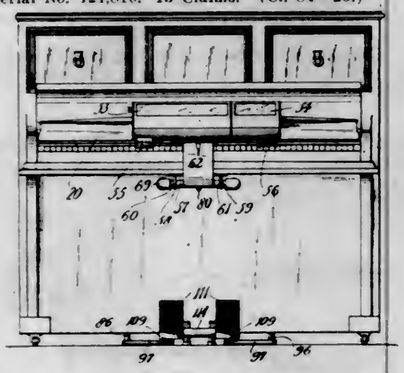
1,504,528. STEAM-FUEL FEEDER. CHRIS L. STRANDRUD, Seattle, Wash. Filed Oct. 7, 1922. Serial No. 593,159. 1 Claim. (Cl. 110—102.)

In combination, a furnace, including a fire box, a saw dust receiving hopper located in front of the furnace, a steam pipe extending into the front end of the hopper, a horizontal pipe mounted at the inner end of and communicating with the steam pipe, a series of nozzles communicating with the horizontal pipe and projecting rearward therefrom and underlying the hopper entrance, said nozzles being mounted for swinging movement with respect to said horizontal pipe, whereby when saw dust is thrown into the hopper and on the nozzles the weight of the saw dust rocks the nozzles downwardly and the force of the steam passing through the nozzles subsequently rocks the later upwardly and agitates the saw dust.



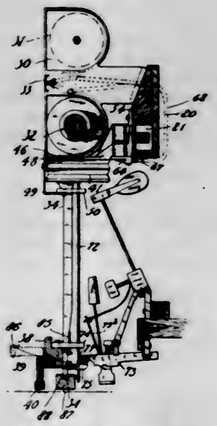
1,504,529. FLUID-CONTROLLED SIGNAL-OPERATING MECHANISM. JOHN BELL STROUD, Pass Christian, Miss. Filed July 21, 1923. Serial No. 652,962. 2 Claims. (Cl. 246—192.)

1. A fluid controlled signal operating mechanism for use with semaphores comprising a cylinder adapted to be arranged below the floor of a locomotive tender, a piston therein, means for controlling the flow of liquid to and from the respective ends of the cylinder, a rod rigid with the piston and extending through the cylinder head; a cross bar rigid with the end of said rod and horizontally disposed with apertures at its respective ends, adapted to carry flexible tubes rigid therewith, wires forming electrical connection with generator and lamp in locomotive cab, said wires passing into flexible tubes and forming connection with forked member carried on the dependent ends of said flexible tubes, trolleys pivotally connecting with said forked members adapted to contact with cables extending along the rails of a railway, clamp members rigid with said rails, adapted to support said cables; wires forming connection with said cables and connecting with lamp and horn in semaphore box set up at a grade crossing; means for flashing said lamp and means for intermittent sound of horn, substantially as described and for the purpose specified.



1,504,530. EXPANSIBLE EGG CASE AND THE LIKE. RUFFIF L. THOMAS, Milford, Mo. Filed Aug. 23, 1923. Serial No. 658,908. 5 Claims. (Cl. 220—6.)

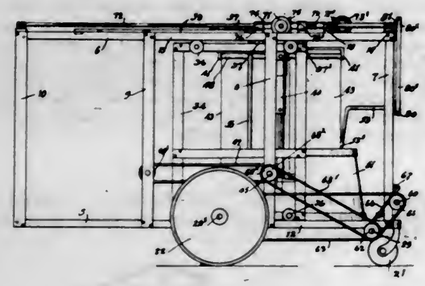
1. In a device of the class described a pair of telescoping members arranged to form a container, means for locking said members relative to each other for



forming a container of various heights, said last means including strap members on the sides of one of said members having parts adapted to project into the sides of the other of said members and means for locking said strap members against accidental movement.

1,504,531. PIANO PLAYER. HENRY THOMSON, Perth, Western Australia, and WILLIAM R. OYSTON, Kensington, near Sydney, New South Wales, Australia; said Oyston assignor to said Thomson. Filed Nov. 18, 1920. Serial No. 424,810. 13 Claims. (Cl. 84—25.)

1. In piano player apparatus, a chest having a vacuum chamber, a series of operating pneumatics corresponding in number to the keys of the keyboard of a piano, said pneumatics being connected to the vacuum chamber and arranged in a single longitudinal row in parallel relation; and means to support the chest upon the piano casing with the pneumatics above the piano keys.

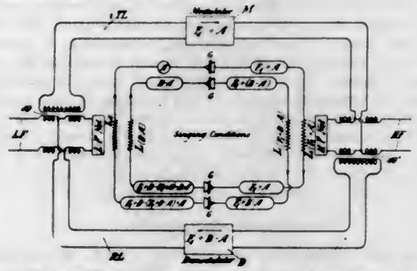


1,504,532. PIANO PLAYER. HENRY THOMSON, Perth, Western Australia, and WILLIAM R. OYSTON, Kensington, near Sydney, New South Wales, Australia; said Oyston assignor to said Thomson. Filed Nov. 18, 1920. Serial No. 424,811. 32 Claims. (Cl. 84—24.)

3. In piano player apparatus, an operating pneumatic having a stationary plate, two floating plates disposed at one side of the stationary plate and an envelope of flexible material for said plates, said envelope being attached to the stationary plate and carrying the floating plates and arranged to collapse upon the exhaust of air and draw the floating plates toward the stationary plates, a rod secured to a floating plate of said pneumatic, and means carried by said rod to operatively connect the rod to and actuate the wippen of the piano action by the movement of said rod caused by the collapsing of the pneumatic.

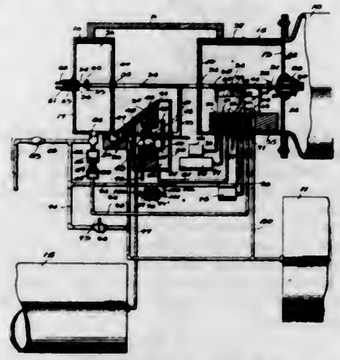
20. In piano player apparatus, a chest having a vacuum chamber; brackets for supporting said chest in the piano casing; pneumatic control valve casings mounted on said chest in communication with the vacuum chamber; pneumatics carried by said casings in communication therewith and arranged in parallel relation in a horizontal row; rods secured to said pneumatics arranged with means to actuate the hammer actions of the piano, said vacuum chest, valve casings and pneumatics being of unitary construction whereby the same may be mounted in and removed from a piano case as a unit.

1,504,533. SHOCKING MACHINE. THOMAS WADGE and BERNARD JOSEPH DESMOND, Winnipeg, Manitoba, Canada. Filed Sept. 1, 1920. Serial No. 407,394. 6 Claims. (Cl. 56—413.)



5. In a shocking machine, the combination with a rotatably mounted table on which the shock is formed, of a plurality of curtains suspended above the table and forming sheaf receiving compartments and means for folding the curtains to withdraw them from the shock formed on the table.

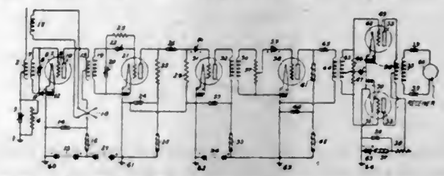
1,504,534. AERONAUTICAL DEVICE. ISRAEL I. ZIPERSTEIN, Chicago, Ill., assignor of twenty per cent to Julius B. Rubenstein and five per cent to Jacob S. Guthman. Filed Apr. 6, 1922. Serial No. 550,099. 20 Claims. (Cl. 244—14.)



1. In a device of the character described, in combination, a pair of semi-cylindrical planes revoluble in a circular path but maintaining a parallel relation to a horizontal plane, an axis for said planes equidistant therefrom, and a propeller adapted to direct a current of air through said planes, said propeller being mounted on said axis.

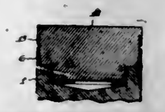
1,504,535. MULTIPLEX TRANSMISSION CHANNEL. HERMAN A. AFFEL, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 31, 1920. Serial No. 434,222. 12 Claims. (Cl. 170—15.)

1. The method of two-way carrier transmission which consists in transmitting in opposite directions two carriers separated in frequency by an amount approximating the width of the signaling band involved in low frequency transmission, modulating said frequencies by low frequency signaling bands so that the upper side band corresponding to one carrier frequency overlaps the lower side band corresponding to the other carrier frequency.



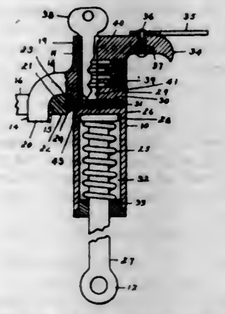
1,504,536. AIR BRAKE. GEORGE ALUS ANDERSON, Santa Rita, N. Mex., assignor or one-eighth to Walter M. Mercer, one-eighth to Robert T. Taper, and one-eighth to Victor H. Waggoner, all of Santa Rita, N. Mex. Filed Jan. 19, 1923. Serial No. 613,701. 17 Claims. (Cl. 303—37.)

1. An air brake apparatus of the character described, including in combination, brake cylinders, a train pipe or line connected with a source of compressed air, a chamber communicating directly with said train pipe and having a depressible wall, means adapted to be actuated by said depressible wall whereby with the air pressure within the train pipe reaching a predetermined degree the reservoirs will be charged from said train pipe with compressed air, and means associated with said depressible wall whereby upon the air pressure within said train line or pipe receding or decreasing a predetermined degree, the reservoir will be connected to supply compressed air to said brake cylinder.



1,504,537. POWER-LIMITING AMPLIFYING DEVICE. HAROLD DE FOREST ARNOLD, Maplewood, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated, a Corporation of New York. Filed Sept. 3, 1915, Serial No. 48,873. Renewed Sept. 14, 1922. Serial No. 588,285. 38 Claims. (Cl. 250—20.)

29. The method of overcoming the effects of static disturbances in a wireless signaling system which consists in producing at a receiving station by means of the signaling current an alternating crrent having a frequency much lower than the transmitted radio frequency cur-

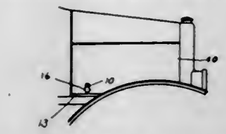


rent, and passing this current through a circuit containing a device for limiting the energy passing therethrough to a predetermined value.

1,504,538. PISTON. OLIVER E. BARTHEL, Detroit, Mich. Filed Apr. 10, 1922. Serial No. 551,004. 7 Claims. (Cl. 74—108.)

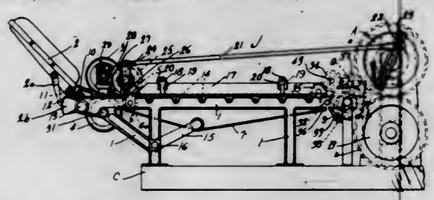
1. A piston comprising a body having an annular feather edge, and a detachable end member connected to said body and cooperating therewith in forming an annular recess.

1,504,539. AUTO HOOD LOCK. CHARLES BOBER, New Britain, Conn., assignor of one-half to Thomas Kobynos, New Britain, Conn. Filed Jan. 18, 1923. Serial No. 613,319. 2 Claims. (Cl. 70—14.)



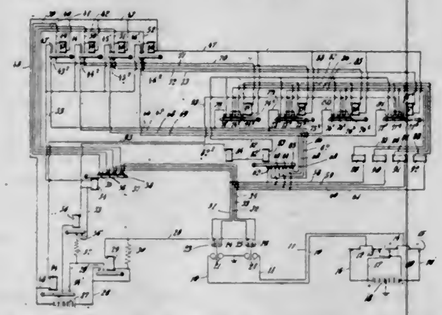
1. In combination in an auto-hood lock structure, a chassis of an automobile and a hood supported thereby, said hood having a laterally directed lug that has an eye opening, a hood-clamp structure of generally vertically elongated form that is pivotally connected by its lower end to said chassis and is provided at its upper end with a hook for being engaged with said eye opening, said hood-clamp structure comprising two main parts that are connected for relative movement, said parts comprising an upper part that supports said hook and a lower part that has the above mentioned pivotally connected lower end, said lug and upper part having in the engaged position opposed and adjacent wall portions, a lock supported by said upper portion, and said lock having a bolt for locking together said opposed and adjacent wall portions.

1,504,540. CLAMP-LOCK COMBINATION FOR AUTO HOODS. CHARLES A. BOBER, New Britain, Conn., assignor of one-half to Thomas Kobylaz, New Britain, Conn. Filed Dec. 13, 1923. Serial No. 680,336. 1 Claim. (Cl. 70—14.)



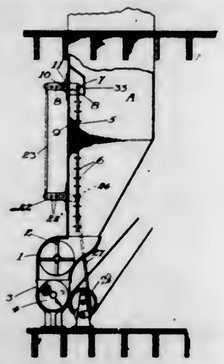
A clamp-lock combination for auto-hoods comprising an upper part and a lower part telescopically connected together and having a spring that tends to draw said

parts together to the closed position, said upper part having a bore and a portion of said lower part fitting and operatively housed within said bore, key operated locking



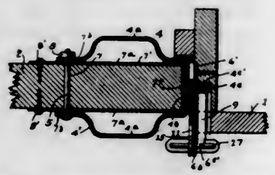
mechanism comprising spring tumblers, and said spring tumblers being operatively housed in opposed and adjacent portions of the wall of said bore and said portion of the lower part.

1,504,541. FEEDING MECHANISM FOR PAPER MACHINES. CHARLES BUTTERFIELD, Middletown, Ohio, assignor to The Interstate Folding Box Company, Middletown, Ohio. Filed Mar. 23, 1922. Serial No. 546,046. 6 Claims. (Cl. 271—39.)



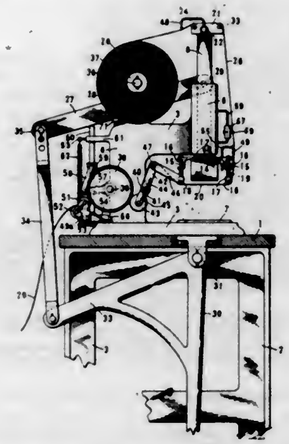
1. A paper feeding mechanism, including in combination with a main machine, a longitudinal frame connecting at one end with said main machine, an inclined table arranged at the opposite end of said frame to receive paper sheets in quantities, pick-up mechanism operable intermittently through connections with said main machine and adapted to deliver the paper sheets singly from said table, paper feeding mechanism arranged at the opposite ends of said frame coacting with a paper carrier operable between said opposite paper feeding mechanisms, means for interrupting the effective operation of the feeding mechanism adjacent said main machine, and other means for stopping the paper on the paper carrier during said period of interruption, whereby the paper is delivered from said table in single sheets to said main machine.

1,504,542. ELECTRIC DISTRIBUTING SYSTEM. GEORGE A. CARDWELL, New York, N. Y., assignor to National Electric Distributor Corporation, a Corporation of Delaware. Filed Aug. 21, 1919. Serial No. 318,974. 5 Claims. (Cl. 178—31.)



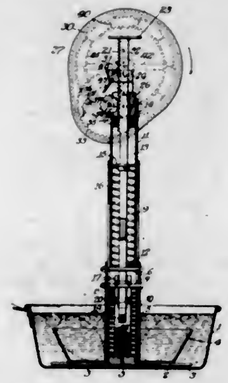
3. An electric distributing system comprising a main line extending between a sending station and a receiving station, means at the sending station for transmitting successive electric impulses over said main line, a group of working magnets at the receiving station, normally open circuits for said magnets including a holding magnet, means responsive to an impulse over said main line to close the circuit of a selected magnet of said group, holding circuits for the magnets of said group for maintaining energized the selected magnet, said holding circuits including a normally open contact adapted to be closed upon the energization of said holding magnet, means for preventing the de-energization of said holding magnet between successive impulses, a second group of working magnets, and means controlled by the selected magnet of said first mentioned group to partially close the circuit of certain of the magnets of said second mentioned group, said impulse-responsive means serving to close a selected one of said partially closed circuits upon a succeeding impulse being transmitted over the line, whereby the magnet associated with said closed circuit will be energized, substantially as specified.

1,504,543. FEEDING AGITATOR. EMIL R. DRAVER, Richmond, Ind., assignor to B. F. Gump Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 16, 1921. Serial No. 522,747. 4 Claims. (Cl. 259—47.)



1. In a feeding agitator, the combination with a hopper, of a pair of rock shafts journaled exteriorly of said hopper, mechanical means for operating one of said shafts, an arm rigidly carried by each shaft and projecting laterally of said hopper, a rod connecting said arms for operatively connecting said shafts, said hopper having a slot, an arm rigidly carried by one of said shafts and projecting through said slot into said hopper, and a stirrer pivotally connected to the last mentioned arm and adapted to be swingingly reciprocated by the aforementioned elements.

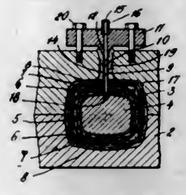
1,504,544. DOOR LATCH. ALCUIN E. KINTNER, Painesville, Ohio, assignor, by mesne assignments, to The Neff Company, Cleveland, Ohio, a Corporation. Filed Oct. 6, 1921. Serial No. 505,911. 13 Claims. (Cl. 292—238.)



1. In a door latch, the combination of a latch adapted to be pivoted to a door, a keeper comprising a plate having a notch in its upper portion arranged to receive said latch, and a locking member movably mounted on said keeper and having arms, one arranged to overlie said latch when it is in said notch to lock it therein and the other arranged to be secured to said keeper to maintain the first mentioned arm in locking position.

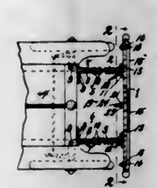
1,504,545. DECALCOMANIA-TRANSFERRING MACHINE. GEORGE CHADWICK, New York, N. Y. Filed Aug. 19, 1922. Serial No. 582,893. 19 Claims. (Cl. 41—7.)

1. A decalcomania transferring machine comprising a movable presser iron adapted to press a transfer tape against work to be marked, a lever to actuate the presser, a drum to feed the tape, and a bar moved by the lever to rotate the drum.



1,504,546. AUTOMATIC COOKING DEVICE. WILL ESPY CURTIS, Evanston, Ill. Filed Feb. 23, 1917. Serial No. 150,470. 10 Claims. (Cl. 161—16.)

1. A chronometric regulating device comprising, in combination, a source of power, a member consisting of a tube bent into endless form with its ends welded together, means for introducing liquid into said member arranged substantially diametrically opposite to said welded connection, a series of restrictions within said member adapted to check the flow of fluid through said member under the action of gravity when the member is rotated, whereby the rotation of said member is checked with a force increasing with its speed of rotation, and substantially constant speed of rotation is obtained.



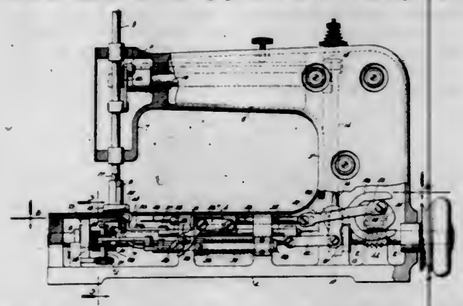
1,504,547. PROCESS OF MOLDING HOLLOW ARTICLES. HENRY C. EGERTON, Ridgewood, N. J. Filed Apr. 16, 1919, Serial No. 290,360. Renewed Jan. 26, 1924. 21 Claims. (Cl. 18—55.)

1. The process of molding and curing hollow articles comprising cloth fabric carrying incorporated phenolic-condensation cementing material, which comprises forming a substantially rigid solid core of fusible metallic material, incorporating with said fusible core a communicating pressure connection, winding and arranging thereon layers of cloth and paper carrying dry phenolic condensation cementing material and a metallic stiffening member until the article blank has substantially the

desired size and thickness of walls, compressing said blank and core in a substantially rigid sectional curing mold, heating the blank and core and subjecting said core to high fluid pressure to force the layers of fabric together and outward against the mold cavity during the heat curing of the cementing material and melting and removing said fusible core.

1,504,548. BUMPER FOR VEHICLES. WILLIAM M. GENTLE, Los Angeles, Calif., assignor of one-half to Robert Bruce Gentle, New York, N. Y. Filed Dec. 18, 1923. Serial No. 681,362. 3 Claims. (Cl. 293—55.)

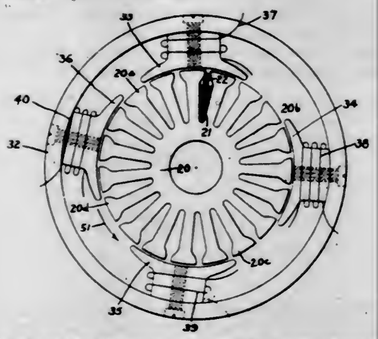
1. The bumper for vehicles set forth comprising a bar; a coiled spring having flattened ends that are aligned and arranged central to the longitudinal axis of said spring; and bolts extending through bolt holes in said spring ends for securing said spring to said bar and a vehicle, said bolts adapted to prevent pivotal movement of the spring ends.



1,504,549. METHOD OF PREPARING SILICEOUS MATERIAL. FRANCIS X. GOVERS, New York, N. Y. Filed Aug. 7, 1923. Serial No. 656,298. 2 Claims. (Cl. 23—28.)

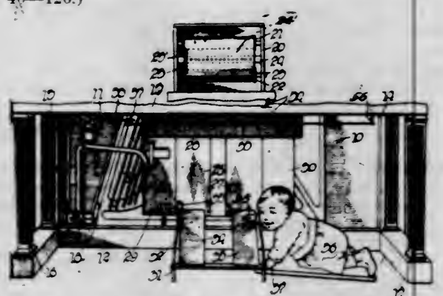
1. The method of preparing silicic acid, which comprises forming a jelly-like mass of colloidal silicic acid, drying the mass with the impurities therein until it will no longer revert to its prior gelatinous colloidal form in the presence of water, washing the dried material and again drying it.

1,504,550. FLAT-FELL SEWING MACHINE. HORACE F. GRUMAN, Jackson, Mich., assignor to Gruman Special Machine Company, Jackson, Mich. Filed Aug. 10, 1922. Serial No. 580,891. 12 Claims. (Cl. 112—120.)



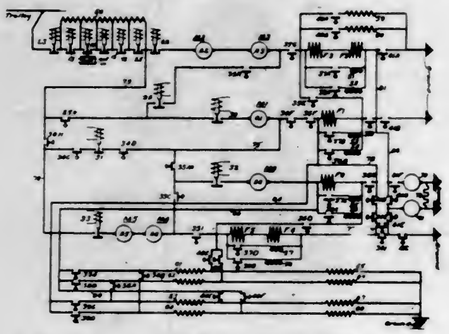
1. In a machine for forming a flat fell seam in which edge portions of material are united by a line of stitching and the united portions then folded upon the body of material and united thereto by a second line of stitching, all in a single passage of the material through the machine; the combination with needles for forming said lines of stitching arranged in angular relation to each other, and folding means for folding the material; of mechanism

for operating said needles in timed relation to each other, one of said needles being positioned above the plane of



the passage of the body of material through the machine and the other of said needles being positioned below said plane.

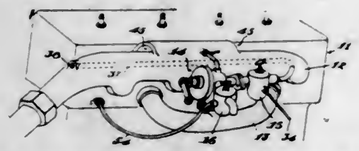
1,504,551. DYNAMO-ELECTRIC MACHINE. NELSON R. HAAS, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio, a Corporation of Ohio. Filed July 12, 1920. Serial No. 395,504. 3 Claims. (Cl. 171—252.)



1. In a dynamo-electric machine, the combiantion of a supporting means; a plurality of pole pieces attached to the said means at irregular intervals; and an armature core having teeth adapted to simultaneously pass the trailing tips of the pole pieces.

1,504,552. ADVERTISING DEVICE. CHARLES W. HALES, Chicago, Ill., assignor to Gulbransen-Dickinson Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 3, 1920. Serial No. 363,033. 15 Claims. (Cl. 40—126.)

1. The combination with a continuously playing musical instrument, of means associated therewith and actuated thereby for indicating the manner and ease with which the instrument may be played, and means for continuously playing the instrument.



1,504,553. SYSTEM OF CONTROL. ARTHUR J. HALL, Winchcombe, England, PAUL L. MARDIS, Swissvale, Pa., and ALEXANDER MCIVER, Deer Lodge, Mont., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 30, 1920. Serial No. 400,159. 46 Claims. (Cl. 172—179.)

1. The combination with a movable member and electrical means for actuating it in a certain direction, of a switching device, means associated with said member for permitting movement thereof for a predetermined distance and means associated with said switching device and independent of said member for permitting continuance of said movement when said device occupies a certain position.
